MCDONALD COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-135  
December 29, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like McDonald, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of McDonald County included additional areas of county operations, as well as the elected county officials. The following concerns were noted as part of the audit:

- As noted in the prior report, the county did not distribute a portion of its General Revenue Fund property tax collections to the Special Road and Bridge Fund as authorized by a ballot issue approved by the voters. At December 31, 1999, the General Revenue Fund owed \$217,580 to the Special Road and Bridge Fund.
- It appears the county has exhausted most of its accumulated cash balance in the General Revenue Fund and continues to spend at a level that is beyond its ability to fund. The county is financing general operating activities by improperly retaining road monies. The county's budget for the year ended December 31, 2000, projects the ending cash balance of the General Revenue Fund to be \$6,869 with no expected transfer of property taxes to the Special Road and Bridge Fund. In addition, the county is close to exceeding the maximum amount of debt that it can legally incur considering the required property tax monies due the Special Road and Bridge Fund and the liabilities for two loans the county has outstanding for patrol cars and the courthouse addition.
- Actual disbursements exceeded budgeted amounts for some funds. Budgets were not prepared for the Domestic Violence Fund and the DARE Fund. The annual published financial statements of the county did not include the financial activity of some county funds as required. In addition, several funds had negative cash balances at year end.

(over)

YELLOW SHEET

- The county generally made efforts to seek competitive bids for most major purchases; however, several items purchased by elected officials and the county were noted in which bids were not solicited, nor was bid documentation always retained. Additionally, contrary to county policy, the county allowed the road and bridge grader operators to grade private roads in the county, without keeping track of the roads graded.

Also included in the audit are recommendations to improve the county's personnel policies and procedures, land acquisition procedures and verification of county property tax books. In addition, the audit recommended improvements in the accounting controls and procedures for the courts under the Circuit Clerk's authority, Sheriff, Prosecuting Attorney, and the Health Department.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of McDonald County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of McDonald County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

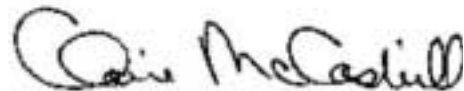

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of McDonald County Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of McDonald County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of McDonald County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31, 1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated August 21, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the management of McDonald County, Missouri, and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

**Missouri State Auditor**

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of McDonald County, Missouri

We have audited the special-purpose financial statements of various funds of McDonald County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated August 21, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of McDonald County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards* and which is described in the accompanying Schedule of Findings as finding number 99-1. We also noted certain immaterial instances of noncompliance which are described in the accompanying Management Advisory Report.

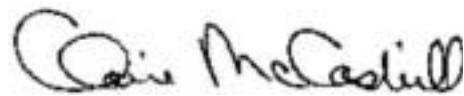

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of McDonald County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements

in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting, which are described in the accompanying Management Advisory Report.

This report is intended for the information of the management of McDonald County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is written in a cursive, flowing style.

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

MCDONALD COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of McDonald County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt a formal budget for the Recorder's Interest Fund for the year ended December 31, 1998, and the county did not adopt formal budgets for the Domestic Violence Fund, DARE Fund, and the River Patrol Fund for the years ended December 31, 1999 and 1998.

Warrants issued were in excess of budgeted amounts for the following funds:

| <u>Fund</u>                                       | <u>Years Ended December 31,</u> |
|---|---------------------------------|
| General Revenue Fund                              | 1998                            |
| Law Enforcement Training Fund                     | 1999 and 1998                   |
| Law Enforcement Sales Tax Fund                    | 1998                            |
| Prosecuting Attorney Bad Check Fund               | 1999 and 1998                   |
| Recorder's Fund                                   | 1999 and 1998                   |
| Sheriff's Special Fund                            | 1999 and 1998                   |
| Extradition and Transportation Fund               | 1998                            |
| Prosecuting Attorney Delinquent<br>Sales Tax Fund | 1999                            |
| Sheriff's Civil Fund                              | 1999                            |
| Law Library Fund                                  | 1999 and 1998                   |
| Circuit Court Interest Fund                       | 1999 and 1998                   |

Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

A deficit budget balance is presented for the General Revenue Fund for the year ended December 31, 1999. However, the budget of that fund also included other resources available to finance current or future year disbursements. Generally, other available net resources represented current year property taxes not received before December 31. Such resources were sufficient to offset the deficit budget balance presented.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statements for the years ended December 31, 1999 and 1998, did not include the Law Library Fund, Circuit Court Interest Fund, Recorder's Interest Fund, DARE Fund, and the River Patrol Fund.

2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than

depository accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The county's deposits at December 31, 1999 and 1998 were entirely covered by federal depository insurance or by collateral securities held by the county's custodial bank in the county's name.

Schedule

MCDONALD COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes the audit finding that *Government Auditing Standards* requires to be reported for an audit of financial statements.

**99-1**

**County Road Monies**

In April 1998, McDonald County voters renewed a fifty cent county revenue property tax levy for an additional four years. The ballot designated that thirty-eight cents (or 76 percent) of the levy was for general revenue and twelve cents (or 24 percent) was for road and bridge. The County Commission subsequently ordered that 24 percent of the General Revenue Fund property tax collections be allocated to the Special Road and Bridge Fund and to the special road districts in the same manner as County Aid Road Trust (CART) funds. In the prior audit, it was reported that at December 31, 1997, the General Revenue Fund owed \$127,807 and \$13,293 to the Special Road and Bridge Fund and to the special road districts, respectively.

During the two years ended December 31, 1999, the county did not transfer any property tax to the Special Road and Bridge Fund or the special road and bridge districts. However, the county did not make the 3 percent administrative transfer from the Special Road and Bridge Fund as allowed by statute in 1999 or 1998, and the county considered this as at least partially offsetting the amount owed to the Special Road and Bridge Fund. Taking these adjustments into consideration, we determined that at December 31, 1999, the General Revenue Fund owed \$217,580 to the Special Road and Bridge Fund. Since the special road districts dissolved in May 1999, the entire amount is to be transferred to the Special Road and Bridge Fund.

This condition was noted in our prior report and the County Commission responded that they would make an effort to implement this recommendation; however, little or no corrective action has been taken.

**WE AGAIN RECOMMEND** the County Commission transfer \$217,580 from the General Revenue Fund to the Special Road and Bridge Fund and make the required allocation to the road fund on a periodic basis.

**AUDITEES RESPONSE:**

*We are fully aware of the required property tax transfer to the Special Road and Bridge Fund. We had planned on transferring some of the property taxes in 2000; however, we simply were unable to do so. Due to the demands for general services in 2001, it does not appear feasible to expect any transfers in that year. We will review the possibility of changing the property tax levy in the future. We will continue to provide the services we believe our constituents expect to have provided for them.*

Follow-Up on Prior Audit Findings for an  
Audit of Financial Statements Performed in Accordance  
With *Government Auditing Standards*

MCDONALD COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN  
AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE  
WITH *GOVERNMENT AUDITING STANDARDS*

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by McDonald County, Missouri, on the applicable finding in our prior audit report issued for the three years ended December 31, 1997.

3.A. County Road Monies

The county did not distribute a portion of the General Revenue Fund property tax collections to the road funds as authorized by a ballot approved by the voters.

Recommendation:

The County Commission:

Transfer \$127,807 from the General Revenue Fund to the Special Road and Bridge Fund and distribute \$13,293 to the special road districts from the General Revenue Fund and make the required allocation to the road funds on a periodic basis.

Status:

Not Implemented. See finding number 99-1.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Findings

MCDONALD COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

We have audited the special-purpose financial statements of various funds of McDonald County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated August 21, 2000.

We also have reviewed the operations of elected officials with funds other than those presented in the special-purpose financial statements. As applicable, the objectives of this review were to:

1. Determine the internal controls established over the transactions of the various county officials.
2. Review and evaluate certain other management practices for efficiency and effectiveness.
3. Review certain management practices and financial information for compliance with applicable constitutional, statutory, or contractual provisions.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed accounting and bank records and other pertinent documents and interviewed various personnel of the county officials.

As part of our review, we assessed the controls of the various county officials to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described in the preceding paragraphs and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Management Advisory Report presents our findings arising from our review of the elected county officials referred to above. In addition, this report includes findings other than those, if any, reported in the accompanying Schedule of Findings. These findings resulted from our audit of the special-purpose financial statements of McDonald County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*.

|           |                                   |
|-----------|-----------------------------------|
| <b>1.</b> | <b>County Financial Condition</b> |
|-----------|-----------------------------------|

The McDonald County General Revenue Fund is experiencing a decline in cash balances. The following chart shows the General Revenue Fund's receipts, disbursements, and cash balances for the three years ended December 31, 1999:

|                           |    | Year Ended December 31, |           |           |
|---------------------------|----|-------------------------|-----------|-----------|
|                           |    | 1999                    | 1998      | 1997      |
| Cash Balance, January 1   | \$ | 88,270                  | 343,378   | 228,591   |
| Receipts                  |    | 1,384,169               | 1,583,147 | 1,344,694 |
| Disbursements             |    | 1,436,305               | 1,838,255 | 1,229,907 |
| Cash Balance, December 31 | \$ | 36,134                  | 88,270    | 343,378   |

During 1998, the county completed its courthouse addition project which totaled approximately \$440,000. The county planned on funding the courthouse addition by using much of the accumulated cash balance in the General Revenue Fund plus funds remaining in the Law Enforcement Sales Tax Fund (approximately \$146,000). The county also borrowed \$100,000 of which approximately \$76,000 (plus interest) remained outstanding at December 31, 1999.

It appears the county has exhausted most of its accumulated cash balance in the General Revenue Fund and continues to spend at a level that is beyond its ability to fund. As noted in finding number 99-1, the General Revenue Fund owes the Special Road and Bridge Fund \$217,580 at December 31, 1999. The county is financing general operating activities by improperly retaining road monies. The county's budget for the year ended December 31, 2000, projects the ending cash balance of the General Revenue Fund to be \$6,869 with no expected transfer of property taxes to the Special Road and Bridge Fund. In addition, the county borrowed \$134,036 for patrol cars in January 2000 to be paid off over several years (increasing the debt of the county's General Revenue Fund). The county is close to exceeding the maximum amount of debt that it can legally incur considering the required property tax monies due the Special Road and Bridge Fund and the liabilities for the two loans.

The county is required to reduce its property tax revenues by 50 percent of the sales tax revenues collected each year. Upon review of the county's 1999 property tax rollback, it appears the county used a lower property tax ceiling while computing the required reduction

resulting in a lower property tax levy than was required. The county may want to review this situation when computing future property tax rollbacks.

The County Commission should review discretionary disbursements to ensure efficient use of resources available to the county and to determine if long term reductions in discretionary disbursements are possible. In addition, the County Commission should attempt to maximize receipts from all sources.

**WE RECOMMEND** the County Commission consider various alternatives of increasing receipts and/or reducing disbursements to ensure that the General Revenue Fund's financial condition improves and is able to maintain an adequate operating cash reserve.

**AUDITEES RESPONSE:**

*As noted in our earlier response to Finding 99-1, we are fully aware of the limited sources of revenue and expanding costs of services provided to the citizens of McDonald County. We will continue to do the best job possible using the funds available.*

|           |  |
|-----------|--|
| <b>2.</b> | <b>Budgetary and Reporting Practices</b> |
|-----------|--|

A. Actual expenditures exceeded budgeted amounts in the following funds:

| Fund                                      | Year Ended December 31, |        |
|---|-------------------------|--------|
|   | 1999                    | 1998   |
| General Revenue                           | \$ N/A                  | 44,742 |
| Law Enforcement Training                  | 3,310                   | N/A    |
| Prosecuting Attorney Bad Check            | 1,890                   | 629    |
| Recorder's                                | 460                     | 7,187  |
| Sheriff's Special                         | 7,502                   | 3,236  |
| Extradition and Transportation            | N/A                     | 18,486 |
| Prosecuting Attorney Delinquent Sales Tax | 2,034                   | N/A    |
| Sheriff's Civil                           | 3,092                   | N/A    |
| Law Library                               | 462                     | 1,866  |
| Circuit Court Interest                    | 166                     | N/A    |

It appears this situation occurred because the applicable officials do not adequately monitor the budgetary status of the various funds.

It was ruled in State ex. rel. Strong v. Cribb, 364 Mo.1122, 273 SW2d 246 (1954), that strict compliance with the county budget law is required by county officials. If there are valid reasons which necessitate excess expenditures, budget amendments should be made following the same process by which the annual budget is approved, including holding public hearings and filing the amended budget with the State Auditor's office. In addition, Section 50.622, RSMo Cum. Supp. 1999, provides that counties may amend the annual budget during any year in which the county receives

additional funds which could not be estimated when the budget was adopted and that the county shall follow the same procedures required for adoption of the annual budget to amend the budget.

- B. Formal budgets were not prepared for the Domestic Violence Fund, DARE Fund, and the River Patrol Fund for the years ended December 31, 1999 and 1998.

Chapter 50, RSMo requires the preparation of annual budgets for all funds to present a complete financial plan for the ensuing year. By preparing budgets or obtaining budgets for all funds and activities, the County Commission is able to more effectively evaluate all county financial resources.

- C. The annual published financial statements of the county did not include the financial activity of some county funds as required. Section 50.800, RSMo 1994, provides that the financial statements are required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for all county funds. For the published financial statements to adequately inform the citizens of the county's financial activities, all monies received and disbursed by the county should be included.
- D. The Health Center Fund and the Sheriff's Civil Fund had a negative cash balance of \$23,017 and \$2,481, respectively at December 31, 1999. In addition, the Law Enforcement Training Fund had a negative cash balance of \$1,765 at December 31, 1998. The County Commission and other officials allowed these funds to incur disbursements greater than the available resources of these funds. Article VI, Section 26(a) of the Missouri Constitution states, "No county . . . shall become indebted in an amount exceeding in any year the income and revenue provided for such year plus any unencumbered balances from previous years . . . ."

Conditions similar to parts A, B, and C were also noted in our prior report.

**WE RECOMMEND** the County Commission:

- A. Ensure expenditures are kept within the amounts budgeted. If additional disbursements are necessary, the circumstances should be fully documented and the budgets properly amended.
- B. Ensure budgets are prepared or obtained for all county funds.
- C. Ensure financial information for all county funds is properly reported in the annual published financial statements.
- D. Ensure expenditures are not incurred in excess of available monies.

**AUDITEES RESPONSE:**

A. *The General Revenue Fund was overspent in 1998 because we decided to complete the courthouse project. We will continue to make the other county officials aware of their budgetary status.*

B&C. *This has been done for all county funds we were aware of.*

D. *We will attempt to implement.*

|                               |
|-------------------------------|
| <b>3. County Expenditures</b> |
|-------------------------------|

- A. A review of expenditures indicated that the county generally made efforts to seek competitive bids for most major purchases; however, several items purchased by elected officials and the county were noted in which bids were not solicited, nor was bid documentation always retained. Examples of items purchased, for which bid documentation could not be found or was not solicited, are as follows:

|   |          |
|---|----------|
| Computers for the Prosecuting Attorney's office | \$ 8,365 |
| Carpet for the courthouse                       | 6,563    |

Section 50.660, RSMo Cumulative Supp.1999, requires the advertisement of bids for all purchases of \$4,500 or more. Bidding procedures for major purchases provide a framework for economical management of county resources and help ensure the county receives fair value by contracting with the lowest and best bidders. In addition, competitive bidding ensures all parties are given equal opportunity to participate in county business. Documentation of bids should always be retained as evidence that the county's established purchasing procedures as well as statutory requirements are followed.

- B. The County received \$2,401 from the Department of Public Safety for Peace Officers Standards and Training (POST) commission in 1998. These monies were not receipted by the County Treasurer. The check was endorsed and turned directly over to the local law enforcement academy to pay for training. Neither the County Treasurer nor the Sheriff have documentation of disbursing these funds to the local law enforcement academy.

The county should ensure all monies are properly recorded and deposited into the depository accounts. Subsequent disbursements should be made upon official county checks and supported by adequate documentation.

- C. According to the County Commission and the road and bridge foreman, the road and bridge grader operators are allowed to grade private roads in the county if time allows. A log is not maintained to document the roads graded. The county does have a written policy prohibiting the use of county equipment and resources on private

property. Considering the overwhelming responsibility of maintaining adequate county roads and bridges along with the limited resources available, county resources and equipment should be used for official county business.

- D. In February 1999, the county purchased 2.5 acres of land next to the county's road and bridge barn. The county did not obtain a professional appraisal to value the land prior to purchase and negotiated with the owner for a final purchase price. The county's records show the county paid \$7,200 for the land.

While the County Commission believes the amount paid for the real estate was reasonable and cheaper than relocating the road barn, a written independent appraisal from a private company should have been obtained prior to the purchase of the land and used to provide the basis for price negotiations. This would have helped to better ensure the amount paid was reasonable.

**WE RECOMMEND:**

- A. The County Commission and other County Officials solicit bids for all items in accordance with state law. Documentation of bids solicited and justification for bid awards should be maintained. If bids are not obtained and/or sole source procurement is necessary, the official minutes should reflect the necessitating circumstances.
- B. County Treasurer ensure all monies received by the county are deposited, posted to the fund ledger, and payments are made through the county disbursing system.
- C. The County Commission discontinue the practice of allowing county equipment and resources to be used on private property and ensure usage logs are maintained to monitor the use of county equipment.
- D. The County Commission obtain professional appraisals on land it considers purchasing and review all possible options for the most cost-effective method of obtaining land.

**AUDITEES RESPONSE:**

*The County Commission provided the following responses:*

- A. *We have made vast improvements in our bidding efforts and will continue to do so in the future.*
- C. *We do have a policy prohibiting the use of county equipment on private property which we plan to follow. Any work performed on private property to assist our citizens in emergency situations or when their roads are washed out will be fully documented.*
- D. *We will do so in the future.*

*The County Treasurer provided the following response:*

*B. I agree. This was an isolated situation.*

|   |
|---|
| <b>4. Personnel Policies and Procedures</b> |
|---|

- A. The county's employee handbook includes provisions that any hours worked over forty hours a week will be paid overtime. Payment for overtime is granted as time off at the rate of one and a half units for each unit of overtime worked. In addition, any overtime accumulated must be taken within six months of the time accumulated or it is lost.

This policy may not comply with the Fair Labor Standards Act (FLSA) which states that covered employees may accumulate a maximum of 240 hours of compensatory time and amounts over these limits will be compensated in pay. The county is required to account for and pay either overtime or allow compensatory time off for nonexempt employees.

The County Commission should review its personnel policy for all employees and adopt overtime and compensatory time policies which comply with the FLSA.

- B. Centralized records of leave balances and leave used and earned are not maintained for all offices. The sheriff's office and the health department maintain the leave and compensatory time records within their offices.

Without centralized records, the County Commission cannot ensure that employees' vacation, sick leave, and compensatory time balances are accurate and that all employees are treated equitably. Centralized leave records also aid in determining unused vacation leave upon termination of employment.

A condition similar to part B was also noted in our prior report.

**WE RECOMMEND** the County Commission:

- A. Review the current overtime and compensatory time policies to ensure such policies comply with the FLSA.
- B. Maintain centralized records of leave earned, used, and accumulated for all county employees.

**AUDITEES RESPONSE:**

- A. *We were aware of this and have been in the process of reviewing and changing our policy to comply with the FLSA.*

B. *We agree.*

|                              |
|------------------------------|
| <b>5. Property Tax Books</b> |
|------------------------------|

The County Assessor enters the assessment information into the county's computer system. The county's computer operator obtains the tax rates from the County Clerk, enters them into the computer system and generates the tax books. There is no evidence that the County Clerk is adequately verifying the tax books charged to the County Collector. Sections 137.290 and 140.050, RSMo 1994, require the county clerk to extend tax books and to charge the county collector with the total amount of the current tax books and the aggregate amount of taxes and fees in the back tax books. The procedures outlined in the statutes for the preparation of the tax books provide a system of checks and balances. Failure to perform reviews of the tax books and test some individual tax bill computations may result in the failure to discover errors and irregularities.

This condition was noted in our last two reports and the County Clerk responded that she would make an effort to implement this recommendation; however, little or no corrective action has been taken.

**WE AGAIN RECOMMEND** the County Clerk review the tax books for accuracy, test individual tax bills for accuracy, and document all procedures performed.

**AUDITEES RESPONSE:**

*I will do this.*

|--|
| <b>6. Court Accounting Controls and Procedures</b> |
|--|

A review of the Circuit Court, Associate and Probate Divisions under the Circuit Clerk's authority disclosed the following concerns:

- A. On January 1, 1998, the Circuit Clerk's office opened one consolidated bank account for the Circuit Court, Associate Civil Division, and Probate Division. An open-items list is prepared only for the Circuit Court. At December 31, 1999, the reconciled cash balance exceeded the open items listing by \$16,940.

Accurate open-items listings help to ensure that receipts and disbursements are properly handled and accurately posted to the case fee sheets, and to verify there is sufficient cash to satisfy all liabilities. The court should make an effort to identify the cases (the Associate Civil and Probate Division) that are associated with the excess cash balance.

- B. At December 31, 1999, \$3,484 in cash bonds had been held in the criminal account of the Associate Division for more than two years. Cases that are open for an extended period of time should be reviewed and the related monies distributed as appropriate with the approval of the Associate Judge. For bonds which are unclaimed and the defendant cannot be located, the monies should be distributed to the state Unclaimed Property Section in accordance with Sections 447.500 through 447.595, RSMo 1994.
- C. Although the Associate Division began recording and depositing all current criminal and traffic receipts on a consolidated Associate Criminal Management System (ACMS) in January 1998, the division continues to utilize a separate ACMS accounting system and bank account for traffic cases that were filed prior to that time. Fines and costs collected during the audit period for the old traffic cases for the period April 1998 through December 1998 totaling \$4,208 were not disbursed until February 1999 and for the period January 1999 through March 2000 totaling \$2,785 were not disbursed until April 2000.

Section 483.023, RSMo Supp. 1999, requires that court costs payable to the state and county be distributed monthly.

- D. A listing of accrued costs owed to the court is not maintained by the Circuit Clerk and monitoring procedures related to accrued costs are not adequate. The Circuit Clerk should review the status of all old cases, and if all costs have not been received, collection of outstanding amounts should be pursued. In addition, the Circuit Clerk should establish written procedures for collecting accrued costs. By not adequately monitoring accrued costs, these costs could remain uncollected and might eventually result in lost revenue.

A complete and accurate listing of accrued costs would allow the Circuit Clerk to more easily review the amounts due to the court and to take appropriate steps to ensure amounts owed are collected on a timely basis.

- E. The Associate and Probate Divisions maintain several old bank accounts that are no longer utilized. Monies held in these accounts should be identified and disbursed so that the accounts may be closed. The account balances at December 31, 1999, are as follows:

|                             |          |
|-----------------------------|----------|
| Associate Division Traffic  | \$ 3,201 |
| Associate Division Civil I  | 24,615   |
| Associate Division Civil II | 4,992    |
| Probate                     | 1,212    |

Reconciling these accounts in order to disburse the monies and close out the accounts will reduce the bookkeeping tasks of the Circuit Clerk's office.

Conditions similar to parts A and B were noted in the prior report.

**WE RECOMMEND** the Circuit Clerk:

- A. Actively supervise the various offices under his supervision.
- B. Attempt to identify the excess cash balance which currently exists in the consolidated Circuit Court account.
- C. Ensure bond monies are distributed on a timely basis. Unclaimed bonds should be disposed of in accordance with Chapter 447, RSMo 1994.
- D. Ensure Associate Division court costs are distributed on a monthly basis as required.
- E. Maintain a complete listing of accrued costs and establish procedures to routinely follow-up and pursue timely collection.
- F. Identify the monies held in the old bank accounts and disburse the monies so that the accounts can be closed.

**AUDITEES RESPONSE:**

- A. *We have delegated portions of financial responsibilities, thereby allowing ample time for proper bookkeeping procedures.*
- B. *We are paying out garnishments at month end instead of 90 days, eventually achieving a zero monthly balance. An open items list will be created on a monthly basis. We are currently updating the previous months' open balance. We will identify, disburse, and reconcile the open items to the bank account on a monthly basis.*
- C. *These were reviewed in January 2000, and disbursed, with the exception of certain bonds wherein old case files need to be located in order to identify who posted the bond and where it should be sent. We cannot turn these over as unclaimed property as we are required to identify who posted the bond. We are continually working to resolve this problem and hope to disburse all of these bonds; however, we may require some guidance from the Office of the State Court Administrator's Office should this not be possible.*
- D. *All of the outstanding fines and costs have been disbursed in this old account. We have developed and will implement procedures to completely close out this traffic account and use only the current account.*
- E. *We are in the process of developing and implementing written policies and procedures to be followed by our office wherein all outstanding fine and costs will be collected or deemed uncollectible and turned over to the county within a reasonable time for collection. We will be seeking guidance from the office of State Court Administrator's Office in certain cases where we currently have no avenue for identifying the party responsible for payment.*

- F. *The Probate account has been reconciled and paid out. We are currently in the process of reconciling, disbursing, and closing out the Civil I and Civil II accounts. We have identified 92 percent of the Civil I account and all of the Civil II account. The Associate Division Traffic account; however, was being utilized (refer to "D").*

|  |
|--|
| <b>7. Sheriff's Accounting Controls and Procedures</b> |
|--|

During our review of the Sheriff's accounting controls and procedures, we noted the following areas of concern:

- A. Accounting and bookkeeping duties are not adequately segregated. One deputy is primarily responsible for receiving, depositing and disbursing monies, preparing bank reconciliations and maintaining the accounting records. An independent review of the accounting records is not performed.

Proper segregation of duties helps ensure that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing monies from that of recording receipts and preparing disbursements. If proper segregation of duties cannot be achieved, at a minimum, a periodic supervisory review of the records should be performed and documented.

- B. Monthly listings of open items (liabilities) are not prepared for the fee account. Consequently, liabilities are not reconciled with cash balances. Monthly listings of open items should be prepared and reconciled to the cash balances to ensure the records are in balance and that sufficient cash is available for the payment of all liabilities.

- C. Our review of cash receipting and depositing procedures revealed the following concerns:

1. Receipt slips are not always issued for monies received. To adequately account for all receipts, receipt slips should be issued for all monies received and the numerical sequence should be accounted for properly.
2. Checks received and deposited in the fee account are not endorsed immediately upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

- D. Adequate controls over seized property have not been established. Although the sheriff's office maintains an inventory listing of seized property, the listing is not properly updated. In addition, periodic inventories of the property on hand are not conducted.

We observed a chain saw and a weed eater that were not on the listing as well as noting a pistol, holster, and ammunition that had been released but were still shown on hand because the proper disposition forms had not yet been filled out.

Considering the often sensitive nature of the seized property, adequate internal controls are essential and would significantly reduce the risk of theft or misuse of the stored items. An inventory control record should include information such as description, persons involved, current location, case number, and disposition of such property. Officers should be required to sign the inventory record each time evidence is removed from the room. In addition, periodic physical inventories should be performed and the results compared to the inventory records to ensure that seized property is accounted for properly.

E. The Sheriff's department maintains two bank accounts (the DARE and the River Patrol account) outside of the control of the County Treasurer. The Sheriff's department received approximately \$17,000 in donations during the two years ended December 31, 1999, that were deposited into the two accounts that were used to purchase equipment and supplies for law enforcement purposes. During our review of these accounts, the following concerns were noted:

1. There is no authority for the Sheriff to maintain custody of these accounts. These monies represent county funds and should be turned over to the County Treasurer. At December 31, 1999, the account balances totaled \$1,819.

Attorney General's Opinion No. 45, 1992 to Henderson, concluded that the sheriff of a third class county is not authorized to maintain a bank account for law enforcement purposes separate from the county treasury.

2. Bank reconciliations are not performed for the DARE and the River Patrol account. The preparation of bank reconciliations is necessary to ensure accounting records agree with bank records and errors are detected on a timely basis. When performing bank reconciliations, the numerical sequence of checks should also be accounted for and check details (such as payee, amount, signature, and endorsement) should be reviewed for reasonableness and propriety.

**WE RECOMMEND** the Sheriff:

- A. Segregate the duties of receipting, recording, disbursing, and reconciling cash. There should be a supervisory review of reconciliations between receipts and deposits and bank reconciliations should be reviewed and signed by the Sheriff or another designated individual independent of cash duties.
- B. Prepare an open-items listing monthly and reconcile it to the fee account cash balance.

- C.1. Issue prenumbered receipt slips for bond monies immediately upon receipt and account for their numerical sequence.
- 2. Restrictively endorse checks and money orders immediately upon receipt.
- D. Maintain a complete inventory record of all seized property. In addition, a periodic inventory should be performed and compared to the inventory listing and any differences investigated.
- E. Turn over the remaining \$1,819 of funds to the County Treasurer. Until such time as the funds are turned over, the Sheriff's department should prepare and retain bank reconciliations for all accounts.

**AUDITEES RESPONSE:**

*The Sheriff's bookkeeper provided the following responses:*

- A. *I will encourage the new Sheriff to review these areas.*
- B. *This will be done.*
- C.1. *This is supposed to be our procedure.*
- 2. *This has been implemented.*
- D. *The department is currently working on this area.*
- E. *The River Patrol account has been closed. We will review the DARE account with the new Sheriff.*

|   |
|---|
| <b>8. Prosecuting Attorney's Accounting Controls and Procedures</b> |
|---|

A review of the records and procedures of the Prosecuting Attorney's office disclosed the following concerns:

- A. Accounting and bookkeeping duties are not adequately segregated. One individual is responsible for receiving, recording, depositing and distributing monies for the restitution account. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are properly accounted for and assets are adequately safeguarded. Proper segregation of duties helps to provide this assurance. At a minimum, there should be a documented review made by a supervisor. We did not observe any documented review by the Prosecuting Attorney.

- B. Checks and money orders are not restrictively endorsed until the deposit is prepared. To reduce the potential for loss, theft, or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- C. A monthly report of bad check fees turned over to the County Treasurer is not filed with the County Commission. Section 50.370, RSMo 1994, requires that an itemized and accurate list of fees collected be filed by county officials with the County Commission monthly.

A condition similar to part C was noted in our prior report.

**WE RECOMMEND** the Prosecuting Attorney:

- A. Adequately segregate accounting and bookkeeping duties to the extent possible. At a minimum, the Prosecuting Attorney should perform documented reviews of the work performed.
- B. Restrictively endorse checks and money orders immediately upon receipt.
- C. File monthly reports of bad check fees in accordance with state law.

**AUDITEES RESPONSE:**

*I see no problem with any of these three recommendations and will do my best to implement.*

|           |                                     |
|-----------|-------------------------------------|
| <b>9.</b> | <b>Health Department Procedures</b> |
|-----------|-------------------------------------|

Our review of county health department cash receipt records and procedures revealed the following concerns:

- A. Receipt slips are not written for all monies received. To ensure receipts are accounted for properly and to lessen the risk of monies being misplaced or stolen, prenumbered receipt slips should be issued for all money received.
- B. The health department transmits receipts directly to the County Treasurer. Receipts are not transmitted to the County Treasurer intact as cash is withheld to make change. The health department does not keep the change fund at a constant amount. To safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be transmitted to the County Treasurer intact daily and the change fund should be maintained at a constant amount.

**WE RECOMMEND** the Health Center Administrator:

- A. Issue prenumbered receipt slips for all monies received and account for the numerical sequence of all receipts.

- B. Remit all monies received to the County Treasurer intact daily or when accumulated receipts exceed \$100. If a change fund is needed, the fund should be established and maintained at a constant amount.

**AUDITEES RESPONSE:**

*The Health Center Administrator responded that the recommendations had been implemented.*

This report is intended for the information of the management of McDonald County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on Prior Audit Findings

## MCDONALD COUNTY, MISSOURI FOLLOW-UP ON PRIOR AUDIT FINDINGS

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by McDonald County, Missouri, on findings in the Management Advisory Report (MAR) of our prior audit report issued for the three years ended December 31, 1997. Finding number 3.A. is omitted since the related follow-up appears in an earlier section of this report. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the county should consider implementing these recommendations.

### 1. Budgetary and Reporting Practices

- A. Formal budgets were not prepared for various county funds.
- B. Disbursements exceeded budgeted amounts for several county funds.
- C. The annual published financial statements of the county did not include the financial activity of some county funds as required.

#### Recommendations:

- A. Ensure budgets are prepared or obtained for all county funds.
- B. Ensure expenditures and transfers between funds are kept within the amounts budgeted. If additional disbursements are necessary, the circumstances should be fully documented and the budgets properly amended.
- C. Ensure financial information for all county funds is properly reported in the annual published financial statements.

#### Status:

- A-C. Not implemented. See MAR No. 2.

### 2. Federal Financial Assistance

- A&B. Salary expenditures of the Sheriff's deputies paid under federal grants were not supported by adequate documentation.
- C. The county health department records related to federal grant expenditures and resulting reimbursements were not maintained in a complete and organized manner.

Recommendation:

The County Commission consult with the grantor agencies to resolve the questioned costs. In addition, the County Commission should:

A&B. Ensure the Sheriff's department maintains adequate documentation to support the expenditures of federal grant funds and ensure that documentation is retained. In addition, checks received related to grant programs should be turned over to the County Treasurer for deposit and the monies processed through the county's established disbursement system. Also, all compensation paid to employees should be included on those individuals' W-2 forms.

C. Ensure the health department records related to grant expenditures and the resulting reimbursements are maintained in a complete and organized manner.

Status:

A-C. Implemented

3.B. County Road Monies

The county distributed road monies to two special road districts without some type of contractual agreement.

Recommendation:

The County Commission:

Obtain written agreements, which specifically state what services are to be provided to the county, for any distribution of CART or road and bridge sales tax monies to the special road districts.

Status:

Not implemented. The special road districts dissolved in May 1999.

4. Collateral Securities

Collateral securities pledged by the county's depository bank at December 31, 1997, were insufficient by approximately \$685,000, to cover monies in the custody of the County Treasurer and County Collector.

Recommendation:

The County Commission ensure collateral securities pledged by the depository bank are sufficient to protect monies at all times.

Status:

Implemented.

5. Property Tax Books

The County Clerk did not verify the tax books charged to the County Collector.

Recommendation:

The County Clerk review the tax books for accuracy, test individual tax bills for accuracy, and document all procedures performed.

Status:

Not implemented. See MAR No. 5.

6. Sheriff's Controls and Procedures

- A. Time sheets were not prepared by some Sheriff's department employees. In addition, leave (vacation, sick, and compensatory time) records were maintained within the Sheriff's department rather than by the County Clerk's office.
- B. Sheriff's deputies (driver and guard) were paid a per diem when performing extraditions. The officer driving received an additional amount if a personal vehicle was used.

Recommendation:

The County Commission:

- A. Require the Sheriff's department employees to prepare time sheets and submit them to the County Clerk's office for review and to support the preparation of payroll. In addition, leave records for Sheriff's department employees should be maintained by the County Clerk.
- B. Ensure deputies and employees who serve as guards are paid their normal salary for the amount of time spent. If reimbursable expenses are incurred by the Sheriff and his employees, reimbursement should be claimed only for actual miles driven in personal cars or for other actual expenses incurred.

Status:

- A. Partially implemented. Time sheets are prepared and copies are submitted to the County Clerk's office. Sheriff's department employees leave records are still maintained in the Sheriff's department. See MAR No. 4.
- B. Implemented.

7. Prosecuting Attorney's Accounting Controls and Procedures

- A. The Prosecuting Attorney's office maintained one bank account which had been inactive since February 1995.
- B. Bank reconciliations and open-items listings were not prepared for the bad check and restitution bank account.
- C. The cash control ledger was not adequately maintained.
- D. Two receipts totaling \$60 could not be traced to a deposit and were not detected because recorded receipts were not reconciled to deposits.
- E. A monthly report of bad check fees was not filed with the County Commission.

Recommendation:

The Prosecuting Attorney:

- A. Take action to close the inactive bank account. Any monies which can be identified should be distributed to the appropriate parties. Any monies which cannot be identified should be remitted to the state Unclaimed Property Section.
- B. Perform monthly bank reconciliations for the active bank account. In addition, a listing of open items should be prepared on a monthly basis and reconciled to the bank and book balances.
- C. Maintain a proper and complete cash control ledger noting monthly receipt and disbursement totals and ending cash balances.
- D. Investigate those instances where recorded receipts could not be traced to bank deposits and take appropriate action to recover the monies. In addition, recorded receipts should be reconciled to bank deposits on a regular basis.
- E. File monthly reports of bad check fees in accordance with state law.

Status:

- A-C. Implemented.
- D. Partially implemented. The Prosecuting Attorney did not recover the receipts totaling \$60. Although not repeated in the current MAR, our recommendation remains as stated above.
- E. Not implemented. See MAR No. 8.

8. Court Accounting Controls and Procedures

- A. The Circuit Clerk's reconciled cash balance exceeded the open-items listing by \$9,826, at December 31, 1997.
- B. The cash control ledger maintained by the Probate Division was not maintained accurately or adequately reconciled to the bank balance. As a result, the Probate Division did not distribute court fees on a monthly basis as required.
- C. Court costs related to the civil section of the Associate Division were not disbursed on a timely basis.
- D. Cash bonds totaling \$1,747 had been held in the criminal account of the Associate Division for more than two years.

Recommendation:

The Circuit Clerk actively supervise the various offices under his supervision. In addition, the Circuit Clerk should:

- A. Attempt to identify the excess cash balance which currently exists in the Circuit Court civil accounts. Any unidentified amount should be disposed of in accordance with Chapter 447, RSMo 1994, and Section 50.500, RSMo 1994.
- B. Ensure the cash control ledger of the Probate Division is maintained accurately and reconciled to the bank balance on a periodic basis. In addition, the fee distributions should be made accurately and on a monthly basis as required.
- C. Ensure Associate Division civil court costs are distributed on a monthly basis as required.
- D. Ensure bond monies are distributed on a timely basis. Unclaimed bonds should be disposed of in accordance with Chapter 447, RSMo 1994.

Status:

A-D. Not implemented. See MAR No. 6.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

MCDONALD COUNTY, MISSOURI  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

Organized in 1849, the county of McDonald was named after Alexander McDonald, a Revolutionary War soldier and congressman. McDonald County is a county-organized, third-class county and is part of the 40th Judicial Circuit. The county seat is Pineville.

McDonald County's government is composed of a three-member county commission and separate elected officials performing various tasks. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials.

Principal functions of these other officials relate to judicial courts, law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records of importance to the county's citizens.

Counties typically spend a large portion of their receipts to support general county operations and to build and maintain roads and bridges. The following chart shows from where McDonald County received its money in 1999 and 1998 to support the county General Revenue and Special Road and Bridge Funds:

| SOURCE                    | 1999         |            | 1998      |            |
|---------------------------|--------------|------------|-----------|------------|
|                           | AMOUNT       | % OF TOTAL | AMOUNT    | % OF TOTAL |
| Property taxes            | \$ 324,267   | 12         | 314,533   | 11         |
| Sales taxes               | 1,068,056    | 40         | 978,064   | 35         |
| Federal and state aid     | 927,991      | 35         | 911,207   | 33         |
| Fees, interest, and other | 364,332      | 13         | 569,855   | 21         |
| Total                     | \$ 2,684,646 | 100        | 2,773,659 | 100        |

The following chart shows how McDonald County spent monies in 1999 and 1998 from the General Revenue and Special Road and Bridge Funds:

| USE                       | 1999         |            | 1998      |            |
|---------------------------|--------------|------------|-----------|------------|
|                           | AMOUNT       | % OF TOTAL | AMOUNT    | % OF TOTAL |
| General county government | \$ 733,935   | 27         | 1,171,170 | 39         |
| Public safety             | 702,370      | 26         | 667,085   | 22         |
| Highways and roads        | 1,278,721    | 47         | 1,186,974 | 39         |
| Total                     | \$ 2,715,026 | 100        | 3,025,229 | 100        |

The county maintains approximately 42 county bridges and 731 miles of county roads.

The county's population was 12,357 in 1970 and 16,938 in 1990. The following chart shows the county's change in assessed valuation since 1970:

|                        |    | Year Ended December 31, |       |       |        |        |
|------------------------|----|-------------------------|-------|-------|--------|--------|
|                        |    | 1999                    | 1998  | 1985* | 1980** | 1970** |
|                        |    | (in millions)           |       |       |        |        |
| Real estate            | \$ | 84.0                    | 83.9  | 46.0  | 13.6   | 8.6    |
| Personal property      |    | 44.6                    | 40.2  | 16.3  | 7.1    | 3.0    |
| Railroad and utilities |    | 16.5                    | 13.8  | 6.1   | 4.7    | 3.0    |
| Total                  | \$ | 145.1                   | 137.9 | 68.4  | 25.4   | 14.6   |

\* First year of statewide reassessment.

\*\* Prior to 1985, separate assessments were made for merchants' and manufacturers' property. These amounts are included in real estate.

McDonald County's property tax rates per \$100 of assessed valuations were as follows:

|                               |    | Year Ended December 31, |      |
|-------------------------------|----|-------------------------|------|
|                               |    | 1999                    | 1998 |
| General Revenue Fund          | \$ | .26                     | .22  |
| Special Road and Bridge Fund* |    | .00                     | .00  |

\* The Special Road and Bridge Fund should receive 24 percent of the General Revenue Fund property tax collections.

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on September 1 and payable by December 31. Taxes paid after December 31 are subject to penalties. The county bills and collects property taxes for itself and most other local governments. Taxes collected were distributed as follows:

| Year Ended February 28,      |                     |                  |
|------------------------------|---------------------|------------------|
|                              | 2000                | 1999             |
| State of Missouri            | \$ 43,693           | 42,031           |
| General Revenue Fund         | 370,461             | 310,816          |
| Special Road and Bridge Fund | 6,692               | 12,979           |
| Assessment Fund              | 52,627              | 46,256           |
| Schools                      | 3,988,062           | 3,587,160        |

\* Includes fees received from probate cases.

\*\* Includes \$900 annual compensation received from the state.

\*\*\* Compensation on a fee basis.

A breakdown of employees (excluding the elected officials) by office at December 31, 1999, is as follows:

| Office   | Number of Employees Paid by |          |
|--|-----------------------------|----------|
|  | County                      | State    |
| Circuit Clerk and Ex Officio Recorder of Deeds | 2 *                         | 7        |
| County Clerk                                   | 3                           | 0        |
| Prosecuting Attorney                           | 5                           | 0        |
| Sheriff  | 18 **                       | 0        |
| County Collector                               | 2                           | 0        |
| County Assessor                                | 5                           | 0        |
| Road and Bridge                                | 18                          | 0        |
| Health Center                                  | 7                           | 0        |
| Total  | <u>60</u>                   | <u>7</u> |

\* Includes one part-time employee

\*\* Includes two part-time employees

In addition, the county pays a proportionate share of the salaries of other circuit court-appointed employees. McDonald County's share of the 40th Judicial Circuit's expenses is 27.59 percent.

General obligation bonds, dated October 1, 1994, were issued in the original amount of \$1,950,000. These bonds were issued to provide funds loaned to Sibley Industries pursuant to an agreement to acquire, construct, extend, and improve and industrial plant. Bonds payable at December 31, 1999, totaled \$1,670,000 and this debt issue is scheduled to be fully liquidated in 2014.

All improvements are owned by Sibley Industries. The loan agreement requires Sibley Industries to pay the principal, interest, and fiscal charges as they become due. All payments servicing the debt are paid directly to the trustee bank by Sibley Industries. If Sibley Industries defaults on the payments, the improvements and/or plant reverts to the county and the county is obligated to make the debt service payments and may levy a property tax for such purpose.

REVIEW OF INDEPENDENT AUDITS OF  
FIRE PROTECTION DISTRICTS  
IN GREENE COUNTY

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-134  
December 29, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**The annual review of audits of fire protection districts in Greene County has been completed. This review covered reports for the year ended December 31, 1999 that were required to be submitted to the State Auditor's office within six months after the year end.**

---

State law requires Greene County fire protection districts with revenues in excess of \$50,000 annually to cause an audit to be performed on a biennial basis. For those districts with annual revenues of less than \$50,000, the State Auditor may exempt the district from the audit requirement if the appropriate reports are filed.

For those districts for which an audit is required, the district must file a copy of the completed audit report and management letter with the State Auditor within six months after the close of the fiscal year.

Eight of 11 districts in the county are required to have at least a biennial audit. However, the Walnut Grove Fire Protection District has not obtained an audit for the years ended December 31, 1999 and 1998 and therefore are not in compliance with state law. The three other districts submitted unaudited financial reports.

This report includes information about the districts' revenues, expenditures, and balances, and summarizes comments made by the various districts' independent auditors including recommendations for improving accountability and management of finances.

**Copies of the audit are available upon request.**

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger Wilson, Governor  
and  
Members of the General Assembly  
and  
Boards of Directors of Fire Protection  
Districts in Greene County

We have conducted a special review of independent audits of the fire protection districts in Greene County as required by Section 321.690, RSMo. The purposes of this review were to:

1. Evaluate the impact of statutory audit requirements and State Auditor's regulations on the effectiveness of financial reporting and auditing for fire protection districts in Greene County.
2. Assess the degree of compliance by these districts with statutory audit requirements and the State Auditor's regulations.
3. Bring to the attention of the various fire districts and independent auditors any specifically identifiable reporting deficiencies which should be taken into consideration and corrected in future audit reports.
4. Summarize and evaluate the financial data presented for the various fire districts.

Section 321.690, RSMo 1994, requires all fire protection districts with revenues in excess of \$50,000 annually to cause an audit to be performed on a biennial basis. For those districts with annual revenues of less than \$50,000, the State Auditor may exempt the district from the audit requirement if the appropriate reports are filed.

For those districts for which an audit is required, the district must file a copy of the completed audit report and management letter with the State Auditor within six months after the close of the fiscal year. The audit reports and management letters are reviewed to determine that they are prepared according to guidelines contained within the Code of State Regulations (CSR) (Section 15 CSR 40-4). Any weaknesses noted during the review are communicated to the districts by letter. Should the weaknesses be of a serious enough nature to require the report to be amended, the district

is granted a ninety-day period from the date of notification by the State Auditor to correct the report. The State Auditor received and accepted four of the five required audit reports for the year ended December 31, 1999. The Walnut Grove Fire Protection District had not obtained an audit for the years ended December 31, 1999 and 1998 as of October 24, 2000.

During our review, we considered Section 321.690, 1994 and 15 CSR 40-4 (which are presented in Appendices B and C), and audit reports and other financial information submitted to the State Auditor by the various fire districts for the year ended December 31, 1999. Because some data presented in the schedules and appendices was compiled from information submitted by the various fire districts and their independent auditors and was not verified by us via additional audit procedures, we express no opinion on the schedules and appendices.

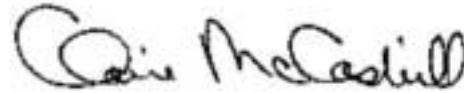

Our review was limited to the specific matters described above and was based on procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

Some problems were noted during our review of the fire protection districts' audit reports and the compliance deficiencies are summarized on Schedule 4. The problems noted included, failure to submit an audit report to the State Auditor's office (SAO) by June 30, 2000, and failure to submit engagement letters to the SAO.

To better determine the quality of the fire district audits, we reviewed the supporting working papers of various independent auditor reports for the year ended December 31, 1999. The information contained in the working papers constitutes the principal record of work the auditor has accomplished and provides evidence for conclusions that he has reached concerning significant matters. Generally Accepted Governmental Auditing Standards (GAGAS) require that a written record of the auditor's work be retained. However, some auditor's working papers need to be improved in this area.

As shown in Appendix A, independent auditors made a few specific recommendations to improve the overall management of the fire districts. Recommendations included concerns regarding budgets and pledged securities. Each fire district should review all recommendations and the applicability to their individual district. Consideration should be given by individual districts to have their independent auditor review any areas where risk and citizen concern may be evident.

This is the sixth review the State Auditor's office has performed of the Greene County fire protection districts' reports and many improvements have been noted. It appears that the fire protection districts, on the whole, are working to improve the quality of their financial reporting. We solicit from the readers of this report any suggestions for changes or requests for other new information which may be of benefit to those involved with the Greene County fire protection districts.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

\* The Walnut Grove Fire Protection District has not obtained an audit for the years ended December 31, 1999 and 1998 as of October 24, 2000.

\*\* The Walnut Grove Fire Protection District was not included as applicable.

## NOTES TO THE SCHEDULES

REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS  
IN GREENE COUNTY  
NOTES TO THE SCHEDULES

1. Significant Information

A. General

At December 31, 1999, there were eleven fire protection districts in Greene County. Districts are required to have biennial audits performed if revenues exceed \$50,000, or file a financial statement if revenues are less than \$50,000.

Upon completion of the audit, copies of the report and management letter are to be submitted to the State Auditor for review. Four audits and three financial statements have been received as follows:

1. The Battlefield, Ebenezer, Strafford, and Willard Fire Protection Districts obtained audits for the year ended December 31, 1999. Each of these districts previously obtained audits for the year ended December 31, 1998.
2. The Walnut Grove Fire Protection District notified the State Auditor's office in writing of their plans to obtain an audit for the two years ended December 31, 1999; however, the district had not received an audit as of October 24, 2000.
3. The Brookline, Fair Grove, and Logan-Rogersville Fire Protection Districts obtained audits through December 31, 1998. These districts plan to obtain an audit for the two years ended December 31, 2000.
4. The Ash Grove, Bois D'Arc and West Republic Fire Protection Districts were not required to obtain audits. Information presented in this report was obtained from unaudited information provided by these districts.

B. Schedules

Information included in these schedules was compiled from the audit reports, management letters, and unaudited financial statements received from the Greene County fire protection districts.

In analyzing these schedules, some disparity will result due to the different methods of presenting essentially the same information.

Reasons for some problems in comparison are:

1. The financial statements of the Battlefield, Brookline, Ebenezer, Fair Grove, Logan-Rogersville, Strafford, and Willard Fire Protection Districts are presented on the modified accrual basis of accounting in accordance with generally accepted accounting principles. The ending balances represent assets net of liabilities. Revenues are recognized in the fiscal period in which they become available and measurable. Expenditures are recognized in the fiscal period in which the related liability is incurred.
2. The financial statements of the Ash Grove, Bois D'Arc and West Republic Fire Protection Districts are presented on a cash basis of accounting. The ending balances represent cash balances. Revenues are recognized when received in cash and expenditures are recognized when disbursed in cash.

The schedules presented are as follows:

Schedule 1 presents revenues, expenditures, and fund balance for the General Fund in a combined format. The General Fund is the general operating fund of each district and is used to account for all operating resources.

Schedule 2 presents the general fixed asset balances of the districts at December 31, 1999, with comparative totals of general fixed assets at December, 31 1998. The fire protection districts that are presented are only those which obtained an audit for 1998 or 1999. However, the Fair Grove Fire Protection District's 1998 audit report did not include a schedule of general fixed assets.

Schedule 3 presents the assessed valuations of the individual fire protection districts as well as tax levies. Immaterial differences were noted in the assessed valuations presented in the audit reports and the amounts reported by the districts to the State Auditor's office. In addition, in 1998 and 1999, Walnut Grove Fire Protection District levied .01 and .02, respectively, in excess of the levies approved by the State Auditor's office. In 1998 and 1999, the Fair Grove Fire Protection District levied .01, in excess of the levies approved by the State Auditor's office.

Schedule 4 is a listing of deficiencies noted regarding compliance with State Auditor's regulation 15 CSR 40.

C. Method of Accounting

All of the districts' operations are accounted for in the General Fund, which is a governmental type fund. As described in Note 1.B., the districts use various methods of accounting for their General Funds.

For those districts which have obtained audits, all fixed assets acquired or constructed for general governmental purposes are reported as expenditures in the General Fund and are capitalized in the General Fixed Assets Account Group. Purchased fixed assets are capitalized at historical cost or at estimated historical cost if actual historical cost is not available.

2. Independent Audits

For the year ended December 31, 1999, two independent auditors each performed one audit, and one independent auditor performed two audits.

3. Compensation Of Directors

The independent audit reports included the names of the principal officeholders during the year ended December 31, 1999, and the compensation received by each official in the performance of his or her duty as established by Section 321.190, RSMo 1994. Most of the districts have three-member boards of directors, except for the Brookline and Willard Fire Protection Districts which have five-member boards. When more than three or five names were listed, it was due to a change in the officials serving on the board.

The following is a list of total compensation paid to directors by each district which was audited.

| <u>District</u> | <u>Total Compensation Paid</u> |             |
|-----------------|--------------------------------|-------------|
|                 | <u>1999</u>                    | <u>1998</u> |
| Battlefield     | \$ 5,745                       | 5,730       |
| Ebenezer        | 0                              | 0           |
| Strafford       | 5,150                          | 5,150       |
| Willard         |                                | 1,000 1,000 |

## APPENDICES

## Appendix A

### REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS IN GREENE COUNTY SUMMARY OF MANAGEMENT LETTER COMMENTS ISSUED BY AUDITORS IN CONNECTION WITH THE AUDITS OF THE YEAR ENDED DECEMBER 31, 1999

The following is a summary of the various comments contained in those management letters received by the State Auditor for audits of the year ended December 31, 1999. These comments apply to one fire protection district unless otherwise noted. The comments extracted from the management letters were not verified by the State Auditor's office via additional audit procedures for accuracy, validity, or completeness.

#### Budgets

- \* Actual expenditures exceeded budgeted expenditures.

#### Pledged Securities

- \* District deposits of \$15,715 were uninsured and uncollateralized as of December 31, 1999.

## Appendix B

### 321.690 RSMo Cum. Supp 1999

1. In counties of the first classification having a charter form of government and having more than nine hundred thousand inhabitants and in counties of the first classification which contain a city with a population of one hundred thousand or more inhabitants which adjoins no other county of the first classification, the governing body of each fire protection district shall cause an audit to be performed consistent with rules and regulations promulgated by the state auditor.
- 2.(1) All such districts shall cause an audit to be performed biennially. Each such audit shall cover the period of the two previous fiscal years.
- (2) Any fire protection district with less than fifty thousand dollars in annual revenues may, with the approval of the state auditor, be exempted from the audit requirement of this section if it files appropriate reports on its affairs with the state auditor within five months after the close of each fiscal year and if these reports comply with the provisions of section 105.145, RSMo. These reports shall be reviewed, approved and signed by a majority of the members of the governing body of the fire protection district seeking exemption.
3. Copies of each audit report must be completed and submitted to the fire protection district and the state auditor within six months after the close of the audit period. One copy of the audit report and accompanying comments shall be maintained by the governing body of the fire protection district for public inspection at reasonable times in the principal office of the district. The state auditor shall also maintain a copy of the audit report and comment. If any audit report fails to comply with the rules promulgated by the state auditor, that official shall notify the fire protection district and specify the defects. If the defects specified are not corrected within ninety days from the date of the state auditor's notice to the district, or if a copy of the required audit report and accompanying comments have not been received by the state auditor within six months after the end of the audit period, the state auditor shall make, or cause to be made, the required audit at the expense of the fire protection district.
4. The provisions of this section shall not apply to any fire protection district based and substantially located in a county of the third classification with a population of at least thirty-one thousand five hundred but not greater than thirty-three thousand.

DEKALB COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-133  
December 28, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like DeKalb, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of DeKalb County was a financial and compliance audit of various county operating funds. The following concerns were noted as part of the audit:

The audit includes some matters upon which the county should consider and take appropriate corrective action.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of DeKalb County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of DeKalb County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

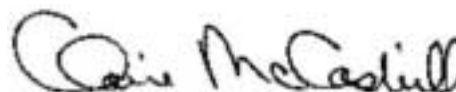

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of DeKalb County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of DeKalb County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of DeKalb County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31,

1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated December 5, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 5, 2000 (fieldwork completion date)

and  
Officeholders of DeKalb County, Missouri

We have audited the special-purpose financial statements of various funds of DeKalb County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated December 5, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

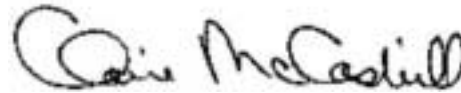

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of DeKalb County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain immaterial instances of noncompliance, which we have reported to the management of the county in the accompanying Letter on Other Matters.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of DeKalb County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material

weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting, which we have reported to the management of the county in the accompanying Letter on Other Matters.

This report is intended for the information of the management of DeKalb County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## Notes to the Financial Statements

DEKALB COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of DeKalb County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, the Multi-County (ACCD) 911 Board, or the Senate Bill 40 Board. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt a formal budget for the Election Fees Fund for the year ended December 31, 1999.

Warrants issued were in excess of budgeted amounts for the following funds:

| <u>Fund</u>                              | <u>Years Ended December 31,</u> |
|--|---------------------------------|
| Circuit Clerk Interest Fund              | 1999 and 1998                   |
| Law Enforcement Training Fund            | 1999                            |
| Prosecuting Attorney Delinquent Tax Fund | 1999                            |
| Nursing Home Sales Tax Fund              | 1999                            |
| Recorder's User Fees Fund                | 1999                            |
| Prosecuting Attorney Bad Check Fund      | 1998                            |
| Sheriff's Calendar Fund                  | 1998                            |
| Cemetery Trust Fund                      | 1998                            |
| Local Use Tax Fund                       | 1998                            |

Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

The county's published financial statements for the years ended December 31, 1999 and 1998, included all funds presented in the accompanying financial statements.

2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The county's deposits at December 31, 1998, were entirely covered by federal depositary insurance or by collateral securities held by the county's custodial bank in the county's name.

Of the county's bank balance at December 31, 1999, \$100,000 was covered by federal depositary insurance and \$1,677,413 was covered by collateral pledged by one bank and held in the county's name by the safekeeping department of an affiliate of the same bank holding company.

The Multi-County (ACCD) 911 Board's deposits at December 31, 1999 and 1998, were entirely covered by federal depositary insurance or by collateral securities held by the Board's custodial bank in the Board's name.

The Senate Bill 40 Board's deposits at December 31, 1998, were entirely covered by federal depositary insurance.

Of the Senate Bill 40 Board's bank balance at December 31, 1999, \$100,000 was covered by federal depositary insurance and \$15,677 was uninsured and uncollateralized.

Schedule

DEKALB COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## Follow-Up on Prior Audit Findings

DEKALB COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

Our prior audit report issued for the two years ended December 31, 1997, included no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## SECTION ON OTHER MATTERS

## DEKALB COUNTY, MISSOURI LETTER ON OTHER MATTERS

We have audited the special-purpose financial statements of various funds of DeKalb County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated December 5, 2000.

We did not review the operations of elected officials with funds other than those presented in the special-purpose financial statements. The operations of such officials will be reviewed and reported on during the state auditor's next scheduled audit of the county.

This Letter on Other Matters presents matters other than the findings, if any, reported in the accompanying Schedule of Findings. These matters resulted from our audit of the special-purpose financial statements of DeKalb County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*. Nevertheless, the county should consider these matters and take appropriate corrective action.

### Senate Bill 40 Board

The board does not have written contracts with some organizations that receive funding. Contracts should specifically address how funds are to be used, applicable bidding requirements, and clarify asset ownership. The board does not have a written depositary agreement with its bank as required by state law. As a result, the board's bank balances in excess of FDIC coverage (\$100,000) were not covered by collateral securities.

The board treasurer does not always maintain a checkbook balance or prepare complete and accurate bank reconciliations. Various financial records of the board, including the December 1999 bank statement and invoices to support several expenditures, could not be located.

This Letter on Other Matters is intended for the information of the management of DeKalb County, Missouri, and other applicable government officials. However, this letter is a matter of public record and its distribution is not limited.

**AUDIT OF  
CHILD ABUSE AND NEGLECT  
REPORTING AND RESPONSE SYSTEM**

From The Office Of State Auditor  
Claire McCaskill

Report No. 2000-132  
December 28, 2000

The child abuse and neglect hotline system could be more effectively managed. Children are at risk because quality control systems are not effective and in some instances are non-existent.

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

PERFORMANCE AUDIT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

***Concerned citizens seeking protection for at risk children through the child abuse and neglect hotline cannot always depend on the results.***

---

Our office began auditing the hotline system run by the Division of Family Services after two boys died from abuse, despite at least 11 hotline calls about possible neglect - including an incorrectly categorized call just before their deaths. Our staff focused on determining how the system received, reviewed and resolved hotline calls. The audit tested decision making processes, tracked actions taken and studied the outcomes.

Our review showed that while many calls are properly handled, ineffective oversight by top managers leaves many children in danger of further mistreatment. Our findings fall into two major issues: overall quality control and investment in field staff. Without an adequate monitoring system, managers could not detect problems when they occurred and, in some cases, ignored detected problems. Managers also did not adequately support their field staff, which contributed to low morale and high turnover. The following highlights our findings:

**Inconsistent decision making**

Our tests showed that field staff did not make consistent decisions about hotline calls. We presented a series of calls to several workers and received varying responses. The workers were requested to decide if the calls met abuse or neglect criteria and if so to classify them for either investigation or family assessment. In our test, we included two calls made on behalf of three children who died and found 83 percent of those tested chose a different action than was chosen by the workers who originally handled those cases. In a call of a mother forcing an 8-year-old to breast feed which was not accepted by the original call taker, all those tested said it should have been accepted as a child abuse and neglect report or referral for services rather than an unable to investigate case, which it was. We proposed a decision making model that leaves less room for inconsistencies and worker judgment. (See page 4)

**Calls incorrectly classified**

Of the 95,000 calls received in 1999, call takers determined one quarter of them could not be investigated, which means no action occurred. But our audit showed many calls are incorrectly classified. In our small sample, we found 50 incorrectly categorized calls. We presented these cases to DFS officials in May 2000 to give the children another chance at protection, but officials only agreed with our reassessment on one case and took no action on the rest. One of our examples included an inadequately clothed boy locked outside his home on a cold day. The hotline manager defended the decision with: "Let's face it, 38 degrees isn't going to kill anyone." (See page 6)

YELLOW SHEET

Our review of these uninvestigated calls showed hotline workers did not always indicate if they checked for previous reports of abuse and did not fully document the call on the manual worksheet. In addition, supervisors approving the categorization of these calls never listened to the taped calls to monitor a call taker's judgment. Finally, once a call is considered unable to investigate, usable records of the call are destroyed within two months. (See page 9)

### **Reports of abuse ignored**

There is no assurance that the county offices will act on calls referred to them by the hotline unit. We found 33 calls in three months that received no action because the county staffs never pulled the call off the automated referral system. We could not determine the historical magnitude of this problem because the automated system only displays calls for a 3-month period. DFS officials have since tried to correct this issue. (See page 11)

### **Nearly half substantiated calls overturned**

During 1999, the child abuse review board overturned on appeal 40 percent of all investigations substantiating probable abuse. The review board cited poor case management as the reason for 26 percent of the overturned cases. DFS has known of the high overturn rate for at least four years and hired an employee to create a better case-management plan, but then ignored the employee's suggestions. (See page 13)

### **More investment in staff needed**

The DFS Central office has not fully supported the field staff which suffers from low morale and high staff turnover and as a result cannot complete tasks within deadlines or have confidence in their decision-making. We attribute these problems to low pay, inadequate equipment, and training.

Missouri ranks 45<sup>th</sup> in the nation on basic pay and offers only a 4 percent raise for promotion to supervisor, which is nearly one third less than what four surrounding states offer. There is also no pay differential for staff obtaining a Master's degree or professional licensing. (See page 26) Workers are inefficient due to inadequate equipment, such as some workers having to type or handwrite their reports due to a lack of computers. (See page 29) And all employee levels, from workers to supervisors, shared concerns about the adequacy of training and lack of guidance. In fact some directors, with background in Income Maintenance not Children Services, said they were uncomfortable supervising social workers. (See page 31)

We realize that the role of DFS staff in receiving and processing hotline calls and cases is very difficult. We also realize that no one in DFS wants a child at risk to remain at risk. For this realization to remain true, senior managers need to take a more proactive role in managing the organization and institute effective quality controls. Our recommendations offer some simple mechanical steps to meet this goal.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger Wilson, Governor  
and  
Steve Renne, Acting Director Department of Social Services  
and  
Denise Cross, Director Division of Family Services

The State Auditor's Office audited the Department of Social Services Division of Family Services' (DFS) child abuse and neglect hotline reporting and response system. The impetus for this audit came from the public outcry over some high profile abuse/neglect cases. My office received numerous calls expressing great concern over the plight of abused or neglected children in many locations over the state.

The purpose of the audit was to determine if hotline calls that alleged child abuse and neglect were properly received, documented, and referred to the appropriate local DFS city or county office; whether those offices made certain the child or children were adequately protected and the calls were handled in accordance with the Missouri statutes, Code of State Regulations, and division policy. The audit included a review of operations of the central Child Abuse/Neglect Hotline unit and the subsequent follow-up handling of abuse and neglect cases in local DFS offices.

We concluded the child abuse and neglect hotline response system was not effectively managed and some children were unnecessarily left at risk. Quality control systems were not effective and in some instances were non-existent. Senior managers in the DFS need to take a more proactive role in managing the hotline and child abuse/neglect system.

We also determined the DFS Central Office has not been as supportive of field staff as they need to be. Field staffs are expected to carry unreasonable workloads while at the same time they have not received competitive salaries, modern tools, and training that could alleviate some of their burden. DFS officials generally agreed with most of the recommendations and provided acceptable implementation dates. Some responses were not clear and they will be followed up on during our followup process.

Claire McCaskill  
State Auditor

August 30, 2000 (fieldwork completion)

The following auditors participated in the preparation of this report:

|                     |                        |
|---------------------|------------------------|
| Director of Audits: | William D. Miller, CIA |
| Audit Manager:      | James Helton, CPA,     |
| In-Charge Auditor:  | Christina Davis        |
| Audit Staff:        | Patrick T. Devine, CPA |
|                     | Scott Evans            |
|                     | Stacy Griffin          |

## **RESULTS AND RECOMMENDATIONS**

### **1. Child Abuse and Neglect Cases Can Be Better Managed to Ensure Children Are Protected**

The decentralized, reactive management style of the Division of Family Services (DFS) did not ensure that child abuse and neglect hotline calls would be processed properly and meet the need to adequately protect each at risk child. Audit tests disclosed:

- The decision to accept a child abuse and neglect report as an investigation or family assessment was not consistent among DFS social workers.
- Hotline staff decided not to accept child abuse and neglect reports when they should and could have referred allegations to local offices for investigation or other services.
- Hotline calls forwarded to field locations were not always reviewed or acted on.
- Substantiated hotline cases were overturned on appeal because they were not properly prepared or presented.
- Children's services were cut back or denied because field staff were told to reduce costs.

These conditions occurred because DFS management did not take a proactive approach to evaluating major elements of the hotline decision-making process. Quality control systems did not work properly or were nonexistent in some management processes. In some instances, no action was taken to correct problems that were disclosed. More guidance and supervision was needed to assist field level social workers in making consistent decisions and developing cases. As a result, some children did not receive the services or protection they were entitled to and there is no assurance that child abuse and neglect decisions are correct or will be appropriate.

#### **The DFS is responsible for handling Child Abuse and Neglect Hotline calls**

The DFS Children's Services personnel receive calls reporting child abuse and neglect and determine how to respond by evaluating the information received, performing an investigation if necessary, and documenting the circumstances found. If needed, appropriate services intended to prevent future incidents of abuse or neglect are initiated.

*(See Appendix III, page 45, for a more detailed description of the Child Abuse and Neglect System process.)*

The DFS receives a very high volume of calls. Calls are received from private citizens, mandated reporters,<sup>1</sup> family members, and non-caretakers. Call takers classify calls in various

---

<sup>1</sup> Mandated reporters are required by law to call the child abuse hotline if they see evidence of child abuse and neglect. Examples of mandated reporters are school officials, law enforcement, nurses, doctors, day care workers etc.

categories of which the large majority are classified as either child abuse and neglect reports, mandated reporter referrals, or unable-to-investigate calls and to a lesser extent, new born crisis, non caretaker, or preventive service referrals.

In order for a call to be classified as child abuse and neglect, it must meet the following criteria:

- The child is under age 18.
- The alleged perpetrator has care, custody, and control of the child.
- The alleged abusive or neglectful treatment is having an adverse effect on the child.
- The report meets the definition of abuse/neglect described in state statutes.

In instances when the call taken by the hotline unit does not meet either child abuse and neglect or referral criteria or if no identifying information can be obtained, the information is coded unable to investigate.

There are two types of newborn crisis referrals--drug-involved and non-drug-involved. For drug-involved referrals the new born must show signs and symptoms of drug/alcohol. For non-drug-involved referrals there must be allegations of potential serious risk of abuse/neglect upon release of the newborn from the hospital.

Non caretaker referrals result from calls from persons other than mandated reporters identifying possible abuse or neglect where the alleged perpetrator has no care, custody, or control of the child.

Preventive Service Referrals result from calls made by persons other than mandated reporters where actual abuse or neglect has not yet occurred, but where the actions of the child, caretaker, another juvenile or adult demonstrates the need for intervention and possible service delivery to prevent child abuse and neglect from occurring.

The number and classifications of hotline calls received during 1999 and 1998 are shown below:

## DFS staff need help to make consistent decisions on case handling

Audit tests revealed that given the same case situations, local office personnel would choose varying responses. We asked 17 local social workers to read documentation of 5 actual hotline calls to determine, using available policy and resources, whether the allegations met child abuse and neglect criteria and if so to classify for either the Family Assessment<sup>2</sup> or Investigation track. The following table discloses test results that identify inconsistencies in the responses received from the workers in the test and workers who handled the actual calls.

| Number of social workers who categorized cases as |                   |               |       |       |                                |
|---|-------------------|---------------|-------|-------|--------------------------------|
| Case No   | Family Assessment | Investigation | Other | Total | Actual Result                  |
| 1   | 3                 | 11            | 0     | 14    | Family Assessment <sup>3</sup> |
| 2   | 2                 | 15            | 0     | 17    | Family Assessment              |
| 3   | 7                 | 9             | 1     | 17    | Unable to Investigate          |
| 4   | 17                | 0             | 0     | 17    | Family Assessment              |
| 5   | 8                 | 9             | 0     | 17    | Family Assessment              |

- Case number three was actually classified as unable-to-investigate (no action taken to protect child), by the hotline unit while all the test workers believed it met child abuse and neglect or referral criteria and most thought it should have been classified as an Investigation. This call reported a mother who was forcing her 8-year old child to breast-feed nightly. We brought the lack of action on this case to the attention of the Child Abuse and Neglect Hotline Unit (hotline unit) and DFS Central Office on May 18, 2000, but they declined to take any action to protect the well being of this child. This denial is a reflection of problems with categorizing cases as unable to investigate when something could have been done. We discuss this problem on page 6 of this report.
- Three children in cases one and two died as a result of abuse and/or neglect within months of being incorrectly classified and handled by DFS as Family Assessment cases. While most workers participating in the test correctly classified and screened these two hotline reports as Investigations, the deaths lend a tragic emphasis to the problems of inconsistency in decision making on DFS cases.

Three  
children  
died

In order to gain an understanding of why decisions varied significantly, we reviewed training procedures and supervisory practices, queried social workers, participated in a walk-through of an actual call, and examined decision-making systems used in other states. We determined that the basic training was satisfactory but field workers were confused in some cases about when or when not to use the Family Assessment track. Additionally, differences in decision making from one case to another and from one social worker to another occurred because social workers could

<sup>2</sup> The two-track system (family assessment/investigation) provides the social worker the flexibility in determining whether to bring law enforcement in or to counsel the family. Investigations are ordered when the social worker feels there is a high likelihood that some abuse or neglect has occurred. These require law enforcement involvement. Family assessments allow the social worker to determine what type of services including counseling, parenting classes etc. might help the family overcome their problems in handling children.

<sup>3</sup> One case was not given to some workers because they were aware of the case.

exercise considerable judgment in their decision-making. Other states developed useful decision making tools that would help social workers make better and more consistent decisions.

## **Structured Decision Making Model**

The National Council on Crime and Delinquency established The Children's Research Center to help federal, state and local child welfare agencies reduce child abuse and neglect by developing case management systems and conducting research that improves service delivery to children and families.

A structured decision model would help

According to the Children's Research Center published materials, the National Council was established in 1907 to perform a similar role for private and public agencies serving delinquent children. The National Council branched out to Children's Protective Services after successful completion of a risk assessment model for Alaska's delinquent population by devising a system to provide the same structure for Alaska's Children's Protective Service program.

Approximately 12 states have implemented some elements of the structured decision model approach. The model is a system of several basic components used to structure the decision-making process for Children's Protective Services. At the heart of the system is a series of tools used to assess families and structure the agency response to them. The following tools are used at multiple decision points, ranging from call intake to family reunification:

- Response Priority--A decision system to guide whether a call should be accepted or not and how quickly investigative staff should respond to a report alleging child abuse/neglect.
- Safety Assessment--To determine the threat of immediate harm and identify steps needed to protect children.
- Risk Assessment--A research-based system to estimate the likelihood of future abuse/neglect.
- Family and Child Strengths and Needs Assessments--Assessments to guide service planning.
- Reassessments--Safety, risk and needs are reassessed periodically to determine the need for changes in service levels and/or changes in permanency planning.
- Service Levels--The service levels and associated standards are designed to ensure that staff time and attention is concentrated on those families at the highest levels of risk and need.
- Workload Management--A workload measurement and accounting system for determining the number of child welfare staff needed to allocate the workload equitably among staff.

- Management Information--A process of using aggregate family assessment data, agency response/decision data and workload data to assist managers in planning, monitoring, budgeting and evaluation.

The objectives of the model are:

1. To introduce structure to critical decision points in the child welfare system.
2. To increase the consistency and validity of decision making.
3. To target resources to families most at risk.
4. To improve the effectiveness of Child Protective Services.

Our audit work included research into other states that have implemented elements of the model. This research led us to visit Michigan because that state has used the model longer than most other states. While in Michigan, we discussed the model with State officials, several local front line workers having varying levels of experience and length of service, front line supervisors, and County Administrators from two different counties. In those discussions, workers gave varying responses depending upon their level of experience as to the helpfulness of the model, but most agreed it was especially helpful as a learning tool for inexperienced workers serving to guide them in making difficult decisions. Everyone we interviewed stated that the model should be retained and thought it was a better system than other systems they had experienced.

### **Quality controls could be improved**

The DFS should have more effective oversight systems to ensure child abuse allegations are reviewed and appropriate actions are taken. DFS relies more on supervisory reviews and signature systems rather than proactive review and oversight of program activities. As a result, central office staff is not aware of problems or do not take effective corrective action when problems are known.

### **Calls could have been referred for local action but were classified as unable to investigate by the hotline unit**

The hotline unit tape records all calls received. Our audit found that the hotline unit categorized calls as “Unable-To-Investigate” when the calls actually met child abuse and neglect or referral criteria, leaving children at risk. The hotline unit classifies approximately 25 percent of all calls as unable-to-investigate. There were 1,757 and 1,880 calls classified unable-to-investigate in December 1999 and January 2000 respectively. To evaluate the hotline unit’s handling of unable-to-investigate calls we tested 6 percent of the December 1999 calls and all of the January 2000 calls. We concluded that 50 of the unable-to-investigate calls tested (3%) were incorrectly classified as unable-to-investigate and some action should have been taken. *(See Appendix III, page 51, for a more detailed description of unable-to-investigate classification and Appendix VI page 61, for detailed test results).*

The following are examples of calls incorrectly classified:

- The caller alleged that the parents of a 9-year old girl beat her with a broken hockey stick. The call taker said the case would be considered a child abuse and neglect case if a prior call could be found with the address for the victim. No action was taken. We found the victim's address in a prior report in the hotline system. The child continued to be at risk.

Girl allegedly beaten with broken hockey stick

- The caller and his friends observed a 5-year old child screaming, "Mommy, Mommy, let me in, it's cold out here!" The caller said the temperature was 38 degrees and he was concerned because the child had been outside for up to 1 hour in only a short sleeve T-shirt, thin pants, and socks. The caller stated he and his friends, in spite of wearing coats and heavy clothing, were still cold. The caller reported that the child's mother told him she was punishing the child. The call taker told the caller the hotline could not do anything because the incident did not meet the 1-hour "lock out law." (Being locked out for over an hour.) A supervisor told us that this case did not meet the criteria for child abuse and neglect because the call taker could not be certain that the door was locked. Our audit disclosed that there is no "lock out law," the wind chill at that day and time was 16 degrees, and the hotline unit manager was not concerned with this case. He stated in response to our concern, "Let's face it, 38 degrees isn't going to kill anyone."

Inadequately clothed child left out in cold

- A mandated reporter (psychologist) stated that a 12-year old boy revealed in a therapy session that his friend's parents punished his friend by keeping him in a cage 5' high and 9' wide. The reporter could only give the victim's first name, age, and school. The call taker did not pursue the call because the caller did not identify the victim's last name or address. Our audit disclosed that this call could have been referred to the local county office, which could have contacted the school and obtained such information.

Boy alleged to be locked in cage by his parents

- The caller stated a mother and 3 children under the age of five were living in a filthy apartment. Human feces and rotten, molded laundry covered much of the floor the last time the caller went to the home a few months prior. At that time, the caller and others had to wear masks to enter the home due to the strong odors. Ten days before the reporter called in, fumigators refused to spray the apartment because of the odors. The call taker dismissed the call because the caller could not confirm if the condition existed within 1 or 2 days of the call. The hotline received a repeat call a few days later and a different call taker determined that the condition had existed within the last week before the call and referred the case to the local office for review.

Family is living in filthy conditions

All of the questions we posed on the 50 cases were presented to DFS executive and management officials in May 2000 when we discovered them in an attempt to make sure the children had another chance for protection. We presented them again 2 months later. At the first presentation, these officials assured us that they would look into each case because they were concerned that children were still at risk. At the second presentation, the officials acknowledged that they agreed with only 1 of the 50 cases and never took action on the rest. The above examples are typical of all 50 cases we questioned. These examples demonstrate that at least a referral for preventive services could have been made. For each case, children are still at risk.

DFS officials  
choose not to  
respond

**Call takers and supervisors should be more diligent in documenting and reviewing calls before categorizing as unable-to-investigate**

The hotline unit call takers did not document on the unable-to-investigate worksheet whether they had checked DFS records for prior child abuse and neglect calls or Referrals for the child's family on 288 of 882 (33%) calls tested. Prior child abuse and neglect calls and referrals are important because they could indicate a family history of abuse or neglect and that the current allegations should be checked out. Prior records could also provide addresses or other needed information the current caller cannot provide, raising the priority of the call from an unable-to-investigate to a child abuse and neglect or Referral. We located prior records for 140 of 333, or 43 percent of all calls tested (the 288 mentioned above and 45 others we questioned). In all 140 instances, the call takers either did not document that they checked for priors or documented fewer prior records than we found.

Not enough is  
done to ensure  
that cases are  
reviewed

From listening to the tape recordings of these unable-to-investigate calls, we noted that hotline unit call takers do not always fully document the call on the unable-to-investigate worksheet, often omitting pertinent information. One call taker did not put any narrative on the majority of her unable-to-investigate worksheets. This omission made it impossible for the supervisor to review the allegations of the call (which supervisors are required to do) to approve the decision. Even so, the supervisor signed off on all the worksheets.

We also noted in 18 of 331 unable-to-investigate calls tested, the reporter called again, gave the same information to a different call taker, and the second call taker classified the case as either a child abuse and neglect report or Referral. This further supports that the initial calls should not have been classified unable-to-investigate.

The causes for improperly categorizing calls as unable-to-investigate may be attributed to a policy in the hotline unit that too narrowly interprets what can be referred for review, the lack of attention by unit supervisors, the lack of thorough review of prior records by call takers, and the lack of a quality control system to detect problems.

### **Hotline unit personnel narrowly interpreted procedures unnecessarily**

According to the hotline unit manager, calls are categorized as unable-to-investigate when they do not meet the criteria for child abuse and neglect, various special referral categories, or 11 specific criteria for preventive service referrals. Our review of this policy disclosed that it is not an effective management tool and it causes calls to be improperly dismissed. For example, a caller could allege that a child is going from door to door begging for food, or that there are drug activities in a child's home and the hotline unit would not consider making a referral for preventive services. The 11 criteria for referral to preventive services were not meant to be exclusive for any case. In fact, the DFS Investigative Manual and guidance provided by DFS Training and Policy personnel confirm that these 11 criteria are not the only criteria to consider when deciding if preventive service is needed.

DFS trainers and policy specialists stated the 11 situations listed in the manuals are only the more severe examples and are not the only situations that should be considered appropriate for preventive service. Preventive services are intended to prevent child abuse or neglect from occurring. According to the DFS training supervisor a preventive service referral is any call where no specific incident of abuse or neglect has occurred, but the caller has concerns for the family.

### **Unable-to-investigate calls are not included in the hotline unit quality control system and the limited quality control placed on these calls is not effective**

Hotline unit senior officials advised that incoming calls received are subject to random supervisory check. This check includes reviewing documentation by the call taker and listening to the tape recordings of the calls to ensure that they are satisfied with the call taker's response. This quality control measure assures the officials that they can identify judgment errors or identify staff training needs.

However, once a call is categorized as an unable-to-investigate call, the only quality control measure used is the supervisor's signature, which signifies agreement that it is an unable-to-investigate call. Audit results disclosed that supervisors never listen to the tape recordings of the calls, and do not know that information recorded on the unable-to-investigate worksheets is incomplete. This is troubling because the unable-to-investigate call is the most vulnerable to judgmental error and the impact of the error is to do nothing for the endangered child. The implication of the terms "unable-to-investigate" is that the call cannot be investigated—there is some missing information that does not allow the call taker to take action. However, as discussed previously, this is not the case. Call takers are making judgments based on narrow interpretations of policies that could and have led to making inappropriate decisions.

Unable to investigate or won't investigate?

Review of the hotline unit monthly and yearly production reports for calendar year (CY) 1999 indicated that although the hotline's average unable-to-investigate calls are 25 percent of total calls received, some call takers had unable-to-investigate average percentages as low as 11 and as high as 50. Hotline unit management should have

discovered these inconsistencies when reviewing the monthly production reports. These reports could help identify workers who need more training or call takers who need more management monitoring.

Our 2-month review of unable-to-investigate calls, previously discussed, identified that workers who unjustifiably categorized multiple calls as unable-to-investigate often had above average unable-to-investigate percentages:

- A new call taker who was in her first month made multiple errors on unable-to-investigate calls and she classified 48 percent of her calls as unable-to-investigate. This high rate suggests there is reason for concern about the adequacy of the hotline unit training program and/or the adequacy of supervisory monitoring of the new workers.
- One experienced call taker has categorized 50 percent of the calls received as unable-to-investigate for the last 3 years. At one point in CY99, this call taker's percentage of unable-to-investigate calls was 60.
- The call taker who failed to document a narrative for most of her unable-to-investigate calls also had multiple errors on our 2-month unable-to-investigate review and classified an average of 35 percent of all her calls in CY99 as unable-to-investigate.

The record keeping system for unable-to-investigate calls is not currently conducive to effective quality controls and needs to improve. There are no tape or manual records of unable-to-investigate calls after 6-months and all written records are destroyed after 60 days. Manual unable-to-investigate worksheets are not filed in an easily retrievable manner and are destroyed after 60 days, leaving no written record of the call. Although the tape recordings of these calls are retained for 6 months, they are not easily retrievable without the worksheet, so the tapes are only useful for 60 days. After 6 months, the tapes are erased and there are no records of the calls.

Quality control is not effective

Better quality control would include (i) retaining all documentation of unable-to-investigate calls for the same period as other calls, (ii) ensuring documentation of the call on the worksheets is complete, (iii) reviewing production reports to identify problem areas, (iv) trending of calls to determine how many are received on the same victim (whether or not they were categorized as unable-to-investigate), and randomly listening to tape recordings of unable-to-investigate calls to ensure call takers and supervisors made the appropriate decisions. Additionally, we found that one state compiles unable-to-investigate calls and refers the victim to the county office for review after three unable-to-investigate calls with similar allegations from different sources are received. A similar system would be helpful and would serve as a final check on the quality of the unable-to-investigate decision.

**Children were left at risk because local offices did not always act on child abuse and neglect reports and Referrals from the hotline unit**

There is no assurance that the county offices will act on calls referred to them by the hotline unit. In February 2000 we visited a field office to review local abuse report handling. One referral we asked to review had not been retrieved from the automated referral system and no action had been taken even though the office received the referral nearly 3 months earlier. The office did not know about this call until our request. To determine the extent of the problem, we checked for similar delayed handling in other counties for the 3-month period of December through February.

Reports of abuse were ignored

We found 33 calls in the 3 months that received no action because the county staffs never retrieved the calls from an automated referral system. We also found 10 calls that remained on the automated referral system for up to 7 days or more before being retrieved for action. Such inaction left some of the children listed in these calls at risk. Many children may have been similarly ignored in the past, but because the automated referral system only displays calls for a 3-month period, there is no way to determine the historical magnitude of this problem. Our audit also found that DFS officials could have identified these unretrieved calls by reviewing monthly overdue listings and following up on cases more than 1 month old. Adequate review would have detected the child abuse and neglect reports not taken off the automated referral system for action.

In response to these problems, DFS management issued corrective policy to their staff during June 2000. However, managers did not monitor if the staff followed the new policy. To ensure the corrective action worked, we again reviewed the automated referral system in August and found another 27 referrals that were not retrieved in the 3 months from May 1<sup>st</sup> through July 31<sup>st</sup>.

Initial DFS corrective action not effective

During September 2000, the DFS responded to our second review

- indicating that 4 of the 27 incidents still on the automated referral system on our August review had not been acted on by the local office until we brought this to their attention, and
- outlining a new corrective action plan that included periodic Central Office monitoring that may address these problems.

**Inconsistencies and errors in case handling at field offices could be improved by initiating quality control and peer review programs**

The lack of adequate, systemwide quality controls or peer review programs prevented DFS management from identifying inconsistencies and errors noted during our field visits and case handling reviews.

During our audit we visited five field offices to review case processing activities for appropriateness and consistency with policy. We interviewed both Area and county front-line and administrative personnel to ensure we understood how each office applied the various DFS policies and procedures. We reviewed case files to evaluate policy compliance. Audit tests disclosed:

- Required supervisory review and approval was not done or was not documented on 30 percent of 181 cases reviewed.
- Child contact was not initiated within 24 hours as required on child abuse and neglect reports for 11 percent of 187 cases reviewed.
- Required notification to involved parties that investigations were going to take over 90 days to complete was not sent in 40 of 40 (100%) delayed cases reviewed.
- Required risk assessment forms were not completed for 20 percent of the 35 investigations reviewed.
- Case files contained no record of sending the required perpetrator notification of the right to appeal in 9 of 95 affected cases.

The DFS needs to implement adequate quality controls or peer review systems to ensure case handling errors or policy noncompliance by field offices are identified and corrected.

#### **The Child Abuse and Neglect Review Board overturned substantiated findings**

During state Fiscal Year (FY) 99, the review board overturned on appeal 40 percent of all investigations substantiating probable abuse. (*See Appendix III, page 48, for a more detailed description of the review board appeal process.*) The cases reviewed and overturned by the review board in FY 99 and FY00 are shown below:

| <i><b>Fiscal Year</b></i> | <i><b>Number Reviewed</b></i> | <i><b>Number Overturned</b></i> | <i><b>Percent</b></i> |
|---------------------------|-------------------------------|---------------------------------|-----------------------|
| <b>1999</b>               | 301                           | 119                             | 40                    |
| <b>2000 (9 Mo)</b>        | 185                           | 58                              | 31                    |

Audit tests disclosed that the review board cited poor case management as the reason for 26 percent of the overturns of cases in FY 1999. The review board defined poor case management as

- incomplete interviews with child abuse victims,
- incomplete interviews with collateral witnesses,
- failure to collect available documentation or evidence to support allegations,

- improper investigation procedures,
- incomplete reports,
- poor question formulation in interviews,
- poor writing skills, and
- poor case presentation skills.

The DFS has been aware of these investigation problems for at least 4 years. They hired a former review board member in 1996 as an employee to study cases brought to the review board to determine how the cases could have been better managed. The former board member reviewed 250 case appeals and attended review board hearings for 18 months. The employee provided four memos from August 1996 to January 1998 to the former DFS Director outlining her findings and suggestions for decreasing the number of overturns due to poor investigations. She suggested that workers receive specialized case investigation and presentation training. She recommended that DFS officials notify DFS workers when a finding is overturned and describe the deficiencies causing the overturn. She stressed the need for supervisory involvement to help ensure the deficiencies were corrected.

DFS  
executives  
ignored  
suggestions

On January 22, 1998, the former DFS Director responded that nothing could be done. As a result, 5 years have elapsed and the same problems are occurring—high overturn rates and no action to remedy the causes. The former review board member, out of frustration, accepted a different job opportunity with the Department of Social Services.

Our review of overturned cases and discussions with review board members and DFS employees revealed the following:

- **DFS did not correct 14 instances of overturned probable cause findings in the computer record system.** As a result, the name of the alleged perpetrator remained on the abuse registry, which can subject DFS to litigation, and it is unfair to the alleged perpetrator.
- **DFS was not represented at 22 of 465 (5%) hearings during 1999 and 2000.** In instances when DFS was not represented at the hearings, the review board overturned the finding decision on 10 cases or 33 percent in FY99 and in 71 percent of cases during the FY00 to date (July 1999-March 2000). The failure to appear at appeal hearings to explain probable cause findings could contribute to the review board overturning the findings. In addition, state regulations require that appropriate local and area division staff and/or legal counsel represent DFS in the appeal hearings.
- **DFS only represented 1 of 33 children in state custody in appeals hearings during FY 1999 and FY 2000.** Social workers assigned to children in state custody

DFS not  
represented in  
22 appeal  
hearings

revealed they were confused as to their responsibility to represent the child in appeal hearings when an investigation has found probable cause of abuse by a foster parent or residential home worker. While the DFS is not required by law to represent the child in these hearings, it is the responsibility of the legal custodian to decide whether and by whom the child should be represented. The DFS or a Guardian ad Litum should usually represent these children in appeal hearings.

- **Notification letters to perpetrators are not sent by registered mail.** Some perpetrators requested and were granted appeal reviews from “probable cause” incidents as far back as 1995 even though under state law the alleged perpetrator only has 60 days after notification to request an appeal hearing. These late appeals occur because the DFS has no proof the perpetrator received the required notification letter sent after the original finding. If DFS sent the notification letters by registered mail as several other states do, they would have the necessary proof to prevent outdated appeal hearings.

Late appeals  
can be avoided

### **Cost reduction initiative cut Children’s Treatment Services**

Two high level supervisors told us the utilization review contributed to delays in providing services and may ultimately have been one contributor to one child’s death from abuse. The worker was considering how to obtain needed services in view of DFS management’s orders limiting children’s treatment services expenditures and using only Medicaid covered services where possible. During the time the worker was trying to locate drug counseling services the child died. At the time of the death, the delay had been over 2 weeks and although the death might still have occurred absent the children’s treatment services expenditure cutbacks, the concerns of the high level supervisors appear to be warranted.

Staff believes  
service  
cutbacks were  
detrimental

The children’s treatment services program provides for many different services to children and families, including counseling, therapy, psychological evaluations, drug screenings, and paternity testing. DFS senior managers realized in early March 2000, that if spending for these services continued at the then current rates, expenditures would exceed available funding. These senior managers ordered staff to perform a utilization review. The Central Office mandate required that every authorization for children’s treatment services be reviewed by staff above the supervisor I level, and any new service requests had to be thoroughly documented and forwarded to the Area Office for approval. All Medicaid eligible children would receive services from a Medicaid provider, thus avoiding use of children’s treatment services funds.

According to DFS management, they intended the review to ensure that Medicaid covered services would be used in place of children’s treatment services funds because of the funding limitation problem. They assured us that they did not cut essential services and have approved new authorizations if it was in the best interest of the child.

## **Front line staff and supervisors say children are going without needed services**

Although Central Office officials stated they did not intend for services to be cut or for children to go without needed services, social workers insist the message they received was to cut services, which caused some children to go without needed services. This inconsistency may be attributed to DFS' decentralized communication and management style. For example, the following are the instructions received by social workers in one office regarding the utilization review process :

“If there are children receiving children’s treatment services for therapy, they will be cut off as of March 31. Unless court has ordered you to provide a specific number or hours per week or month, cut whatever they have in half,” and in closing, “. . . it is my recommendation that you do not suggest or imply to any court official that a service will be put in place if they order DFS to pay for it. If word were to get out that you had taken such action . . . well, you can fill in your own blank.”

The concerns noted below were received from front line staff and supervisors in response to our questionnaires and discussions. These conflict with the Central Office stance that no children have been harmed by this review.

A supervisor stated:

- “DFS is no longer able to provide preventative services to children and their families. Only after the family is in serious trouble will DFS give them the services they need.”

Social Workers stated:

- “If the services were not ordered by a court or if the child could not receive services through a Medicaid provider the child was actually going without needed services.”
- “Some kids had seen a counselor for 4-5 months and then had to start seeing a new counselor who is Medicaid eligible, it was just like having the child start over.”
- “In my county there is only one Medicaid provider, and those people don’t have the needed background in child abuse and neglect like other children’s treatment services counselors, so we have no choice but to send children to these unqualified providers.”

## **Inadequate Preventive Service Referral policies leave children at risk**

The hotline unit classifies calls concerning (i) parents who abuse alcohol and drugs, (ii) children with inadequate food and hygiene, and (iii) children with inadequate shelter (those who face

eminent eviction, homelessness or utility shutoff) as unable-to-investigate instead of considering a preventive service referral or a child abuse and neglect referral. We attribute this problem to the hotline unit's narrow interpretation of DFS policy. Preventive service referrals are calls made by permissive reporters (those not mandated) where no actual abuse or neglect has occurred, but where the actions of the child, caretaker, another juvenile or adult demonstrates the need for intervention and possible service delivery to prevent child abuse and neglect from occurring.

### **Hotline unit handling of preventive service referrals:**

The DFS training and policy personnel gave us several examples of what would constitute a preventive service referral. This guidance confirmed our conclusions that DFS should not ignore calls alleging drug and alcohol use by parents, or calls claiming children begged for food. Examples include a concerned citizen who reported children in the neighborhood going around begging for food and reports of children at risk because the parent was in a drug induced stupor. Calls such as these and others should have been classified as preventive service referral and sent to county offices for review and action, instead they were classified as unable-to-investigate, which prevented any action to help the children.

DFS staff stated their opinion, which is not stated anywhere in policy, that drug and alcohol abuse is simply a “lifestyle choice” for parents and does not constitute child abuse if the child is not using. Although the act of abusing drugs and alcohol around children itself does not constitute child abuse, studies have shown that without preventive measures in many such children's lives, they are at great risk of abuse and neglect. DFS staff chooses to ignore these children until an actual act of child abuse or neglect has occurred. Waiting for the effects of these and other problems to be obviously visible is unfortunate and often comes too late for the emotional and physical well being of children.

Preventive  
services  
should be used

The only reports involving drugs and alcohol the hotline unit classifies as child abuse and neglect are those involving:

- Working Methamphetamine labs, because they pose a physical threat to the child.
- Providing drugs or alcohol for consumption to children, only if under 8 years old.
- Forcing children to sell drugs.
- Allowing children under 8 to use tobacco, drugs and alcohol because of the danger of fires or similar problems that could cause physical harm to the child.

DFS managers should expand the hotline unit criteria for accepting calls as preventive service referral and child abuse and neglect calls to include additional areas of concern such as drugs and alcohol abuse by parents, and inadequate food, hygiene or shelter. Even if the hotline unit call takers feel that calls do not meet the criteria for preventive service referrals or child abuse and neglect, they should ensure that appropriate authorities are informed in the case of drug use or sale by parents and inform callers of community services that could help children who are going without adequate food or shelter.

### **Better policy is needed to guide local office handling of preventive service referrals**

Local DFS county offices are not handling preventive service referrals consistently across the state. We attributed these inconsistencies to unclear policy guidance to local offices. Training personnel explained that local offices should see the family and use the suggested assessment techniques to get to know the family's strengths/needs and determine services that can best help the family and protect the children. Local DFS office handling of preventive service referrals varied from visiting with the family and filling out assessment forms to simply returning the reporter's call.

Policy guidance is not clear

The DFS should issue clear policy guidance for the handling of preventive service referrals and use quality control and peer review programs to ensure the policy is implemented consistently across the state.

### **Mandated reporters often have a negative perception of the DFS**

We received several calls from mandated reporters during our audit where the caller expressed concern with how DFS handled their calls. Based on these calls, we conducted a survey of 1,530 mandated reporters throughout the state and confirmed that there is a perception problem with mandated reporters. This result confirms the result of DFS' own study done in August and September 1999, however DFS managers had not taken any corrective action. The DFS has contributed to this perception by:

- Not contacting the mandated reporter within the required time frames for both child abuse and neglect reports and Mandated Reporter Referrals.
- Not informing mandated reporters of the outcome of their calls.
- Not providing adequate policy and guidelines for handling Mandated Reporter Referrals.
- Assuming mandated reporters are aware of the hotline system and how it works.
- Not taking steps to correct mandated reporter misunderstanding of the hotline system.

State law requires certain professionals such as physicians, nurses, teachers, and police officers having reasonable cause to suspect a child has been or may be subjected to abuse or neglect or observing a child being subjected to such conditions or circumstances to immediately report to the DFS. However, what should be reported is not always clear to these reporters. This creates a dilemma for the DFS on how to handle the numerous calls made by mandated reporters. Many abuse reports from mandated reporters do not meet DFS criteria for family intervention, family contact, or even further review by the DFS, while mandated callers expect something to be done. When nothing happens, the negative perception grows. (*See Appendix II, page 38, for more information on laws covering Mandated Reporter rules and Appendix III for additional detailed Mandated Reporter procedures.*)

DFS decided to deal with the mandate for professionals by creating a category for calls from mandated reporters that do not meet child abuse and neglect report criteria. When a mandated reporter calls the hotline unit, the call can either be classified as a child abuse and neglect report or a Mandated Reporter Referral (referral). If a call is classified as a child abuse and neglect report, it will be sent to the county office and the assigned social worker should contact the mandated reporter and initiate action within 24 hours. If not a child abuse and neglect report, the call is classified as a referral. All calls classified as mandated referrals are sent to the local offices where workers are to call the mandated reporter within 3 days (72 hours) so they can agree on community services that might help the family or agree that further action is or is not needed. Audit tests showed that in 31 percent of the referrals reviewed DFS did not contact the reporter in a timely manner. As shown in the chart below mandated reporters indicated in questionnaire responses they are not always contacted by DFS staff in a timely manner.

Until September of 2000, the call back within 72 hours was the only requirement for mandated referrals, but DFS has recently issued new policy and guidance on how workers should document their handling of referrals. In addition to not ensuring mandated reporter calls are returned in a timely manner, DFS officials also do not require letters to be sent to mandated reporters informing them of the outcome and actions taken on their calls.

As the chart confirms, the lack of collaboration and feedback on case outcomes by DFS leads to mandated reporter dissatisfaction.

#### **DFS hotline unit staff could communicate better with mandated reporters**

The hotline unit policies and procedures take for granted that mandated reporters understand the hotline system, when in fact many do not. For example, during September 2000, a mandated reporter who was very concerned about a child she reported as being sexually abused contacted us. When a DFS worker did not contact the caller and the child had not been seen or examined within 24 hours, the caller called the hotline again believing her previous call had been a child abuse and neglect report and questioned why no action had been taken.

DFS hotline staffs do not explain call procedures

Our review of the situation determined the hotline worker did not explain to the reporter that, based on responses to the call taker's questions, the call would be handled as a mandated referral and not a child abuse and neglect report. This misunderstanding caused the call to be downgraded to a referral requiring a call to the mandated reporter within 72 hours when it should have been a child abuse and neglect call requiring investigation the same day. The caller believed the call reported a child abuse and neglect situation and it would be acted on immediately. This misunderstanding caused a 2-year old child to be left at risk of continuing abuse.

#### **DFS staff can improve mandated reporter and public understanding**

The DFS is aware many mandated reporters have a negative perception and attribute the perception to a lack of understanding of the role and powers of the DFS. The hotline unit conducted a survey of mandated reporters during part of August and September 1999 that reconfirmed this image, but DFS management has taken no action to correct the problem. We planned to review the DFS survey results during our audit, but DFS staff destroyed the responses.

DFS didn't work to educate reporters

Our study determined that DFS managers had not taken any proactive action to correct the perception problems with mandated reporters. Possible corrective actions to improve mandated reporter perceptions would include:

- Expanding informational program efforts to inform mandated reporters (and the public) as to how the hotline system works and what they *can* and *cannot* expect to result from a call reporting abuse or neglect. During our research, we noted other states and the St. Louis City DFS office have prepared manuals explaining the entire hotline process to the mandated reporters and providing guidance on what information is needed to make a report. Some states also include this type of information on their Internet websites.
- Using quality control and peer review programs to ensure that mandated reporters be contacted within the required time for child abuse and neglect reports and referrals.
- Sending notification letters to mandated reporters informing them of the outcome of their calls to the hotline unit.
- Ensuring that hotline unit personnel explain expected call classification and handling to reporters so they agree calls are given the proper classification.

#### **DFS Central Office managers need to disseminate preventive best practices to all offices**

DFS managers have not developed a means to identify and disseminate across the system the best preventive practices used in various local offices or in other states. Some of these best practices originated at local DFS offices, but have not been established on a statewide basis by DFS management. The following are best practices that could be implemented to help DFS staff statewide serve the best interest of children's safety.

- A Substance Abuse Specialist is used by St. Louis City DFS (Area 6) to assist social workers in identifying and treating families with substance abuse problems during home visits and family conferences.
- St. Louis City has developed a way to identify and treat chronic neglect families. These families need intensified treatment services to make lasting improvements in their lives. This is one of the first programs of its kind in the nation. St. Louis City staff has frequently presented program details at the request of many other states, but DFS management has not disseminated the program across Missouri.
- St. Louis City has taken a preventive approach to educational neglect. The hotline unit does not take calls reporting education neglect unless the reporter shows exhaustive effort on the part of the school to correct the problem and the child has missed a great deal of school. In contrast, St. Louis City DFS arranged for schools to send a fax notice when a

St. Louis City  
pioneers  
chronic  
neglect  
reviews

child has missed 10 days of school. This allows the local office to initiate early preventive or intervention efforts before the problem becomes more serious.

- In at least some Michigan counties, unable-to-investigate calls are put into the computer system to allow for easy tracking and access and to allow for re-evaluation of the need for possible DFS intervention when a family has three unable-to-investigate calls of similar allegations of abuse from three different sources.

*(See Appendix IV, page 53, for a complete listing of best practices noted during our audit.)*

### **DFS performance goals and measures need improvement**

At least one performance goal and measure used by DFS was not valid or measurable. The DFS goal was to “Increase the number of safe children from 90.7 percent to 91.5 percent.” The measure used was the number of children returned to their home safely from DFS custody, which they defined as “a child who has been home for 1 year without another substantiated incident of child abuse and neglect.” The outcome actually reported by DFS in the FY 2001 Budget Request for this goal was 98.2 percent, but audit analysis showed the measurement was not valid.

DFS managers used a partial year measurement instead of a complete calendar year for each child. As a result, a child who was returned home in the last month of the FY was counted as safe for the entire year instead of just safe for 1 month. In addition, the measure did not include the children removed from their homes during family assessments, children removed from their homes because of referrals, or children who received some type of services but were left in their homes. During FY00, DFS managers realized this error and began using a full-year measurement. In the future when measuring and reporting its performance, DFS managers should ensure the performance goals used are valid and measurable and should not exclude major segments of the population it seeks to protect and/or serve.

### **Conclusion**

We realize that the role of DFS staff in receiving and processing hotline calls and cases is very difficult. DFS staffs are always under scrutiny for whatever decision they make on a call. We also realize no one in DFS wants a child at risk to remain at risk and DFS staff make many decisions that are right for the family and the child. The audit, however, disclosed that improvements in management are necessary and needed to ensure that children are not at risk when they do not have to be. The issues we have discussed in this section of the report and will discuss in the next section concern the role of top management in DFS. Senior officials will need to take a proactive role in ensuring their organization is functioning as they envisioned and in the best interest of the public. These officials need to take the responsibility and accountability for establishing effective quality controls to ensure decisions are properly made and to ensure staff receive the support they need to make and document decisions. Senior officials need to heed the concerns of staff and reviewers and proactively identify problems and resolve them. Our recommendations will assist in identifying some of the things that need to be done.

## **Recommendations**

We recommend DFS officials:

- 1.1 Implement a structured decision making tool to increase consistency and accuracy in making intake, screening, risk assessment, service and placement decisions.
- 1.2 Require that hotline unit call takers check DFS records for prior reports of abuse on the child or family and document that check.
- 1.3 Ensure unable-to-investigate worksheets document completely and appropriately the phone reports of abuse received by the hotline unit.
- 1.4 Improve the hotline unit quality control review process to ensure unable-to-investigate decisions are appropriate.
- 1.5 Enter unable-to-investigate records into the automated Production System and retain them.
- 1.6 Retain tape recordings of hotline calls for possible use in future criminal prosecutions or for review board hearings.
- 1.7 Ensure reports are retrieved and acted on by field office staff by establishing a quality control system that requires the hotline unit to reconcile reports sent to field offices to reports printed and taken off the system for action.
- 1.8 Establish a peer review quality control system to ensure policies and practices are consistently followed and applied throughout the DFS child abuse and neglect response system.
- 1.9 Readdress the DFS study of overturns by the Child Abuse and Neglect Review Board on appeal of probable cause findings and take appropriate corrective action as suggested in the report.
- 1.10 Establish quality controls that ensure the child abuse central registry and local case records are appropriately corrected to remove the probable cause finding when the alleged perpetrator wins an overturn on appeal.
- 1.11 Develop a quality control system to ensure DFS is represented at Child Abuse and Neglect Review Board hearings as required by statute.
- 1.12 Ensure Children's Services workers are provided adequate guidance and training on their responsibility to make appropriate decisions on whether to represent DFS custody children in probable cause finding appeal hearings.
- 1.13 Send perpetrator notification letters by certified return receipt requested mail.

- 1.14 Redefine hotline unit criteria definitions for preventive service referral classifications to better allow for the best interest of children to be served.
- 1.15 Provide better policy and guidance to field staff on the handling of preventive service referrals.
- 1.16 Improve the understanding of the child abuse and neglect system by mandated reporters and the public by improving the quality and quantity of detailed information easily available. The DFS should increase efforts to explain what can be expected from the system.
- 1.17 Send responses to mandated reporters on the outcome of every call and the reasons for action or inaction.
- 1.18 Ensure that hotline unit call takers make clear to mandated reporters what action can be expected based on the information provided.
- 1.19 Develop methods to identify and disseminate best practices throughout the DFS system.
- 1.20 Ensure DFS children's services goals are valid and measurable.

#### **Division of Family Services Comments**

The Division provided a response that indicated general agreement with the recommendations and contained reasonable implementation dates. Some responses were not clear or adequate and these will be followed up on during our followup process. The Division's detailed comments are found at Appendix VII, page 62, and the State Auditor's Office detailed comments are found at Appendix VIII, page 63.

## **2. DFS Senior Officials Need to Invest in Their Field Staff to Ensure They Have The Best Opportunity to Accomplish Their Duties**

DFS Central Office has not been as supportive of field staff as they need to be. Field staffs are expected to carry unreasonable workloads while at the same time they have not received competitive salaries, modern tools, and training that could alleviate some of their burden. Audit tests disclosed overdue Child Abuse and Neglect Reports and morale problems. We attribute these problems to workers not being provided with adequate:

- Pay. Missouri ranks 45<sup>th</sup> out of the 50 states in basic pay. Supervisory pay level differentials are miniscule compared to salary structures in surrounding states.
- Equipment such as computers, cell phones, dictation machines or transcription services, and telephone voice mail.
- Training on the two-track approach (Investigation/Family Assessment).
- Specialized training on case development and presentation to appeal boards.

As a result, field staff cannot (i) complete tasks within established timeframes, (ii) accomplish tasks efficiently, (iii) have confidence in decision-making, or (iv) ensure that DFS has the best opportunity to prevail in appeal hearings.

### **One Third of the Child Abuse and Neglect Reports in 1999 were not completed in a timely manner**

Audit tests showed that as of February 3, 2000, there were a total of 4,482 overdue child abuse and neglect reports, and 36 percent of the overdue reports were more than 3 months overdue.

Many child abuse and neglect reports are overdue

The DFS local county offices are responsible for conducting an investigation or family assessment review for each child abuse and neglect report received from the Child Abuse and Neglect Hotline, and under Section 210.145 (12), RSMo, the resulting child abuse and neglect reports must be completed within 30 days and the results entered into the computer record system.

*(See Appendix II, page 37, for a more detailed description of the statutory requirements.)*

The following table shows the number and percentage of overdue reports by state geographic area.

### Overdue Reports by Area as of 2/3/00

| <i>Area</i>  | <i>Location</i>  | <i>Number<br/>Overdue</i> | <i>Percent<br/>Overdue</i> |
|--------------|------------------|---------------------------|----------------------------|
| <i>1</i>     | St. Joseph       | 109                       | 3                          |
| <i>2</i>     | Fulton           | 827                       | 19                         |
| <i>3</i>     | Cape Girardeau   | 139                       | 3                          |
| <i>4</i>     | Springfield      | 1,453                     | 32                         |
| <i>5</i>     | Jackson County   | 776                       | 17                         |
| <i>6</i>     | St. Louis City   | 323                       | 7                          |
| <i>7</i>     | St. Louis County | 855                       | 19                         |
| <i>Total</i> |                  | 4,482                     | 100                        |

The DFS officials attribute this high volume of overdue reports to the high volume of new child abuse and neglect reports received and to low staffing levels, causing the paperwork on previous reports to be preempted by work needed to review the new child abuse and neglect reports of children at risk.

The DFS officials reduced the number of overdue reports to just over 3,000 by May. Officials accomplished this decrease in overdue reports after some areas and counties requested permission from management to pay overtime for extra workdays for workers to catch up on the overdue reports. Area and local management staff had to ask for paid overtime because the workers often have already accumulated compensatory time they cannot take because of their heavy caseloads.

The decrease in the number of overdue reports was only temporary because by October the volume increased again. These increases are occurring because of staffing and workload imbalances. This is most evident in Area 4 (Springfield area). Area 4 was responsible for 46 percent of the child abuse and neglect reports over 3 months overdue and for 73 percent of all DFS case reports over 1 year overdue. Even with the reduction of the number of overdue reports, Area 4 increased in percentage of overdue reports from 32 percent to 43 percent. This indicates an imbalance in the workload and staffing of Area 4 compared to the rest of the state. As the above table shows, similar imbalances are occurring in Areas 2, 5, and 7.

#### **DFS does not consider relevant information when allocating staff**

The DFS method of determining worker position allocation has caused several counties to be severely understaffed while other locations have open positions they cannot fill by hiring more workers. For example, during April 2000, St. Louis County (Area 7) had 60 open positions they could not fill, while Greene and Jasper counties (Area 4) were only authorized at 64 and 33 percent respectively of the staff position allocations needed to meet Council on Accreditation standards. (*See Appendix III, page 51, for discussion of the council and its mission and requirements*). This has contributed to Area 4 worker overload and the highest level of overdue reports in the state. The St. Louis County DFS administration explained the 60 positions could not be filled because competing organizations, including the state of Illinois, paid better and had more

DFS staffing  
approach  
causes case  
overloading

manageable workloads. The Greene County administration said they do not have as much difficulty filling their allocations.

The maximum caseload for a social worker recommended by the council is 15 new cases at one time, or continuing services on 30 prior cases, or a combination of the two. Additionally, the council recommends that organizations such as DFS adjust their protective services worker caseload to allow for variations in complexity of cases, range of family support services available to augment the worker's role, number of cases per worker at any one time involving investigation or intensive intervention, and travel and other non-direct service time required to fulfill the workers' responsibilities. DFS managers do not make such adjustments. Instead, they determine staffing allocations by dividing the number of cases an area had the previous year by the council's suggested maximum workload per worker.

DFS managers have not performed a workload or time study to determine the necessary time required to complete each type of case, and, in several instances, could not or would not provide adequate related information we requested to perform a staffing analysis.

DFS managers need to perform time and work load studies to determine the necessary worker time required for each type of case taking into consideration all the factors mentioned above. Careful analysis of such factors would help the DFS identify staffing needs and pinpoint problem areas that would warrant attention. A workload and staffing analysis, properly used, could reduce case handling delays and improve the quality and timing of services provided to children. It would serve as the basis for deciding which areas need staff or whether a special team of workers would be needed to serve as "hotspot" specialists, deployed as needed wherever the workload approaches imbalance in the local field offices.

Based on a request for more staff to meet the accreditation standards, DFS increased staff after April 30. However, without the proper development of workload and staff analyses, DFS managers will not be able to effectively deploy staff and efficiently manage the workload.

### **Social worker compensation needs to be more competitive to enable DFS to hire and retain qualified workers**

DFS officials have difficulty recruiting and retaining the social workers needed to deal with child abuse and neglect, because Missouri's base salary for a beginning social worker is too low to compete with private industry and other surrounding states. Missouri ranks 45<sup>th</sup> in the nation in base salary ahead of only South Carolina, Louisiana, Kentucky, Tennessee and New Hampshire. Missouri does not compare favorably with contiguous states. The following table compares Missouri DFS social worker and supervisor base salaries with the salaries paid by four states contiguous to Missouri.

| <i>Salary Comparison to Contiguous States</i> |                            |                                       |                             |                                       |                             |
|---|----------------------------|---------------------------------------|-----------------------------|---------------------------------------|-----------------------------|
| <u>State</u>                                  | Base Salary<br><u>SW I</u> | Amount of Raise<br>to<br><u>SW II</u> | Base Salary<br><u>SW II</u> | Amount of Raise<br>to<br><u>Sup I</u> | Base Salary<br><u>Sup I</u> |
| <i>Missouri</i>                               | \$22,248                   | \$2,208                               | \$24,456                    | \$984                                 | \$25,440                    |
| <i>Arkansas</i>                               | \$23,433                   | \$1,498                               | \$24,931                    | \$3,358                               | \$28,289                    |
| <i>Illinois</i>                               | \$25,836                   | \$2,292                               | \$28,128                    | \$4,152                               | \$32,280                    |
| <i>Kansas</i>                                 | \$26,000                   | \$2,704                               | \$28,704                    | \$4,493                               | \$33,197                    |
| <i>Oklahoma</i>                               | \$26,083                   | \$2,592                               | \$28,675                    | \$5,803                               | \$34,478                    |

These low pay rates make it difficult for the Missouri DFS to compete effectively with contiguous states for social workers and supervisors. This is particularly true for Missouri's two major metropolitan areas. For example, both St. Louis City and County DFS officials voiced concerns over not being able to fill all their 122 unfilled open positions as of April 2000. They explained they could not compete with the pay level of Illinois (a difference of \$3,588 in starting salary) or private organizations because of the state's low salary and heavy caseload for workers. Even when they are successful in hiring workers, the workers often do not stay with the DFS. In comparison to competing employers, DFS workers in the St. Louis area are expected to handle double the caseload because of the shortage of workers protecting Missouri's children.

DFS unable to fill 122 open positions in St. Louis

Because of low worker and supervisor pay levels, the Missouri DFS is often considered only a temporary position that allows workers to gain social work experience, before moving on to better paying positions. Given the disparity in supervisor pay between Missouri and the contiguous states, there is little incentive for workers seeking advancement to supervisory level positions to stay with the DFS.

Low DFS pay causes high worker turnover

We asked former employees why they left DFS Children's Services. As shown by the following chart, 58 percent of the respondents said they left because of low pay and/or high caseloads (overworked/underpaid and better job/higher pay).

**Financial incentives for obtaining advanced degrees and licensing is needed to obtain and retain qualified staff**

DFS officials do not pay additional salary to staff that obtain a Master's degree. Similarly, they do not require workers to be licensed social workers and do not provide any increased compensation for achieving professional licensing. Our audit research of pay practices in other states showed several states give salary increases to workers with a Master's degree and similarly require and pay more for workers to be licensed. One former DFS supervisor told us when she transferred to Missouri, she had to take a \$10,000 per year pay cut to work in the Missouri DFS even though she was licensed in four states and held a Master's degree.

**Inadequate compensation may keep DFS from meeting accreditation goals**

Missouri is currently applying for accreditation by the Council on Accreditation for Family and Children's Services, Inc. The council accomplishes its mission by developing standards of best practice, delivering a program of provider recognition and accreditation, providing educational and technical assistance programs, and advocating for policies that promote high quality services for families and children.

To be accredited the council recommends that:

- Supervisors of child protective workers monitor no more than seven experienced and professionally trained workers.
- Caseloads not exceed 15 new cases or continuing services on 30 prior cases or a combination of the two at one time.
- All social worker supervisors have a Master's degree.

Audit tests showed that:

- The DFS meets the supervision ratio in most areas of the state.
- State legislators have supported the accreditation process by increasing staffing allocations.
- The DFS plans to meet the supervisor education goal by making social work specialists, who have their Master's degrees, available for consultation with supervisors who do not have a Master's degree.

According to our discussions with St. Louis County officials and other DFS staff, and reviews of former and present employee questionnaires, DFS may not be able to fully meet the accreditation case load to staffing ratio goals without providing increased pay, better staffing allocation, and compensation for advanced degrees.

## **Current technologies could be put to better use to allow workers to use their time more efficiently and effectively**

The audit found many workers do not have ready access to computers or must share computers, must type or handwrite their own reports on manual forms and share or provide their own cell phones. Sharing or using personal cell phones limits worker efficiency that state owned cell phones would alleviate. Workers could perform their jobs more efficiently, effectively and safely if they were provided with laptop computers, dictation equipment and transcription services, computerized forms, voice mail and cellular phones. The lack of this modern technology contributes to the inability to complete timely reports and directly impacts the rate of overdue reports and stress on the workers for not completing reports on time.

Efficiency  
could be  
improved

In addition to the morale problems caused by not having proper technology and increasing pressure to meet unreasonable deadlines, the outcome of overdue reports and improperly prepared reports affects the ultimate outcome of resolution of the child abuse case. As discussed in Result 1 in this report, untimely reports can cause overturns of substantiated cases by the review board. Untimely reports could have an impact on the availability to the call taker of a prior record on the perpetrator. Therefore, it is incumbent upon senior managers to make sure the field staff have the best equipment and technology to improve the product that field staff produce and to improve employee morale, which will ultimately improve staff retention rates.

## **Social workers, supervisors and county directors need more training to be comfortable with their decisions**

A total of 76 of 524 (15%) social workers and supervisors in our survey stated they had concerns about the adequacy of the training they received. New social workers are given 3 weeks of formal training in a classroom setting to provide an overview of what their job will entail. Each local office determines what additional formal training (if any) is needed, before the worker starts actual on-the-job training. Beyond the initial training, the central office provides no additional specific training on how child abuse and neglect investigators should ensure their assigned cases are properly screened and assessed or investigated. Similarly there is no guidance from central office managers on how investigations should be documented and presented so decisions can withstand appeal or prevail in court proceedings.

### **Training on the two-track system was not adequate**

DFS left children at risk of continued abuse or death because training on the two-track (Investigation/Family Assessment) system was not adequate. With the two-track system, DFS intended to shift the focus toward a greater preventive effort, rather than only performing investigations as were previously done. The Family Assessment approach requires a thorough study of the family's strengths, weaknesses and needs. The study involves the family and is intended to provide preventive services that would prevent abuse, or additional abuse by first time perpetrators of less serious abuse and/or neglect. However, our field visits, questionnaires, and discussions with DFS employees and employees of other organizations showed that children are often left at risk by:

- Incorrect screenings of child abuse and neglect calls as Assessments when they should have been Investigations. (*Refer to examples previously discussed on pages 3 and 4*)
- Staffs being more likely to screen child abuse and neglect calls as Assessments because they are viewed as easier and quicker than Investigations, while DFS officials correctly state that Assessments, when done correctly, should be just as thorough and effective, if not more so, than Investigations.
- Staffs not performing complete Assessments.
- Workers not being comfortable with their decisions. Sixty-five percent of the workers polled in our questionnaires stated they did not receive enough training on the two-track system to always make accurate and correct decisions.

Interviews and questionnaires revealed that county directors, supervisors, and social workers often believed training on how central office management expected the two-track (Investigation vs. Family Assessment) system to be used was not adequate. Significantly, the DFS has not performed adequate quality control checks or peer reviews to determine if the two-track system worked correctly and consistently when it went statewide in May 1999.

The DFS should provide additional training to staff on the two-track system's purposes, goals and procedures. Additionally, in the future, DFS should ensure staffs receive adequate training and use quality control and peer review programs to ensure correct and consistent implementation of the new tools.

**Specialized investigation training is needed to reduce overturns of decisions because of poor investigations**

Our review of overturned decisions and discussions with present and former review board members revealed probable cause conclusions are often overturned because of poor investigation procedures or lack of adequate documentation. For fiscal year 1999, the review board overturned on appeal 40 percent of cases that were initially found as substantiated abuse or neglect. Following are examples of the review board's reasons for overturns during fiscal year 1999 and 2000 appeals hearings:

- ❑ "Despite compelling evidence that the girls were victims of sexual abuse, there was insufficient evidence to support the finding that the (alleged) perpetrator was involved."
- ❑ "Perpetrator is likely guilty, but the DFS report had too many discrepancies!!! The DFS report was incomplete and no effort was made to clarify discrepancies. The victim was never evaluated medically for rape."
- ❑ "There was insufficient evidence to support the DFS investigator's failure to see the child in a timely manner (one month after child's injuries), and the Investigator did not talk to the accused perpetrator."

As discussed in Result 1, proper case development by DFS investigators was of major concern to the review board. The DFS should provide specialized training to workers performing investigations to ensure substantiated cases will withstand administrative appeal and criminal court proceedings. An alternative would be for the DFS to hire workers having a criminal justice education or experience background to perform investigations of child abuse and neglect, similar to practices in Arkansas.

### **Workers are not always receiving adequate supervisory guidance**

Half of the DFS employees (current and former) responding to our questionnaires stated they did not always receive adequate guidance from supervisors. The Children's Services social workers face very difficult decisions every day, and often feel a need for supervisory assistance and direction. Many of these directors and supervisors do not have a Social Work degree or child abuse and neglect investigation experience, and thus are not always able to give adequate support and supervision to their Children's Services social workers.

Half of  
workers  
wanted more  
guidance

Several county directors and supervisors, who have backgrounds in Income Maintenance, instead of children services indicated through questionnaires that they are uncomfortable with their role of supervising social workers because their experience and background is in Income Maintenance instead of Children's Services. One county director said, "I am not a social worker however, I am a County Director who is responsible for the direct supervision of two social workers and all other staff in our county office. I do not have any degree and do not feel that I have had the proper training to do my job as it should be done." That director went on to say he does not know what will happen once the experienced social workers retire because he cannot provide the necessary direct guidance to less experienced social workers. Problems such as this typically occur in smaller population counties where social workers must handle all types of Children's Services. These duties include child abuse and neglect investigations and family assessments, adoptions, foster care, independent living, residential treatment services, and ongoing family centered services. Low population counties typically lack adequate staffing levels to allow assignment of specialized investigators and supervisors.

Supervisors  
said they need  
more training

A staffing best practice was instituted in Area 4 where Pulaski, Texas, Maries, and Phelps counties joined forces to form an Investigation Team responsible for performing all investigations in the 4-county area. The team consists of seven investigators and one supervisor. This approach allows these lower population counties to designate specialized investigators who work under an adequately trained and experienced supervisor. This approach should be considered for other rural county groups throughout the state.

## DFS managers need to better manage the accumulation and use of compensatory time

As of April 5, 2000, social workers had a total compensatory time balance of over 102,700 hours with a resulting payoff liability of nearly \$1.4 million. This results in an average of over 65 hours and over \$880 per worker. Below is a summary of compensatory time averages by state area.

DFS owes  
\$1.4 million in  
compensatory  
time

Average Compensatory Time Balances

| <i>Area</i>             | <i>Avg Hours<br/>Per Worker</i> | <i>Avg Liability<br/>Per Worker</i> |
|-------------------------|---------------------------------|-------------------------------------|
| <i>St. Joseph</i>       | 87                              | \$1,182                             |
| <i>Fulton</i>           | 66                              | 875                                 |
| <i>Cape Girardeau</i>   | 58                              | 772                                 |
| <i>Springfield</i>      | 56                              | 771                                 |
| <i>Jackson County</i>   | 81                              | 1,095                               |
| <i>St. Louis City</i>   | 52                              | 729                                 |
| <i>St. Louis County</i> | 61                              | 859                                 |

Saline County has the highest average per worker, totaling 240 hours and an average liability of over \$3,118 per worker. The worker having the highest balance works in Jackson County (Area 5). That worker accumulated 872 hours or nearly 6 months' compensatory time and a resulting liability for the DFS of over \$11,981.

The DFS policies regulating compensatory time earnings and use are not adequate. DFS compensatory time policy provides for workers to accumulate compensatory time and then be paid for it when they separate from service. There are no requirements for when compensatory time should be taken or priority of compensatory time leave over other types of leave. For example, other agencies set maximum allowable compensatory time balances and workers must use their compensatory time before they use accumulated Annual Leave. The payoff policy does not encourage workers to take the time they earned and could result in an incentive to separate from service if the employee is considering other employment. The compensatory time payoff could be a determining factor in whether they accept the new opportunity.

The DFS managers do not effectively use a monitoring system to manage workers' accumulation and use of compensatory time. While reports of compensatory time are generated, central office personnel do not use them in planning, staffing or identifying problems. In addition, the reports are not sent to county directors who told us such reports would be very useful. This lack of adequate monitoring has led to some social workers accumulating excessive compensatory time balances.

## **Recommendations**

We recommend that DFS management:

- 2.1 Ensure that the child abuse and neglect investigations and/or assessments are completed within the required time frame.
- 2.2 Ensure all accreditation council and other appropriate standards available as staffing planning tools are used to establish staffing allocations and future needs and goals.
- 2.3 Perform time and workload studies to help determine needed staff allocations.
- 2.4 Relocate open staff positions from areas unable to fill positions to areas where the positions can be filled, when necessary or beneficial.
- 2.5 Develop a special team of investigators to assist “problem” areas and help ease the local offices’ caseloads. This team could be sent to help counties who are having problems completing child abuse and neglect cases and making initial contacts on cases within the required time frames.
- 2.6 Increase salaries for both social worker and supervisor positions to make DFS jobs more competitive with surrounding states and private organizations who hire social workers.
- 2.7 Provide increased financial compensation to workers who obtain advanced degrees or certifications.
- 2.8 Ensure that each full time Children’s Services social worker is provided with a state-owned cellular phone.
- 2.9 Provide Children’s Services social workers with laptop computers and standard automated forms and letters, and/or dictation equipment and transcription services.
- 2.10 Provide specialized training for:
  - Front line staff and supervisors on how to use the two track (Investigation/Family Assessment) system to achieve the best possible results and to meet DFS management goals for the system.
  - Staff involved in child abuse and neglect investigations. This training should teach staff to adequately investigate, document and present investigation cases, increasing child safety and decreasing overturns on alleged perpetrator appeals.
  - Supervisors and county directors who supervise child abuse and neglect Investigations and Family Assessments, but have no clinical experience in protective services.

- 2.11 Develop Investigative teams for low population county groups to ensure specially trained workers and supervisors handle child abuse and neglect cases. These employees should not have other duties that interfere with their primary children's services functions.
- 2.12 Make better use of the compensatory time monitoring system to more effectively manage its accumulation and use. Compensatory time should be:
- Used before annual leave.
  - Used within a reasonable time frame.
  - Monitored for purposes of planning future staff allocations and identifying staffing problems or inequities.

### **Division of Family Services Comments**

The Division provided a response that indicated general agreement with the recommendations and contained reasonable implementation dates. Some responses were not clear or adequate and these will be followed up on during our followup process. The Division's detailed comments are found at Appendix VII, page 62, and the State Auditor's Office detailed comments are found at Appendix VIII, page 63.

**OBJECTIVE, SCOPE AND METHODOLOGY**

**OBJECTIVE**

The objective of the audit was to determine whether calls reporting child abuse/neglect received by the DFS Child Abuse/Neglect Hotline were properly documented, processed, referred to the appropriate local DFS city or county office, and whether those offices made certain the child or children were adequately protected and the calls were handled in accordance with the Missouri statutes, Code of State Regulations, and division policy.

**Scope and Methodology**

Audit fieldwork started during late calendar year 1999 and continued through late summer 2000. Most of the calls reporting child abuse and neglect and related case records reviewed were currently active during or just prior to that time period. The audit staff:

- Reviewed the year 2000 revisions to Section 210 RSMo and evaluated the apparent appropriateness of related DFS policy changes but did not test the effectiveness of those changes.
- Reviewed applicable state statutes, code of state regulations, division policies and procedures, division training programs, and child and family case files.
- Interviewed area and local employees, supervisors, and other local, area and state level administrative officials.
- Attended a DFS training session on child abuse and neglect procedures and participated in home visits with DFS social workers.
- Discussed child abuse concerns with various groups and individuals who often come in contact with abused and neglected children.
- Solicited information from current and former DFS social workers, supervisors and county directors, and from mandated reporters of child abuse such as police officers, juvenile officers, school employees and officials and hospital employees.
- Listened to calls from concerned citizens.
- Contacted officials of similar protective agencies in other states to obtain information regarding child abuse and neglect practices and procedures.
- Traveled to another state to view a child abuse decision making system and discussed the system in detail with a variety of front line, supervisory, and state level officials.

## **APPENDIX I**

- Listened to child abuse hotline calls, reviewed individual case files to evaluate the adequacy and timeliness of responses to calls reporting child abuse and neglect, and reviewed internal DFS reporting systems.
- Reviewed actions of the Child Abuse and Neglect Review Boards and interviewed various board officials.

The audit was made in accordance with applicable generally accepted government auditing standards and included such tests of the procedures and records as were considered appropriate under the circumstances.

**STATUTES AND CODE OF STATE REGULATIONS**

The State of Missouri's commitment to protecting children from child abuse and neglect is evidenced by various statutes and rules under the Code of State Regulations. The ultimate intent of these laws and regulations is to protect children who cannot adequately protect themselves from abuse and neglect by those responsible for their care and protection (often parents). These laws and rules provide the framework within which DFS constructs operating policy and procedures to guide employee social workers responding to reports of incidents of alleged child abuse and neglect for the purpose of preventing future incidents of abuse and neglect. Section 210.109 and Sections 210.110 through 210.183 RSMo and 13 CSR 40-31 are the principal laws and rules, respectively governing the handling of child abuse and neglect.

Section 210.109, RSMo required the Division of Family Services to establish a child protection system for the entire state designed to promote the safety of children and the integrity and preservation of their families by conducting investigations or family assessments in response to reports of child abuse or neglect. The system was to endeavor to coordinate community resources and provide assistance or services to child and families identified to be at risk, and to prevent and remedy child abuse and neglect.

**Definitions**

Section 210.110 provides several key definitions to set the framework within which DFS must operate in meeting the mandates established by Section 210.109, RSMo.

**“Abuse”** is any physical injury, sexual abuse, or emotional abuse inflicted on a child other than by accidental means by those responsible for the child's care, custody, and control, except that discipline including spanking, administered in a reasonable manner, shall not be construed to be abuse.

**“Central Registry”** is a registry of persons where the division has found probable cause to believe or a court has substantiated through court adjudication that the individual has committed child abuse or neglect or the person has pled guilty or has been found guilty of a crime under various sections if the victim is a child less than eighteen years of age and the perpetrator is twenty-one years of age or older, or has attempted to commit any such crimes.

**“Child”** is any person, regardless of physical or mental condition, under eighteen years of age.

**“Investigation”** is the collection of physical and verbal evidence to determine if a child has been abused or neglected.

## APPENDIX II

**“Neglect”** is failure to provide, by those responsible for the care, custody, and control of the child, the proper or necessary support, education as required by law, nutrition or medical, surgical, or any other care necessary for the child’s well-being.

**“Probable cause”** condition of available facts when viewed in the light of surrounding circumstances which would cause a *reasonable person* (emphasis added) to believe a child was abused or neglected.

**“Those responsible for the care, custody, and control of the child”** including but not limited to the parents or guardian of a child, other members of the child’s household, or those exercising supervision over a child for any part of a twenty-four-hour day. Those responsible for the care, custody and control shall also include any adult who, based on relationship to the parents of the child, members of the child’s household or the family, has access to the child.

**“Family assessment and services”** is an approach . . . developed by the DFS which will provide for a prompt assessment of a child who has been reported to the division as a victim of abuse or neglect by a person responsible for that child’s care, custody or control and of that child’s family, including risk of abuse and neglect and, if necessary, the provision of community-based services to reduce the risk and support the family.

## STATUTES

Section 210.115 prescribes that physicians, dentists, other physical and mental health care providers, day care workers, law enforcement officers, teachers, and many others in responsible or professional positions in contact with children and who have reasonable cause to suspect that a child has been or may be subjected to abuse or neglect or who observes a child being subjected to conditions or circumstances which would reasonably result in abuse or neglect shall immediately report the abuse to the DFS using the child abuse and neglect hotline. These persons required to report are commonly referred to as *Mandated* reporters. As used in this section, the term "abuse" is not limited to abuse inflicted by a person responsible for the child's care, custody and control, but shall also include abuse inflicted by any other person. Any person or individual required to report may also report the suspicion of abuse or neglect to any law enforcement agency or juvenile office. Such report shall not, however, take the place of reporting to the division.

This statute provides that DFS is allowed to make reasonable exception to the normal abuse and neglect provisions in instances of any child who does not receive specified medical treatment by reason of the legitimate practice of the religious belief of the child’s parents, guardian, or other legally responsible person.

This statute also provides that any other person, that is, any *non-mandated* person, with reason to suspect that a child has been or may be subjected to abuse or neglect may also report to the DFS hotline.

## APPENDIX II

Section 210.125 provides that a police officer, law enforcement official, or a physician who has reasonable cause to suspect that a child is suffering from illness or injury or is in danger of personal harm by reason of his surroundings and that a case of child abuse or neglect exists, may request that the juvenile officer take the child into protective custody under chapter 211, RSMo. In instances where these persons have reasonable cause to believe a child is in imminent danger of suffering serious harm, it provides authority to take protective custody of a child for up to twenty-four hours, without the consent of the child's parents, guardian or others legally responsible for his care.

In no event is an employee of the division, acting upon his own, allowed to remove a child under the provisions of this act.

Section 210.130 establishes that oral reports of abuse or neglect shall be made to the division by telephone or otherwise. In addition, that the reports shall include the names and addresses of the child and his parents or other persons responsible for his care, if known; the child's age, sex, and race; the nature and extent of the child's injuries, type of abuse, or neglect; and much other additional information, including the name and address of the person responsible for the injuries, abuse or neglect, whenever available to allow the division to identify and locate the child and his family.

Section 210.135 provides that any person, official, or institution complying with the provisions of sections 210.110 to 210.165 in the making of a report, the taking of color photographs, or the making of radiologic examinations pursuant to sections 210.110 to 210.165, or the removal or retaining a child pursuant to sections 210.110 to 210.165, or in cooperating with the division, or any other law enforcement agency, juvenile office, court, or child-protective service agency in any of the activities pursuant to sections 210.110 to 210.165, or any other allegation of child abuse, neglect or assault, pursuant to sections 568.045 to 568.060, RSMo, shall have immunity from any liability, civil or criminal, that otherwise might result by reason of such actions. Exception is provided for intentionally filing a false report, acting in bad faith, or with ill intent. This section also provides the same immunity with respect to participation in any judicial proceeding resulting from the report.

Section 210.140 provides that any legally recognized privileged communication, except that between attorney and client, shall not apply to situations involving known or suspected child abuse or neglect and shall not constitute grounds for failure to report as required or permitted by sections 210.110 to 210.165, to cooperate with the division in any of its activities pursuant to sections 210.110 to 210.165, or to give or accept evidence in any judicial proceeding relating to child abuse or neglect. As a result, privileged communications are not recognized for many mandated child abuse reporters.

Section 210.145 prescribes that the division shall establish and maintain an information system operating at all times, capable of receiving and maintaining reports. This information system shall have the ability to receive reports over a single, statewide toll-free number. Such information system shall maintain the results of all investigations, family assessments and services, and other relevant information.

## APPENDIX II

The section prescribes that the division shall maintain a central registry.

The section prescribes that although reports may be made anonymously, the division shall in all cases attempt to obtain the name and address of any person making a report.

Section 210.145 also prescribes that upon receipt of a report, the division shall immediately communicate such report to its appropriate local office, after a check has been made with the information system to determine whether previous reports have been made regarding actual or suspected abuse or neglect of the subject child, of any siblings, and the perpetrator. Upon receipt of a report, which, if true, would constitute violation of several criminal sections against a child, and the perpetrator is twenty-one years of age or older, or an attempt to commit any such crimes, the local office shall contact the appropriate law enforcement agency and provide such agency with a detailed description of the report received. In such cases the local division office shall request the assistance of the local law enforcement agency in all aspects of the investigation of the complaint. The appropriate law enforcement agency shall assist the division in the investigation or provide the division, within a reasonable time, an explanation in writing detailing the reasons why it is unable to assist.

In addition, the local office of the division shall cause a thorough investigation to be initiated immediately or no later than within twenty-four hours of receipt of the report from the division, except in cases where the sole basis for the report is educational neglect, in which case the investigation shall be initiated within seventy-two hours of receipt of the report. If the report indicates the child is in danger of serious physical harm or threat to life, an investigation shall include direct observation of the subject child within twenty-four hours of the receipt of the report.

The investigation shall include but not be limited to the nature, extent, and cause of the abuse or neglect; the identity and age of the person responsible, the names and conditions of other children in the home, the home environment and the relationship of the subject child to the parents or other persons responsible for the child's care; any indication of incidents of physical violence against any other household or family member; and other pertinent data. The record shall contain the facts ascertained which support the determination as well as the facts that do not support the determination.

The section prescribes that when a report has been made by a mandated reporter, the division shall contact the person who made such report within forty-eight hours of the receipt of the report in order to ensure that full information has been received and to obtain any additional information or medical records, or both, that may be pertinent.

The section prescribes that upon completion of the investigation, if the division suspects that the report was made maliciously or for the purpose of harassment, the division shall refer the report and any evidence of malice or harassment to the local prosecuting or circuit attorney.

The section prescribes that protective or preventive social services shall be provided by the division to the family and subject child and to others in the home to prevent abuse or neglect, to

## APPENDIX II

safeguard their health and welfare, and to help preserve and stabilize the family whenever possible. The juvenile court shall cooperate with the division in providing such services.

The section prescribes that multidisciplinary services shall be used whenever possible in conducting the investigation and in providing protective or preventive social services, including the services of law enforcement, the juvenile officer, the juvenile court, and other agencies, both public and private. The division shall cooperate with law enforcement agencies and juvenile courts to develop training programs to increase the ability of division personnel, juvenile officers and law enforcement officers to investigate suspected cases of abuse and neglect.

The section prescribes that within thirty days of an oral report of abuse or neglect, the local office shall update the information in the information system with the determination made as a result of the investigation, identifying information on the subjects of the report, those responsible for the care of the subject child and other relevant dispositional information. The division shall complete all investigations within thirty days, unless good cause for the failure to complete the investigation is documented in the information system and if not completed within thirty days, the information system shall be updated at regular intervals and upon the completion of the investigation. In addition, the information shall be updated to reflect any subsequent findings, including any changes to the findings based on an administrative or judicial hearing on the matter.

The statute prescribes that a mandated reporter shall be informed by the division of his right to obtain information concerning the disposition of his report from the local office, and if requested, shall respond to the request within forty-five days.

Section 210.150 prescribes that the division shall ensure the confidentiality of all reports and records of child abuse and neglect made and maintained by the division, its local offices, the central registry, and other appropriate persons, officials, and institutions. To protect the rights of the family and the child, the division of family services shall ensure that any disclosure of information concerning the abuse and neglect involving that child is made only to persons or agencies that have a right to such information, such as appropriate federal, state or local criminal justice agency personnel, a physician or a designated agent, appropriate staff of the division, or a multidisciplinary provider of professional treatment services for a child referred to the provider, and others as specified.

The statute requires that any alleged perpetrator named in the report shall have access to information and records of the results of the division's investigation, but the names of reporters shall not be furnished to persons in this category. However, the investigation reports will not be released to any alleged perpetrator with pending criminal charges arising out of the facts and circumstances named in the investigation records until an indictment is returned or an information filed.

## APPENDIX II

The statute provides that after a period of two years following a finding by the division, any person who is the subject of a report where there is insufficient evidence of abuse or neglect shall have the records removed from the division and destroyed.

The statute provides that any person who knowingly violates the provisions of this section, or who permits or encourages the unauthorized dissemination of information contained in the information system or the central registry and in reports and records made pursuant to sections 210.109 to 210.183, shall be guilty of a class A misdemeanor.

Section 210.152 sets record keeping retention time frames for information from reports of child abuse and neglect and related investigations. The specified retention time varies depending on whether evidence of abuse or neglect was sufficient or insufficient for a finding conclusion of probable cause to believe the abuse occurred. The results of the investigative or family assessment and services approach reports shall include any exculpatory evidence (of innocence) known by the division, including exculpatory evidence obtained after the closing of the case.

The section prescribes that within ninety days after receipt of a report of abuse or neglect that is investigated, the alleged perpetrator named in the report and the parents of the child named in the report, if the alleged perpetrator is not a parent, shall be notified in writing of any determination made by the division based on the investigation. The notice shall advise either that the division has determined that there is probable cause to suspect abuse or neglect exists or there is insufficient probable cause of abuse or neglect. When there is a finding of probable cause, the division is to notify the alleged perpetrator he has sixty days from the date of receipt of the notice to seek reversal of the division's determination through an administrative appeal review by the child abuse and neglect review board.

The section prescribes that such request for review shall be made within sixty days of notification of the division's decision under this section. In those cases where criminal charges arising out of facts of the investigation are pending, the request review shall be made within sixty days from the court's final disposition or dismissal of the charges. In any such action for administrative review, the child abuse and neglect review board shall sustain the division's determination if such determination is supported by evidence of probable cause and is not against the weight of such evidence. In any such action for administrative review the child abuse and neglect review board shall notify the child or the parent, guardian or legal representative of the child that a review has been requested.

The section further provides that if the alleged perpetrator is aggrieved by the decision of the child abuse and neglect review board, he may seek de novo judicial review in the circuit court in the county in which he resides. The request for a judicial review shall be made within sixty days of the notification of the decision of the child abuse and neglect review board decision.

Section 210.153 provides for creation in the department of social services the "Child Abuse and Neglect Review Board", which shall provide an independent review of child abuse and neglect

## APPENDIX II

determinations in instances in which the alleged perpetrator is aggrieved by the decision of the division of family services, except findings of probable cause which are substantiated by court adjudication. The division may establish more than one board to assure timely review of the determination. Each board shall consist of nine members, who shall be appointed by the governor with the advice and consent of the senate, and shall include a physician, nurse or other medical professional, a licensed child or family psychologist, counselor or social worker, an attorney who has acted as a guardian ad litem or other attorney who has represented a subject of a child abuse and neglect report, and a representative from law enforcement or a juvenile office.

In addition, other members of the board may be selected from a person from another profession or field who has an interest in child abuse or neglect, a college or university professor or elementary or secondary teacher, a child advocate, or a parent, foster parent or grandparent. The members of the board serve without compensation.

The section prescribes others who may participate in a child abuse and neglect review board review, including appropriate division of family services staff and legal counsel for the department, the alleged perpetrator, who may be represented, and witnesses providing information on behalf of the child, the alleged perpetrator or the department. The alleged perpetrator's presence is not required for the review to be conducted, and he may submit a written statement for the board's consideration in lieu of personal appearance.

The section prescribes that the department shall promulgate rules and regulations governing the operation of the child abuse and neglect review board except as otherwise provided for in this section. These rules and regulations shall, at a minimum, describe the length of terms, the selection of the chairperson, confidentiality, notification of parties and time frames for the completion of the review.

Section 210.155 prescribes that the division shall, on a continuing basis, undertake and maintain programs to inform all persons required to report abuse or neglect pursuant to sections 210.110 to 210.165 and the public of the nature, problem, and extent of abuse and neglect, and of the remedial and therapeutic services available to children and their families; and to encourage self-reporting and the voluntary acceptance of such services. In addition, those mandated to report pursuant to this act shall be informed by the division of their duties, options, and responsibilities in accordance with this act.

The section provides that the division shall conduct ongoing training programs in relation to sections 210.110 to 210.165 for agency staff and shall continuously publicize to mandated reporters of abuse or neglect and to the public the existence and the number of the twenty-four hour, statewide toll free telephone service to receive reports of abuse or neglect.

Section 210.167 prescribes that if an investigation reveals that the only basis for action involves a question of an alleged violation of the compulsory school attendance law, the local office of the division shall send the report to the school district in which the child resides.

## **APPENDIX II**

Section 210.180 prescribes that each employee of the division who is responsible for the investigation or family assessment of reports of suspected child abuse or neglect shall receive not less than forty hours of preservice training on the identification and treatment of child abuse and neglect. In addition to such preservice training such employee shall also receive not less than twenty hours of inservice training each year on the subject of the identification and treatment of child abuse and neglect.

Section 210.183 prescribes that at the time of the initial investigation of a report of child abuse or neglect, the division employee conducting the investigation shall provide the alleged perpetrator with a written description of the investigation process and provides the prescribed content of the notice to be provided.

The section provides similar guidance for notification of the alleged perpetrator if the division uses the family assessment approach, including the possible services available and expectations of the family.

### **CODE OF STATE REGULATIONS**

13 CSR 40-31.025 establishes a child abuse and neglect review process for a review of child abuse and neglect determinations where an alleged perpetrator disagrees with the division's decision of probable cause. The alleged perpetrator must request the administrative review in writing within sixty days of the probable cause determination. Within fifteen days of receipt of the request the county director is required to review all appropriate material and determine whether the decision of the division should be upheld or reversed. The county director is to provide written notice of the decision to uphold or reverse the original finding and how to request further review by the child abuse and neglect review board, if he disagrees with the decision.

This rule also establishes the length of terms of the nine members of the child abuse neglect and review board, the review process, requires the division to be represented by local and area staff and/or legal counsel, requires the board decision be made within seven days of the review, and written finding notice within thirty-five days to the alleged perpetrator, division director, and local division office.

**BACKGROUND**

The Division of Family Services must deal with children and their families who are faced with problems coping with everyday life in addition to the reported abuse or neglect. Many of these families are poor, illiterate, unemployed, and addicted to drugs and alcohol. Children coming from these environments may have been abused or neglected by adults who went through the same cycle of abuse and neglect when they were children. This audit—and the problems we have identified—should be viewed within this environmental context.

Social workers and others involved in the day-to-day lives of abused children and their families must make decisions on a daily basis about what course of action they think is in the best interest of each child. Sometimes those interests are competing, such as trying to balance the safety and well being of children with the rights of families, and the alternatives often are not perfect. Often the decisions they make work out well; sometimes they do not. No child abuse response system can prevent all abuse or tragic results from occurring, but properly administered and handled it must keep such instances to an absolute minimum and protect children shown to be at risk. To accomplish these very difficult tasks, the social workers that are at the heart of the system, need the best resources and training the state can provide.

At the same time, program staff are to be commended for working in a very difficult program in which social workers are expected to confront openly hostile parents and suspected perpetrators of child abuse and/or neglect on a daily basis and attempt to document whether abuse or neglect occurred. Where necessary, they must take appropriate action to prevent additional abuse to children in their highly vulnerable situations.

**Mission Statement of Division of Family Service (DFS)**

To maintain or improve the quality of life for the people of Missouri by providing the best possible services to the public, with respect, responsiveness and accountability, which will enable individuals and families to better fulfill their potential.

As of January 2000, the Division of Family Services employed 5,627 full time employees (FTE) including 3,329 working in Children's Services. The Division of Family Service's Children Service unit is responsible for coordinating programs to provide assistance to children and their parents. The Children's Services Programs include Adoption, Foster Care, Child Abuse and Neglect, Treatment Services, Independent Living, Residential Program, Parental Stress Helpline and other programs. Our audit focused on the Child Abuse and Neglect system which is responsible for receiving hotline calls of suspected abuse or neglect and determining if the calls meet statutory or policy requirements to be sent to the local county DFS office as either Child Abuse and Neglect reports or referrals for services. The local county offices evaluate each report received to determine if it should be investigated or if the family assessment approach would benefit the family more. In cases of referrals, the local offices determine what steps need to be taken to help address the family's needs. In all cases, the safety and risk of harm to the child is to be an overriding concern.

## APPENDIX III

### Structure

The governor appoints the Director of Social Services who in turn appoints the Director of Family Services. The Family Service Director appoints the Children's Services Director. The Children's Services central office is located in Jefferson City, and the state is divided into seven geographic areas for administrative purposes. The state's 114 counties are clustered into these geographic areas, except for St. Louis City, St. Louis County, and Jackson County, which make up their own areas. The following are the area headquarters locations:

- **Area 1** – St. Joseph
- **Area 2** – Fulton
- **Area 3** – Cape Girardeau
- **Area 4** – Springfield
- **Area 5** – Jackson County
- **Area 6** – St. Louis City
- **Area 7** – St. Louis County

### Child Abuse/Neglect Reports

The Child Abuse/Neglect Hotline Unit is operated year-round on a 24-hour per day, seven days per week basis by approximately 50 social workers. Missouri's toll-free number for reporting child abuse/neglect is 1-800-392-3738.

The volume of hotline calls received for 1999 and 1998 and their classifications are shown below:

| <b><i>VOLUME OF CALLS<br/>HANDLED BY DFS</i></b>         |                           |                           |
|--|---------------------------|---------------------------|
| <b><i>Call Classification:</i></b>                       | <b>Calendar Year 1999</b> | <b>Calendar Year 1998</b> |
| <b><i>Child Abuse and Neglect</i></b>                    | 48,769                    | 47,954                    |
| <b><i>New Born Crisis Assessments (A Referrals)</i></b>  | 1,092                     | 934                       |
| <b><i>Mandated Reporter Referrals (M Referrals)</i></b>  | 13,948                    | 11,562                    |
| <b><i>Preventive Service Referrals (P Referrals)</i></b> | 5,694                     | 4,822                     |
| <b><i>Non-Caretaker Referrals (N Referrals)</i></b>      | 1,208                     | 1,093                     |
| <b><i>Unable to Investigate</i></b>                      | 24,767                    | 24,910                    |

The hotline unit receives calls of suspected abuse and/or neglect from permissive and mandated (certain professionals mandated by statute to report) callers. When a call is received at the hotline unit, the call taker must evaluate the information to determine whether the conditions reported meet the Child Abuse and Neglect criteria listed below.

## APPENDIX III

- The child is under age 18.
- The alleged perpetrator has care, custody, and control of the child.
- The alleged abusive or neglectful treatment is having an adverse effect on the child.
- The report meets the definition of abuse/neglect described in state statutes.

If the call meets the above criteria it is considered a child abuse and neglect report. Within moments of deciding a call is a child abuse and neglect report, the information is forwarded electronically to the appropriate county office where the victim lives. The county office personnel retrieve the report from the electronic automated retrieval system (list of cases from the hotline unit) and give it to the appropriate screener (determined by the local county offices) who determines whether the report should be handled as an Investigation or Family Assessment.

The DFS implemented a new two track approach (Investigation or Family Assessment) statewide in May 1999, to recognize different families have different intervention needs and require flexible responses from Children's Protective Services and the community, to protect children and meet family needs.

### *Investigation Approach*

The investigation track is chosen by the screener if the following are alleged:

- ❑ Serious physical, medical or emotional abuse and serious neglect where criminal investigation is warranted;
- ❑ All reports of sexual abuse;
- ❑ All other reports that if confirmed would be a (criminal) violation of certain sections of Chapters 565 – 568 and 573 RSMo;
- ❑ Reports, indicating the child is in danger at the time of the report and law enforcement involvement is needed;
- ❑ All reports referred to the Out-of-Home Investigation (OHI) unit or non-relative/non-household member caretaker reports investigated by county staff.

If the report is classified as an investigation, it is assigned to a social worker, who must initiate the report and have face-to-face contact with the child(ren) within 24 hours of receiving the report. In most cases, law enforcement is called to conduct a joint investigation. The investigator's role includes the responsibility to ensure services are provided to a family when service needs are immediate during the investigation. The social worker has 30 days to complete the investigation and to prepare the related documents and reports. The following are the possible investigation conclusions:

## APPENDIX III

- ☐ Court Adjudicated
- ☐ Probable Cause
- ☐ Unsubstantiated – Preventive services indicated
- ☐ Unsubstantiated
- ☐ Unable to Locate
- ☐ Inappropriate Report
- ☐ Located out of State

The alleged perpetrator and victim(s) are to receive written notification as to the decision determined by the local division office. If the finding is probable cause, the notification must contain a notice that if the alleged perpetrator disagrees with the probable cause decision, s/he has 60 days from the date of receipt of the notification to request an administrative review. The local county director conducts the administrative review. If the director upholds the office's decision and the perpetrator wishes to continue the process, the County Director must notify the Child Abuse and Neglect Review Board Liaison within 10 days. The Liaison schedules a hearing for the case and notifies the involved parties of the date.

There are currently three review boards composed of nine members each. The board members are appointed by the governor and are made up of independent citizens, some of whom must be from mandated professions such as law enforcement and child health care. The boards review the investigation case records and may hear testimony from involved parties. The Chairpersons submit a written decision to the liaison within 7 days of the review. The liaison provides a written decision notice to all parties within 30 days of receiving the recommendations from the review board. For cases that are overturned, the DFS also must change the investigation conclusion recorded in the case file and in the computer system.

### ***Family Assessment Approach***

The screener chooses the family assessment track if the following conditions are alleged:

- ☐ Mild, moderate, or first-time non-criminal reports of physical abuse or neglect (including medical neglect);
- ☐ Mild or moderate reports of emotional maltreatment; and
- ☐ Educational neglect reports.

If the report is classified as a Family Assessment, it is assigned to a social worker who contacts the family and conducts a thorough family assessment. Family assessments must be initiated within the first 24 hours. An exception is if the only allegation is educational neglect in which case it should be initiated within 72 hours. If the children are not seen within the first 24 hours, documentation must be recorded in the assessment form explaining how safety was determined. The Social Worker can either schedule this contact with the family or make an unannounced home visit. The goal of the family assessment is to:

- ☐ determine any risk to the child's safety;
- ☐ determine if the family needs assistance from the division or the community; and
- ☐ identify service needs of the family.

## **APPENDIX III**

During the family assessment process, workers use the forms provided as tools to help accomplish the goals listed above. If the family refuses to cooperate in the family assessment process and there is risk to the child, the report must be changed to place it on the investigation track, giving the worker more authority to deal with the situation.

The worker has 30 days to complete the family assessment and to prepare the related documents and reports. The family must be notified of the conclusion reached. The following are the possible family assessment conclusions:

- ☐ Services Needed
- ☐ Services Not Needed
- ☐ Non-Cooperative/Child Safe (Police Involvement)
- ☐ Services Needed (Family Declined)
- ☐ Services Needed (Linked in 30 days)
- ☐ Unable to Locate
- ☐ Inappropriate Report
- ☐ Located out of State
- ☐ Home Schooling

### **Referrals**

In instances when a call taken by the hotline unit does not meet the child abuse and neglect criteria, the hotline unit call taker must determine if the call meets the criteria for one of the four referral types (Mandated Reporter, New Born Crisis Assessment, Non-Caretaker, and Preventative Service Referrals). Like child abuse and neglect reports, once a call has been classified as a referral by the hotline unit it is forwarded electronically to the appropriate local county office.

#### ***Mandated Reporter Referrals***

The state child abuse and neglect law requires certain professional people known as mandated reporters to make a report to DFS when they have reasonable cause to suspect that a child has been or may be subjected to abuse or neglect. In an effort to recognize the importance of Mandated Reporters, the division has a policy to accept referrals of concerns that do not rise to the level of a child abuse and neglect report. The division refers to these calls as Mandated Reporter or “M” Referrals. Non-anonymous mandated reporters, acting in their professional capacity, and reporting family situations, must make these referrals.

Local personnel pull off the referral from the automated referral system and give it to the appropriate worker (as determined by local office policy). In most cases, new social workers or supervisors are assigned to the M Referrals. With one exception in the Central Office, local county offices set all policies regarding M referrals.

Central DFS policy requires local DFS staff to contact the mandated reporter within 3 working days of the referral (or the next working day if received on a Friday), to discuss the situation with the mandated reporter and to mutually determine the most appropriate response. In most

## **APPENDIX III**

situations, the DFS staff does not visit the family but advises the reporter of services the community and DFS can offer the family and suggests the reporter inform the family of those services.

### ***Newborn Crisis Assessments***

These referrals are cases in which medical personnel are referring a newborn. There are two types of newborn referrals--drug-involved and non-drug-involved. For drug-involved referrals there must be signs and symptoms of drug/alcohol involvement in the newborn at birth. For non-drug-involved referrals there must be allegations of potential serious risk of abuse/neglect upon release of the newborn from the hospital and must be called to the hotline unit prior to the newborn's discharge. These calls are coded as "A" referrals and forwarded electronically to the local county office to be handled as emergencies. Local personnel pull the referral off the automated referral system and give it to the appropriate worker as determined by local office policy. Policy requires the worker to start the Newborn assessment immediately after receiving the report.

### ***Non-Caretaker Referrals***

Permissive reporters (persons not mandated) identifying possible abuse/neglect where the alleged perpetrator has no care, custody, or control of the child are advised that the hotline unit will make an "N" referral to the county office, but that it is not considered a child abuse/neglect report. The referral is forwarded electronically to the local county office. Local personnel pull the referral off the automated referral system and give it to the appropriate worker for handling. The worker then decides whether to act on the case himself or herself or to refer the case to other agencies such as law enforcement or juvenile authorities.

### ***Preventive Service Referrals***

Preventive Service Referrals are calls made by permissive reporters (those not mandated) where no actual abuse or neglect has occurred, but where the actions of the child, caretaker, another juvenile or adult demonstrates the need for intervention and possible service delivery to prevent child abuse and neglect from occurring. The following are the only instances the hotline unit will take as Preventive Service Referrals:

- Family requests services.
- Caretaker is ill, hospitalized and no appropriate child care plan.
- Caretaker requesting placement of child, but no child abuse and neglect.
- Caretaker or child is suicidal.
- Child exhibiting extreme maladaptive behavior; or
- Domestic violence in the home and child is witness to violence.
- New information reported to the hotline unit which would be important for the local county office to have available on a currently open Preventive Services case.
- Non child abuse and neglect fatality referrals from permissive reporters.
- G.L. vs. Stangler referrals from permissive reporters (relates to a Jackson County court order).

## **APPENDIX III**

- Ex-parte orders (legal proceeding) with no child abuse/neglect allegations.
- Calls regarding children over 18 who remain in DFS custody.

Hotline unit personnel inform the permissive reporter that a “P” referral is being sent to the local office, but that it is not considered a child abuse/neglect report. The DFS policy manual guides the worker to the family assessment procedures for handling “P” referrals. All other policy concerning “P” referrals is set by each local office.

### **Unable to Investigate**

In instances when the call taken by the hotline unit does not meet either child abuse and neglect or referral criteria or if no identifying information can be obtained, the information is coded unable-to-investigate. The hotline unit unable-to-investigate worksheet must clearly show the reasons for the call being classified as unable-to-investigate and include the information provided by the caller. No action is taken on calls coded unable-to-investigate, there is no computer record of these calls, and the hotline unit keeps the paper worksheet for only 2 months before being destroyed. The following situations are classified as unable-to-investigate:

- ☐ Victim is 18 years old or older
- ☐ No child abuse/neglect allegations
- ☐ Out of state reports from non-mandated reporters
- ☐ No address, direction, or other means of locating the family
- ☐ Prior Checks (allows certain mandated reporters to check for possible prior reports on abuse or neglect of a child or family).

### **Accreditation**

The DFS is currently in the application phase of seeking accreditation by the Council on Accreditation of Services for Families and Children, Inc. The council is a leading independent accreditor of the full range of behavioral healthcare, social, and community services. According to their internet website, the council's mission is to "actively promote and improve the quality of social and mental health services that support and improve the lives of families and children and the well-being of society." The council accomplishes its mission by developing standards of best practice, by delivering a program of provider recognition and accreditation, by providing educational and technical assistance programs, and by advocating for policies that promote high quality services for families and children.

The council recommends certain caseload standards that will allow staff to more effectively work with families and children. Also, the council recommends that the supervisor of child protective workers only have responsibility for the direction of no more than seven experienced and professionally trained workers. DFS has been allocated additional social worker positions for FY2001 to help achieve the council staffing and caseload requirements.

### **APPENDIX III**

For more information and statistics on the Child Abuse and Neglect System readers may go to the DFS Internet Website at ***<http://www.dss.state.mo.us/dfs/dfs.htm>***.

**SUMMARY OF BEST PRACTICES**

During the course of our field work we identified various best practices that could be implemented by DFS on a statewide basis. Some of these best practices originated from within DFS but have not been disseminated beyond a few local areas. Others were identified while studying child abuse and neglect practices used in other states. The importance of ensuring the state maintains a compendium of the best and most effective practices in preventing and responding to reports of child abuse and neglect cannot be overstated. Many nations are struggling with the problem of child abuse and neglect and the problem is seen as growing in significance as drug and other substance abuse, for one example, reaches near epidemic proportions. It is imperative that new, improved and proven practices should be adopted and disseminated by the DFS in its efforts to respond to child abuse and neglect throughout Missouri. The practices shown below are worthy of serious consideration by the DFS for methodologies to improve various practices in Missouri.

**Best practices from other states:**

***Arkansas***

The Arkansas State Police operates a Family Protection Unit that handles 1/3 of the Child abuse and neglect reports received each year. The unit was established in 1997 to enhance the effectiveness of Arkansas child abuse and neglect investigations by using personnel trained in proper investigation procedures and documentation and to help ensure cases against perpetrators of child abuse could be effectively prosecuted. Unit personnel have arrest powers and may carry firearms. The unit works in joint venture with the Children Services Unit in handling child abuse cases and if a child must be removed from the family home, the Children Services Unit handles the placement.

***Iowa***

In Iowa, the position of child abuse investigator is the highest possible level a social worker can achieve before becoming a supervisor. It is also the highest paid position social workers can attain and continue to work with children.

***Illinois***

The state of Illinois will require all their Department of Children and Family Services social workers to be licensed by January 1, 2001. All those social workers will be required to pass a certification test to work as a social worker in Illinois.

## **APPENDIX IV**

### ***Kansas***

In Kansas, social workers are required to be licensed prior to being hired by the state.

### ***Oklahoma***

In Oklahoma, the social workers receive a 2.5% salary increase for having obtained a Master's Degree education level.

### ***Washington***

In Washington State, statutes require that conclusion notices to perpetrators must be sent by registered mail. The conclusion notices inform the alleged perpetrators of the abuse finding and the right to appeal the finding to an appellate organization much like the Missouri Child Abuse and Neglect Review Boards. In Missouri these appeal rights notices are sent by regular mail, allowing perpetrators to claim they never received the required notice and thus allowing them to force an appeal long after the rights have actually expired.

### ***Michigan***

In some counties, records of calls screened out as Unable to Investigate because of the low level of claimed abuse and not considered significant or worthy of investigation or review are kept in the computer system and also in paper files.

However, when three such calls have accumulated on the same family, social workers visit the family because of the high likelihood of real problems. This practice provides the children's services agency an opportunity to initiate preventive services, if needed.

The state has established several procedures intended to protect the safety of social workers. Examples include checking for any prior criminal history or child abuse and neglect records on any family members in the subject household prior to the family visit, each social worker is provided a cell phone and pager and provided state owned vehicles equipped with personal alarms and remote entry mechanisms. These and other safety procedures were established after a worker responding to a report of child abuse was murdered at the child's home.

A statewide Peer Review program has been developed to ensure consistency and appropriateness of the handling of all facets of children's protective services provided and in implementing departmental policies and procedures.

Social workers are paid a more competitive salary.

## APPENDIX IV

Increased compensation is given to workers who have obtained a Master's degree.

Various forms used in handling children's cases and perpetrator notification letters are maintained as master documents and are computer generated on demand as needed, thus saving worker time.

Mandated Reporter's are notified of the outcome of calls reporting child abuse and neglect.

### ***Florida***

Florida state has developed and posted on their Children and Families web page an outstanding policy guideline giving callers the standards of courtesy and professionalism the state child abuse hotline call takers are expected to follow. The guidelines also explain how callers can contact hotline supervisors if the standards were not followed. The Missouri DFS has similar policies but the information on what to do if the call is not handled properly is not publicly posted on the web site as in Florida. Posting this information in Missouri would improve communications with child abuse reporters and would allow them a mechanism to question the hotline worker's decision if they believe it is wrong. It could also provide a mechanism to alert management when problems develop.

### **Best practices within Missouri:**

#### ***St. Louis City***

The DFS (Area #6, St. Louis City) has developed a substance abuse specialist to accept referrals from workers with the purpose of assisting the workers in identification of substance abuse during their home visits and family conferences. The position duties include: consultation, assessment & screening of families, chemical dependency evaluation, psychological evaluations, attending family meetings & court hearings, pre-treatment counseling and education, training and workshops, and practicum opportunities. Common issues for families include: co-dependency, treatment referral & availability, support groups, breaking through barriers such as denial, enabling, reaching out for help, family violence, and mental health.

## **APPENDIX IV**

St. Louis City has also developed a way to identify and treat chronic neglect families. Chronic Neglect work is a relatively new approach in the United States, and St. Louis City is the only DFS office with their own specialist on staff. The Chronic neglect approach does not focus so much on the particular incident, but on the pattern and the “accumulation of harm.” Chronic Neglect is defined as a persistent pattern of family functioning in which the caregiver has not sustained and/or met the basic needs of the child, which results in harm, and the behavior may result in an accumulation of harm. Accumulation of harm is a heightened risk to children when the caretaker shows a repeated pattern of failing to meet a child’s basic needs.

The Chronic Neglect Specialist reviews every hotline call sent to the county. The specialist not only reviews the current incident, but looks at all prior involvement with the family (substantiated or not, referrals, information obtained regarding neglect while investigating an incident, etc.). St. Louis City chose to use 10 prior incidents as a starting point to classify a family as in a state of chronic neglect. The city staff has been asked to give presentations in other states and at CA/N conferences throughout the U.S. The DFS should develop policies for all local offices to help them better identify and treat chronic neglect families.

St. Louis City has taken a preventive approach to educational neglect. The DFS hotline unit does not take calls reporting education neglect unless the reporter shows exhaustive effort on the part of the school to correct the problem and the child has missed a great deal of school. In contrast, St. Louis City DFS arranged for schools to send a fax notice when a child has missed 10 days of school. This allows the local office to initiate early preventive or intervention efforts before the problem becomes more serious.

## APPENDIX V

### SUMMARY OF SURVEY QUESTIONNAIRE RESULTS

A survey questionnaire was sent to 1,183 current and former employees of DFS, Children's Services. A total of 514 responded to the questionnaires giving a response rate of 43%. The results of this survey are as follows:

| Question   | Always | Sometimes | Never |
|--|--------|-----------|-------|
| Do you feel that you received enough training to make accurate and correct decisions on handling child abuse and neglect reports in the two-track (Investigation/Assessment) system? | 153    | 238       | 46    |
| Is your caseload such that you feel you are able to successfully manage your cases?  | 52     | 206       | 187   |
| Does your workload allow you to act on a child abuse and neglect report in a timely manner?  | 159    | 221       | 39    |
| Do you feel that you are unable to do enough investigative work on a child abuse and neglect report due to time constraints?   | 72     | 260       | 74    |
| Have there been times that you could not include fully accurate records and details because of time limitations?   | 40     | 287       | 106   |
| Have you had any problems getting child abuse and neglect reports or any other information from the Central Registry Unit?   | 14     | 173       | 238   |
| Are there times when child abuse and neglect calls are made to the local county office and not reported to the Central Registry Unit?  | 7      | 171       | 221   |
| Does your supervisor provide adequate instruction and support?   | 221    | 192       | 31    |
| Is it necessary to vary from DFS procedures and policy to serve the best interest of the child?  | 23     | 304       | 114   |
| Has a lack of Out-of-Home resources been the reason for keeping a child in a dangerous home situation?   | 14     | 166       | 259   |
| Do you believe mandated reporter calls are given the proper classification and treatment?  | 127    | 252       | 54    |
| Is the name of the reporter ever given to the family?  | 1      | 29        | 414   |
| Are intensive In-Home services effective in keeping children safe?   | 58     | 369       | 15    |
| Do you contact mandated reporters within 3 days of their call?   | 286    | 117       | 7     |
| Do you feel you have the full needed cooperation of the other agencies shown below?  |        |           |       |
| The Department of Health?  | 181    | 225       | 31    |
| The Department of Mental Health?   | 75     | 263       | 109   |
| The Juvenile Office?   | 141    | 291       | 26    |
| The Courts?  | 117    | 301       | 31    |
| Law Enforcement Agencies?  | 173    | 257       | 15    |

| Question  | Yes | No  | % Yes |
|---|-----|-----|-------|
| Are available state resources adequate to address the problems causing abuse? | 102 | 347 | 23    |

We asked DFS social workers what they felt was the main cause of men and women abusing their children. The following are the main causes given in the survey responses:

## APPENDIX V

- ❑ Single Parent, Stress, Economics, No Support System, Anger, Control Issues
- ❑ Drug and Alcohol Abuse
- ❑ Lack of Parenting Skills/Education
- ❑ The way they were raised, poor role models, cycle of abuse

A survey questionnaire was sent to 803 mandated facilities including Police Departments, Juvenile Offices, Schools, and Hospitals. We received 1,530 responses, a 191% response rate. Many of the facilities made multiple questionnaire copies so more employees who make calls to the Child Abuse and Neglect Hotline could respond to the survey, thus causing a very high response rate. The results of this survey are as follows:

| Question  | Yes   | No    | % Yes |
|---|-------|-------|-------|
| Were you able to provide all of the information you wanted to give to the hotline worker?           | 1,371 | 108   | 93    |
| Have you ever had to exaggerate the condition of the child in order to get the hotline's attention? | 234   | 1,230 | 16    |
| Did the DFS county worker discuss fully your concerns for the family/children?                      | 1,064 | 352   | 75    |
| Has any alleged perpetrator confronted you about turning them in to the hotline?                    | 695   | 775   | 47    |
| Overall, are you satisfied with the way your calls are handled by hotline personnel?                | 1,126 | 305   | 79    |
| Overall, are you satisfied with the local field office's handling of the cases you call about?      | 900   | 466   | 66    |

| Question   | Always | Sometimes | Never |
|--|--------|-----------|-------|
| Do you report all suspected child abuse/neglect to the Child Abuse Neglect Hotline Unit?                               | 1,268  | 231       | 1     |
| Do you feel once you report the abuse the problem will be taken care of?   | 281    | 1,156     | 66    |
| Was the hotline worker courteous and tactful in your discussions?  | 988    | 471       | 6     |
| After you reported to the hotline, did you see subsequent improvement in the child's physical and/or mental condition? | 63     | 1,244     | 122   |
| From your calls, did cases receive action you considered appropriate?  | 311    | 1092      | 77    |

| Question  | Within 24 hours | Within 48 hours | Within 72 hours | No Contact | Other |
|---|-----------------|-----------------|-----------------|------------|-------|
| Did the DFS county worker contact you after your initial call to the hotline? | 552             | 167             | 108             | 205        | 245   |

## APPENDIX V

| Question   | 1-3 | 4-6 | 7-10 | Over 10 | Over 20 |
|--|-----|-----|------|---------|---------|
| How many times have you, as a mandated reporter, called the Child Abuse Neglect Hotline? | 316 | 316 | 204  | 272     | 346     |

| Question   | Never | Occasionally | Often |
|--|-------|--------------|-------|
| Do you contact your local DFS office for informal consultations or assistance? | 180   | 936          | 357   |

| Question   | Not Applicable | Never | Occasionally | Often |
|--|----------------|-------|--------------|-------|
| Do you find your local DFS office helpful and responsive to your request(s) when you contact them? | 76             | 43    | 636          | 716   |

We asked Mandated reporters what could be done to improve the handling of their calls reporting alleged Child Abuse and Neglect. The following chart shows their responses regarding the areas for improvement.

## APPENDIX V

We tallied the comments made by both employees and mandated reporters to identify areas of concern. The concerns and the level of importance based on the number of mentions are shown below:

## APPENDIX VI

### **RESULTS OF CALLS CLASSIFIED UNABLE TO INVESTIGATE**

The audit included a test of the justification for categorizing 1,984 calls received in December 1999 and January 2000 as unable to investigate to determine if they were properly categorized. Audit results showed that 50 of these calls were not properly categorized and some action could have been taken to assist an endangered child—a child who could still be at risk. Our test disclosed the following issues of concern.

#### **Didn't meet the criteria to be unable-to-investigate**

| Testing Dates    | Number of Errors | Total Tested | % Error Rate |
|------------------|------------------|--------------|--------------|
| December 11 & 15 | 10               | 104          | 10           |
| January 1 – 31   | 40               | 1880         | 2            |

#### **Call taker didn't explain why the call was unable-to-investigate**

| Testing Dates    | Number of Errors | Total Tested | % Error Rate |
|------------------|------------------|--------------|--------------|
| December 11 & 15 | Not tested       | Not tested   | Not tested   |
| January 1 – 31   | 79               | 1880         | 4            |

#### **No supervisory approval on unable-to-investigate worksheets**

| Testing Dates    | Number of Errors | Total Tested | % Error Rate |
|------------------|------------------|--------------|--------------|
| December 11 & 15 | 12               | 104          | 12           |
| January 1 – 31   | 34               | 1880         | 2            |

#### **Call taker didn't document a prior child abuse and neglect record check**

| Testing Dates    | Number of Errors | Total Tested | % Error Rate |
|------------------|------------------|--------------|--------------|
| December 11 & 15 | 23               | 70           | 33           |
| January 1 – 31   | 265              | 812          | 33           |

#### **DFS computer system record didn't agree with call taker's prior record check notation**

| Testing Dates  | Number of Errors | Total Tested | % Error Rate |
|----------------|------------------|--------------|--------------|
| December 15    | 8                | 66           | 12           |
| January 1 – 31 | 132              | 267          | 49           |

#### **A later report or referral was taken on the same allegation as the unable-to-investigate\***

| Testing Dates  | Number of Errors | Total Tested | % Error Rate |
|----------------|------------------|--------------|--------------|
| December 15    | 2                | 66           | 3            |
| January 1 – 31 | 16               | 265          | 6            |

\* A call giving the same allegation of abuse was accepted as valid for referral and handling

## **APPENDIX VII**

### **DEPARTMENT OF SOCIAL SERVICES**

#### **DIVISION OF FAMILY SERVICES**

**Department of Social Services  
Division of Family Services  
Audit Of Child Abuse and Neglect Response System  
Response to Recommendations**

We take our commitment to protecting children very seriously and are proud of the improvements made in the last several years. While there is always room for improvement, we feel this document borders on audit by anecdote and takes an overly simplified approach to an extremely complicated system.

Protecting children is difficult and vastly more challenging than designing the perfect system. Our staff is faced daily with making more serious judgment calls in people's lives than most people ever face in their lifetime. The standard they are held to is perfection, which is virtually unattainable.

For the record, we wish to register a strong disagreement with the harsh accusations and inflammatory generalizations used in the narrative. We will attempt to address the recommendations individually as listed below.

While Missouri's child protection system is better than most and has steadily continued to improve, we know intuitively that even with more staff, increased money and tougher laws, some children will still be lost to tragic circumstances. That is why solutions should involve more than one system. They include communities, parents, relatives, teachers, neighbors, law enforcement, health care professionals and many others beyond the Child Abuse and Neglect Reporting and Response system.

**1.1 Implement a structured decision making tool to increase consistency and accuracy in making intake, screening, risk assessment, service and placement decisions.**

In April 2000, the division began working with Children's Research Center, a division of the National Council of Crime and Delinquency in Madison, Wisconsin, to explore the adaptability of a specific structured decision-making model to our system. The first phase would focus on enhancing the current decision making tools used at two points in the system: the hotline, to classify calls received, and in the county office to determine if the report will be treated as an assessment or investigation. Further exploration will take place over the next year regarding other decision points in the system.

**1.2 Require that hotline unit call takers check DFS records for prior reports of abuse on the child or family and document that check.**

Currently social service workers at the hotline do check DFS records for priors on all calls (approximately 75,000 annually) except those classified as Unable To Investigate (UTI). DFS will work with the Division of Data Processing to implement a tracking system for these types of reports, which will include a check for priors when enough information is known from the caller to determine specific persons' identities. It should be noted that many UTIs do not

contain adequate information for clear data collections. Implementation will be expected by April 2001.

**1.3 Ensure unable to investigate worksheets document completely and appropriately the phone reports of abuse received by the hotline unit.**

The division is implementing a policy that hotline supervisors will read worksheets and listen to tapes of 10% (as consistent with Council on Accreditation (COA) expectations for peer reviews) of all calls classified as Unable To Investigate. Supervisors will review the work of staff other than those in their own unit. It should be noted that currently supervisors consult frequently with staff, especially new social service workers, when they are making a decision to classify a report as Unable To Investigate. Staff often seek consultation while the caller is still on the phone. It is also believed that implementing a Structured Decision Making model at the Hotline Unit may further enhance staff decision making. Finally, we are in the process of implementing changes to the MIS database system which will require more complete documentation for data entry and conclusion on reports classified as unable to investigate.

**1.4 Improve the hotline unit quality control review process to ensure unable to investigate decisions are appropriate.**

See #1.3

**1.5 Enter unable to investigate records into the automated Production System and retain them.**

See #1.2. Records will be maintained for one year.

**1.6 Retain tape recordings of hotline calls for possible use in future criminal prosecutions or for review board hearings.**

Currently the division keeps tapes of all calls for six months and cooperates by supplying copies of tapes as requested by prosecutors within that time frame. Rarely has the Child Abuse and Neglect Review Board (CANRB) requested a tape and most reviews are held within six months of the finding. Effective January 1, 2001 the division will keep tape recordings of all calls for one year. This will be done as a one-year pilot during which time, records will be kept regarding the number and type of requests made for copies of the tapes. At the end of one year this practice will be reevaluated.

**1.7 Ensure reports are retrieved and acted on by field office staff by establishing a quality control system that requires the hotline unit to reconcile reports sent to field offices to reports printed and taken off the system for action.**

As noted in the audit report, the division has made changes to ensure reports are retrieved from the system. Reports are sent from the central registry to the county offices electronically. There is an audio cue from the printer when the report first comes in. Staff check for new reports several times per day in case the audio alert is missed. The ALOG system has been enhanced

so that reports remain on the list indefinitely in case the daily checks miss one. In addition, local supervisors are charged with checking the system twice weekly for any that might have been missed and central office staff checks the system twice monthly to be sure all reports have been assigned. No further action is needed.

**1.8 Establish a peer review quality control system to ensure policies and practices are consistently followed and applied throughout the DFS child abuse and neglect response system.**

As a part of the statewide accreditation process begun prior to this review, each year DFS performs a Practice Development Review (PDR) in a judicial circuit in each of the four rural administrative areas of the state, and in each of the three metro areas. The PDR looks at all parts of the child protection system rather than just the division's work. These reviews include comprehensive interviews with the children and family members, as well as other people important in the treatment planning for each family. In addition, interviews are held with community stakeholders, including mandated reporters, to gain a more complete picture of how the system functions.

Regular peer reviews of all Children's Services programs begin March 2001, as part of the already established accreditation process. This review entails staff at all levels reading records for 10% of all families served by DFS Children's Services. At the hotline, supervisors will read 10% of the reports taken by staff other than those assigned to the supervisor's unit.

**1.9 Readdress the DFS study of overturns by the Child Abuse and Neglect Review Board on appeal of probable cause findings and take appropriate corrective action as suggested in the report.**

It should be noted that the division's overturn rate on appeals is lower than many other states, including Michigan, which is highlighted for best practices.

DFS will review the report noted above, regarding overturns and determine what action should be taken. A significant error occurred in the report. It states, in FY97 the overturn rate was 44%. In fact the overturn rate was 30%.

The division has already engaged the boards as one of the federally required Citizen Review Panels. In this capacity, the boards will have the opportunity to review files of reports that do not come before them for review, both probable cause and unsubstantiated. There will also be a team within DFS that will read recent CANRB decisions. This will facilitate discussion between the boards and the division regarding decisions made by both parties. Through this dialogue action steps will be identified by April 1, 2001.

**1.10 Establish quality controls that ensure the child abuse central registry and the local case records are appropriately corrected to remove the probable cause finding when the alleged perpetrator wins an overturn on appeal.**

Effective January 1, 2001, the central office staff supporting the Child Abuse and Neglect Review Board (CANRB) will make the necessary change for each alleged perpetrator in the central registry, when the CANRB overturns an investigation. Local offices will continue to be notified to make the necessary changes in the local file and send out corrected notification letters. This will be ensured through inclusion in the peer review done quarterly for other Children's Services Programs as part of accreditation. Unsubstantiated reports will continue to be expunged according to law.

**1.11 Develop a quality control system to ensure DFS is represented at Child Abuse and Neglect Review Board hearings as required by statute.**

At present the division staff participate in 95% of the hearings. DFS policy regarding participation in review board hearings will be reaffirmed in a memo to all staff.

**1.12 Ensure Children's Service workers are provided adequate guidance and training on their responsibility to make appropriate decisions on whether to represent DFS custody children in probable cause finding appeal hearings.**

Children should always be represented at hearings by virtue of the division's participation in the review. In 95% of the cases children were represented. For the 5% of the reviews where staff did not participate county directors will implement a backup plan to ensure representation.

**1.13 Send perpetrator notification letters by certified return receipt requested mail.**

Contacts with other states have indicated many states do not use certified mail and those that do continue to receive complaints regarding failure to receive notice.

**1.14 Redefine hotline unit criteria definitions for preventive service referral classifications to better allow for the best interest of children to be served.**

We believe the current system offers better than average preventive services that are in the best interest of the children. Missouri delivers preventive services to children at a rate of 35.9 children per 1,000. Comparatively, Illinois's child protective services system offers 12.4 children per 1,000 and Michigan's child protective services system serves only 3.9 children per 1,000. (National Child Abuse and Neglect Data System, Child Maltreatment 1998).

**1.15 Provide better policy and guidance to field staff on the handling of preventive service referrals.**

Effective November 15, 2000, the division implemented a data collection system for all referral categories. Through this mechanism DFS will have specific information, rather than anecdotal, about the actions field staff took with preventive service referrals. The division will analyze the first six months of data to determine what if any guidance is needed for staff by June 2001.

**1.16 Improve the understanding of the child abuse and neglect system by mandated reporters and the public by improving the quality and quantity of detailed information easily available. The DFS should increase efforts to explain what can be expected from the system.**

The division was already working on steps to increase the quality and quantity of information available to mandated reporters and the public at large. In March of 2000, DFS policy was implemented for social service workers to contact mandated reporters to share information about the findings and plan how they might work together to provide services for the family.

Changes in legislation strengthened mandated reporter contacts by creating a communication link with schools through a specified liaison within each school district so that information is shared on a regular basis. All of the language in RSMo 210 supports the concept of a strong connection among DFS and all of the other community partners on behalf of children.

Additionally, the division has updated its information packet, made available to all school districts throughout the state, with changes in law and practice. These packets have been available since 1995, and updated as needed.

The central office and local offices participate in innumerable training sessions and community education meetings every year. DFS is also the primary sponsor of a Child Abuse and Neglect Conference held bi-annually which attracts over 1,200 participants. The focus of the conference is on the detection, investigation and treatment of child abuse and neglect as a priority for all community partners.

The division partners with the Children's Justice Task Force and Prevent Child Abuse Missouri to promote professional awareness of Child Abuse and Neglect through the quarterly publication of the "Colleagues for Children" newsletter. This newsletter specifically written for mandated reporters is distributed to 25,000 professionals across the state. Presently, the division has information available on the DSS web site. The number of website visits to the Child Abuse and Neglect page has increased over the last year.

**1.17 Send responses to mandated reporter on the outcome of every call and the reasons for action or inaction.**

Action is taken on every mandated reporter call. Current policy dictates staff to contact the mandated reporter within five days of reaching a conclusion regarding the report. At this time, the social service worker discusses the outcome, reason for it and most importantly how the mandated reporter might assist the family.

**1.18 Ensure that hotline unit call takers make clear to mandated reporters what action can be expected based on the information provided.**

This is existing policy and is included as part of the desk guide check list used by all social service workers at the hotline to ensure appropriate steps are taken with each call. This checklist was developed in December 1999 and all staff received training on its use. There have been

numerous reminders for staff regarding this issue. Memos were sent November 5, 1999 and September 14, 2000 and it was a specific agenda item for a meeting of the hotline supervisors in June 2000. In order to monitor this on an ongoing basis, it will be included in the hotline peer review process mentioned in #1.8.

**1.19 Develop methods to identify and disseminate best practices throughout the DFS system.**

Through an initiative which began in 1996 to promote community based child protection, supported through the Edna McConnell Clark Foundation, the division is participating in the development of a "Best Practices Tool Kit" along with the Family Investment Trust, the Children's Trust Fund and Citizens for Missouri's Children. This package will give ideas to all community members, including DFS, to help ensure that an overall community system is in place to help protect children. The "Tool Kit" should tentatively be available in the summer of 2001.

Area staff meets monthly with central office staff to discuss policy and procedures, new initiatives and areas of concern. Quarterly Continuous Quality Improvement (CQI) meetings, which is part of the accreditation process, offer an opportunity to share ideas and to learn from each other. The PDR and peer review processes present further learning experiences.

**1.20 Ensure DFS Children's Services goals are valid and measurable.**

The auditor's report notes a single discrepancy. This was corrected prior to their review.

**2.1 Ensure that the child abuse and neglect investigations and/or assessment are completed within the required timeframe.**

DFS acknowledges the need to address overdue reports. Area office staff report that contacts have been completed with families to ensure that children are safe and services have been provided. The overdue reports reflect a need for system updates and documentation of actions taken. Current practices identify monthly each overdue report for each county by incident number. Central office has allowed overtime for staff to complete necessary documentation and system updates, and has worked with area staff to make a plan for each area of the state. The additional staff allocations received in the FY 2000 and 2001 budgets and requested in the FY 2002 budget will greatly enhance the ability of the agency to address this important issue. The division will monitor this monthly with the area offices and make corrective action plans.

**2.2 Ensure all accreditation council and other appropriate standards available as staffing planning tools are used to establish staffing allocations and future needs and goals.**

Current practice.

**2.3 Perform time and workload studies to help determine needed staff allocations.**

The division uses standards established through the Council on Accreditation.

**2.4 Relocate open staff positions from areas unable to fill positions to areas where the positions can be filled, when necessary or beneficial.**

The division has conscientiously worked to assure the protection of all children in Missouri. In 1999, a new staffing request for 174 social service workers, was made as part of the statewide accreditation process and was appropriated. These allocations were specifically identified in the budget for the three metro areas where need is the greatest. These areas represent 35% of the population of children in Missouri and 31% of all hotline reports.

DFS continues to request more staff for other areas of the state, including this year's 2000 appropriation request for 105 social service workers and 143 new social services workers for FY 2001.

**2.5 Develop a special team of investigators to assist "problem" areas and help ease the local offices' caseloads. This team could be sent to help counties who are having problems completing child abuse and neglect cases and making initial contacts on cases within the required time frames.**

The division believes a special team would not be necessary if staffed at COA standards.

**2.6 Increase salaries for both social worker and supervisor positions to make DFS jobs more competitive with surrounding states and private organizations who hire social workers.**

The division continues to support salary increases for all staff as revenue resources allow.

**2.7 Provide increased financial compensation to workers who obtain advanced degrees or certifications.**

The division supports educational advancement for staff by paying tuition, books, and fees for employees working on MSW degrees, as well as accommodating flexible work schedules.

**2.8 Ensure that each full time Children's Services social worker is provided with a state-owned cellular phone.**

The division has made 629 cell phones available statewide for staff to use when out of the office and on call.

**2.9 Provide Children's Services social workers with laptop computers and standard automated forms and letters and/or dictation equipment and transcription services.**

The division has been working on a comprehensive management information system and by April 2001, all staff will have computers. Approximately 763 of the available computers are laptops.

Through the rest of this fiscal year the division will be testing a case management application that will include standard automated forms, letters, and other enhancements.

## **2.10 Provide specialized training for:**

- **Front line staff and supervisors on how to use the two track (Investigation/Family Assessment) system to achieve the best possible results and to meet DFS management goals for the system.**

The division began implementing the two track system in 1995. An evaluation was performed and necessary changes in legislation occurred in order to make this statewide practice. Counties adopted the new practice incrementally and each county received training prior to their individual implementation. The practice was in place in all counties by June 1999.

The division has training planned for spring 2001 that will focus on supervisors and their ability to provide consultation and support to their staff. The supervisors, with consultation from central office training and policy staff, will in turn present training to the social service workers. Section 210 RSMo provides for annual training for staff.

- **Staff involved in child abuse and neglect investigations. This training should teach staff to adequately investigate, document and present investigation cases, increasing child safety and decreasing overturns on alleged perpetrators appeals.**

It should be noted that the division's overturn rate on appeals is lower than many other states, including Michigan, which is highlighted for best practices. A new decision item in the FY 2002 budget addresses the need for additional training staff. These trainers would provide skill building regarding the subjects mentioned above as well as other issues involved in the division's services to children and families.

## **2.11 Develop Investigation teams for low population county groups to ensure specially trained workers and supervisors handle child abuse and neglect cases. These employees should not have other duties that interfere with their primary children's services functions.**

The cost of this recommendation is prohibitive. In many rural judicial circuits, the number of reports is so low, it would be difficult to justify the number of full time staff necessary to also ensure adequate coverage for a large geographic area. For example, Circuit 4 includes the five counties of Atchison, Gentry, Holt, Nodaway and Worth. In a three-month period from July through September 2000, these counties received a combined total of 57 reports, or monthly average of 19. This would imply the need for just over one full time worker. The large geographic area and the unpredictable nature of hotline reports, coupled with the need to have staff available for emergencies 24 hours every day makes it impossible to staff with only one part time and one full time person.

The division has other mandated responsibilities for children in addition to investigations and assessments. All of which are primary functions for social service workers. We now staff smaller counties with social service workers who are responsible for a variety of duties. Services to families are often more consistent when the same worker can remain involved with a given family instead of reassigning staff after different phases of work are accomplished. By

combining functions the division makes better use of personnel and provides a more holistic approach to assuring safety and permanency for children. It is important that caseload sizes are appropriate as consistent with COA and the division continues to advocate for full staffing in all counties.

**2.12 Make better use of compensatory time monitoring system to more effectively manage its accumulation and use. Compensatory time should be:**

- **Used before annual leave.**

DSS administrative policy 2-108 indicates supervisors may not require employees to use their compensatory time after the workweek...unless prior approval from the division personnel officer is received. Many social service workers have accrued maximum annual leave and would lose annual leave if forced to use compensatory time instead.

- **Used within a reasonable time frame.**

DFS encourages staff to use compensatory time within the week it is earned. County directors and supervisors work with staff to try to arrange this. In many instances however, this is not possible. DFS will continue to follow DSS policy regarding earning and using compensatory time. Full staffing would help alleviate the need for earning compensatory time.

- **Monitored for purposes of planning future staff allocations and identifying staffing problems or inequities.**

Compensatory time is tracked through the attendance process that also includes sick leave and vacation. Each county office has responsibility for approving and tracking earned and used time for each worker based in the county.

## **STATE AUDITOR OFFICE'S RESPONSE**

The audit findings only highlight problems we found to be systemic and significant, and any examples used in the report were used for the purpose of illustrating the significant problems found. The overriding issues in the report identify significant breakdowns in quality controls and staff support. Stating the audit addressed anecdotal issues cannot dismiss the seriousness of these issues because they are systemic, and incidents will happen again if not corrected.

Although the Division did not state agreement or disagreement with the recommendations, their comments generally indicate agreement and they provided reasonable implementation dates. Some of their comments for corrective action are dependent upon receiving additional staffing. If this additional staffing is not received (and we support getting additional staffing) some corrective action as suggested by the audit will need to be taken. In this regard, we will follow-up with the Division to determine if they received the necessary staffing or if they have implemented interim corrective action. There are a few comments where the division neither agreed nor disagreed and therefore, we will also follow-up on them.

**Recommendation 1.13. Send perpetrator notification letters by certified return receipt requested mail.** The response stated that other states do not use certified return receipts and those that do, still get complaints that they were not received. The Division did not state whether they would or would not use certified return receipts. The point of the recommendation was to establish a cutoff time so late appeals do not have to be honored.

**Recommendation 1.14. Redefine hotline unit criteria definitions for preventive service referral classifications to better allow for the best interest of the children to be served.** The response stated that the Division provides better than average preventive services. This response misses the point. The recommendation is directly related to the incidents of categorizing cases as unable-to-investigate rather than considering preventive services; and that the cause for this action was that the Division had too narrow of an interpretation of what can be referred as preventive services.

**Recommendations 2.2 and 2.3 address staffing allocation methodologies.** The response stated that current practice and use of the Council on Accreditation standards satisfy the intent of our recommendations. In order for this to be true, the Division will have to acquire the staffing they need. In the absence of getting such staffing, our recommendations to develop staffing standards and contingency plans for allocating staff are still appropriate.

**Recommendation 2.7. Provide increased financial compensation to workers who obtain advanced degrees or certifications.** The response stated that the Division provides monetary assistance for social workers who want to obtain their Masters Degrees. However, it does not address the new hire social worker who already has a Masters Degree. By not providing additional salary compensation for individuals with higher-level degrees, the Division is vulnerable to turnover of their most qualified staff.

CITY OF LOUISIANA, MISSOURI

YEAR ENDED MAY 31, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-131  
December 28, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**The following problems were discovered as a result of an audit conducted by our office of the City of Louisiana, Missouri.**

---

During the period between December 1998 and January 2000, fines, court costs, and bonds received by the court totaling over \$3,800 were not deposited to the court's bank account. The monies that are missing represent cash receipts which were received and recorded but not deposited. These missing funds were not detected on a timely basis due to numerous internal control weaknesses, inadequate segregation of duties, and little or no independent review.

The Court Clerk resigned in November 2000. Information gathered during our review has been turned over to the Pike County Prosecuting Attorney's office and the Pike County Sheriff's office.

In late 1996, the city decided to construct a new water treatment plant rather than try to bring its two existing water treatment plants into compliance with new state Department of Natural Resources (DNR) regulations. Letters were sent to the owners of the two sites determined to be feasible indicating that the city was interested in buying one of the sites.

The city rejected an offer from one individual of approximately \$300,000 and accepted the offer from the second individual of \$120,000 plus the old water treatment plant land (valued at approximately \$32,000 by the Pike County Assessor).

The city did not obtain a professional appraisal of the land prior to purchase. According to the Pike County Assessor, the estimated market value of the building and land, prior to the city's purchase, was approximately \$44,000. The disparity between this amount and the amount paid demonstrates the benefit of an independent appraisal to help establish the market value of the land.

In January 1997, the city signed a contract for the land contingent upon the passage of the bond issue in April 1997. The bond issue passed and DNR approved the plans in October 1998. The city signed a contract with a construction company in February 1999. The contract for the purchase of the land for the new water treatment plan stated that the city would include a penalty clause in the new plant construction contract. Although the wording is unclear, it appears the clause would require the construction company to pay a \$500 per day penalty if the new plant was not operational within 24 months of the passage of the bond issue. The contract the city signed with the construction company, however, did not include this clause, but instead included a clause providing for a \$500 per day penalty if the construction was not completed within 455 calendar days of the date the

(over)

YELLOW SHEET

contract was signed. In April 1999, based on the required clause in the land purchase contract, the former owner of the land requested that the city either vacate the old water treatment plant facilities or that the city pay rent for the use of the facilities. The city refused and the owner filed a lawsuit against the city in April 2000.

In 1999, the city purchased a new city hall building for \$100,000. During the year ended May 2000, approximately \$34,000 was spent in renovations, including more than \$7,000 in labor costs and \$26,000 in materials. These expenditures were not planned for in the city budget. The renovations were authorized by the Mayor but were not formally approved by the city council prior to incurring the charges as required by city ordinance. In addition, there is no documentation that bids were solicited for this work and no contract was signed with the individuals performing the labor.

In June 2000, the city started collecting late fees of two-percent of the delinquent balance each month on its water bills. The city has an informal policy that allows city employees to be exempt from paying these late fees. In addition, it is currently the city's informal policy to allow city employees who normally operate city equipment to borrow the equipment during non-working hours for personal use.

Prior to April 1998, the city had a credit card to be used for miscellaneous city purchases. According to the current Mayor and the City Superintendent, the city previously had an informal policy allowing personal use of the credit card by city employees. Employees who used the card for personal use were supposed to either reimburse the city for the personal charges or pay the credit card company directly; however, the city did not track these personal charges to ensure reimbursement was received from the employees. Payments were processed without supporting documentation, approval, and documentation of purpose. In April 1998, the credit card was cancelled by the newly elected Mayor. Personal expenditures totaling \$1,074 were charged to the card from June 1996 through April 1998; the City Clerk could not provide documentation indicating these were city charges. Only \$204 of these personal charges have been shown to be reimbursed to the city. The City Clerk provided us with documentation showing reimbursement had been made in 1997 for an additional \$267; however, this documentation was not legitimate and appeared to be falsified. The city indicates she paid \$267 to the city and resigned in October 2000.

The city does not have a written depository agreement with an investment firm or the banks requiring collateral securities to be provided to cover deposits in excess of Federal Deposit Insurance Corporation (FDIC) coverage. Certificates of Deposit are covered by FDIC Insurance up to \$100,000; however, one CD exceeded the FDIC coverage by \$8,000 at June 30, 2000. The city also has money market accounts that are neither insured or guaranteed by the U.S. government.

The city does not have a formal bidding policy. The decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. During the past few years, bids were either not solicited or bid documentation was not retained in several instances, such as for a street sweeper costing \$95,444 or two backhoes costing approximately \$87,000.

The city does not maintain records to account for all property owned by the city. The city owns approximately 30 vehicles and has not adopted a formal policy regarding the use of city-owned vehicles, including policies which prohibit personal use.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Members of the City Council  
City of Louisiana  
Louisiana, Missouri 63353

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Louisiana, Missouri. The city had engaged Wade, Stables, Schanbacher & Walker, P.C., Certified Public Accountants (CPA firm), to perform a financial audit of the city for the year ended May 31, 2000. To minimize any duplication of effort, we reviewed the report and substantiating work papers of the CPA firm. Our audit of the city included, but was not limited to, the year ended May 31, 2000. The objectives of this audit were to:

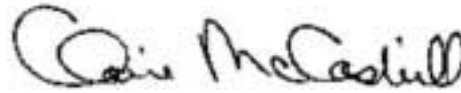

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed council minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Louisiana, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

August 10, 2000

- (1) Dr. Howard Greene was appointed to the City Council when Allen Murry resigned in August 1999. Dr. Greene was re-elected in April 2000 for the one year unexpired term.
- (2) Steven Ballinger resigned from City Council in October 2000. A replacement has not been appointed.
- (3) Wesley Meyers served as City Marshall until his resignation in June 2000. William Laub was appointed City Marshall in June 2000.
- (4) Kathy Walker resigned in October 2000. Sharon Kakouris was appointed as City Clerk in November 2000.
- (5) Jeana Thomas was appointed Treasurer in November 1999, to replace Ruth Elliott.
- (6) Ruth Shumaker was appointed Collector in November 1999, to replace Jeana Thomas. Ruth resigned in June 2000. Christina McCormick was appointed Collector/Administrative Assistant in November 2000.
- (7) Patricia Chandler resigned in November 2000. Kristina Branstetter was appointed Court Clerk in November 2000.
- (8) Joseph Allwood served as City Attorney until his resignation in May 2000.

The city also employs approximately 40 full-time and 20 part-time employees.

Assessed valuation and tax rate information are as follows:

| ASSESSED VALUATION | 1999                 |
|--------------------|----------------------|
| Real Estate        | \$ 18,357,055        |
| Personal Property  | 8,387,426            |
| Total              | <u>\$ 26,744,481</u> |

#### TAX RATES PER \$100 ASSESSED VALUATION

|              | Rate    | Expiration Date |
|--------------|---------|-----------------|
| General Fund | \$ 0.73 | None            |
| Library      | 0.10    | None            |

The city has the following sales tax; the rate is per \$1 of retail sales:

|         | Rate     | Expiration<br>Date |
|---------|----------|--------------------|
| General | \$ 0.015 | None               |

## MANAGEMENT ADVISORY REPORT

CITY OF LOUISIANA, MISSOURI  
SUMMARY OF FINDINGS

1. New Water Treatment Plant (pages 10-11)

A professional appraisal was not obtained prior to purchasing land for a new water treatment plant. The land purchase contract included a deadline for vacating the old plant which the city did not pass along to the contractor and did not meet.

2. New City Hall (pages 11-13)

Renovation expenditures totaling \$34,364 were authorized by the Mayor without the formal approval of the city council. A formal written policy regarding leasing of office spaces has not been established and written agreements are not signed with entities using office space free-of-charge.

3. Personnel (pages 13-15)

Duties for all employees and officials of the city have not been established by ordinance. City employees are exempt from paying late fees on water bills and are allowed to use city equipment for personal use. The city does not track reimbursements of insurance premiums by city employees to ensure the city receives payments timely. Additionally, the city is not including all compensation on employees' W-2 forms and is not always issuing W-2 forms when applicable.

4. Expenditure Procedures (pages 15-17)

The city does not have formal written bidding policies and procedures. Bids were not solicited or bid documentation was not retained for purchases totaling over \$200,000. Forms 1099-MISC are not filed as required. City funds were used for an employee Christmas party, employee Christmas gifts, and flowers for funerals of former employees and relatives of current employees. Competitive bids were not obtained for purchases made from a company partially owned by a councilman. Additionally, an expenditure was deliberately charged to the wrong budget category.

5. Credit Card Procedures (pages 17-18)

The city credit card was used for personal charges totaling \$1,074. The city had documentation showing only \$204 in personal charges were reimbursed. The city did not have formal procedures for the use of the credit card and charges were not supported with adequate documentation.

6. Receipt Procedures (pages 18-19)

Prenumbered receipt slips are not issued for all monies received by the city and the method of payment is not recorded. Deposits are not made on a timely basis and checks are not restrictively endorsed immediately upon receipt.

7. Budgets, Financial Statements, and Minutes (pages 19-20)

The city's budgets do not reflect beginning available resources, projected ending fund balances, a budget message, and debt information. The city's semi-annual financial statements do not include the city's indebtedness. Council minutes are sometimes not signed by the Mayor and City Clerk.

8. Contracts (page 20)

The city did not enter into contracts with various individuals for sludge dumping.

9. Investments (page 21)

The city did not have adequate collateral securities pledged on an investment. Additionally, some city monies are deposited into money market mutual funds. These type of investment accounts are neither insured or guaranteed by the U.S. government and may not be proper investments of local public funds.

10. General Fixed Asset Records and Procedures (pages 21-23)

The city does not maintain records to account for all property owned by the city. Additionally, the city has not adopted a formal policy regarding the use of city-owned vehicles and mileage logs are not maintained for city vehicles.

11. Municipal Court (pages 23-26)

Cash receipts of \$3,800 were not deposited and are missing. Other court receipts were not always deposited intact on a timely basis. Receipt slips are not issued for all monies received, some copies of voided receipt slips are not maintained, and the method of payment is sometimes not recorded correctly. Duties of receiving, recording, and transmitting monies collected by the Municipal Court are not adequately segregated. Listings of open items are not prepared on a regular basis. Procedures utilized to monitor amounts due to the municipal division are not adequate. Adequate records are not maintained to account for all traffic tickets issued and their ultimate disposition. Additionally, court dockets are not always complete and accurate.

CITY OF LOUISIANA, MISSOURI  
MANAGEMENT ADVISORY REPORT

|                                     |
|-------------------------------------|
| <b>1. New Water Treatment Plant</b> |
|-------------------------------------|

In late 1996, the city decided to construct a new water treatment plant rather than try to bring its two existing water treatment plants into compliance with new state Department of Natural Resources (DNR) regulations. The city contracted with an engineering firm to perform preliminary engineering studies to determine feasible sites for construction. Letters were then sent to the owners of the two sites determined to be feasible indicating that the city was interested in buying one of the sites. The city rejected an offer from one individual of approximately \$300,000 and accepted the offer from the second individual of \$120,000 plus the old water treatment plant land (valued at approximately \$32,000, by the Pike County Assessor). The city signed a contract for the land in January 1997 contingent upon passage of the bond issue in April 1997. In April 1997, the bond issue passed, and in May 1997, the city issued \$3,000,000 in general obligation bonds. The city then contracted with an engineering firm to design the proposed water treatment plant. Due to the death of the lead engineer and various concerns regarding the plans and other problems, the plans were not approved by the DNR until October 1998. The city signed a contract with a construction company in February 1999. We noted the following concerns regarding this project:

- A. The city did not obtain a professional appraisal of the land prior to purchase. According to the Pike County Assessor, the estimated market value of the building and land prior to the city's purchase was approximately \$44,000. The disparity between this amount and the amount paid demonstrates the benefit of an independent appraisal to help establish the market value for the land.
- B. The contract for the purchase of the land for the new water treatment plant stated that the city would include a penalty clause in the new plant construction contract. Although the wording is unclear, it appears the clause would require the construction company to pay a \$500 per day penalty if the new plant was not operational within 24 months of the passage of the bond issue. The penalty was to be divided equally between the city and the landowner. The City Council indicated the City Attorney at the time reviewed and approved the contract for the purchase of the land for the new water treatment plant. The contract the city signed with the construction company, however, did not include this clause but instead included a clause providing for a \$500 per day penalty if construction was not completed within 455 calendar days of the date the contract was signed (May 3, 2000). The city indicated it believed this clause fulfilled the requirement of the land purchase contract, even though the penalty clause provided for a different time frame than the land purchase contract specified.

In April 1999, based on the required clause in the land purchase contract, the former owner of the land requested that the city either vacate the old water

treatment plant facilities or that the city pay rent for the use of the facilities. The city refused. In April 2000, the owner filed a lawsuit against the city because the city had not required the construction company to pay a \$500 per day penalty for exceeding the contract period. Additionally, the lawsuit is attempting to get the city to vacate the old water treatment plant facilities.

**WE RECOMMEND** the City Council:

- A. Obtain professional appraisals on buildings or land it considers purchasing.
- B. Ensure all contract terms and clauses are clear and unambiguous. The city should comply with terms of previous contracts when entering into new contracts that are based on prior contractual agreements.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *We will obtain appraisals next time we purchase land or buildings.*
- B. *The city's attorney at that time reviewed the contract for the purchase of the land and approved it. The City Attorney at the time also indicated that the deadline in the construction contract was adequate. The city followed its attorneys' opinions in this matter. In the future, we will ensure all contract terms are clear and any deadlines are within our control.*

|                         |
|-------------------------|
| <b>2. New City Hall</b> |
|-------------------------|

In 1999, the city purchased a new city hall building for \$100,000. We noted the following concerns regarding the city hall:

- A. During the year ended May 31, 2000, \$34,364 was spent in renovations to the new city hall building. This included \$7,671 in labor costs and \$26,693 in materials. These expenditures were authorized by the Mayor and were not planned for in the city budget. Although it appears that some discussion of the renovations occurred during the Building and Grounds Committee meetings, the renovations were not formally approved by the City Council prior to incurring the charges. The city's purchasing ordinance states that any officer of the city or committee of the city council must have prior approval of the council in the form of a council ordinance or resolution to expend more than \$300, except in the case of an emergency.

In addition, there is no documentation that bids were solicited for this work and no contract was signed with the individuals performing the labor.

The Mayor indicated the city currently allows department heads to expend monies without limit, so long as the council has included the purchase in the budget. However, since the project was not budgeted, it would appear this "informal" policy was not complied with either.

- B. Office space in the new city hall building is leased to individuals at a rate of \$200 per month for regular offices, \$250 per month for corner offices, and \$350 per month for two offices. The city indicated that the rent it charges will cover the city's costs to maintain the offices. Additionally, the city indicated that these prices are what the market would bear. However, the city did not perform a formal analysis to determine the costs of maintaining the building to ensure that these costs will be covered by the rent payments and no documentation was maintained indicating what prices the market would bear.

Additionally, the city has not adopted a formal written policy regarding leasing these office spaces. A formal written policy will help ensure that all lessees receive equitable treatment.

- C. The city does not have written lease agreements with the entities that are using offices in the city hall building free-of-charge (the Pike County Developmental Authority and a probation office). Formal written agreements are necessary to document each party's duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires political subdivisions' contracts be in writing.

**WE RECOMMEND** the City Council:

- A. Ensure all expenditures have prior approval of the council as required by ordinance. In addition, all large expenditures such as this should be bid and have written contracts.
- B. Establish a minimum lease amount to ensure the city recovers the cost of maintaining the building. Additionally, the City Council should adopt a formal written policy regarding leasing of office space in the city hall building.
- C. Obtain written agreements with all entities using office space in the city hall building to ensure the rights and responsibilities of all parties are specifically outlined.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *Expenditures such as these are always approved by the council prior to payment. However, they are not always approved prior to incurring the charges. The Building and Grounds Committee was aware of these expenditures prior to incurring the charges. We*

*will ensure all future expenditures are properly approved. We will also ensure large expenditures are properly bid and written contracts are entered into.*

- B. The city called around to check other rental prices in town. However, no documentation was kept of this. The city plans to do a formal analysis to ensure that the rental income is covering the related expenses and document other rental prices in town. This will be done by April 1, 2001.*
- C. We will obtain written agreements for all entities using office space in city hall by January 2001.*

|                     |
|---------------------|
| <b>3. Personnel</b> |
|---------------------|

- A. Throughout calendar years 1997 and 1998, the city switched back and forth between having a City Treasurer and no City Collector and having a City Collector and no City Treasurer. The city's ordinances at that time regarding the Collector and Treasurer positions did not clearly define the duties of either position and as a result, during the time from September 1997 through April 1998, the city's general ledger was not maintained. In April 1998, the city paid the City Collector an additional \$3,500 to get the general ledger up-to-date. Documentation of duties and job descriptions would clarify the duties and responsibilities of each employee and official and help prevent misunderstandings.
- B. In June 2000, the city started collecting late fees of two-percent of the delinquent balance each month on its water bills. The city has an informal policy that allows city employees to be exempt from paying these late fees. One employee had a delinquent balance of approximately \$200 as of June 28, 2000. This policy does not appear equitable for all citizens of the city.
- C. It is currently the city's informal policy to allow city employees who normally operate city equipment to borrow the city equipment during non-working hours for personal use. This has raised concerns among citizens regarding the propriety of such usage and does not appear to be a prudent use of city resources.
- D. The city allows former city employees, family members of former city employees, and ex-spouses of current city employees to maintain their insurance through the city for a period of 18 months after termination or divorce. Additionally, the city allows former employees who have retired from the city to stay on the insurance plan indefinitely. The individuals are supposed to reimburse the city monthly for this cost; however, the city does not monitor payments from these individuals to ensure they are paying monthly and that they are paying the correct amount. Because the city was not monitoring this, the city failed to realize one individual was paying an incorrect amount, and, as a result, owes \$249 to the

city. The city should be monitoring the insurance reimbursements to ensure all reimbursements are made on a timely basis and for the correct amount.

- E.1. As set by ordinance, the city pays the personal utility costs of the city's fire truck driver/janitor. Total costs were approximately \$1,400 for the year ended December 31, 1999. These costs have not been included on the employee's W-2 form in the past. Internal Revenue Service (IRS) regulations require such benefits be considered gross income and require payroll taxes be withheld from this gross income. The failure to submit the required forms could result in penalties to the city.
- 2. For the year ended December 31, 1999, the city did not report, withhold payroll taxes, and pay the employer's share of social security for the library janitor's wages of \$1,664. The IRS regulations require employers to report wages on W-2 forms and withhold federal income taxes. Similarly, Chapter 143, RSMo 1994, includes requirements for reporting wages and withholding state income taxes. State and federal laws require employers to withhold payroll taxes and pay the employer's share of social security on the compensation paid to employees. Section 105.300, RSMo 1994, defines an employee of a political subdivision as an employee for social security tax purposes.

**WE RECOMMEND** the City Council:

- A. Establish by ordinance the duties of all city officials and employees.
- B. Discontinue the informal policy of allowing city employees exemption from paying late fees on city water bills.
- C. Discontinue the informal policy of allowing city employees to use city equipment for personal use.
- D. Monitor insurance payments from retirees and individuals on the insurance plan to ensure they are paying the correct amount and that the payments are timely.
- E. Ensure all compensation provided for or paid to city employees is properly reported and appropriate payroll taxes are withheld and paid. In addition, the city should consider filing amended W-2 forms for the unreported employee compensation.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

A,B,  
&D. *These recommendations have been implemented.*

- C. *We have developed a formal policy concerning the use of city equipment for personal use. It is awaiting council approval.*
- E. *This recommendation will be implemented. We will ensure all compensation is properly reported for 2000 and will consider filing amended W-2 forms for past years.*

|           |                               |
|-----------|-------------------------------|
| <b>4.</b> | <b>Expenditure Procedures</b> |
|-----------|-------------------------------|

- A. The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. During the past few years, bids were either not solicited or bid documentation was not retained in several instances.

|                             |          |
|-----------------------------|----------|
| Street sweeper              | \$95,444 |
| Two backhoes                | 87,180   |
| Truck                       | 22,544   |
| City ordinance book binding | 10,560   |
| Laser printer               | 2,637    |
| Mosquito spray              | 2,117    |
| Cemetery mower              | 2,000    |
| Electrical supplies         | 1,989    |

Formal bidding procedures for major purchases provide a framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding helps ensure all parties are given an opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected.

- B. The city did not file Forms 1099 with the Internal Revenue Service. The Internal Revenue Code requires payments of \$600 or more annually for services by nonemployees (other than corporations) be reported to the federal government on Form 1099. During the year ended December 31, 1999, the city paid one individual \$4,560 in labor costs to renovate the new city hall building. Also, the city paid a software consultant \$150 each quarter (\$600 per year) in software rental charges. Additionally, in January 2000, the water department paid an individual \$3,036 for performing various services including checking various gear boxes and water stations during calendar year 1999.
- C. The city spent \$787 during the year ended May 31, 2000, for an employee Christmas party and employee Christmas turkeys. In addition, the city purchased flowers for the funerals of former employees and relatives of current employees.

These disbursements do not appear to be necessary or prudent uses of public funds. Expenditures such as these could be funded through an employee contribution fund or association. The city's residents have placed a fiduciary trust in their public officials to spend tax revenues and fees in a necessary and prudent manner.

- D. During the year ended May 31, 2000, the city made several purchases of paper products totaling approximately \$3,100 from a local paper supply company partially owned by a councilman. Competitive bids were not obtained for these expenditures.

Section 105.458.2, RSMo, Cumulative Supp. 1999, states "No sole proprietorship, partnership, joint venture, or corporation...in which any member of any political subdivision...is the partner...or owner...shall:... (2) Sell, rent or lease any property to the political subdivision or any agency of the political subdivision where the consideration is in excess of five hundred dollars per transaction or one thousand five hundred dollars per annum unless the transaction is made pursuant to an award on a contract let or a sale made after public notice and in the case of property other than real property, competitive bidding, provided that the bid or offer accepted is the lowest received." The city should obtain bids and retain bid documentation for all purchases, exceeding \$500 per transaction and \$1,500 annually, from businesses owned by city officials in order to ensure and adequately document compliance with this statute.

- E. The city does not always code expenditures to the appropriate line item. In April 2000, the council approved a cemetery mower expenditure of \$2,000 to be paid out of the cemetery salaries line item. The board approved coding this expenditure in this manner because the equipment line item had been depleted. The city should ensure all expenditures are correctly classified.

**WE RECOMMEND** the City Council:

- A. Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected.
- B. Ensure that IRS Forms 1099 are filed as required for prior years as well as in the future.
- C. Limit disbursements to only those necessary to properly operate the city.
- D. Comply with state laws relating to purchases from businesses owned by city officials.
- E. Ensure expenditures are charged to the correct line item.

## **AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. We have established a formal bid policy and will ensure all items are properly bid. This policy awaits council approval.*
- B. We will file amended 1099 forms for prior years and correct 1099 forms for 2000.*
- C. We believe the Christmas party and turkey expenses are a form of fringe benefit compensation to the employees. A policy has been written and awaits council approval. Funeral flowers will be paid by officials and employee donations in the future.*
- D. We will bid all future paper product purchases.*
- E. We have already implemented this recommendation.*

|                                  |
|----------------------------------|
| <b>5. Credit Card Procedures</b> |
|----------------------------------|

- A. Prior to April 1998, the city had a credit card to be used for miscellaneous city purchases. According to the current Mayor and the City Superintendent, the city previously had an informal policy allowing personal use of this credit card by city employees. Employees who used the card for personal use were supposed to either reimburse the city for the personal charges or pay the credit card company directly; however, the city did not track these personal charges to ensure reimbursement was received from the employees. Personal expenditures totaling \$1,074 were charged to the card from June 1996 through April 1998, by the City Clerk and various other city employees. The City Clerk could not provide documentation indicating these were city charges. Only \$204 of these personal charges have been shown to be reimbursed to the city. The City Clerk provided us with documentation showing reimbursement had been made in 1997 for an additional \$267; however, this documentation was not legitimate and appeared to be falsified.
- B. There were no formal procedures for use of this credit card including authorization, approval, and review of expenditures. As a result, payments were processed without supporting documentation, approval, and documentation of purpose. During the two years ended May 31, 1998, charges of \$1,418 (73% of total credit card expenditures) were not supported by adequate documentation. Without adequate documentation, the city cannot ensure purchases are for city purposes.

The credit card was cancelled by the newly elected Mayor in April 1998.

**WE RECOMMEND** that if city credit cards are used in the future, the City Council:

- A. Not allow personal use of city credit cards. In addition, the city should request payment of the \$870 in unreimbursed personal charges.
- B. Establish formal policies and procedures for credit card accounts.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *We received reimbursement for \$267 from the City Clerk on October 25, 2000. We will attempt to obtain reimbursement for the remaining \$603 in the next 12 months. We have referred this matter to the County Prosecuting Attorney.*
- B. *We do not have a credit card at this time. If a credit card is used in the future, we will not allow personal use and formal policies and procedures will be established.*

|                              |
|------------------------------|
| <b>6. Receipt Procedures</b> |
|------------------------------|

- A. The City Collector's office collects various types of receipts, including property taxes, car licenses, pet licenses, and monthly turnovers from the license office manager. Property tax bills are marked paid and serve as the property tax receipt slips. Manual receipt slips are issued for all other monies received; however, these manual receipt slips are not prenumbered. To adequately account for all receipts, prenumbered receipt slips should be issued for all monies received and the numerical sequence should be accounted for properly.
- B. The method of payment received (i.e. cash, check, money order) is not recorded on the receipt records. To ensure all receipts have been recorded properly and deposited intact, the method of payment received should be recorded on each receipt slip and the composition of receipt slips should be reconciled to the composition of bank deposits.
- C. Deposits are not made on a timely basis. During the year ended May 31, 2000, deposits were generally made every other day with deposits averaging over \$1,000. To adequately safeguard cash receipts and reduce the risk of loss or misuse of funds, deposits should be made on a daily basis or when accumulated receipts exceed \$100.
- D. Checks and money orders received are not restrictively endorsed immediately upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should always be restrictively endorsed immediately upon receipt.

**WE RECOMMEND** the City Council:

- A. Require prenumbered receipt slips to be issued for all monies received, and ensure the numerical sequence of receipt slips is accounted for properly.
- B. Ensure the method of payment is recorded on each receipt slip and the composition of receipt slips is reconciled to the composition of bank deposits.
- C. Ensure deposits are made on a daily basis or when accumulated receipts exceed \$100.
- D. Ensure checks and money orders are restrictively endorsed immediately upon receipt.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated these recommendations have been implemented.*

|  |
|--|
| <b>7. Budgets, Financial Statements, and Minutes</b> |
|--|

- A. The budgets for the city's years ended May 31, 2001 and 2000, did not include some information required by state law. The budget did not reflect beginning available resources or projected ending fund balances; a budget message describing the important features of the budget and major changes from the preceding years; or interest, amortization, or redemption charges on debt.

Section 67.010, RSMo 1994, requires each political subdivision of the state to prepare annual budgets with specific information. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area. A complete budget should include appropriate revenue and expenditure estimates by classification, and include the beginning available resources and reasonable estimates of the ending available resources for all funds. The budget should also include a budget message and information on interest, amortization, or redemption charges on debt.

- B. The city's semi-annual published financial statements do not include the city's indebtedness. The published financial statements for May 31, 2000 and December 31, 1999, did not include bonds payable or capital lease obligations of the city at that date.

Section 77.110, RSMo 1994, requires the city council to publish, semi-annually, a full and detailed account of the receipts, expenditures, and indebtedness of the city. The publication of such financial statements are intended to provide information to citizens regarding the financial activity and condition of the city.

- C. The council minutes are prepared by the City Clerk, but the minutes are sometimes not signed. The minutes should be signed by the City Clerk as preparer and by the Mayor to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the council meetings.

**WE RECOMMEND** the City Council:

- A. Ensure annual budgets include all relevant information, as required by state law.
- B. Ensure the published financial statements provide the citizens an adequately detailed account of the financial activity and indebtedness of the city.
- C. Ensure board minutes are signed by the City Clerk and the Mayor to attest to their completeness and accuracy.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *This recommendation will be implemented when the budget is prepared for next year.*
- B. *This recommendation will be implemented when the financial statements are published in December.*
- C. *This recommendation has been implemented.*

|                     |
|---------------------|
| <b>8. Contracts</b> |
|---------------------|

During the year ended May 31, 2000, the city contracted with a landowner and paid him \$12,500 to allow the city to dump sludge from the city's sewer system onto his land. During the last three months of the fiscal year, the city began dumping sludge at five additional sites owned by five other individuals at no cost. The city did not enter into contracts with these five landowners.

Formal written agreements are necessary to document each party's duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires political subdivisions' contracts be in writing.

**WE RECOMMEND** the City Council enter into written agreements for all services.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated that this recommendation will be implemented by January 2001.*

|                       |
|-----------------------|
| <b>9. Investments</b> |
|-----------------------|

- A. Through an investment firm, the city invests funds in Certificates of Deposit (CD's) at various banks. The city does not have a written depository agreement with the investment firm or the banks requiring collateral securities be provided to cover deposits in excess of Federal Deposit Insurance Corporation (FDIC) coverage. CD's are covered by FDIC Insurance up to \$100,000; however, we noted one CD that exceeded the FDIC coverage by \$8,000 at June 30, 2000.

Section 110.020, RSMo 1994, provides the value of the securities pledged shall at all times be not less than 100 percent of the actual amount on deposit less the amount insured by the FDIC. Inadequate collateral securities leave funds unsecured and subject to loss in the event of a bank failure.

- B. The city also has money market accounts at these various banks through the investment firm. However, the monies maintained in these accounts are neither insured nor guaranteed by the U.S. government. Investments of local public funds are limited to insured or collateralized banking deposits or direct investments in government securities that can be held to maturity.

**WE RECOMMEND** the City Council:

- A. Enter into written agreements requiring collateral securities be pledged for all funds on deposit in excess of FDIC coverage.
- B. Review this situation with its attorney and determine whether the money market accounts are a proper and legal investment for the city.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *We will no longer invest amounts totaling over the FDIC insured rate, unless we have entered into a written agreement requiring collateral securities be pledged for all funds on deposit in excess of FDIC coverage.*
- B. *We will have our attorney review this situation and make a determination by January 2001.*

|   |
|---|
| <b>10. General Fixed Asset Records and Procedures</b> |
|---|

- A. The city does not maintain records to account for all property owned by the city. Property records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur. The records should include a

detailed description of the assets including the name, make and model numbers, and asset identification number, the physical location of the assets, and the date and method of disposition of the assets. In addition, all property items should be identified with a tag or other similar device, and the city should conduct annual inventories.

Adequate general fixed asset records are necessary to secure better internal control and safeguard city assets which are susceptible to loss, theft, or misuse, and provide a basis for determining proper insurance coverage required on city property.

A similar condition was reported in the city's independent CPA audit report.

- B. The city owns approximately 30 vehicles and has not adopted a formal policy regarding the use of city-owned vehicles, including policies which prohibit personal use. A formal policy would help ensure the vehicles are used only in a manner approved by the board.

In addition, mileage logs which document vehicle use are not maintained. Logs are necessary to document appropriate use of the vehicles and to support gasoline charges. The logs should include the purpose and destination of each trip, the daily beginning and ending odometer readings, and the operation and maintenance costs. These logs should be reviewed by a supervisor to ensure vehicles are used only for city business, are being properly utilized, and help identify vehicles which should be replaced. Information on the logs should be reconciled to gasoline purchases and other maintenance charges.

**WE RECOMMEND** the City Council:

- A. Ensure property records are maintained which include all pertinent information for each asset such as tag number, description, cost, acquisition date, location, and subsequent disposition. Additionally, the city should properly tag, number, or otherwise identify all applicable city property and conduct an annual inventory.
- B. Establish a formal policy governing the use of city vehicles, and require complete and accurate mileage logs be maintained for each vehicle. The logs should be reviewed by a supervisor periodically for completeness and reasonableness.

**AUDITEE'S RESPONSE**

*The City Council and Mayor indicated:*

- A. *We are currently working on this area and will have complete and up to date property records by February 2001. We plan to tag any unmarked property and perform an inventory in March 2001.*

- B. *This policy has been composed and awaits council approval.*

|                            |
|----------------------------|
| <b>11. Municipal Court</b> |
|----------------------------|

- A. Payments for fines, court costs, and bonds are received directly by the Court Clerk or police dispatchers. Prenumbered receipt slips are issued for all monies received. Prior to January 2000, the Court Clerk deposited fines, court costs, and bond monies directly into the court's bank account and performed the monthly bank reconciliations.

In January 2000, the Court Clerk began turning the fines, court costs, and bond monies over to the City Treasurer for deposit into the court's bank account and the City Treasurer began performing the monthly bank reconciliations.

During the period between December 1998 and January 2000, fines, court costs, and bonds received by the court totaling over \$3,800, were not deposited to the court's bank account. The monies that are missing represent cash receipts which were received and recorded but not deposited.

These missing funds were not detected on a timely basis due to numerous internal control weaknesses, inadequate segregation of duties, and little or no independent review as discussed below.

The Court Clerk resigned in November 2000. Information gathered during our review has been turned over to the Pike County Prosecuting Attorney's office and the Pike County Sheriff's office.

- B. Prior to May 2000, court receipts were not always transmitted to the City Treasurer intact on a timely basis. Transmittals were made approximately every other week and amounts often exceeded \$1,500. The majority of monies collected by the municipal division is cash. To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, monies should be transmitted daily or when accumulated receipts exceed \$100.
- C. The municipal division accepts cash, checks, and money orders for the payment of fines, court costs, and bonds. The Court Clerk issues prenumbered receipt slips; however, receipt slips are not issued for some monies received and some copies of voided receipt slips are not retained. In addition, the method of payment is not consistently and accurately noted on the receipt slips. To provide assurance all monies received have been properly deposited, a receipt slip noting method of payment should be issued for all monies received, and the composition of monies received should be reconciled to the composition of bank deposits.
- D. The duties of receiving, recording, and transmitting monies collected by the municipal court are not adequately segregated. Currently, the Court Clerk

performs all of these duties. Although the City Treasurer does perform a bank reconciliation of the court account, she does not reconcile the bank amounts to the court clerk's records.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating the duties of receiving monies from that of recording receipts and preparing and making transmittals. If proper segregation cannot be achieved, at a minimum, the City Treasurer should be reconciling the court clerk's records of receipts and disbursements to the deposits and bank reconciliations.

- E. Listings of open items (liabilities) were not prepared on a regular basis throughout the audit period. At our request, a May 31, 2000, listing was prepared and this listing reconciled to the cash balance.

Monthly listings of open items should be prepared and reconciled to the cash balance to ensure proper accountability over open cases and to ensure monies held in trust by the municipal division are sufficient to meet liabilities. A review of old bond monies still remaining in the account should be made and these monies disposed of as provided for in various applicable statutory provisions.

- F. The municipal division allows defendants to sign a payment plan agreement and pay fines and costs over a period of time. At May 31, 2000, municipal division records indicated an accounts receivable balance of approximately \$65,808. Accounts receivable records and procedures are not adequate to account for and collect amounts due to the court. Several instances were noted where periodic payments as required by the payment plan agreements were missed and no follow up action was taken, the accounts receivable records were not updated for payments, partial payments were being made but no payment plan agreement was on file, individuals with balances due were not included on the accounts receivable listing, arrest warrants were not issued for individuals with delinquent balances, and individual case file receivable information did not agree to the summary listing.

To facilitate monitoring of amounts due to the division, and to provide information to the Municipal Judge, an accurate and complete accounts receivable listing is necessary. In addition, proper follow-up action should include requiring the defendant to appear in court to justify reasons for non-payment, the issuance of arrest warrants for those defendants not providing such justification, and writing off those accounts which are deemed to be uncollectible, after review and approval by the Municipal Judge. The accounts receivable listings should be periodically reconciled to the individual accounts receivable records to check the accuracy of each record.

- G. The Court Clerk maintains records of traffic tickets assigned to police officers; however, neither the police department nor the municipal division maintains adequate records to account for traffic tickets issued and their ultimate disposition. Several tickets selected for review could not be located.

Without a proper accounting of the numerical sequence and disposition of traffic tickets, the police department and the municipal division cannot be assured that all traffic tickets issued were properly submitted to the municipal division for processing. A log listing each ticket in numerical order, the date issued, and the violator's name would help ensure that all tickets issued have been submitted to the municipal division for processing, properly voided, or not prosecuted. A record of the ultimate disposition of each traffic ticket should also be maintained to ensure all traffic tickets have been accounted for properly.

- H. The court docket which lists all cases for the month is not always complete and accurate. Twelve of sixty tickets reviewed had information that did not agree to the court docket and one ticket was not on the docket. Section 479.070, RSMo 1994, requires the proceeding for every case be entered on the docket; furthermore, the amount paid and the disposition of each case should be noted on the docket.

**WE RECOMMEND** the Municipal Court:

- A. Along with the city, work with law enforcement officials regarding any criminal prosecution and to obtain restitution of the missing funds.
- B. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- C. Issue receipt slips for all monies received and retain all voided receipt slips. Additionally, the method of payment should be indicated on each receipt slip issued, and the composition of monies received should be reconciled to the composition of monies deposited by an independent person.
- D. Adequately segregate duties between available employees and/or require the City Treasurer to review and reconcile the municipal division records.
- E. Prepare monthly listings of open items and reconcile the listing to monies held in trust by the municipal division. Any bonds remaining on hand over a period of time should be followed-up on and either refunded, forfeited, or turned over to the state's Unclaimed Property Section.
- F. Establish adequate accounts receivable reporting and follow up procedures including an accurate accounts receivable listing. In addition, the listing of accounts receivable should be reconciled to the individual accounts receivable records on a periodic basis.

G. Work with the police department to establish a log of tickets issued to ensure records are maintained to account for the numerical sequence and ultimate disposition of all tickets issued.

H. Ensure every case is entered on the court docket accurately.

Except for parts A, C and H, similar conditions were also noted in our prior audit report.

### **AUDITEE'S RESPONSE**

*The Municipal Judge, Mayor, and City Council indicated:*

A. *We will work with law enforcement officials regarding any criminal prosecution and obtain restitution.*

B&C. *These recommendations have been implemented.*

D. *We will have the City Treasurer review and reconcile municipal court records starting immediately.*

E,G,

&H. *These recommendations will be implemented immediately.*

F. *This recommendation has been partially implemented. The court has sent some notices to individuals requesting payment of old fines and will attempt to do more in the future.*

This report is intended for the information of the management of the city of Louisiana, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

SIXTEENTH JUDICIAL CIRCUIT

JACKSON COUNTY, MISSOURI

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-130  
December 22, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

The following audit report presents our findings and recommendations for the Sixteenth Judicial Circuit, Jackson County, Missouri. During our audit, we identified accounting records, controls, and certain management practices which we believe could be improved.

The receipts for the Child Support Section were approximately \$60 million annually. In June 1998, the court started using the Missouri Automated Child Support System (MACSS). As a part of the implementation of this statewide system, the court allowed the Office of the State Courts Administrator (OSCA) to start preparing bank reconciliations on the child support bank account. Our review of these reconciliations noted the following concerns:

- Bank reconciliations were not performed in a timely manner. Reconciling items totaling more than \$400,000, some of which could represent missing funds, were not reviewed or investigated. No follow-up action has been taken on approximately 3,000 checks, totaling nearly \$300,000, that have been outstanding for more than one year. Duplicate checks totaling nearly \$120,800 were issued of which \$34,400 remained uncollected as of November 1999. Differences between receipt and deposit amounts, or in the composition of the deposit, are not investigated and resolved in a timely manner. The court does not reconcile the open items listing to the cash balance of the child support account.

*Checks which have been outstanding for a considerable length of time should be periodically reviewed to determine if the checks should be canceled and reissued if the payee can be located. **Failure to follow up on outstanding child support checks in a timely manner unnecessarily deprives custodial parents of monies due them.** If the payees of old outstanding checks can be identified and located, these checks should be reissued.*

Criminal restitution payments are processed through the court's criminal office in Kansas City. Restitution receipts average approximately \$500,000 annually. Our review noted the following concern:

- The court has money on deposit in the criminal restitution bank account which cannot be properly distributed because the victims can no longer be located. Since an open-items list is not prepared, the court cannot monitor these monies to ensure that they are disbursed in accordance with state law.

(over)

YELLOW SHEET

The Criminal Records Section maintains offices in Kansas City and Independence. Separate bank accounts and records are maintained by the Kansas City and Independence offices. Criminal receipts for both offices average more than \$4 million annually. Our review noted the following concerns:

- A complete listing of accrued costs owed to the criminal division is not maintained and cost cards detailing amounts due to the court for each case are not prepared on a timely basis. A complete and accurate accrued cost listing would allow the court to more easily review the amounts owed to the court, and take appropriate steps to ensure all amounts owed are collected on a timely basis.

The court's Civil Section collects costs and other receipts for each case filed in the civil division. Our audit noted garnishment proceeds exceeding \$1.2 million and other court costs totaling over \$9.5 million that had not been disbursed in a timely manner. Some of the cases relating to these moneys dated as far back as the 1970's. To ease the administrative burden on the court and to provide these monies to the appropriate parties, distribution of funds must be done in a timely manner.

A detailed job description has not been developed for the Fiscal Officer position. The court's general ledger has not been properly maintained, bank accounts have not been properly reconciled, running book balances have not been maintained, and interest earned on Title IV-D child support collections has not been disbursed to the state in a timely manner.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Presiding Judge and Court en banc  
and  
Court Administrator of the  
Sixteenth Judicial Circuit  
Jackson County, Missouri

The State Auditor is required under Section 29.200, RSMo 1994, to audit all accounts of the Sixteenth Judicial Circuit, Jackson County, Missouri. The judicial circuit had engaged Donnelly Meiners Jordan Kline, Certified Public Accountants (CPAs), to perform annual audits of the various divisions of the Sixteenth Judicial Circuit, Jackson County, Missouri for the years ended December 31, 1999, 1998, and 1997. In addition, the Jackson County Law Library, Inc., has engaged Winger and Company, Certified Public Accountants (CPAs) to perform annual audits of the Law Library Fund (a component unit of the Sixteenth Judicial Circuit) for the years ended December 31, 1999, 1998, and 1997. To satisfy our statutory obligation and minimize duplication of effort, the State Auditor has used the work of the CPAs. To the extent available, we reviewed the reports and substantiating working papers of the CPA firms to satisfy ourselves as to the appropriateness of using their reports, and we accept them in partial fulfillment of our responsibility under Section 29.200, RSMo 1994.

The objectives of this audit were to:

1. Review certain financial activity and related procedures, and examine compliance with certain constitutional provisions, statutes, and Attorney General's opinions as we deemed necessary or appropriate in the circumstances.
2. Examine certain management practices.
3. Follow up on the status of findings noted in our previous report.

Our audit was conducted in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the records and procedures, and interviewed personnel of the judicial circuit. The scope of this audit included, but was not necessarily limited to, the years ended December 31, 1999, 1998, and 1997.

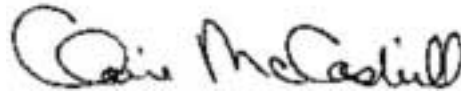

As part of our audit, we assessed the judicial circuit's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance

on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Statistical Section is presented for informational purposes. This information was obtained from the judicial circuit's management and the Office of the State Courts Administrator and was not subjected to the procedures applied to our audit of the Sixteenth Judicial Circuit, Jackson County, Missouri.

The accompanying Management Advisory Report presents our findings arising from our audit of the Sixteenth Judicial Circuit, Jackson County, Missouri.

Claire McCaskill  
State Auditor

February 28, 2000 (fieldwork completion date)

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Findings

SIXTEENTH JUDICIAL CIRCUIT  
JACKSON COUNTY, MISSOURI  
SUMMARY OF FINDINGS

1. Fiscal Officer Duties (pages 8-11)

A detailed job description has not been developed for the Fiscal Officer position. The court's general ledger has not been properly maintained, bank accounts have not been properly reconciled, running book balances have not been maintained, and interest earned on child support collections has not been disbursed to the state in a timely manner.

2. Child Support Section Procedures (pages 12-18)

Bank reconciliations were not performed in a timely manner. Reconciling items totaling more than \$400,000, some of which could represent missing funds, were not reviewed or investigated. No follow-up action has been taken on approximately 3,000 checks, totaling nearly \$300,000, that have been outstanding for more than one year. Duplicate checks totaling nearly \$120,800 were issued to custodial parents of which \$34,400 remained uncollected as of November 1999. Differences between receipt and deposit amounts, or in the composition of the deposit, are not investigated and resolved in a timely manner. The court does not reconcile amounts owed to others (the open items listing) to the cash balance of the child support account.

3. Criminal Records Section Accounting Records and Procedures (pages 18-22)

A complete listing of accrued costs owed to the criminal division is not maintained and cost cards are not always completed for cases on a timely basis. There was a lack of accountability over the numerical sequence of some receipt slips. The mode of payment is not always listed on the receipt slips. A centralized listing of bonds is not maintained and reconciled to the criminal account book balance. Some bond information is not correctly input into the court computer system. Outstanding checks are not followed up on in a timely manner. The Prosecuting Attorney did not document approval of any amendments of traffic tickets and some records of conviction were not always forwarded to the Missouri State Highway Patrol, as required.

4. Civil Section Accounting Records and Procedures (pages 22-25)

Monthly listings of open items are not reconciled with the cash balance. Garnishment proceeds (exceeding \$1.2 million) and other monies collected on civil cases (totaling over \$9.5 million) were not disbursed in a timely manner. Deposits are not always made intact.

5. Criminal Restitution Accounting Procedures (pages 25-26)

A centralized listing of open items is not maintained and reconciled to the criminal restitution cash balance. The court has money on deposit which has not been properly distributed.

6. Delinquent Land Tax and Civil Process Section Accounting Procedures (pages 26-30)

Receipt slips are not issued for some monies received and the method of payment is not always indicated on the receipt slip. Copies of manual receipts are not always maintained and receipts are not always deposited intact on a timely basis. Fees are not paid to the county in a timely manner.

SIXTEENTH JUDICIAL CIRCUIT  
JACKSON COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

|           |                              |
|-----------|------------------------------|
| <b>1.</b> | <b>Fiscal Officer Duties</b> |
|-----------|------------------------------|

The Court Administrator's office employs a fiscal officer who oversees the accounting functions of the court, prepares bank reconciliations for various accounts, and maintains the computerized general ledger. During our review of work performed by the fiscal officer, the following concerns were noted:

- A. The court has not established a detailed job description for this position and did not ensure the duties of this position were fulfilled during the three years ended December 31, 1999. Four different people held the position of fiscal officer. Tom Moore served as fiscal officer during 1996, but resigned in December 1996. The position was vacant until February 1997, when Doug Hewitt took over as fiscal officer. He resigned in August 1998, and the position was not filled until October 1998, when Brett Peters was appointed. He served as fiscal officer until June 1999, and in July 1999 the current fiscal officer, Joel Kesler, assumed the fiscal officer duties. As a result, some of the fiscal officer's duties were not performed and some of the duties were not performed in a timely manner. During December 1998, an assistant fiscal officer position was established to assist with the fiscal officer's duties.

Although there was no detailed job description or procedures manual, the current fiscal officer has been able to correct many of the problems caused by the turnover and/or lack of a fiscal officer during 1997 and 1998, while also keeping up with current records and attending training sessions on new computerized systems implemented in this court. The transition of a new employee to the position of fiscal officer would have been improved had the court developed a detailed job description as well as a procedures manual and enacted procedures to ensure the assigned duties were being performed as required.

- B. The duties performed by the fiscal officer include maintenance of the court's general ledger which tracks the balances of various court accounts. As a result of the turnover in the fiscal officer position and some erroneous entries, the court's general ledger was not accurately maintained after March 1998. This situation lead to the following concerns:

1. Through an agreement between the court and the bank used by the court, monies deposited in various court accounts, including the civil, criminal, and child support accounts, are swept into a Zero Balance Account (ZBA) each night. The court earns a higher rate of interest on the ZBA than on the

individual accounts. The court invests funds in the ZBA in short term investments to maximize interest income. When it was maintained, the general ledger detailed the amounts due from the ZBA to the court's division accounts, which was necessary to adequately reconcile the monthly bank statements for the various accounts. The court should be able to allocate the full balance of the ZBA and short term investments to the various division accounts at any given time. Since the general ledger was not accurately maintained during our audit period, it was not possible for the fiscal officer, or the assistant fiscal officer in the fiscal officer's absence, to reconcile the balance of the ZBA to the combined balance of those accounts swept into the ZBA. The balance of the ZBA and short term investments at December 31, 1998 was approximately \$17 million. At December 31, 1999, according to the court's records, the balance had been reduced to approximately \$11 million.

Monthly reconciliations on the various court accounts were not done on a timely basis and do not reflect the amount due to the accounts from the ZBA. Instead, the reconciliations for the various accounts show the difference between outstanding deposits and checks, which results in a negative balance on the reconciliation (outstanding checks exceeded outstanding deposits for all months we reviewed). In addition, the court does not maintain a running book balance for any of the accounts swept into the ZBA. A book balance is calculated each month using the previous months calculated book balance and adjusting for the current month's activity. The calculated book balance does not account for the funds transferred to the ZBA. The adjustments to the calculated book balance on several reconciliations we reviewed included recording errors and deposit differences which have not been followed up on by the fiscal officer. Currently, the fiscal officer is working to determine the propriety of these adjustments but has resolved very few. As of March 2000, bank reconciliations had only been completed through November 1999.

Monthly reconciliations and running book balances are necessary to ensure that all accounting records balance, transactions are properly recorded, and any errors or discrepancies are detected on a timely basis.

2. Since the general ledger was not maintained to calculate the balance of each account swept into the ZBA, the fiscal officer could not allocate interest between these accounts. As a result, the court has not disbursed some Title IV-D interest earned on the child support account to the state in a timely manner. The court did not disburse Title IV-D interest earned during the period May 1998 thru July 1999 until September 1999, when the amount was estimated to be \$45,537. Approximately \$21,000 in Title IV-D interest has been earned during the period August 1999 thru May 2000, but those funds have not yet been disbursed to the state.

Section 13 CSR 30-3.010 (5)(f) of the Code of State Regulations requires that when a child support account earns interest, the portion attributable to state Title IV-D child support monies is to be remitted monthly to the state. To comply with the state requirements, the fiscal officer should disburse the portion of Title IV-D interest to the state on a monthly basis.

**WE RECOMMEND** the Court Administrator and Fiscal Officer:

- A. Develop a written job description and/or procedures manual for the fiscal officer position.
- B.1. Ensure that the general ledger is updated timely and accurately maintained in the future and that the balance of the ZBA is allocated to the various accounts swept into the ZBA each month. In addition, bank reconciliations should be performed timely for all accounts, adjustments for errors and discrepancies should be reviewed on a timely basis to determine their cause, and a running book balance should be maintained for each of the division's accounts.
- 2. Ensure that interest is allocated properly and that interest earned on Title IV-D collections is remitted to the state monthly.

**AUDITEE'S RESPONSE**

A. *Policy and Procedure Manual*

*The Court had the same Fiscal Officer from 1973 to 1997. That individual retired without leaving written procedures or manuals for his position. When the Court received notice of his retirement, Donnelly Meiners Jordan and Kline (DMJK) was retained to work with the Fiscal Officer until his final date of employment, to continue to work during the gap until a new Fiscal Officer started, and to train the new Fiscal Officer to assist with a smooth transition.*

*A new Fiscal Officer (#2) started his position on February 24, 1997. Job performance issues began to surface with this individual and several duties began to fall behind. Again, Donnelly Meiners Jordan and Kline was retained to assist this individual, however, he resigned effective August 17, 1998. Donnelly Meiners again stayed to work during the gap until a new Fiscal Officer started, and stayed to train the new Fiscal Officer.*

*On October 7, 1998, Fiscal Officer (#3) started his position. He held this position until June 7, 1999. The current Fiscal Officer, Joel Kesler (#4), started with the Court on July 19, 1999.*

*The hiring of a Fiscal Officer is not done quickly. Candidates must be solicited and carefully screened to determine their qualifications and fitness for the job. The interim periods between Fiscal Officers #1 and #2, #2 and #3, and #3 and #4 lasted two months*

*each. During those periods, the Court contracted with the Controllershship Division of Donnelly Meiners Jordan and Kline to fill the Fiscal Officer position on a limited basis. At no time was the Court without a qualified individual in the position. During DMJK's initial tenure, they began the process of creating a handbook for the Fiscal Officer position, but left it to be completed by the new Fiscal Officer. However, as a result of the problems outlined above, the handbook was never completed. It should be noted that the current Fiscal Officer was the lead auditor of the Court's independent audit for the past four years, and is familiar with the procedures dating back to Fiscal Officer #1.*

*Since his hiring, the current Fiscal Officer has worked diligently to bring the Court's records up to date first, resolve all reconciling items second, and finally, to develop procedures (manuals) for his position, along with the new Assistant Fiscal Officer position, and other accounting positions within the Court. During his first year, the current Fiscal Officer has been able to essentially complete the first of the above three mandates by bringing all accounts, except Civil Records, current. This encompasses activity for a period of over three-and-a-half years for over 50 checking accounts. Bank reconciliations are now performed on a monthly basis and a general ledger has been updated and kept current. Outstanding reconciling items are currently being investigated and the Court anticipates resolution by June 30, 2001. The current Fiscal Officer has continued the process begun by DMJK and has collected previous documented procedures and statutes in preparation for assembly of a Fiscal Officer's handbook. The Court agrees that a procedural manual is essential and expects to have the Fiscal Officer Manual completed by June 30, 2001.*

**B. Duties performed by the Fiscal Officer**

- 1. The Court's fee accounts are Zero Balance Accounts (ZBA's) and are swept into an investment account each night. During the period under review, the general ledger was not maintained and balances owed by the investment account to each of the ZBA's was not known. Because the reconciliation process is now up to date, except for the resolution of identified reconciling items, the general ledger is current and the Court maintains a running, monthly, book balance for funds transferred between the ZBA's and the investment account (including Civil Records). In addition, the book balance for each fund (Civil Records, Child Support, Criminal Records, etc.) records a receivable for the amount due from the investment account. These receivables are reconciled against the payable on the investment fund books on a monthly basis. As indicated in the Court's response to item A above, it expects to have the reconciling items resolved by June 30, 2001.*
- 2. Because the general ledger and bank reconciliations are current, the Court has been able to become, and stay, current on its payment of Child Support (IV-D) interest. In July 2000, the Court made a \$21,000 payment to the Department of Social Services for the period August 1999 through June 2000. The Court has made timely payments since.*

The receipts for the Child Support Section total approximately \$60 million annually. We noted the following concerns applicable to this section:

A. As a part of the statewide system implementation, the court started using the Missouri Automated Child Support System (MACSS) in June 1998. This system allows for automated standardized recording and reporting of child support receipts and disbursements. As a part of this implementation, the court allowed the Office of the State Courts Administrator (OSCA) to start preparing bank reconciliations on the child support bank account. Our review of these reconciliations noted the following concerns:

1. Child support bank reconciliations are not performed in a timely manner. The December 1998 bank reconciliation was not completed until July 1999. As of January 31, 2000, OSCA had completed reconciliations through July 31, 1999. This timeliness problem was caused, at least in part, by the fact that MACSS was not originally set up for electronic clearing of checks. Since OSCA has begun electronic clearing of checks, reconciling bank accounts has become more timely. The court has indicated that reconciling the child support account after July 1999 will be the responsibility of the court's fiscal officer. As of October 2000, the Fiscal Officer has completed reconciliations on the child support account through August 2000.

Timely bank reconciliations are necessary to ensure the accounting records are in agreement with the bank records and to help detect errors on a timely basis. The court should ensure bank reconciliations are completed and that reconciling items are investigated and corrected on a timely basis.

2. We noted numerous adjustments were made on the December 31, 1998 bank reconciliation (completed in July 1999), including adjustments for checks issued twice, checks which were shown as voided that cleared the bank, checks which cleared the bank twice, unidentified deposit differences, and deposits not posted to the MACSS system. These various adjustments totaled over \$400,000 on the December 31, 1998 bank reconciliation.

OSCA notified the court in July 1999, of these adjustments and indicated it was the court's responsibility to follow up on the adjustments identified within three days. However, our audit found that little, if any, follow-up had been done on these adjustments. While reviewing the July 31, 1999 and August 31, 2000 bank reconciliation for the child support account, we noted that many of the same adjustments noted on the December 31, 1998 bank reconciliation were still required on subsequent bank reconciliations. The

court indicated that lack of personnel in key positions has hampered their ability to investigate these problems.

Several of the adjustment items identified on the reconciliation, especially those related to deposit differences, could represent missing funds. We asked the court to determine the causes of the deposit differences, but because the court failed to follow up on these differences on a timely basis, they indicated they would need more time to investigate the causes.

3. The court has not established procedures to follow up on checks which are outstanding for a considerable length of time. As of August 31, 2000, the current child support account had approximately 3,000 checks, totaling nearly \$300,000, which had been outstanding over one year. Court personnel indicated that no follow up action has been taken on these checks to determine why they are still outstanding. In addition, the “old” child support account, which is only used for electronic fund transfers of child support since the conversion to MACSS in June 1998, had over 900 outstanding child support checks, totaling approximately \$90,000, as of September 30, 2000. All of the outstanding checks on the “old” account were written prior to conversion, with some dating as far back as 1995.

Checks which have been outstanding for a considerable length of time should be periodically reviewed to determine if the checks should be canceled and reissued if the payee can be located. Failure to follow up on outstanding child support checks in a timely manner could unnecessarily deprive custodial parents of monies due them. If the payees of old outstanding checks can be identified and located, these checks should be reissued. Monies which remain unclaimed, including the unidentified balance of the “old” child support account, should be turned over to the state's Unclaimed Property Section in accordance with Section 447.532, RSMo 1994.

4. Approximately \$69,600 and \$51,200 in duplicate checks were issued during November and December 1998, respectively, which represent a portion of the adjustments discussed in part A.2 above. These checks were issued because child support personnel canceled batches of checks but did not realize that the computer had already printed these batches. This error was brought to the court's attention by child support recipients who received duplicate payments. Court personnel have pursued collection of these amounts from the custodial parents; however, approximately \$34,400 in duplicate payments remained uncollected as of November 1999.

Since December 1999, the court has implemented a procedure where the number of checks printed is compared to the batch total for that day. Court personnel need to continue to compare checks printed to those reported by MACSS to ensure duplicate payments do not occur in the future. In addition,

the court should continue to actively pursue collection of the duplicate payments which remain uncollected.

- B. Child support receipts are reconciled to deposits, but differences between receipt and deposit amounts, or in the composition of the deposit, are not investigated and resolved on a timely basis. As noted in part A.2 above, numerous deposit differences were identified by OSCA while performing child support reconciliations. OSCA identified a total of \$47,754 in adjustments from June 1998 to December 1998 where the deposit slip indicated a different amount being deposited than was actually deposited. Of the \$47,754 in adjustments, OSCA identified \$45,418 where the amount of the bank deposit was less than the deposit slips. In these instances, the bank sends a deposit correction advice to the court to explain the reason for the adjustment. It is then the court's responsibility to determine why the deposit required adjustment.

We attempted to review these adjustments to determine their cause, but the court was unable to locate the majority of the deposit correction advices, which explain the reason for the adjustment. We did review the deposits where the advices were located and noted that the amounts shown on the receipt ledger and deposit slip were higher than the amounts actually deposited, which would represent a possible shortage.

We reviewed each deposit where a difference was noted by OSCA and found little, if any, follow-up was performed by court or OSCA personnel. Therefore, the reasons for the deposit differences were not investigated or documented. Court personnel indicated they felt the majority of these differences were caused by delays in electronic funds transfers from the "old" child support account, but because the court failed to investigate these differences fully, as requested by OSCA, there is less assurance that all receipts were properly deposited.

Due to the significant deposit adjustments and differences identified by OSCA, and the court's failure to investigate and explain these differences, monies may be missing from the child support account. A full review of all affected deposits should be performed by court personnel to determine the cause of these differences.

The court should adopt procedures to ensure that receipts are reconciled to deposits and that differences noted during these reconciliations are fully documented and investigated on a timely basis.

- C. A listing of open items is obtained from the MACSS system monthly, but the court does not attempt to reconcile this listing to the cash balance of the current child support account. At August 31, 2000, the reconciled cash balance exceeded the open items listing by \$20,189. The court made no attempt to identify this difference.

An accurate open-items list helps to ensure that receipts and disbursements are properly handled and accurately posted to the case fee sheets, and to verify there is sufficient cash to satisfy all liabilities. The Court Administrator should make an effort to identify any liabilities associated with the excess cash balance. Any amount which remains unidentified, should be disposed of in accordance with state law.

**WE RECOMMEND** the Court Administrator:

- A.1. Ensure child support bank reconciliations are performed in a timely manner.
- 2. Ensure reconciling items are investigated and corrected in a timely manner. Reconciling items which appear to represent missing funds should be fully investigated and if not resolved, the court should seek assistance from applicable law enforcement officials.
- 3. Reissue old outstanding checks where the payee can be located. Any unclaimed amounts should be turned over to the state's Unclaimed Property Section in accordance with state law.
- 4. Continue to compare checks issued according to MACSS to those checks printed to ensure that duplicate checks are not issued. In addition, court personnel should continue to pursue collection of those duplicate payments not yet collected.
- B. Reconcile the composition of cash, checks, and money orders received to the amounts deposited and investigate and document the reasons for any differences noted. Differences noted by OSCA should be fully investigated.
- C. Reconcile the open-items listing to the child support cash balance on a monthly basis. In addition, the court should attempt to identify additional liabilities associated with the excess cash balance which currently exists in the child support account. Any amounts which cannot be identified should be disposed of in accordance with state law.

**AUDITEE'S RESPONSE**

A. *Child Support Bank Reconciliation*

- 1. *Prior to the implementation of the statewide child support system (MACSS), the Court was able to process the child support reconciliation monthly. As noted in the audit report, the timeliness problem was the result of the lack of electronic clearing of checks in MACSS. A manual marking of 100 checks requires 8 hours; the Court's child support section produced over 25,000 checks monthly. Beginning in early 1999 and with the September 1999 bank reconciliation, electronic clearing of checks was made available. In addition to the reasons above, other difficulties encountered*

during the implementation of the MACSS program and the related bank reconciliation through January 2000 were:

- *Excessive turn-over in key personnel*
- *Approximately 3,000 to 5,000 child support checks were mailed to the wrong addresses per the decisions of the Missouri Division of Child Support Enforcement (DCSE) to use their database for mailing addresses. The clients reported that they had never lived there, or had not lived there for 8 to 10 years.*
- *Arrearages were not converted to MACSS correctly requiring the Court to recalculate an inordinate number of cases.*
- *The same Court personnel responsible for processing child support payments were responsible for processing hundreds of phone calls that were the direct result of the MACSS conversion and operational errors noted above.*

*The child support checking account is now current (in reconciliation) and reconciling items have been identified. The Court is in the process of clearing the identified reconciling items, and, as indicated above, projects resolution of these items by June 30, 2001.*

2. *As indicated above, the Court is in the process of investigating the outstanding reconciling items/adjustments. However, this process is a long and arduous task. The Court must review the documentation on hand for each reconciling item and determine its status. Then, the Court must contact the bank for additional documentation of the reconciling items that have not been cleared. The bank may take up to two weeks to process the Court's request for additional information. In addition to focusing on current reconciliations, daily tasks that require the attention of the Fiscal Officer do not allow the Court to devote 100 percent of its time to resolution of the bank reconciliation adjustments. The Court expects to have the reconciling items cleared by June 30, 2001.*
3. *The Court has complied and continues to comply with the state's unclaimed property statutes. For the period under review, the statute required the Court to forward to the Unclaimed Property Section assets abandoned for seven years (currently five). The Court's policy is to perform annual reviews of outstanding checks and deposits to forward to the Unclaimed Property Section. The Court has no objection to forwarding property deemed unclaimed after a period shorter than the period outlined in the statutes, but is unable to do so because it does not have the necessary manpower to accomplish this task.*
4. *Duplicate checks were issued in November 1998 after the supervisor followed instructions from the MACSS helpdesk. The Court has devoted a great deal of time pursuing collection of the duplicate payments. However, the Court is hampered by*

*advice received by the Department of Social Services and the Office of State's Court Administrator that informed the Court that new Federal law prohibits collection of misapplied or duplicate payments from future child support funds. Therefore, collections can only be made from voluntary payments, demand letters, legal action or collection from sparse child support arrearage payments. The Court has reviewed its check printing procedures with the child support supervisors to guard against future duplication of payments. To the extent practicable, the Court expects to have the duplicate check issue resolved by June 30, 2001.*

**B. Child Support Receipts**

*It is the Court's policy to reconcile total cash, checks and money orders receipted to the amounts deposited and investigate and document the reasons for any differences noted. The majority of the variances noted in the audit report are related to electronic fund transfers from employers that were deposited into the Court's old child support checking account but receipted on the books of the new child support ledgers (MACSS). A receivable from the old child support ledgers is recorded on the new child support ledgers.*

*The Court has re-affirmed the daily receipt and deposit reconciliation policy with the Court's cashiers and supervisors. The Court will continue to investigate these variances and, as indicated in previous responses, resolve them by June 30, 2001.*

**C. Child Support Open Items Listing**

*The Court does not currently reconcile the open items listing produced by MACSS, as the listing is not reliable. A cursory review of the open items balance to the cash balance is performed monthly but because of errors in the listing, as outlined below, an adjustment to the exact balance is not made. The \$20,000 error noted in the audit report represents an excess of cash over the liability of child support payments to custodial parents.*

*The current open items listing indicates an erroneous open items balance in excess of \$8,000,000. This error was created during the MACSS conversion and has not been corrected by the MACSS Project. It is the Court's understanding that the Division of Child Support Enforcement is in the process of correcting this error. When the error is corrected, and a reliable listing is created, the Court will reconcile the balance to available cash. The Court expects the error to be corrected by June 30, 2001.*

**Child Support General**

*The Court has diligently and fervently attempted to maintain proper and current records, given its limited resources while maintaining a high standard of service to its child support customers. The overwhelming majority of the problems in the child support section procedures can be attributed to the implementation of MACSS. Prior to MACSS, the Court did not encounter the errors as noted in the audit. Evidence of this can be easily obtained from examination of the Follow-Up on Prior Audit Findings section in this audit, noting the lack of substantive findings from the prior audit in this area. The initial implementation of MACSS provided unreliable reports, such as the open items*

*listing, incomplete or incorrect data, labor intensive data entry screens, and did not include a complete cash reconciliation package. As a result, the Court was forced to develop time-consuming work-arounds for tasks that should have been included in the MACSS computer package.*

|--|
| <b>3. Criminal Records Section Accounting Records and Procedures</b> |
|--|

The Criminal Records Section maintains offices in Kansas City and Independence. Separate bank accounts and records are maintained by the Kansas City and Independence offices. Criminal receipts for both offices average more than \$4 million annually. Our review noted the following concerns:

- A. A complete listing of accrued costs owed to the criminal division is not maintained and cost cards detailing amounts due to the court for each case are not prepared on a timely basis. The court prepares cost cards when payment is received or when the amount due is requested by the defendant's probation officer.

A complete and accurate accrued cost control listing would allow the court to more easily review the amounts owed to the court, and take appropriate steps to ensure all amounts owed are collected on a timely basis. To ensure that proper costs are charged on all cases, cost cards should be prepared for all cases when the judgment is entered.

- B. Receipt slips are issued for monies received; however, we noted a lack of accountability over some receipts slips since they were not always issued in numerical order and were not always prenumbered. Also, for a short period of time in 1998, the Independence Criminal Office used unnumbered receipt slips. To provide assurance all monies are properly deposited, prenumbered receipt slips should be issued for all monies received and the numerical sequence of receipt slips should be accounted for properly.

- C. The mode of payment is not always indicated on receipt slips. As a result, it is not always possible to reconcile receipt slips to deposits. To adequately account for all receipts and to ensure all receipts are deposited intact, the mode of payment should be indicated on the receipt slips and the composition of receipt slips should be reconciled to deposits.

- D. Bond cards are prepared for each case where a criminal bond is collected. However, a centralized listing of bonds held (open-items) is not prepared and reconciled to the cash balance. In addition, we noted one instance where a \$5,000 bond was posted on a criminal non-support case at the Kansas City criminal records office and subsequently transferred to the Independence criminal records office. Approximately one year later the judge ordered these monies be disbursed to the custodial parent. The Kansas City criminal records office disbursed these monies although these monies were not held in their bank account. Records maintained by the

Independence criminal records office indicate that this bond is still being held. As a result, the Kansas City criminal records account is due \$5,000 from the Independence criminal records account. This situation would not have occurred had the court properly maintained an open-items list, cost cards, and bond cards, and used those records to determine which office should make the disbursement.

Monthly listings of open items should be prepared and reconciled to monies held in trust by the court to ensure proper accountability over open cases and ensure monies held in trust by the court are sufficient to meet liabilities. Because of the large amount of criminal bonds being held and the failure to maintain a monthly open-items list and reconcile it to the cash balance, improprieties and errors could occur and not be detected.

- E. The court has not established procedures to follow-up on checks which are outstanding for a considerable length of time. As of September 30, 2000, checks totaling \$48,242 written on the Kansas City criminal account, have been outstanding for more than one year. As of August 31, 2000, checks totaling \$42,273 written on the Independence criminal account have been outstanding over one year. Each account contained over 200 checks written in 1997 or before.

Checks which have been outstanding for a considerable length of time should be periodically reviewed to determine if the checks should be canceled and reissued if the payee can be located. Monies which remain unclaimed, should be turned over to the state's Unclaimed Property Section in accordance with Section 447.532, RSMo 1994.

- F. Our review of traffic procedures noted the following concerns:

1. The Prosecuting Attorney does not sign appropriate case records to document his approval of any amendment of a ticket. To ensure the proper disposition of all cases has been entered in the court records, the Prosecuting Attorney should sign all amended and non-prosecuted case records, indicating his approval.
2. The court does not always forward required records of convictions on traffic offenses to the Missouri State Highway Patrol (MSHP). We noted three instances out of twenty-nine items tested (10 percent) in which the required record of conviction could not be located on state records. One of the tickets not reported was for Driving Under the Influence (DUI). Section 302.225, RSMo 1994, requires records of any pleas or finding of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

**WE RECOMMEND** the Court Administrator and Director of Criminal Records:

- A. Maintain a complete and accurate listing of accrued costs and ensure cost cards are completed for all cases on a timely basis.
- B. Ensure prenumbered receipt slips are issued for all monies received.
- C. Ensure that the mode of payment is correctly indicated on all receipt slips issued, and reconcile the composition of receipt slips to deposits.
- D.1. Prepare centralized listings of bonds held and reconcile the total amounts to the applicable cash balances monthly. In addition, the court should transfer the \$5,000 bond monies in question from the Independence criminal records account to the Kansas City criminal records account.
- 2. Ensure that bond cards are prepared for all bonds received and that bond information is accurately input in the court's computer system.
- 3. Use the open-items list, bond cards, and cost cards to determine which office should disburse bond monies.
- E. Attempt to contact the payees of old outstanding checks. If the payees cannot be located, the balance should be distributed in accordance with applicable state law.
- F.1. Require the Prosecuting Attorney's signature on all amended and non-prosecuted case records.
- 2. Ensure that records of conviction on traffic offenses are submitted to the MSHP in accordance with state law.

**AUDITEE'S RESPONSE**

A. *Accrued Costs Owed to the Criminal Division*

*The Court has procedures for routing case files to the criminal records financial section for assessing court costs for all disposed cases, as well as any probation violation cases. With these procedures the Court has been able to assess court cost on almost all cases. Costs for the few remaining cases are assessed when payments have been received by mail or notification is received from the probation officer. The Court is in the process of obtaining a new computer accounting system that will minimize the instances in which assessment of court costs are missed. The Court expects to have the new accounting system implemented by December 31, 2000.*

B. *Numerical Sequence of Receipts*

*After the Court's independent audit in 1998, the Court established a receipt log that accounts for all receipts used by criminal records. Each cashier must sign for these receipts, in numerical order, and be accountable for each. The unused receipts are kept in a locked drawer, which is only accessible by the financial supervisor or in her absence, the Assistant Director or Director of Criminal Records. Since this procedure has been in place, the Court has been able to issue receipts in numerical sequence and account for all receipts issued. As a result, the Court considers this issue resolved.*

C. *Mode of Payment*

*Excessive employee turnover over the past few years has contributed to incomplete training and understanding of Court procedures. The Court has re-affirmed its procedures regarding payment type and instructed the employees to utilize proper entry of payment type on all receipt slips. Coinciding with the installation of the new automated financial system, the Court expects this issue to be resolved by December 31, 2000.*

D. *Bond Open Items Listing*

*The implementation of the new computerized financial accounting system will provide an accurate and current open items list of all bond money receipted by criminal records. Both the financial supervisors in Kansas City and Independence will maintain these open items listings. The Director of Criminal Records will review this listing on a monthly basis. Once information has been reviewed, the Director will pass on comments and/or concerns to the appropriate supervisor. In addition, in order to prevent any monies being disbursed into or out of the wrong accounts, the Court is in the process of creating separate checking accounts for the Kansas City and Independence criminal records offices, and a separate account for Traffic. The creation of an open items listing is being done in conjunction with the computerized financial accounting automation project noted above and is expected to be completed by December 31, 2000.*

E. *Unclaimed Property*

*As previously stated in the Court's response to the child support findings, the Court has complied and continues to comply with the unclaimed property statutes. For the period under review, the statute required the Court to forward to the Unclaimed Property Section assets abandoned for seven years (currently five). It is Court policy to perform an annual review of outstanding checks and deposits to forward to the Unclaimed Property Section. The Court has no objection to forwarding property deemed unclaimed after a period shorter than the period outlined in the statutes, but is unable to do so because it does not have the necessary manpower to accomplish this task.*

F. *Traffic Procedures*

1. *The Court will forward this recommendation to the Prosecuting Attorney. In addition, the Court will immediately implement procedures authorizing criminal records staff to accept a fine lower than the fine on the original traffic charge filed only when written confirmation is received from the Prosecutor that the traffic charge has been amended and reduced or when a judgment is entered by the Court on a lower charge.*
2. *The Court has procedures for forwarding records of conviction (roc's) on traffic offenses in which notification is required. The Court has contacted the Department of Revenue to resolve the missing roc's and has found that the missing roc's were returned to the Court for correction. The Court will resolve the missing roc's noted during the audit and review its procedures for responding to rejected roc's by June 30, 2001.*

|   |
|---|
| <b>4. Civil Section Accounting Records and Procedures</b> |
|---|

Civil receipts totaled approximately \$24.7 million and \$14.7 million during the years ended December 31, 1998 and 1997, respectively.

- A. Monthly listings of open items are prepared for the fee account; however, the listing is not reconciled with the cash balance. We noted one instance during our test work where monies received on a case in December 1998, and disbursed in February 1999, were not included on the December 31, 1998 open items listing. In addition, we noted numerous instances where the information on the open items listing did not agree to the case fee report, and in two instances we noted a negative open items balance for cases, indicating the court paid out more money than was received on those cases. The Court Administrator has indicated that because cases were converted to a new computer system during 1999, a review of all case files will be performed in the future to determine which cases have open items and if the open balance is accurate.

To ensure that receipts and disbursements are properly handled and accurately posted to the case files, and that there is sufficient cash to cover all liabilities for open cases, a complete and accurate open-items listing should be prepared monthly and reconciled to the cash balance. Such reconciliations would allow for prompt detection of errors and allow the Court Administrator to determine disposition of any unidentified monies remaining over a period of time.

B Our review of civil procedures noted the following concerns regarding the timeliness of disbursements:

1. Prior to February 1999, court policy stated that a court order was required before garnishment proceeds could be released to the garnishor. As a result, garnishment proceeds held by the court totaled approximately \$1,270,000 at December 31, 1998. During February 1999, the court adopted a new policy which allows garnishment monies to be disbursed without a court order. Garnishment monies received by the court after February 1999 have been disbursed in a timely manner, but the court has made little progress disbursing garnishment monies being held prior to that date. The court should strive to disburse garnishment proceeds to those due the amounts or dispose of the monies in accordance with state law.
2. The court collects court costs for each case filed in the civil division. Many of the funds held on deposit in the fee account are for old cases which contain deposits insufficient to cover all court costs charged in the case. The June 30, 1999 civil open items listing which represents the most recent bank reconciliation done for the civil division account, totaled over \$9.5 million and contained over one thousand cases originating in 1992 or before with numerous cases dating as far back as the 1970's. If it appears unlikely the remaining amounts owed will be collected, a court order should be obtained to allow the balance to be prorated among the various costs. Attorney General's Opinion No. 26, 1973 to Osborne, concluded that "If, when liability has been established, accrued costs cannot be collected in full, charges not having any statutory priority or not allocated under court rule should be prorated."

Old inactive case balances increase the volume of cases which must be monitored and controlled, putting a greater burden on limited personnel resources. In addition, failure to prorate available monies when it is unlikely the balance will be collected, deprives the state and county of the use of those monies.

C. Civil deposits are not always made intact. Although court policy states that employee personal checks will not be cashed, we noted one instance where a court employee's personal check was cashed for \$100.

To safeguard receipts and reduce the risk of loss, theft, or misuse of funds, all receipts should be deposited intact.

**WE RECOMMEND** the Court Administrator:

- A. Prepare monthly listings of open items and reconcile these listings to the cash balance. All differences should be investigated and resolved on a timely basis.

- B.1. Increase efforts to disburse garnishment monies held on all civil cases prior to February 1999.
- 2. Pursue collection of costs accrued on old cases. If collection of such costs cannot be made, monies held by the court should be distributed on a pro-rata basis, after obtaining a court order from the Circuit Judge.
- C. Ensure that deposits are made intact daily and that the court's policy regarding cashing of employees' personal checks is adhered to.

### **AUDITEE'S RESPONSE**

#### **A. Civil Records Open Items Listing**

*As was the case in child support, the Court implemented a new accounting system for civil records, known as Banner. Although implemented in February 1999, Banner is still in its genesis. Reconciliations between pre-Banner records to post Banner records, such as the open items listing, is an ongoing process. In addition, Banner, at its implementation, did not contain a complete financial package. Most notably missing from Banner was a bank account reconciliation process. The Court has obtained assistance from the Office of State's Court Administrator (OSCA) to bring the civil records bank account reconciliation up to date. As of November 2000, OSCA has completed the October 1999 bank reconciliation. When brought up to date, the Court will reconcile the open items listing to the bank reconciliation. Due to OSCA's limited manpower, and based upon the time it has taken to reconcile the August 1999 bank statement, the Court anticipates OSCA's completion of the bank reconciliations by March 31, 2001.*

*Also, in coordination with a review of the open items listing for old garnishment money (see item B.1, below) the Court has compared all open items greater than \$100 and less than five years old to the case fee reports to determine the validity of the open item. As of November 2000, the Court has completed this task and has reconciled case fee reports for the open items noted above. The Court will continue to review the open items outside of the parameters noted above and expects to have them resolved by June 30, 2001.*

#### **B. Timeliness of Disbursements**

- 1. *Prior to its change, local Court Rules, which were based on Missouri Supreme Court Rules in force at that time, required a court order to release collected garnishments to the garnishor. Effective January 1, 1999, the State Supreme Court amended the rules to allow garnishment proceeds to be released without court order. The Court has diligently attempted to comply with the amended rules, however, shortly after amendment the Court was in the process of converting to the new Banner system. After implementation of Banner, the Court was able to process one check a day, whereas previously it was able to process up to 300 checks per day. Months later, system enhancements allowed the Court to process several hundred checks in a business day. In addition, conversion of the old open items listing to Banner did not*

*identify previously collected garnishment funds as such. Therefore, the Court had to manually review every case with an open item.*

2. *The Court has reviewed funds on the open items list back to 1995 and has pulled and reviewed each case file to determine whether deposits were garnishment funds eligible for payment under the new Rule. Once identified as a garnishment, these funds were disbursed. The Court has completed this task and is currently reviewing open items over five years. The Court expects this task to be completed by June 30, 2001.*

*Along with the review of the open items listing for garnishments, the Court has reviewed the current open items listing for disposition of outstanding items on what appear to be old cases. The Court has found that in almost all cases that have in excess of \$100 on deposit, the Court is awaiting final disposition of a case or an order from the Court for disposition of funds held. The Court anticipates disbursement of the few outstanding open items for closed cases, or cases that require no further action or order by the Court, by June 30, 2001.*

C. *Intact Deposits*

*It is the Court's policy that deposits be made intact. The Court has reviewed the policy with the cashiers and supervisors and has cautioned them against the cashing of employee checks, as it is the Court's policy not to cash employee checks. As a result, the Court believes that this issue has been resolved.*

| <b>5. Criminal Restitution Accounting Procedures</b> |
|--|

Criminal restitution payments are processed through the court's criminal office in Kansas City. Restitution receipts average approximately \$500,000 annually. Our review noted the following concerns:

- A. The court does not prepare a monthly listing of open items (liabilities) for the criminal restitution account. As a result, the criminal restitution cash balance is not reconciled to open items. The cash balance of the restitution account at September 30, 2000 was approximately \$330,000. Monthly listings of open items are necessary to ensure proper accountability over open cases and to ensure monies held in trust by the court are sufficient to meet liabilities. Because of the large amount of restitution payments being held and the failure to maintain a monthly open-items list and reconcile it to the cash balance, improprieties and errors could occur and not be detected.
- B. The court has money on deposit in the criminal restitution bank account which cannot be properly distributed because the victims can no longer be located. Since an open-items list is not prepared, the court cannot monitor these monies to ensure that they are disbursed in accordance with state law. We noted for 5 of 25 (20 percent) cases

tested the victim could not be located, with payments totaling over \$500 being held on each of these five cases.

An effort should be made to identify and properly disburse the money remaining in the criminal restitution account. Any amounts remaining that cannot be identified should be turned over to the state's Unclaimed Property Section in accordance with state law.

**WE RECOMMEND** the Director of Criminal Records:

- A. Prepare monthly listings of open items for the criminal restitution account and reconcile these listings to the cash balance. Any differences should be investigated and resolved on a timely basis.
- B. Disburse any money remaining in the criminal restitution account to the appropriate parties. If the victims cannot be located, the amounts should be disposed of in accordance with state law.

**AUDITEE'S RESPONSE**

A. *Open Items Listing*

*The Court understands the importance of an open items listing. The Court is in the process of automating its financial system in the Criminal Restitution Department (along with Criminal Records Department). The open items listing is one of the primary reports that the new system will be able to generate. The Court anticipates implementation of the new accounting system by December 31, 2000.*

B. *Victim Location*

*As stated above, the implementation of new software will enable the Court to provide an open items list effective December 31, 2000. This will enhance the Court's ability to monitor victim information, such as current address, and to comply with unclaimed property procedures in a more timely fashion.*

|   |
|---|
| <b>6. Delinquent Land Tax and Civil Process Section Accounting Procedures</b> |
|---|

- A. Our review of the delinquent land tax sale receipt ledger noted the following concerns:
  - 1. Receipt slips are not issued for monies received from bidders as deposits on delinquent land tax properties. These monies are usually paid by check and are deposited into the section's bank account. A manual ledger is used to track the deposits placed by the various bidders. At the time a sale occurs, a

receipt slip is written for the amount of the sale and any funds remaining out of the deposit are refunded to the successful bidder. The fiscal officer prepares refunds for unsuccessful bidders. We noted three instances, totaling \$6,800, where refunds to bidders were made in cash. Documentation of cash refunds is not maintained. In addition, the numerical sequence of receipt slips, which are posted to a receipt ledger by the computer, is not accounted for properly. We noted several instances where sequential receipt slip numbers were not listed on the ledger or some numbers were missing completely. Staff indicated this was caused by computer error. Because receipt slips are not issued for all monies received, the numerical sequence of receipt slips is not accounted for, and deposits are not made intact, there is less assurance that all monies received are deposited.

To properly account for all monies received, prenumbered receipts slips should be issued for all receipts and deposits should be made intact.

To facilitate the reconciliation of the composition of receipt slips to the composition of deposits and to ensure all monies received are accounted for properly, the court should discontinue the practice of making cash refunds.

2. The receipt ledger does not always indicate the method of payment. We noted several instances where the ledger identified the method of payment as "both", indicating that a portion of the monies received were check or money order and a portion was cash, but the amount of each type of payment was not indicated. As a result, it is not always possible to reconcile receipts to deposits. To ensure that all monies received are properly deposited intact, the method of payment should be specifically identified on the receipt ledger and the composition of receipt slips issued should be reconciled to the composition of deposits.

- B. In case of computer problems, manual receipt slips are issued for delinquent land tax sales and posted in a ledger. The court was unable to locate the manual receipt ledger for the September 1997 sale. In addition, when manual receipt slips are issued at a sale, a copy of the receipt slip is not maintained in the case file.

All records of original entry should be retained in accordance with the Secretary of State record retention guidelines. Record retention is necessary to ensure the validity of transactions and provide an audit trail. In addition, Section 109.270 RSMo 1994, states that all records made or received by an official in the course of their public duties are public property and are not to be disposed of except as provided by law.

- C. Receipts from land tax sales are not always deposited intact on a timely basis. We noted a receipt of \$48,700 for a land tax sale which was not deposited until three days after it was received. In addition, a change fund of approximately \$1,000 is maintained. Cash is withheld from deposits to make change; however, the amount of

cash on hand varies from day to day. The court indicated that they only deposit large cash bills and leave the rest for the next day's change fund, but they are unwilling to ensure the cash on hand is maintained at a constant amount.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, all monies should be deposited intact daily or when accumulated receipts exceed \$100. In addition, change funds should be maintained at a constant amount.

- D. Fees are not always paid to the county in a timely manner. Civil Process fees collected in March 1998 were not turned over to the county until June 4, 1998, and fees collected in October 1998 were not turned over to the county until January 6, 1999.

Section 488.023, RSMo Cumulative Supp. 1999, requires that fees be turned over to the county within 30 days of collection.

**WE RECOMMEND** the Director of Civil Process:

- A.1. Ensure that receipt slips are issued for all monies received and that the numerical sequence of receipt slips is accounted for. In addition, refunds should be made by check.
2. Ensure that receipt slips indicate the method of payment and that the composition of receipt slips is reconciled to the composition of deposits.
- B. Retain all records in accordance with the Secretary of State's record retention guidelines and state law.
- C. Ensure receipts are deposited intact on a timely basis. In addition, change funds should be maintained at a constant amount.
- D. Ensure fees are paid to the county on a timely basis.

**AUDITEE'S RESPONSE**

A. *Receipt Slips and Ledger*

1. *In August 2000, an enhancement to the Delinquent Land Tax program was added which now allows pre-numbered receipts to be issued to any bidder placing money on deposit with the Court. Deposit receipts that are issued use a separate block of numbers so they will not be confused with receipts of purchasers. The receipt documents the payment type (cash and/or cashier's check with the cashier check number). Several reports were also added to track bidder deposits such as a bidder deposit report, bidder receipt report and bidder disbursement report. All refunds are now made by check, and the check number, date and amount can be entered on the*

*bidder disbursement report for complete tracking. Because of these enhancements, the Court believes that this issue has been resolved.*

2. *The same enhancement of August 2000 now enables the Court to indicate all methods of payment on each purchased parcel. A daily report was added that shows check numbers and amounts, cash returned, deposit money used and change returned for each parcel. As a result, the Court believed this issue has also been resolved.*

**B. Computer Problems and Manual Receipts**

*The Court has not been able to locate the ledger for the September 1997 sale but is continuing to look. Procedures have been implemented that forward a copy of the ledger to the Fiscal Officer, with the original remaining with the Department of Delinquent Land Trust.*

*During the period under review, the Court used a single-copy, carbon-free pegboard system for its manual receipting. The original receipt is given to the purchaser and the receipt information is recorded on the pegboard sheet that records 24 other sales per sheet. When the receipt is computer generated it prints an original and a copy; the copy is put in each file folder. The manual system does not facilitate the placement of receipt copies in individual case files. Because of the computer enhancements noted above, the Court believes that this issue has been resolved.*

**C. Intact, Timely Deposits**

*During the period under review, the cashiering function of the Court's annual land tax sale was performed by either individuals new to the Fiscal Officer position or temporary personnel provided by the Court's independent accounting firm of Donnelly Meiners Jordan and Kline. Inexperience in the cash flow requirements of the sale led to the excess cash availability. This inexperience, along with functional problems associated with the use of DMJK led to the deposit of receipts three days after the sale. At all times, though, this excess cash was either stored overnight in the Court's safe, or in the County's vault during the actual sale. During the 2000 Land Tax Sale, the cash remaining in the drawer overnight did not exceed \$5,000 and a day's receipts were deposited the following day. Due to cash flow needs during the Kansas City sale, a reduction in this amount for the first few days may not be possible. Sufficient cash must be available to make change on sales of small dollar amounts purchased with large dollar cashier checks. The Court, at the next land tax sale, will monitor this issue and reduce the cash drawer to an amount reasonably close to \$1,000 (the amount of the initial cash drawer).*

**D. Timely Payment of Civil Process Fees**

*The Court's policy is to pay these fees in a timely manner. Due to the prior instability in the Fiscal Officer position, these payments were overlooked for the periods noted. All payments were made at a later date. With the implementation of Banner, these payments are made*

*monthly with other fees collected in Civil Records. The Court is current in their payment of fees and as a result of the above factors, believes that this issue is resolved.*

This report is intended for the information of the judicial circuit's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on Prior Audit Findings

SIXTEENTH JUDICIAL CIRCUIT  
JACKSON COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

In accordance with Government Auditing Standards, this section reports the auditor's follow-up on action taken by the Sixteenth Judicial Circuit, Jackson County, Missouri, on findings in the Management Advisory Report (MAR) of our prior audit report issued for the two years ended December 31, 1994. The prior recommendations which have not been implemented, but are considered significant, are repeated in the current MAR. Although the remaining unimplemented recommendations are not repeated, the judicial circuit should consider implementing these recommendations.

1. Distribution of Unidentified Monies

During September 1995, the Jackson County Circuit Court disbursed \$767,992 in unidentified monies from its civil accounts to Jackson County instead of disbursing the monies to the State Treasurer's Office, Unclaimed Property Section.

Recommendation:

No recommendation was made in our prior audit report because the court was working with the State Treasurer's Office and the county to determine the proper distribution of these monies.

Status:

The court provided documentation that the State Treasurer's Office reviewed this situation and determined that the \$767,992 cited above was not subject to the Unclaimed Property Act and should remain with Jackson County.

2. Child Support Section's Accounting Procedures

- A. Open-items (liabilities) records for the Child Support account were not reconciled to the cash balance. At December 31, 1994, the cash balance was approximately \$170,000 less than the open-items balance. In 1995, some excess (unidentified) monies were transferred from the civil accounts to child support to decrease the shortage. As a result, the July 31, 1995, cash balance was \$17,621 less than the open-items balance.
- B. A lack of segregation of duties existed because the two individuals who opened the mail could also post receipts to the receipt records.

Recommendation:

The Court Administrator require the Child Support Section to:

- A. Correct the open-items accounting problems noted by the independent certified public accountants and reconcile open items to the cash balance monthly. Any differences noted should be resolved in a timely manner.
- B. Segregate the duties of opening the mail from that of posting collections to the receipt records.

Status:

- A. Not implemented. See MAR No. 2.
- B. Implemented. Personnel opening the mail can no longer post receipts to the child support system.

3. Criminal Records Section's Accounting Procedures

- A. Deposits were not being adequately reviewed and compared to receipt records to ensure recorded receipts were deposited intact.
- B. A monthly open-items (liabilities) listing was prepared by the Restitution Division documenting those cases in which restitution had been received but not yet disbursed. The listing prepared as of December 31, 1994, included 20 cases totaling \$5,222 for which no monies had been received since December 31, 1990.

Recommendation:

The Court Administrator require the Criminal Records Section to:

- A. Review deposits and compare them to the receipts records to ensure all monies received are deposited. This would include agreeing the deposit total to the receipts total and agreeing the cash/check composition of the deposits to the cash/check composition of the receipts journal.
- B. Distribute restitution monies involving payees who cannot be located to the state's Unclaimed Property Section in accordance with state law.

Status:

- A. Not implemented. See MAR No. 3.
- B. Not implemented. The court no longer maintains a listing of open-items for the Criminal Restitution account and therefore cannot ensure that monies are turned over

to the state's Unclaimed Property Section within the time guidelines prescribed by statutes. See MAR No. 5.

4. Family Court Division's Recreation Accounts

- A. Bank reconciliations were not performed on a monthly basis for those bank accounts held by the McCune School for Boys and the Hilltop Co-educational Treatment Center.
- B. Certain accounting records were not maintained by the facilities mentioned above. Nearly all records related to 1993 were missing from both facilities. In addition, bank statements for various periods could not be located.
- C. Invoices or other documentation were not maintained to support all disbursements made by the above-mentioned facilities.
- D. Many disbursements were made by cash obtained from checks made payable to cash or to employees of the division. The facilities did not always maintain records to support how the cash was used.
- E. Checks were written out of sequence at both facilities and several books of unissued checks at the McCune School for Boys could not be located.

Recommendation:

The Family Court Division ensure:

- A. Monthly bank reconciliations are performed for all accounts.
- B. All accounting records are maintained.
- C&D. Supporting documentation, such as original invoices, are maintained for all disbursements.
- E. All checks are written in numerical sequence. In addition, unissued checks should be adequately safeguarded.

Status:

- A-E. Implemented. The Family Court Division closed all of the bank accounts which were held at the facilities and administers recreation monies through the accounting office.

5. Law Library's Procedures

- A. Free access to the materials in the library was limited to county judges, court officials, and member attorneys who had paid annual dues to the Jackson County

Law Library (JCLL). Nonmember attorneys were asked to pay a daily fee when using the law library materials.

- B.1. The library did not have a formal written policy for vacation and sick leave or compensatory time.
- 2. Timesheets were not required for some employees and some timesheets completed were not adequate. Full-time salaried employees were not required to complete timesheets; however, timesheets were required from part-time employees.

Recommendation:

The Presiding Circuit Judge:

- A. Review the JCLL's current policy concerning access to the law library with other members of the court and the JCLL for compliance with Section 514.480, RSMo 1994, and consider revising that policy as necessary.
- B.1. Ensure the JCLL establishes a formal written policy regarding vacation, sick leave, and other compensatory time.
- 2. Ensure the JCLL requires that timesheets be prepared and submitted by all employees. These timesheets should indicate the actual hours worked during the pay period, be signed by the employee, and be properly approved by the respective employee's supervisor.

Status:

- A. Not implemented. Although not repeated in the current report, our recommendation remains as stated above.
- B.1&  
B.2. Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

SIXTEENTH JUDICIAL CIRCUIT  
JACKSON COUNTY, MISSOURI  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

Organization

The Sixteenth Judicial Circuit includes only Jackson County, and consists of nineteen circuit judges, eight associate circuit judges, seven commissioners, and one deputy commissioner.

The court en banc consists of all of the divisions of the Sixteenth Judicial Circuit acting collectively. The circuit and associate circuit judges elect a presiding judge for a two-year term. The court en banc determines questions of policy for the court and promulgates court rules. The presiding judge operates as the chief executive of the court, with administrative authority over personnel and the assignment of cases filed in the court. The presiding judge is responsible for making management decisions involving the court on a daily basis, assigns the judges to dockets, presides over court en banc meetings, and acts as the spokesperson of the court. An administrative staff assists the court.

Effective August 28, 1993, the Juvenile Division was redesignated the Family Court Division pursuant to state law. The court en banc appoints commissioners who must possess the same qualifications as a circuit judge to hear family court cases.

The court operates out of four different locations in Jackson County: seventeen judges sit in the Jackson County Courthouse in Kansas City, seven judges sit in the Jackson County Courthouse in Independence, two judges who are assigned to criminal cases sit at the Criminal Justice Center in Kansas City, and one judge who is assigned to juvenile cases sits at the Family Justice Center in Kansas City.

The court appoints a court administrator who is in charge of the administrative functions of the court, except for the Probate Division. The Office of the Court Administrator plans, assigns, coordinates, and supervises the operation and administration of the courts presided over by the circuit and associate circuit judges. Duties of the Office of the Court Administrator include: docketing, clerical tasks, provision of documentation for court matters, accounting and recording, and receipt and disbursement of funds.

The Probate Division Judge is responsible for the administrative functions of the Probate Division.

The court appoints a Director of Family Court Services who is responsible for the administrative functions of the Family Court Division and who reports to the Family Court Administrative Judge and the Court Administrator. The Family Court Division operates nine facilities including detention centers, group homes, and schools for the detention and rehabilitation of juveniles.

The court also appoints a Jury Supervisor to oversee the jury selection system.

The court has appointed Jackson County Law Library, Inc., to operate and maintain the county law library.

::

### Operating Costs

The operating expenses of the various courts, the Family Court Division, and judicial administration are paid by Jackson County. The salaries of the court administrator and immediate staff, the bailiffs, the Family Court Division employees, as well as the salaries of the employees in the Civil Process, Personnel, Computer Services, and Court Services Departments are paid by Jackson County. All other salaries are paid by the state of Missouri.

Expenditures incurred for the Sixteenth Judicial Circuit, Jackson County, Missouri, were obtained from the Jackson County budget and information provided by the State Courts Administrator's Office and are as follows:

| Year Ended December 31, |                      |                   |                   |
|-------------------------|----------------------|-------------------|-------------------|
|                         | 1999                 | 1998              | 1997              |
| State of Missouri:      |                      |                   |                   |
| Personal Service        | \$ 8,791,160         | 8,433,690         | 8,000,056         |
| Jackson County:         |                      |                   |                   |
| Personal Service        | 18,682,886           | 18,063,810        | 16,787,414        |
| Expenses                | 6,832,103            | 6,456,733         | 6,620,696         |
| Total                   | <u>\$ 34,306,149</u> | <u>32,954,233</u> | <u>31,408,166</u> |

### Caseload and Time Standards Statistics

Caseload statistics of the filings and dispositions as provided by the State Courts Administrator's Missouri judicial reports, are as follows:

| Year Ended June 30,   |               |               |               |               |               |               |
|-----------------------|---------------|---------------|---------------|---------------|---------------|---------------|
|                       | 1999          |               | 1998          |               | 1997          |               |
|                       | Filings       | Dispositions  | Filings       | Dispositions  | Filings       | Dispositions  |
| Civil                 | 47,038        | 42,264        | 48,441        | 50,148        | 49,711        | 45,697        |
| Criminal              | 9,968         | 10,064        | 11,772        | 11,424        | 12,430        | 10,347        |
| Traffic and ordinance | 21,326        | 19,199        | 16,654        | 15,426        | 16,691        | 14,886        |
| Juvenile              | 7,717         | 6,770         | 6,839         | 6,050         | 6,714         | 5,671         |

::

Compliance by the Sixteenth Judicial Circuit, Jackson County, Missouri, with time standards for disposition of certain types of cases, provided by the State Court Administrator's Missouri Judicial Report for fiscal year 1999, is as follows:

| Type of Case       | Time Standard    | Sixteenth<br>Judicial Circuit,<br>Jackson County, |   | State Total |   |
|--------------------|------------------|---|---|-------------|---|
|                    |                  | Missouri  |   |             |   |
| Circuit Civil      | 90% in 18 months | 78  | % | 80          | % |
|                    | 98% in 24 months | 90  |   | 88          |   |
| Domestic Relations | 90% in 8 months  | 81  |   | 83          |   |
|                    | 98% in 12 months | 88  |   | 90          |   |
| Associate Civil    | 90% in 6 months  | 84  |   | 89          |   |
|                    | 98% in 12 months | 95  |   | 97          |   |
| Circuit Felony     | 90% in 8 months  | 83  |   | 87          |   |
|                    | 98% in 12 months | 92  |   | 94          |   |
| Associate Criminal | 90% in 4 months  | 80  |   | 77          |   |
|                    | 98% in 6 months  | 87  |   | 88          |   |

#### Personnel

At December 31, 1999, the judges, commissioners, and other key court personnel of the Sixteenth Judicial Circuit, Jackson County, Missouri, were:

##### Circuit Court judges:

Division One, David W. Shinn  
 Division Two, William W. Ely  
 Division Three, Thomas C. Clark  
 Division Four, Justine E. Del Muro  
 Division Five, W. Stephen Nixon  
 Division Six, John R. O'Malley  
 Division Seven, William F. Mauer  
 Division Eight, Lee E. Wells  
 Division Nine, Kelly Moorhouse  
 Division Ten, Charles E. Atwell  
 Division Eleven, J. D. Williamson, Jr.  
 Division Twelve, Edith L. Messina, Presiding Judge  
 Division Thirteen, Jay A. Daugherty  
 Division Fourteen, Thomas H. Newton  
 Division Fifteen, K. Preston Dean  
 Division Sixteen, Marco Roldan  
 Division Seventeen, C. William Kramer  
 Division Eighteen, Jon R. Gray  
 Division Nineteen, John A. Borron Jr., Probate Division

::

Associate Circuit judges:

Division Twenty-five, Richard E. Standridge  
Division Twenty-six, Anthony J. Romano  
Division Twenty-seven, Peggy Stevens McGraw  
Division Twenty-eight, Vernon E. Scoville, III  
Division Twenty-nine, Charles L. Stitt  
Division Thirty, Twila K. Rigby  
Division Thirty-one, Christine T. Sill-Rogers, Family Court Division  
Division Thirty-two, Robert L. Trout  
Division Thirty-three, Jeffrey Busher

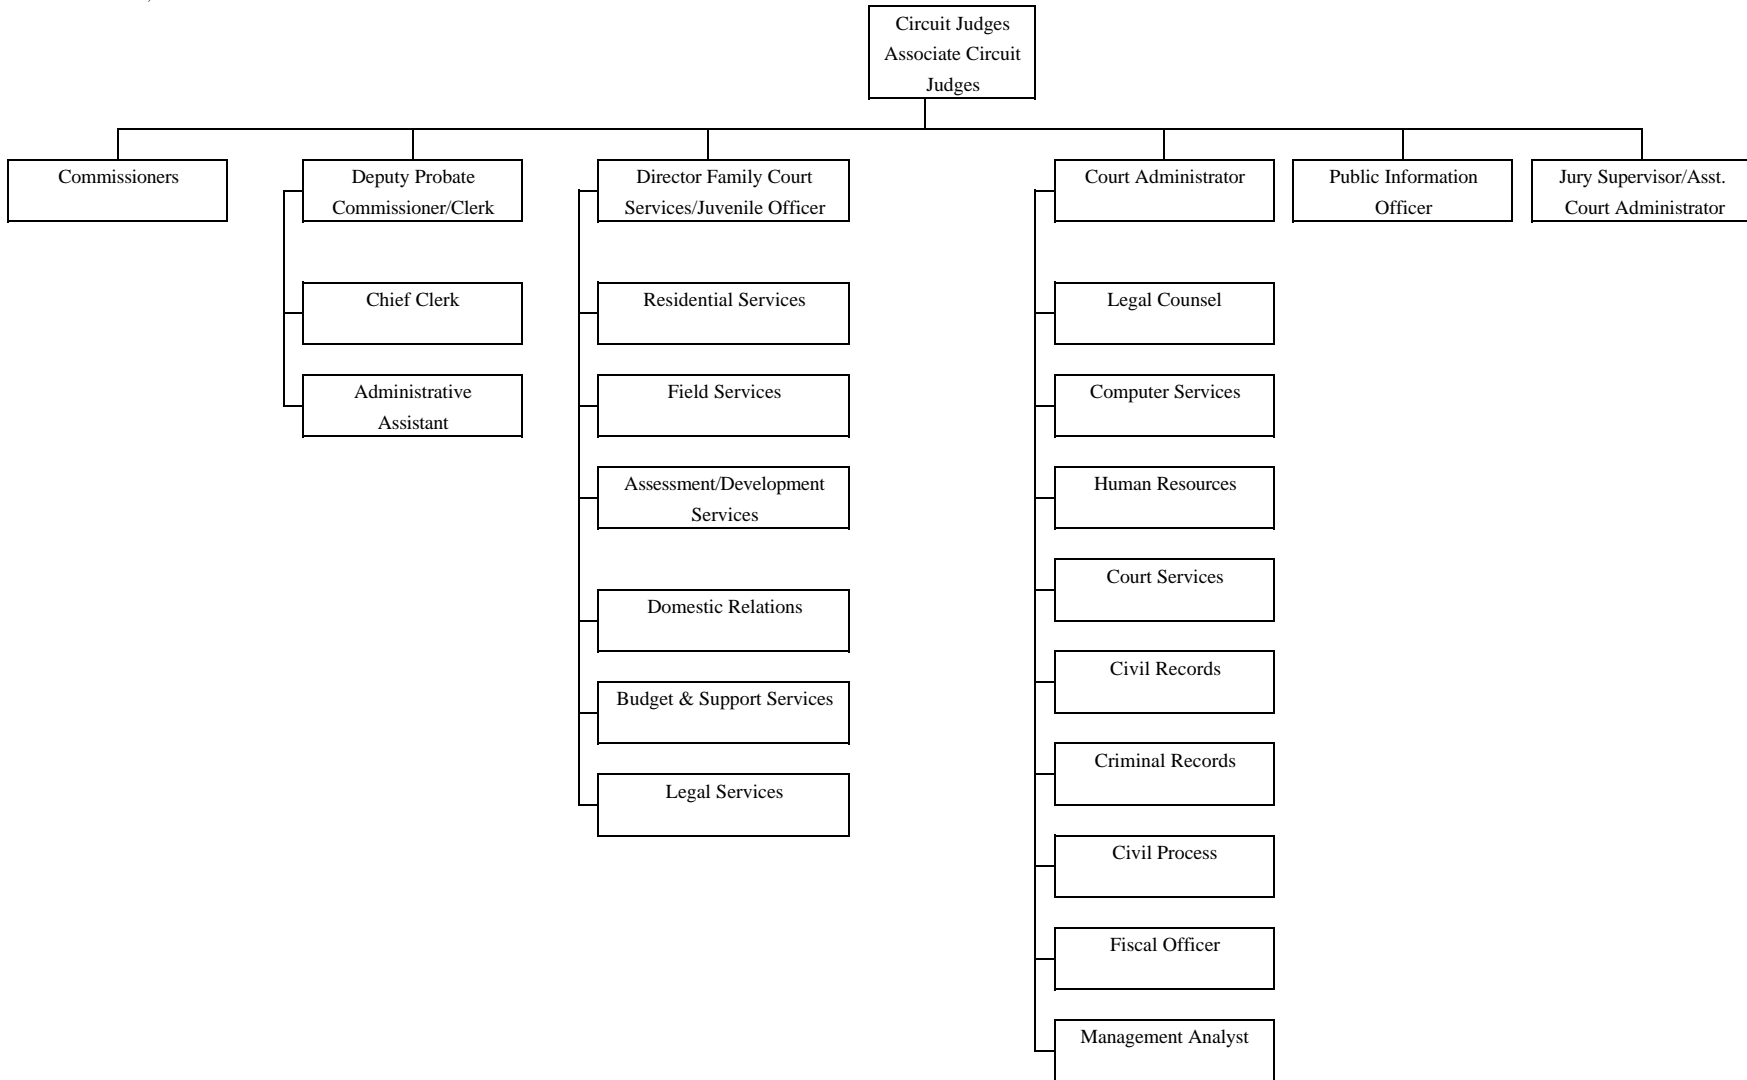

Commissioners:

Geoffrey Allen, Family Court Division  
John F. Payne, Family Court Division  
Sherrill L. Rosen, Family Court Division  
Robert L. Schieber, Family Court Division  
Molly M. Merrigan, Family Court Division  
Kathleen A. Forsyth, Probate Division  
Daniel P. Wheeler, Probate Division  
Gregory B. Gillis, Drug Court

Court Administrator, Jaci Mairs  
Juvenile Officer/Director of Family Court Services, David W. Kierst, Jr.  
Law Library Board President, F. Coulter DeVries  
Assistant Court Administrator/Jury Supervisor, Teresa Steelman  
Fiscal Officer, Joel Kesler

 JACKSON COUNTY, MISSOURI  
 ORGANIZATION CHART  
 DECEMBER 31, 1999

\* \* \* \* \*

STATEWIDE ADVANTAGE FOR MISSOURI (SAM II) SYSTEM

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-129  
December 21, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

During fiscal year 1995, the state began discussing the need to replace the old accounting system (SAM) with a new integrated accounting system. The state decided to purchase a software package from a vendor that would be upgraded periodically. In addition, the State of Missouri wanted an integrated system that would incorporate various areas such as accounting, budget, payroll, procurement, fixed assets, leave accrual, etc.

The state issued a request for proposal to obtain bids for a new accounting system. In April 1997, the state awarded the contract to American Management Systems. On July 1, 1999, SAM II was implemented as the state's accounting system.

The state began using a new accounting system (SAM II) in fiscal year 2000. We audited the new accounting system to determine if the controls within the new system were adequate and effective. Our audit noted various concerns, as follows:

- The reporting needs of various state agencies have not been met by the SAM II system. Over 69 percent of the users who responded to our survey indicated they were not satisfied with the standard reports generated by the new SAM II system.
- We reviewed two year-end reports (the Balance Sheet report and the Statement of Revenue and Expense report) and noted various errors that made the reports inaccurate and unreliable.
- With the new SAM II system, state agencies are suppose to file all supporting documentation, such as purchase orders, receiving reports, and vendor invoices, with the Office of Administration. However, the Office of Administration does not ensure that state agencies file all original supporting documentation.
- Although the Office of Administration requested all state agencies to submit an internal control plan, only three agencies had done so and the Office of Administration did not adequately pursue the other agencies to get their internal control plan submitted.
- Some state agency personnel were not following proper procedures in processing interagency transactions which caused these transactions to be recorded improperly.
- The Office of Administration did not give proper guidance to the state agencies about system security access.

(over)

YELLOW SHEET

- The Office of Administration did not perform timely reconciliations between the new SAM II system and the State Treasurer's records, which caused monthly financial reports to be issued late.

As part of the audit, we surveyed the state agencies to determine if the new system satisfied their needs. Highlights of the survey responses from state agencies are as follows, with more detail in Appendix II, which starts on page 19.

- There appears to be widespread dissatisfaction with the standard reports generated by the system.
- Although most state agencies are using the data warehouse, some users indicated the data warehouse was difficult to use and the cost to use it was too high.
- Most responses indicated the new SAM II system required more staff time to process transactions.
- We asked users to rate their level of satisfaction with the new SAM II system and the 81 users that responded to our survey rated the system an average of 5.7 out of a possible 10.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger B. Wilson, Governor  
and  
Richard A. Hanson, Commissioner  
Office of Administration

We have audited the SAM II system implemented by the State of Missouri on July 1, 1999. The objectives of this audit were to:

1. Review certain management and system controls to determine the propriety, efficiency, and effectiveness of those controls.
2. Determine if the financial statements, reports, and data warehouse information available through the SAM II system are satisfactory and meet the needs of the users.
3. Survey applicable state departments regarding the efficiency and effectiveness of the SAM II system.

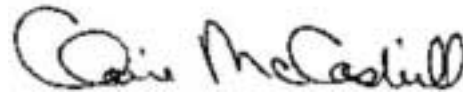

Our audit was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed applicable state and federal laws, interviewed applicable personnel, analyzed responses to surveys distributed, and reviewed certain records and documents.

As part of our audit, we assessed the Office of Administration's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management and systems controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying information presented in the appendices is presented for informational purposes. This information was obtained from the state's management and was not subjected to the procedures applied in the audit of the SAM II system.

The accompanying Management Advisory Report presents our findings arising from our audit of the SAM II system.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

August 17, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## MANAGEMENT ADVISORY REPORT SECTION

STATEWIDE ADVANTAGE FOR MISSOURI (SAM II) SYSTEM  
SUMMARY OF FINDINGS

1. Reporting (pages 6-8)

The standard reports provided by the SAM II system do not adequately meet the needs of some state agencies. Two reports reviewed were not accurate or reliable.

2. Workflow and Document Listing (pages 9-10)

The workflow system does not facilitate the approval of payment voucher documents. As a result, the compliance auditors have been using the suspense file to approve payment voucher documents, a procedure that circumvents the payment approval processes in SAM II.

3. Filing Supporting Documentation (pages 10-11)

The Office of Administration does not ensure state agencies file all original supporting payment documentation with the Office of Administration.

4. Internal Control Plans (pages 11-12)

State agencies have not filed their internal control plans with the Office of Administration.

5. Receivable Document Processing (pages 12-13)

The receivable document does not have adequate edit checks to ensure the accurate processing of interagency transactions. SAM II does not cancel interagency transaction purchase orders automatically.

6. Cash Receipt Payment Document Processing (page 13-14)

The cash receipt payment document does not have adequate edit checks to ensure the accurate processing of an interagency payment.

7. SAM II Access Procedures (pages 14-15)

The Office of Administration did not establish adequate controls to ensure security request forms were properly authorized before processing.

8. Reconciliations (page 16)

The Office of Administration did not prepare monthly financial summary reports on a timely basis.

STATEWIDE ADVANTAGE FOR MISSOURI (SAM II) SYSTEM  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

|           |                  |
|-----------|------------------|
| <b>1.</b> | <b>Reporting</b> |
|-----------|------------------|

- A. Our surveys of state agencies indicated the reporting needs of various state agencies have not been met by the SAM II system. (See Appendix II for survey results) Some agencies indicated the standard reports generated by the SAM II system do not provide the detailed information needed for review of their transactions and for tracking their appropriations. In addition, some agencies indicated the information provided by the standard reports is organized in a format which is complex and confusing. SAM II is a fund based accounting system while SAM was an appropriation based system.

Many users indicated that reports are needed which include detailed information at the organization level and at the appropriation level. Many state agencies are unable to determine the current status of their appropriations. One agency indicated, "...We are three-fourths of the way through the fiscal year and have no real way to see where we are." The inability for agencies to evaluate their appropriation levels is a critical concern of many users. In addition, users indicated the formatting for standard reports is complex and not meaningful. As a result of inadequate reports, users are having difficulties reviewing reports for individual transactions. Some users indicated that although the SAM II standard reports provide adequate summary information, the information is difficult to analyze and understand what is included in these summary reports. Standard reports that provide significant detailed information regarding specific transactions are still needed. Many users also indicated the reports generated by the SAM II system are not similar to the previous reports produced by the SAM system. As one agency indicated, "...We were led to believe from the project that we would receive reports similar to what we were used to receiving. That turned out to be fiction..." Some agencies hired consultants to develop usable reports. The hiring of consultants was an additional expense incurred by these agencies.

In addition to the standard reports generated by the SAM II system, state agencies can generate reports from the data warehouse. The data warehouse enables agencies to query detailed information and to organize the information into the desired format. However, many users indicated that even though the data warehouse has the desired information, it is extremely difficult to obtain, download, and organize this information into a usable report.

As a result of complaints from the state agencies for more detailed and user friendly reports, a SAM II Data Warehouse/Reporting Information Technology Advisory Board (ITAB) Committee was formed. This committee was created to assist state

agencies in obtaining the information necessary for reporting purposes. The committee considered various agency needs and coordinated the development of three additional standard reports. Some agencies have indicated these three reports will be beneficial and will satisfy many reporting needs. The committee also encourages users to communicate with other users to determine successful data warehouse queries and the methods used in developing usable report information.

However, many survey responses received indicated the lack of adequate reports is the most important concern of users. The SAM II Data Warehouse/Reporting ITAB Committee has partially addressed this issue with the development of the three reports mentioned above. At the time of the survey, these three reports were still in the early implementation phase and agencies had not received or become familiar with these reports. Thus, survey responses indicated that many users were unable to obtain the necessary detailed information required for reporting purposes. One user indicated, "If the reports are not available, the system is useless. This needs top priority."

B. We reviewed the Comparative Balance Sheet By Fund report (F205) as of June 30, 2000, and the Statement of Revenue and Expense report (F140) for Fiscal Year 2000. Our review noted the following concerns:

1. The balance sheet for the General Revenue and the State Road funds did not balance as total assets did not equal total liabilities and fund equity.

For financial reporting purposes, total assets must equal total liabilities and fund equity. When this does not occur it is an indication of improperly recorded transactions.

2. An accurate statement of changes in fund balance could not be prepared for 19 of the 356 (5.3 percent) funds. The difference between calculated fund balance and the reported fund balance was \$92,290,033. The differences in these 19 funds ranged from \$(7,766,261) to \$84,614,374. An accurate statement of changes in fund balance is needed for financial reporting purposes. When this does not occur it is an indication of improperly recorded transactions.
3. An accurate statement of cash flows could not be prepared for 18 of the 356 (5.1 percent) funds. The difference between calculated cash balance and the reported cash balance was \$(13,302,986). The differences in these 18 funds ranged from \$(20,314,124) to \$11,587,147. Many of the differences were for the same funds indicated in 2 above. An accurate statement of cash flows is needed for financial reporting purposes. When this does not occur it is an indication of improperly recorded transactions.

4. We noted that accumulated depreciation was reported for six funds. However, four of these funds did not report a fixed asset amount and the other two funds reported a negative fixed asset amount. Accumulated depreciation is recorded as a reduction in the fixed asset amount and should only be reported when there are fixed assets. In addition, fixed assets should never be a negative number. These discrepancies indicate there are errors in the recording of fixed assets and accumulated depreciation.

From the errors indicated above, the Comparative Balance Sheet By Fund report as of June 30, 2000, and the Statement of Revenue and Expense report for Fiscal Year 2000 are not accurate and reliable.

**WE RECOMMEND** the Office of Administration:

- A. Continue to coordinate the development of reports to meet the reporting needs of the various state agencies.
- B. Determine the reasons for the inaccuracies in the SAM II reports and develop procedures to ensure the accuracy of reports.

**AUDITEE'S RESPONSE**

- A. *We concur. We did work with the ITAB Datawarehouse/Reporting Committee to develop and implement the three standardized reports identified in this finding. In addition, the ITAB Committee and the SAM II Steering Committee confirmed that these reports met the identified needs of systems users.*

*While the system has 170 standard reports available, we are encouraging agencies to make use of the adhoc reporting capabilities of the system. We envision that in the future more information will be used and analyzed by adhoc reports than by standardized reports.*

*To move from a batch, paper document, cash basis accounting system to an on-line real-time accrual based accounting system has been a major undertaking and we expect we will continue to experience a considerable learning curve.*

- B.1. *This error was caused by a human error when entering a transaction. This was corrected and these reports now balance.*
- 2&3. *These errors were the result of conversion errors in moving data from SAM I to SAM II. Cash balance amounts were loaded into the fund balance account. This was corrected and these reports now reflect correct totals.*
4. *These errors were caused when the payment voucher transactions to purchase the assets were entered incorrectly. The payment indicated that no asset record should be created.*

*However, correct entries were made in the fixed asset subsystem. These errors were caught and corrected as part of preparation of the Comprehensive Annual Financial Report.*

**2.**

**Workflow and Document Listing**

The SAM II workflow system routes documents from one user to another user to facilitate the processing and approval of various on-line documents. Included in the workflow system is a worklist which is a listing of all documents routed to a specified user. Each user has a unique worklist which identifies documents ready to be processed and approved.

Vendor invoices are processed using different types of on-line payment voucher documents. All payment vouchers except for automated payment vouchers and vendor payment vouchers require approval by the Office of Administration (OA) – Compliance Audit Section before payment is made. The on-line payment voucher documents are submitted to the compliance auditors from state agencies by the workflow system and the state agencies submit the original invoices to the compliance auditors for final approval of the payment voucher document.

The compliance auditors are not using the worklist in the workflow system to approve payment voucher documents. A large number of payment voucher documents from different state agencies are routed through the workflow system to the compliance auditors for the compliance auditors to approve the payment voucher document. However, the work list cannot locate payment voucher documents by using a specific document number. In addition, the worklist cannot be sorted to allow the compliance auditors to locate specific documents. To locate a document on the worklist, the compliance auditors must scroll through the listing of documents until the specific document is located. As a result, it takes a lot of time to search the worklist for specific documents needing approval. In order to locate documents quicker, the compliance auditors are using the document listing table which is also known as the suspense file (SUSF). However, the SUSF allows the compliance auditor access to documents before the documents have been processed and approved at the agency level.

The SUSF does not operate within the workflow system. The SUSF operates as a holding file storing documents from all workstations connected to the system. The SUSF stores documents until the documents are approved, completed or corrected. Compliance auditors are allowed access to the SUSF and use it to locate documents needing approval. The SUSF allows the compliance auditors to search by document number, document type, agency number, or fund number. However, by using the SUSF, compliance auditors have access to all documents, not just those documents pending approval from the compliance auditors. By not using the workflow system, which restricts the flow of documents to only the designated workstation, the OA compliance auditors could approve documents, which would generate a check to the vendor, before the documents have been reviewed and approved at the agency level. In addition, by using the SUSF the compliance auditors are circumventing the controls established with workflow in the SAM II system.

**WE RECOMMEND** the Office of Administration modify the workflow system to provide for the more efficient and timely location of documents by the compliance auditors and discontinue allowing the compliance auditors to approve documents from the SUSF.

**AUDITEE'S RESPONSE**

*The ability of the worklist to be sorted to locate a specific document has been identified as a significant shortcoming to AMS and they are currently working on an enhancement to the baseline software. In the meantime, we have strengthened our procedures to reduce the chance of error when using SUSF.*

|   |
|---|
| <b>3. Filing Supporting Documentation</b> |
|---|

The OA does not ensure the original supporting documentation is received from state agencies for Automated Payment Voucher (PVA) and Vendor Payment Voucher (P1) transactions. During our review of expenditures, the OA was unable to locate supporting documentation for 21 of 30 PVA expenditures reviewed (70 percent) and supporting documentation for 8 of 23 P1 expenditures reviewed (35 percent). In addition, one agency indicated it had not submitted supporting documentation for any PVA expenditures to the OA since the SAM II system was implemented.

Vendor invoices are processed using different types of payment voucher documents. The PVA documents are generated by the SAM II system as a result of the three-way match feature. According to SAM II policies and procedures, this feature provides the capability of generating payment vouchers automatically, provided the system has accepted the correct combination of the corresponding purchase order, receiving, and vendor invoice documents. When the required criteria has been matched on these three documents, a payment voucher is automatically generated. The P1 documents are payment vouchers which are prepared at the agency level. The P1 documents also reference a purchase order and vendor invoice, but is not an automatically generated payment voucher. Once the P1 document has been completed, the P1 will be approved and processed by designated personnel at the agency level and does not have to be approved by compliance auditors. Supporting documentation of expenditures is filed with the OA after the payment voucher documents have been processed and approved.

The OA is responsible for receiving all supporting documentation relating to PVA and P1 transactions. The OA will use a Data Warehouse query (payment document submission) to ensure supporting documentation for all PVA and P1 transactions has been submitted to the OA for filing. SAM II policies and procedures indicate the payment document submission query will be used by the agency and the OA to ensure all original supporting payment documents forwarded by the agency are physically present. In addition, SAM II policies and procedures indicate the OA will do a comprehensive verification of all submitted documents within three business days. If there are any discrepancies the agency will be contacted.

The OA indicated a monthly spot check is performed to verify that supporting documentation has been submitted for several expenditures before the documents are filed. However, not all expenditures are verified. In addition, as of May 2000, the payment document submission query had only been generated through December 1999 for the PVA documents and no review had been performed to ensure agencies submitted P1 documents to the OA. As of August 17, 2000, the payment document submission query had been generated through July 2000. However, the OA was still receiving documents dating back to July 1999. Therefore, it does not appear that a comprehensive verification of all documents is performed by the OA to ensure that all supporting documentation has been received.

SAM II policies and procedures indicate the OA has the primary responsibility of filing and archiving supporting documentation for most financial transactions. In addition, Section 33.060, RSMo 1994, indicates the Commissioner of Administration shall keep all vouchers, documents, and all papers relating to the accounts of the state, and Section 33.150, RSMo 1994, indicates the original of all accounts, vouchers, and documents approved or to be approved be kept by the Commissioner of Administration. Therefore, it is imperative for the OA to develop and follow procedures which will ensure supporting documentation for all expenditures has been submitted to the OA for filing.

**WE RECOMMEND** the Office of Administration develop and follow procedures to ensure supporting documentation for expenditures is received from the agencies and filed accordingly.

#### **AUDITEE'S RESPONSE**

*We concur.*

|                                  |
|----------------------------------|
| <b>4. Internal Control Plans</b> |
|----------------------------------|

Following the implementation of the SAM II system, state agencies were requested to submit an internal control plan to the OA. However, only three state agencies had submitted completed internal control plans as of August 17, 2000.

The instructions for the preparation of an agency internal control plan were distributed to state agencies in April 1999. Originally, internal control plans were to be submitted to the OA by October 1999. However, due to complications and increased workload associated with the implementation of the SAM II system, an extension was granted to January 2000. The OA had not received any internal control plans by January 2000 and extended the deadline to the spring of 2000 without setting an actual date for the submission of the internal control plans.

The state agencies are responsible for preparing the internal control plans and submitting the plans to the OA. The state agencies are also responsible for reviewing and evaluating internal controls on an annual basis and are required to report on the annual review to the

OA. The development of internal control plans by the state agencies will provide assurance that assets are being safeguarded, that applicable statutes, rules and regulations are being followed, and that the objectives of agency management are being met.

**WE RECOMMEND** the Office of Administration require all state agencies to submit internal control plans by a certain date and discontinue extending the deadline.

### **AUDITEE'S RESPONSE**

*We concur. We will meet with agency representatives and establish a workable deadline.*

|  |
|--|
| <b>5. Receivable Document Processing</b> |
|--|

The receivable (RE) document is used to record accounts receivable and interagency billings. In general, receivables are to be recorded in SAM II when the state has the right to an asset (cash) that has not been received.

The processing of an RE document results in a debit to accounts receivable and a credit to revenue. When cash is received for an applicable receivable, the cash receipt (CR) document will reference the RE document number and the system will debit cash and credit accounts receivable.

The RE document is also used to record interagency billings. When a RE document is used to bill another state agency, certain fields in the RE document must be coded correctly to ensure the transaction is accurately recorded. The net effect on cash when processing an RE document correctly for an interagency transaction is zero. A RE document for non-interagency transactions results in a cash increase. To ensure the proper recording of interagency transactions, the prefix IAB was added as the first three digits of the RE document number when processing an interagency billing. In addition to the IAB prefix, interagency revenue source codes were established to distinguish interagency revenue from non-interagency revenues.

Our review noted the following areas of concern:

- A. Users are not following SAM II policies and procedures for processing interagency RE documents. Since the RE document is used to code both interagency and non-interagency transactions, the SAM II system is unable to ensure the IAB prefix is indicated on the RE document for interagency transactions. It is the users responsibility to know when to manually add the IAB prefix and when to use the specified interagency revenue source code. The SAM II system does not provide an edit check to ensure IAB is coded in the first three characters of the document number when an interagency revenue source code is used or ensure an interagency revenue source code is used when IAB is coded in the first three characters of the document number. Without the IAB coding in the first three characters of the

document number, the SAM II system will not recognize the transaction as an interagency transaction and will not record the transaction correctly.

- B. For interagency transactions, the purchasing agency must manually cancel the purchase order generated by the SAM II system instead of being automatically liquidated, as the RE document does not include the purchase order document number. Without manually canceling the purchase order, the purchase order will remain on the SAM II system which causes reporting errors and understates the balance of remaining appropriations.

**WE RECOMMEND** the Office of Administration:

- A. Implement edit checks to ensure that agencies properly code the RE documents when processing interagency transactions by using IAB in the first three characters of the document number and to ensure that agencies use the interagency revenue source code.
- B. Change procedures for interagency transactions so that purchase orders will be liquidated automatically by the SAM II system.

### **AUDITEE'S RESPONSE**

*We have identified a number of problems associated with the interagency billing transactions and are considering elimination of the Cash Receipt Payment (CRP) transaction. We are exploring the possibility of using standard payment voucher transactions for the payment of interagency bills. Such an approach would use vendor information to identify transactions between agencies for financial reporting purposes.*

|  |
|--|
| <b>6. Cash Receipt Payment Document Processing</b> |
|--|

The cash receipt payment (CRP) document was a modification to the SAM II system and is used strictly to record payments for interagency billings. The CRP document is a clone of the SAM II cash receipt (CR) document consisting of the same fields. The CRP document is used to record both revenue and expense information. The CRP document references the interagency billing/invoice (RE) document and also records the expenditure accounting information for the billed/paying agency.

Our review noted the following areas of concern:

- A. Users are not following SAM II policies and procedures for the processing of CRP documents as users are not indicating IAB in the document prefix or entering the interagency bank account code. These two fields distinguish CRP documents from CR documents. Neither the IAB prefix nor the interagency bank account code populate the fields automatically for a CRP document. In addition, the CRP

document will accept any valid object or revenue source code in the SAM II system versus only accepting revenue source codes specific to interagency transactions. The CRP document does not have edit checks to ensure the above information has been entered correctly. Thus, interagency transactions are not being recorded correctly resulting in errors in the accounting records.

- B. In addition, the CRP document will process without referencing a valid RE document. When the CRP document is processed without referencing a valid RE document, the transaction will credit revenues instead of accounts receivables, overstating both revenues and accounts receivables. An edit check should be included on the CRP document to ensure a valid RE document is referenced.

**WE RECOMMEND** the Office of Administration:

- A. Modify the CRP document to populate the prefix IAB and the interagency bank account code automatically to ensure the proper processing of interagency billing transactions. In addition, the modification should ensure only interagency revenue source codes are used on a CRP document.
- B. Design an edit check to ensure a valid RE document is referenced on CRP documents.

### **AUDITEE'S RESPONSE**

*We have identified a number of problems associated with the interagency billing transactions and are considering elimination of the CRP transaction. We are exploring the possibility of using standard payment voucher transactions for the payment of interagency bills. Such an approach would use vendor information to identify transactions between agencies for financial reporting purposes.*

|                                    |
|------------------------------------|
| <b>7. SAM II Access Procedures</b> |
|------------------------------------|

The Office of Administration (OA) controls access to the SAM II system. The OA grants access to the system based on security request forms completed by agency personnel. We noted the following concerns in the state's system security access procedures:

- A. The OA did not instruct the agencies and/or give the agencies any guidance on proper controls and procedures to establish access to the system. As a result, each agency had to establish their own procedures to control access. In addition, the OA did not require agencies to report their procedures to the OA; therefore, the OA does not know if agency procedures are proper and adequate.
- B. The OA did not coordinate the designation by each agency of which employees would serve as the agency's security liaison. For proper control and to be able to

manage security more effectively, each agency should use a designated security liaison. This would help ensure that agency access requests are authorized by a person who is familiar with the various SAM II security profiles. It would also give the OA a list of agency employees to contact to discuss security concerns.

- C. The OA did not require agencies to submit a list of personnel who can authorize security request forms. The OA left it up to each agency to decide who could make these authorizations. In addition, the OA does not have a listing of the individuals designated as authorized signatures. As a result, the OA cannot ensure the access that is being granted by the form was appropriately approved. The OA should review the forms to determine if they are signed by an authorized person.
- D. Although the OA maintains a system that documents security access levels at various times on a historical basis, the OA does not produce any security reports. Without reports, the OA and the agencies cannot effectively manage security profiles assigned to individual users. Each agency, as well as the OA, should review security profiles on a continuing basis. Instead of each agency implementing their own system to track security access levels, it appears it would be more efficient and effective if the OA used the system to generate security access information.
- E. The OA does not review security request forms for reasonableness or to identify incompatible profiles where too much access is granted to an individual. Although each agency may be ultimately responsible for security access, we believe the OA or the SAM II system should have certain controls and procedures at a centralized level to reduce the risk of inappropriate financial activity.

**WE RECOMMEND** the Office of Administration:

- A. Provide appropriate guidance to agencies about system security access.
- B. Require each agency to designate a security liaison.
- C. Help agencies identify appropriate personnel to authorize security request forms, maintain a list of authorized personnel and review the security request forms to ensure they are signed by an authorized person.
- D. Produce security access information for review by the OA and agency personnel.
- E. Review security request forms for inappropriate access.

**AUDITEE'S RESPONSE**

- A. *While we are sure additional instruction would be beneficial, limited resources prevent us from doing more in this area.*

B,C,

&E. *We concur.*

D. *Reports on security are available on a weekly basis now.*

|                           |
|---------------------------|
| <b>8. Reconciliations</b> |
|---------------------------|

The OA did not prepare their monthly financial summary on a timely basis. As of July 2000, the last monthly financial summary completed was October 1999, indicating the OA was eight months behind in preparing the monthly financial summary. As of August 17, 2000, the OA had completed the monthly financial summary through May 2000 demonstrating that the OA has been able to improve on the timeliness of the monthly financial summary in the last few months.

To prepare the monthly financial summary, the OA reconciles SAM II data from the data warehouse to the State Treasurer's Office monthly cash balance report and the SAM II Monthly Fund Cash Activity Report. The OA reconciles the cash balance but also reviews transactions for possible coding errors to ensure transactions were processed properly. The OA has indicated that most problems encountered when reconciling are due to interagency transactions which have been discussed earlier in this report.

Timeliness of monthly reporting is essential to the monitoring of state activities. By not ensuring monthly financial summary reports are prepared on a timely basis, the state's activities cannot be properly monitored.

**WE RECOMMEND** the Office of Administration ensure monthly financial summary reports are completed on a timely basis.

**AUDITEE'S RESPONSE**

*We concur.*

**AUDITOR'S OVERALL COMMENT**

The development and implementation of the SAM II system has been and continues to be a significant and complex project for the State of Missouri and the OA. Because of the importance of the SAM II project, further review of its ongoing implementation and operation is needed. While we realize the resources available to resolve all issues relative to SAM II are limited, we will monitor the implementation of recommendations made in this report to ensure these issues are addressed.

This report is intended for the information of the management of the Office of Administration and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## APPENDICES

## STATEWIDE ADVANTAGE FOR MISSOURI (SAM II) SYSTEM

### APPENDIX I

#### BACKGROUND

During fiscal year 1995, the state began discussing the need to replace the old accounting system (SAM) with a new integrated accounting system. The state decided to purchase a software package from a vendor that would be upgraded periodically. In addition, the State of Missouri wanted an integrated system that would incorporate various areas such as accounting, budget, payroll, procurement, fixed assets, leave accrual, etc.

The state issued a request for proposal to obtain bids for a new accounting system. In April 1997, the state awarded the contract to American Management Systems. On July 1, 1999, SAM II was implemented as the state's accounting system.

As of January 1, 2000, SAM II contracted expenses with the vendor totaled approximately \$29 million, excluding the Missouri Department of Transportation. The SAM II contracted expenses for the Missouri Department of Transportation were approximately \$14 million. In addition, numerous hours were spent by state employees on SAM II but these costs were not identified as SAM II expenditures. Also, some state agencies needed to upgrade their computer equipment for SAM II. However, these computer equipment expenditures were also not specifically identified as SAM II expenditures.

## STATEWIDE ADVANTAGE FOR MISSOURI (SAM II) SYSTEM

### APPENDIX II

#### ANALYSIS OF SURVEY RESPONSES

The purpose of our survey was to obtain information regarding the efficiency and effectiveness of the SAM II system. We distributed a survey on March 23, 2000, to the various state agencies who use the SAM II system. We also requested the agency to forward a copy of the survey to other agency personnel that handled SAM II processing.

We received eighty-one responses to the survey which included multiple responses from some state agencies. The surveys were completed by a wide range of users. For example, some surveys were completed by department executives detailing the experiences of the entire department, other surveys were completed by agency personnel indicating views of their staff, while other surveys were completed by individuals expressing their specific experiences with the SAM II system. The broad scope of survey responses provided us with an extensive review of all facets of the SAM II system. The survey responses provided user perspectives as to the success of the SAM II system, as well as problems the users are encountering.

The following is a summary discussion of specific questions that were included in the survey and some positive and critical comments received regarding the SAM II system.

- **Do the standard reports prepared by SAM II provide the information you need for financial management? If not, please explain.**

There appears to be widespread dissatisfaction with the standard reports generated by the system. As indicated in the following chart, over 69% of the responses indicated the standard reports generated by the SAM II system are not meeting their needs.

The users of the SAM II system have had difficulty obtaining detailed information that is specific to the reporting needs of that user. Some of the reports generated by the SAM II system are in a format that is difficult to understand and therefore, not meaningful to the user. Some responses indicated a few beneficial reports were recently developed. However, comments received from some users indicate improvements are still needed in this area:

There are very few standard reports which provide our office with any useful information. The standard reports are primarily "fund" based. Our agency tracks and monitors expenditures at the appropriation level. There is only one report that provides any useful information at the appropriation level, the A400 report. We need month-end appropriation status information.

So many reports provide only summary information, and the detail is not included. Some reports that provide detail information, provide information by fund rather than our specific appropriation from that fund, therefore giving us all transactions statewide from that particular fund all mixed together, which is of no use to us. We need detail for agency/organization/appropriation to get only our transactions. Every document we input has these fields entered, so it does not make sense that we cannot inquire by these fields as well as get a standard report of detail of expenditures, revenues, transfers, purchase order activity and outstanding encumbrances, fund activity and fund balance based on these fields.

What reports? What we received up until two weeks ago was useless.

Monthly reports received are two feet thick. I trash three-fourths of this stack. The one-fourth retained does not meet balancing needs.

Contrary to the above opinions, some agencies expressed satisfaction with the information provided by the standard reports:

Several of the monthly reports are very useful for fund balancing.

The reports we are currently getting seem to meet our needs, along with the access to the data warehouse.

- **Is your agency using the data warehouse? If so, for what reasons is the data warehouse being used? For example, is the data warehouse being used to generate reports, perform reconciliations, or for other purposes?**

A majority (68.8%) of those responding to the survey indicated they used the data warehouse. However, comments included in the survey responses indicated the data warehouse is difficult to use. In addition, many users indicated they were forced to rely on the data warehouse because the standard reports did not provide them with the information needed.

Some users described the data warehouse as “not user friendly and difficult to use”, while other users described the data warehouse as “the best thing to come out of SAM II”. A few survey responses also indicated the users were discouraged from accessing the data warehouse because of the high cost associated with processing the information in the data warehouse. This financial impact appears to be preventing some agencies from using the data warehouse as the available information resource as originally intended. Some positive comments received include:

We are using the data warehouse to generate reports to monitor expenditures, verify transactions, accumulate data to enter into other systems for cost allocation and grant reporting and to monitor encumbrances. The data warehouse is a positive outcome of SAM II. It has given agency staff the ability to create reports of a detail nature in agency specific format in a timely manner.

We use the data warehouse to generate reports with specific data in formats more easily understood. We find it necessary for financial planning.

Yes, extensively. It is our primary means of providing reports to management.

Some negative comments received include:

We use the data warehouse sparingly. First of all, the training last year was disastrous. We won't be able to use the data warehouse nearly as much as we would like because of the cost.

Initially we used the data warehouse on a very limited basis, and it will rarely be used by this agency in the future due to the excessive cost involved.

Although I have used the data warehouse to a limited extent I was disappointed. The data doesn't seem to be trustworthy and it is cumbersome.

- **Has SAM II reduced or increased time or staff required to process financial transactions? If increased, please explain.**

The implementation of the SAM II system increased the amount of time and/or personnel required to process financial transactions. As indicated in the following chart, over 70% of the responses indicated that using the SAM II system required more time than was previously necessary using the SAM system.

Reasons given for the increased time and/or staff burden were the SAM II system required more information to be entered and uses more on-line documents. In addition, document approval time has increased because each document must be approved individually instead of being able to approve several documents together as a batch. Also, some agencies reported the slow system response time was an extremely frustrating aspect of the SAM II system. Some comments regarding increased time or staff include:

Time has significantly increased. The difficulty and time involved with processing financial transactions has nearly doubled, requiring the addition of a second fiscal employee to accomplish the workload previously accomplished by one. I am concerned with similar impact with the upcoming conversion to the SAM II payroll system.

Our staff of four account clerks has been increased to seven, and we are still experiencing overtime. Entry time increased approximately five-fold. We migrated from a legacy system which had customized entry screens requiring only keyboard entry to entry screens which require use of both keyboard and mouse.

Time has greatly increased. More people are involved in the process. Approvers may spend 2-3 hours a day opening, reviewing, and approving documents. Managers spend more time helping staff modify transactions and working through system problems. More documents must be processed to get the transaction completed.

System response time is still an issue. It's improved, but we still have some instances where it takes five minutes to approve and run a document.

Some survey responses indicated a decrease in the time and/or staff required to process financial transactions while some survey responses indicated the time required to process financial transactions did not change:

SAM II has reduced the time to process financial transactions. The checks are received in much less time.

SAM II has reduced my staff by two positions.

After a period of adjustment, I believe that staff time for processing in SAM II is about the same as it was with the SAM system.

The system has reduced transaction processing time for some documents and expanded the requirement and time on others. In our opinion, we have changed the way we do business, but not saved work effort.

SAM II has neither reduced nor increased staff time. It has reallocated how the time is spent.

- **What problems is your agency having with SAM II?**

The survey responses indicated there were many problems with SAM II. Many users expressed concerns with specific features of the SAM II system which were not operating efficiently; other users identified general areas of the SAM II system where improvements would be beneficial; and other users indicated the SAM II system is operating smoothly and the users are not experiencing any problems. Some of the problems indicated were related to the SAM II reports, data warehouse, and the increase in time and/or staff needed to process documents which have been commented on in other sections of this appendix. Included below are a few comments in response to this question:

The way the object codes are set up makes it very time consuming to find the object code you need. It would be so much better if they could be compiled in area types. I think the vendor codes need to be compiled as there will be the same vendor code except for the last number, making numerous numbers for the same vendor.

The on-line screen views are very limited. It would be better if more data could be seen at once. If this happened, the trail of a transaction could be followed much easier.

The primary problem has been how to access detailed year-to-date financial information to know exactly the status of a particular appropriation, and at the same time prepare reports in the desired format to meet individual needs.

The system is very slow. The data warehouse is slower than SAM II. Error messages received often require telephone calls to determine problems.

The search for commodity codes takes too long and at times nothing satisfactory is found, which leads to the use of a miscellaneous code.

Commodity codes are very detailed and yet hard to find a fairly general description. We need a good listing of tables and what each provides - this listing needs to be in a good area without having to go through gyrations to find it. Access to the policy and procedures manual is not user friendly.

Numerous vendor numbers exist for the same vendor, indicating the same address, telephone number, etc. in the vendor information file. The decision of which vendor number to use is difficult when so many exist.

Our worst problem is that the detailed error messages could still be more informative - or the system needs a place to look up a very detailed synopsis of the error and corrective actions to take.

At this point, our document processing seems to be running smoothly and appears to be very efficient in all areas of the system. However, one item that seems to be a bit tedious is performing modifications to purchasing documents that require the addition of more than six accounting lines on a document.

Currently, we do not have any major issues with SAM II. There are many small issues that could be solved with modifications to the system.

None - I just miss receiving all the SAM reports I used to get.

I'm not having any problems other than those I create for others by making mistakes.

- **On a scale of 1 to 10 with 10 being the best, what is your level of satisfaction with SAM II?**

As indicated in the following chart, a wide range of ratings was reported in response to this question. We calculated the average rating to be 5.74 which appears to be consistent with the comments reported by the SAM II users. Some users indicated a rating which included a decimal; for example 7.5. These ratings were rounded to the nearest whole number for graph presentation purposes. While some users reported positive comments relating to specific SAM II features, there were other users who were critical of the same SAM II features.

It is difficult to implement a system which meets the needs of all users. The following comments reinforce this viewpoint and indicate that while some users are progressing well with the SAM II system, other users are extremely disappointed.

Level of satisfaction is 10 except for the need of paper documentation.

Satisfaction with SAM II would be almost a 9, and when the remaining problems are taken care of, I feel it will be a 10.

The system is not fool proof, but it is better than what we have worked with in my 17 years experience. I rank the system 7.5. I think most of the functional problems present in the first six months have been resolved.

I'd say about a 6. A lot of training/learning issues caused much concern initially. Even though I feel there is much room for improvement, I would not want to go back to the old SAM system.

Overall rating of SAM II is 5. The biggest frustration is getting accurate information out of the system.

Our level of satisfaction rating is a 4. The best thing about SAM II is the payments to vendors have speeded up. At the outset of fiscal year 2000, the rating would have been a negative 1. As we come to the end of the fiscal year, the rating now is about a 3. With additional improvements, the rating may improve to a 5 or 6. From what we have been told and our understanding of the capabilities of the system, we do not feel SAM II will ever reach a 9 or 10 rating.

Our level of satisfaction rating is a 1. We purchased a cheap system and we got a cheap system. The biggest concern of everyone when we started this process several years ago was that any new system would eliminate the problem of having separate stand alone systems to obtain financial information. We were promised that the new system would provide any information we needed. It didn't. This entire system is outdated.

#### **Other Comments:**

Included below are a few other comments from the survey responses. These comments are included to provide a variety of viewpoints relating to the overall satisfaction of users with the SAM II system:

Even though I'm very far behind and still have a lot to learn – I am relatively happy with the system. There are some things much easier and faster and others much harder and slower. It's change.

It's okay, could be better, but could be worse. It takes time. In my position I do lots of jobs, and SAM II could be an entire job in itself. It works, after you get use to all of its quirks, however, it isn't particularly a user friendly system.

The system is too complex, too cumbersome, and too time consuming. There is no reason to take something simple (writing someone a check and adding up the amount you have spent) and make it complex. Unfortunately, I would use less time in keeping track of the money with a pencil and a ledger.

Slow response time is the biggest problem we have with SAM II. The daily challenge of SAM II is that it is slow. SAM II has a tendency to kick a user out without warning. The system downtime is a great inconvenience to work.

Although the SAM II system has many new features, users feel SAM II is more complex and labor intensive. In addition, while users are generally happy with more timely and greater access to on-line information, the users find the standard reports unsatisfactory and the data warehouse difficult to use. Furthermore, some users believe that charging agencies for use of the data warehouse discourages use and decreases the benefits of greater availability of information. While there are many benefits to the new SAM II system, users have identified a few areas where improvements are desired. Based on the survey responses reviewed, some users are satisfied with the SAM II system, while some users are not satisfied.

SIXTH JUDICIAL CIRCUIT

ASSOCIATE DIVISION V

TRAFFIC VIOLATIONS BUREAU

PLATTE COUNTY, MISSOURI

JULY 1, 1999 THROUGH MAY 31, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-128  
December 21, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

The Traffic Violations Bureau of the Sixth Judicial Circuit, Associate Division V, Platte County, Missouri, is responsible for assessing, collecting, and distributing monies in connection with traffic tickets handled by the court.

During June and July 2000, court officials in Platte County identified discrepancies in the court's collection of fines and court costs on a number of traffic cases. On July 24, 2000, the Platte County Circuit Clerk notified the Platte County Sheriff of these discrepancies, reported that a shortage existed, and requested that the matter be investigated. The Platte County Sheriff's Department subsequently contacted the State Auditor's office regarding this situation. Our audit was performed to review these discrepancies and more fully determine the extent of misappropriated court funds.

Between October 1999 and May 2000, payments on at least nine traffic tickets, totaling \$925, were not recorded or deposited. Defendants produced receipt slips issued by the court showing these nine tickets were paid; however, the collections were not recorded or deposited. It appears these monies were misappropriated. Payments on twenty-three additional traffic tickets, totaling \$2,225, also appear to have been misappropriated. Defendants provided verbal or written statements indicating the tickets were paid or there was documentation the tickets were paid in the manual case files, but collections were not recorded in the court's computer system. In addition, payments on a number of other traffic tickets do not appear to have been properly handled and we are continuing to follow-up on these tickets. Documentation in the manual case files of many of these tickets indicate payments may have been made and it is likely that additional monies related to at least some of these tickets were also misappropriated.

Certain procedural or control weaknesses existed in the Traffic Violations Bureau which allowed this misappropriation to occur without being detected on a timely basis.

Owens Lee Hull, Jr. serves as Presiding Judge of the Sixth Judicial Circuit. Gary D. Witt serves as Associate Circuit Judge of Division V, and Sandra Dowd serves as Circuit Clerk. During the period under review, one clerk was primarily responsible for handling the receipt and recording of collections on traffic tickets. On July 21, 2000, this clerk submitted her resignation and also provided a written statement to court officials indicating she was aware some monies were missing from cases.

**Missouri State Auditor**

Presiding Circuit Judge  
and  
Associate Circuit Judge, Division V  
and  
Circuit Clerk  
Sixth Judicial Circuit  
Platte County, Missouri

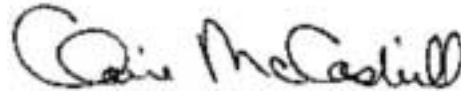

We have audited the traffic tickets and related collections handled by the Traffic Violations Bureau of the Sixth Judicial Circuit, Associate Division V, Platte County, Missouri. The scope of this audit included, but was not limited to, the period of July 1, 1999 through May 31, 2000. The objectives of this audit were to:

1. Investigate discrepancies in the handling of traffic tickets and the related collections, and determine the amount of court funds misappropriated.
2. Review and evaluate certain controls and procedures regarding the collection and processing of monies related to traffic tickets.

Our audit was conducted in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We reviewed the records and procedures of the Traffic Violations Bureau, interviewed court personnel, and examined other records and documents as we considered necessary.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Management Advisory Report presents our findings and recommendations concerning the Traffic Violations Bureau of the Sixth Judicial Circuit, Associate Division V, Platte County, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## EXECUTIVE SUMMARY

SIXTH JUDICIAL CIRCUIT  
ASSOCIATE DIVISION V  
TRAFFIC VIOLATIONS BUREAU  
PLATTE COUNTY, MISSOURI  
EXECUTIVE SUMMARY

Between October 1999 and May 2000, payments on nine tickets, totaling \$925, were not recorded or deposited, but the defendants were able to produce receipt slips issued by the court showing the tickets were paid. Payments on twenty-three additional tickets, totaling \$2,225, were not recorded or deposited, but the defendants either provided verbal or written statements indicating the tickets were paid or there was documentation the tickets were paid in the manual case files. It appears these monies were misappropriated. In addition, payments on a number of other tickets do not appear to have been handled properly and it is likely additional monies related to at least some of these tickets were also misappropriated. The lack of records related to collections recorded on manual receipt slips prevented us from assuring ourselves of the extent of missing monies.

Certain procedural or control weaknesses existed in the Traffic Violations Bureau which allowed this misappropriation to occur without being detected on a timely basis.

Owens Lee Hull, Jr. serves as Presiding Judge of the Sixth Judicial Circuit. Gary D. Witt serves as Associate Circuit Judge of Division V, and Sandra Dowd serves as Circuit Clerk. During the period under review, one clerk was primarily responsible for handling the receipt and recording of collections on traffic tickets. On July 21, 2000, this clerk submitted her resignation and also provided a written statement to court officials indicating she was aware some monies were missing from cases.

## MANAGEMENT ADVISORY REPORT

SIXTH JUDICIAL CIRCUIT  
ASSOCIATE DIVISION V  
TRAFFIC VIOLATIONS BUREAU  
PLATTE COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT

The Traffic Violations Bureau of the Sixth Judicial Circuit, Associate Division V, Platte County, Missouri, is responsible for assessing, collecting, and distributing monies in connection with traffic tickets handled by the court.

During June and July 2000, court officials in Platte County identified discrepancies in the court's collection of fines and court costs on a number of traffic cases. On July 24, 2000, the Platte County Circuit Clerk notified the Platte County Sheriff of these discrepancies, reported that a shortage existed, and requested that the matter be investigated. The Platte County Sheriff's Department subsequently contacted the State Auditor's office regarding this situation. This audit was performed to review these discrepancies and more fully determine the extent of misappropriated court funds.

Following are our comments regarding the misappropriated funds and the accounting controls and procedures over receipts of the Traffic Violations Bureau.

|                                 |
|---------------------------------|
| <b>1. Misappropriated Funds</b> |
|---------------------------------|

Payments on at least nine traffic tickets, totaling \$925, were not recorded or deposited. Defendants produced receipt slips issued by the court showing these nine tickets were paid; however, the collections were not recorded or deposited. It appears these monies were misappropriated. Payments on twenty-three additional traffic tickets, totaling \$2,225, also appear to have been misappropriated. Defendants provided verbal or written statements indicating the tickets were paid or there was documentation the tickets were paid in the manual case files, but collections were not recorded in the court's computer system. In addition, payments on a number of other traffic tickets do not appear to have been properly handled and we are continuing to follow-up on these tickets. Documentation in the manual case files of many of these tickets indicate payments may have been made and it is likely that additional monies related to at least some of these tickets were also misappropriated.

The discrepancies noted above were not detected, or were not detected on a timely basis, due to certain internal control weaknesses which existed (See Management Advisory Report [MAR] No. 2).

Information gathered during our audit has been turned over to the Platte County Sheriff's Department.

**WE RECOMMEND** the Associate Division V Judge and Circuit Clerk work with the various law enforcement authorities regarding any criminal prosecution of this matter and to obtain restitution.

**AUDITEE'S RESPONSE**

*See letter included as an appendix.*

|  |
|--|
| <b>2. Accounting Controls and Procedures</b> |
|--|

- A. Most collections related to traffic tickets are recorded directly into the court's computer system and a computer-generated receipt slip is issued to the payor. However, manual receipt slips were issued to walk-in payors when payments could not be recorded directly into the system. Court personnel indicated this would occur when the computer system was not working, when the court clerk responsible for receipting monies into the system was not present, or when the monies were received after that day's transactions had been closed. These manual receipt slips were single copy receipts given to the payor, and were not prenumbered. No copy or other record of the manual receipt slips which were issued was maintained by the court.

This situation represented a serious control weakness and it appears the monies noted as misappropriated in MAR No. 1 were payments where these manual receipt slips were issued. The lack of records documenting collections recorded on these manual receipt slips prevented us from fully determining the extent of missing monies.

Since the discovery of these discrepancies, procedures have been changed. While manual receipt slips are still issued when payments cannot be recorded directly into the system, the current receipt slips are prenumbered and duplicate receipt slips are maintained and accounted for properly.

- B. It appears improvements are needed in the segregation of duties in the Traffic Violations Bureau. Except for collections received on court dates, one clerk was responsible for collecting and maintaining physical custody of receipts, recording payments into the court's computer system and filing the cases as closed. The clerk had access to the manual case files, the court's court computer system, and she had the ability to change or delete court dates and record case dispositions. In addition, this clerk had the capability of having warrants withdrawn.

To safeguard against possible loss or misuse of funds and to ensure that receipts are properly handled, duties should be segregated to the extent practical. If it is not feasible to segregate duties further, procedures should be established to periodically identify and review any traffic cases that have had no recorded activity or have not been otherwise resolved for an extended period of time.

**WE RECOMMEND** the Circuit Clerk:

- A. Continue to ensure any manual receipt slips issued are prenumbered, duplicate receipt slips are maintained, and that these receipt slips are accounted for properly.
- B. Ensure the duties surrounding the handling of traffic tickets and the related payments are segregated to the extent practical. At a minimum, procedures should be established to periodically identify and review any traffic cases that have had no recorded activity or have not been otherwise resolved for an extended period of time.

**AUDITEE'S RESPONSE**

*See letter included as an appendix.*

This report is intended for the information of the management of the Sixth Judicial Circuit, Associate Division V of Platte County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

ATTENTION: Greg Slinkard

RE: Audit Report regarding audit of traffic department, Platte County, Missouri,  
July 1, 1999 through May 31, 2000

Dear Mr. Slinkard:

Having reviewed the management advisory report portion of the above-reference report, the Platte County Circuit Court and Circuit Clerk make the following response to paragraphs A and B set forth therein:

Manual receipting with regard to payment of traffic tickets became an absolute necessity as a result of the entire Platte County Court system and Circuit Clerk's Office undergoing a computer conversion between approximately October, 1999 and late December, 1999. There were lengthy "down times" for the entire computer system, i.e., the system would be up for an hour and then down for the rest of the day, and there were literally days when the system was of no use and could not be used for any purpose.

Manual receipt slips are still used when payments cannot be recorded directly with the system for whatever reason, but they are pre-numbered, and duplicate receipts are kept in a separate record which is not available to the traffic violations bureau.

Segregation of receipting collections, recording receipts, and maintaining case records in the traffic department, as suggested by the audit report, is not possible, feasible, nor practical because of limited personnel, required vacation time, sick leave, and staff turnover. All traffic personnel are cross-trained with regard to the various duties of the traffic violations bureau and

all circuit clerk and court personnel need access to the physical traffic files and to the traffic record maintained within the computer system. It is often necessary that various circuit clerk personnel access traffic files to provide attorneys, the public, judges, and law enforcement personnel with court date information. It may be necessary that cases be continued and court personnel must memorialize court action on the files and in the computer, and record the final disposition of the cases.

In the year 1999, there were 12,941 traffic cases filed, which is an average of 1,078 filings per month. In order for cases to be processed as expeditiously as possible, all traffic personnel, including other court personnel, have access to these files. We do not have a "secure room" or "secure, locked file system" to limit access to case files, nor do we have enough personnel to accomplish this type of segregation.

The Circuit Clerk's Office does a daily reconciliation of traffic payments and deposits and that duty is performed by a clerk who is independent of the collection function.

Every six (6) months, a computer run will be made of traffic cases that have had no recorded activity or otherwise been resolved within that period of time, and said cases will be docketed and reviewed by the Court and Circuit Clerk. This process was previously used but delayed because of computer conversion.

The Circuit Court and Circuit Clerk and related personnel have provided access and all relevant information to law enforcement authorities and audit officials since the institution of this investigation, and will continue to cooperate with regard to any criminal, civil or other legal proceeding that may be necessary. The Court and Clerk appreciate the help and assistance of the Missouri State Auditor's Office and that of the Platte County Sheriff's Department.

CITY OF NAYLOR, MISSOURI

YEAR ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-127  
December 20, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Naylor, Missouri.**

In April 2000, the city paid a total of \$1,450 in severance pay to the former City Clerk and Chief of Police upon their resignation. This appears to represent additional compensation for services previously rendered, and as such, is in violation of the Missouri Constitution.

The city paid \$2,400 to the former Police Chief for the lease of law enforcement equipment during the year ended December 31, 1999 and \$1,374 to a service garage owned by an alderman for repair and maintenance services on city vehicles in July 1998. The equipment rental and the garage services were not competitively bid. The former City Clerk indicated the city did obtain price quotes on the equipment rental; however, no documentation could be located.

Personal interests in business matters of the city create the appearance of conflicts of interest and a lack of independence that could harm public confidence in the mayor and board and reduce their effectiveness. State law prohibits financial transactions between the city and an officer or employee (or spouse, dependent child, or business and corporate interest of the officer or employee) that involve \$500 per transaction or \$1,500 per year unless there had been public notice to solicit proposals and (except for real property) competitive bidding, provided that the bid or offer was the lowest received.

The city pays wage and fringe benefit expenses from the general, water, sewer, and street funds. Records were not available to support the amounts charged to each of these funds.

Salaries of city officials and employees have not been established by ordinance. State law requires the Board of Aldermen to fix the salaries of all city officials and employees by ordinance.

The city exceeded the budgeted disbursement amounts in various funds during the year ended December 31, 1999, such as the General Fund by approximately \$30,000 and the Water Fund by approximately \$13,000. State law requires political subdivisions to keep disbursements within amounts budgeted or adopt a resolution setting forth the budget increase and the facts and reasons for such.

The Board of Aldermen does not review and approve the payment of city expenditures prior to the disbursements being made. In addition, supporting documentation was not maintained for some disbursements.

(over)

YELLOW SHEET

The city received federal assistance from the U.S. Department of Justice under the COPS FAST program to increase the number of law enforcement officers. The City Clerk is responsible for filing quarterly report/reimbursement request for the COPS FAST program. The City Clerk calculated the amounts for reimbursement; however, she did not retain documentation of her calculations or copies of the reports.

The City Collector does not prepare monthly or annual reports of tax collections and delinquent taxes. State law requires the City Collector to make annual reports of tax collections and delinquent taxes.

The minutes of the meetings of the Board of Aldermen did not contain some information required by statute. There were numerous instances where the minutes indicated a motion had passed, but did not indicate the number of votes for and against. Also, the board regularly conducts closed meetings. Minutes were not prepared to document the matters discussed in closed meetings, and board minutes did not always indicate the reasons for closing the meetings.

The duties of receiving, recording, and depositing court receipts are not adequately segregated. The City/Court Clerk performs all the duties related to the collection, deposit, and recording of fines, court costs, and bonds. Receipt slips are not issued for some monies received by mail. The composition of receipt slips issued is not reconciled to bank deposits. Also, various records related to the receipt of court monies could not be located for the period reviewed. In addition, data related to tickets issued was deleted from the computer without copies of the information being retained.

There is no independent oversight or adequate segregation of duties related to the city's utility system. The Utilities Secretary performs all functions related to generating monthly utility bills, receipting, recording, and depositing utility payments, and making credit adjustments.

The city has not prepared and maintained permanent, detailed property records for general fixed assets, including the cost of land, buildings, equipment, and furniture owned by the city. In addition, it has not prepared and maintained permanent, detailed property records for the water and sewer system. Also, annual physical inventories are not performed.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
And  
Board of Aldermen  
City of Naylor  
Naylor, Missouri 63953

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Naylor, Missouri. Our audit of the city included, but was not limited to, the year ended December 31, 1999. The objectives of this audit were to:

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

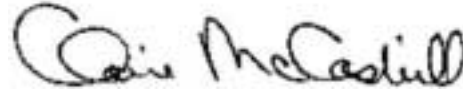

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Naylor, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

July 28, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF NAYLOR, MISSOURI HISTORY AND ORGANIZATION

The City of Naylor is located in Ripley County. The city was incorporated in 1905 as a fourth-class city. The population of the city in 1990 was 620.

The city government consists of a mayor and four-member board of aldermen. The four members are elected for two-year terms. The mayor is elected for a two year term, presides over the board of aldermen, and votes only in case of a tie. The Mayor, Board of Aldermen, and other principal officials at December 31, 1999, were:

| Elected Officials                      | Term Expires | Actual Compensation<br>for the Year Ended<br>December 31, 1999 |
|--|--------------|--|
| James E. Price, Mayor (1)              | April, 2000  | \$ 300   |
| Bernard Allen, Alderman (2)            | April, 2000  | 180  |
| Eugene Jackson, Alderman (3)           | April, 2000  | 180  |
| Max Day, Alderman                      | April, 2001  | 120  |
| Frank Rigdon, Alderman                 | April, 2001  | 120  |
| <br>Other Principal Officials          |              |  |
| Tina George, City/Court Clerk (4)      |              | \$ 16,950  |
| Betty Gilbert, City Collector (5)      |              | 1,737  |
| David Kimbrough, City Treasurer (6)    |              | 600  |
| David George, Chief of Police (7)      |              | 18,000   |
| Don Young, Water/Street Superintendent |              | 21,120   |
| Ben Morrison, Sewer Superintendent     |              | 9,600  |
| Judy Wyatt, Utilities Secretary (8)    |              | 12,600   |

- (1) Darla Powell was elected Mayor in April 2000.
- (2) Brad Davis was elected in April 2000 to fill this seat.
- (3) Roy Dawes was elected in April 2000 to fill this seat.
- (4) Tina George resigned as City Clerk in April 2000 and was replaced by Roberta Carter. Roberta Carter resigned in August 2000 and was replaced by Sandra Sams. Sandra Sams resigned in October 2000 and was replaced by Katina Taylor.
- (5) Betty Gilbert resigned as City Collector in April 2000 and was replaced by Kim Jones. Kim Jones resigned in October. The Chief of Police will now serve as City Collector.

- (6) David Kimbrough resigned as City Treasurer in April 2000 and was replaced by Sheila Sullivan. Sheila Sullivan resigned in October 2000 and was replaced by Peggy McElhaney.
- (7) David George resigned as Chief of Police in April 2000 and was replaced by Charles Mays in July 2000.
- (8) Judy Wyatt resigned as Utilities Secretary in September 2000 and was replaced by Kim Jones in October 2000.

The city employed approximately nine full and part-time employees at December 31, 1999. In April 2000, the city disbanded the police department, reducing the number to seven.

Assessed valuation and tax rate information for 1999 were as follows:

ASSESSED VALUATION

|                   |    |                         |
|-------------------|----|-------------------------|
| Real Estate       | \$ | 1,348,910               |
| Personal Property |    | <u>476,975</u>          |
| Total             | \$ | <u><u>1,825,885</u></u> |

TAX RATES PER \$100 ASSESSED VALUATION

|              |    |     |
|--------------|----|-----|
| General Fund | \$ | .67 |
|--------------|----|-----|

A summary of the financial activity of the city of Naylor for the year ended December 31, 1999, is presented below:

|                                     | General<br>Fund | Collector's<br>Fund | Fire<br>Fund | Clutter's<br>Museum<br>Fund | Police<br>Training<br>Fund | Sewer<br>Fund | Sewer<br>Depreciation<br>Fund | Street<br>Fund | Water<br>Fund | Water<br>Depreciation<br>Fund | Municipal<br>Court<br>Fund |

## MANAGEMENT ADVISORY REPORT

CITY OF NAYLOR, MISSOURI  
SUMMARY OF FINDINGS

1. Expenditures and Related Items (pages 10-11)

Some questionable transactions were noted between the city and various city officials. Improvements are needed regarding payment procedures. The Board of Aldermen does not review and approve the payment of city expenditures prior to the disbursements being made. Supporting documentation is not maintained for some disbursements made by the city.

2. Budgetary Practices and Financial Reporting (pages 12-13)

Improvements are needed in the city's budget documents and procedures. The city exceeded the budgeted disbursement amounts in various funds. The city publishes a semi-annual financial statement; however, the receipts and disbursements published were not complete and/or accurate.

3. Property Tax Procedures (pages 13-14)

The City Collector does not prepare monthly or annual reports of tax collections and delinquent taxes. Improvements are needed regarding the collector's accounting procedures.

4. Water and Sewer System Procedures (pages 15-16)

Improvements are needed regarding the city utility's accounting procedures. Accounting and bookkeeping duties are not adequately segregated. The city does not perform monthly reconciliations of total amounts billed, payments received, and amounts remaining unpaid for water and sewer services.

5. Fixed Assets (pages 16-17)

The city does not maintain fixed asset records for city property. The city does not perform annual physical inventories of all city property.

6. Payroll Procedures (pages 17-18)

Salaries of city officials and employees have not been set by ordinance. The city pays wage and fringe benefit expenses from various funds and no documentation is available to support the method of allocation used. The city paid severance pay to the former City Clerk and Chief of Police upon their resignation.

7. Community Oriented Policing Services (COPS) Grant (pages 18)

No supporting documentation of the calculations used to prepare the quarterly financial reports for the Community Oriented Policing Services Grant (COPS), were retained by the city.

8. Minutes (pages 19)

The minutes of meetings of the Board of Aldermen did not contain some information required by statute. Minutes were not prepared to document the matters discussed in closed meetings, and did not always indicate the reasons for closing the meetings.

9. Municipal Court (pages 19-21)

Accounting and bookkeeping duties are not adequately segregated. Improvements are need in the city's municipal division's accounting documents and procedures. Various records related to the receipt of court monies could not be located for the period reviewed.

CITY OF NAYLOR, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                                       |
|-----------|---------------------------------------|
| <b>1.</b> | <b>Expenditures and Related Items</b> |
|-----------|---------------------------------------|

- A. The city paid \$2,400 to the former Police Chief for the lease of law enforcement equipment during the year ended December 31, 1999 and \$1,374 to a service garage owned by an aldermen for repair and maintenance services on city vehicles in July 1998. In addition, the city made several other small payments to this garage during 1998 and 1999. The equipment rental and the garage services were not competitively bid. The former City Clerk indicated the city did obtain price quotes on the equipment rental; however, no documentation could be located.

Officers and agents of a city serve in a fiduciary capacity. Personal interests in business matters of the city create the appearance of conflicts of interest and a lack of independence that could harm public confidence in the mayor and board and reduce their effectiveness.

Section 105.454 RSMo, 1994, prohibited financial transactions between the city and an officer or employee (or spouse, dependent child, or business and corporate interest of the officer or employee) that involved more than \$500 per year unless there had been public notice to solicit proposals and (except for real property) competitive bidding, provided that the bid or offer was the lowest received. In 1998, this threshold was changed to \$500 per transaction or \$1,500 per year with Section 105.454, RSMo Cum. Supp. 1999.

To reduce the appearance of conflict of interest and to ensure full compliance with state and city law, the city should bid all services provided by city officials and employees, and particularly where it is possible the payments may exceed \$500 per year. The Board should also consider establishing an ordinance which addresses these types of situations and provides a code of conduct for city officials.

In addition, payments to the Chief were not included on either an IRS 1099-Misc form or a W-2 tax form.

- B. The Board of Aldermen does not review and approve the payment of city expenditures prior to the disbursements being made. In addition, although there is an occasional reference to a specific invoice being approved for payment, the board minutes usually only make a general reference that invoices are being approved for payment. A financial report is prepared monthly by the City Clerk which includes a detailed listing of all expenditures by fund; however, the expenditures represent the preceding month's activities.

Expenditures made from city funds should be reviewed and approved by the Board of Aldermen before payment is made to ensure all disbursements represent valid operating costs of the city. In addition, to adequately document the board's review and approval of all disbursements, a complete and detailed listing of bills should be prepared, signed or initialed by the aldermen to denote their approval, and retained with the official minutes.

- C. Supporting documentation was not maintained for some disbursements made by the city. Various payments for professional services had no invoice or other documentation to support the payments. In addition, other invoices were not adequately detailed to support the work performed.

All disbursements should be supported by paid receipts and/or complete vendor-provided invoices to ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds. The city should require detailed invoices for all services which include the number of hours worked by day, the work performed, and the hourly rate charged. Finally, the city should require that reimbursement requests include the date, purpose, and amount of the reimbursement.

**WE RECOMMEND** the Board of Aldermen:

- A. More closely examine future city transactions to identify and avoid apparent and actual conflicts of interests and carefully review all transactions with city officials and establish procedures to ensure all services obtained from city officials are properly bid in accordance with state law. In addition, the Board should ensure proper withholdings are made and compensation is reported to the IRS, as appropriate.
- B. Review and approve the expenditure of city funds prior to the disbursements being made. In addition, the approval of disbursements should be adequately documented by including a listing of all approved disbursements in the board minutes.
- C. Ensure all disbursements are supported by paid receipts and/or vendor provided invoices which contain an adequate description of the goods or services rendered.

**AUDITEE'S RESPONSE**

- A. *This recommendation has been implemented.*
- B. *This recommendation has been implemented. A list of itemized bills is presented to the Board for approval.*
- C. *This recommendation has been implemented.*

**2.****Budgetary Practices and Financial Reporting**

- A. The budgets for the years ended December 31, 1999 and December 31, 2000 did not include budget messages, comparative statements of actual or estimated receipts and disbursements for the two previous years, or the beginning and projected ending cash balances for any of the funds budgeted. Section 67.010, RSMo 1994, requires the preparation of an annual budget which shall present a complete financial plan for the ensuing budget year.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual disbursements. A complete budget should include separate receipt and disbursement estimations, and include the beginning available resources and a reasonable estimate of the ending available resources. The budget should also include a budget message and comparisons of actual receipts and disbursements for the two preceding years.

- B. The city exceeded the budgeted disbursement amounts in various funds during the year ended December 31, 1999, as follows:

| <u>Fund</u>           | <u>Year Ended<br/>December 31, 1999</u> |
|-----------------------|---|
| General Fund          | \$ 30,827                               |
| Water Fund            | 13,272                                  |
| Sewer Fund            | 3,868                                   |
| Clutter's Museum Fund | 122                                     |

Section 67.040, RSMo 1994, requires political subdivisions to keep disbursements within amounts budgeted. If there are valid reasons which necessitate excess disbursements, a resolution should be adopted by the governing body setting forth the amount of the budget increase and the facts and reasons for such.

- C. Section 79.160, RSMo 1994, requires the Board of Aldermen to semiannually publish a full and detailed statement of the receipts, expenditures, and indebtedness of the city, in a newspaper in the city. However, the receipts and disbursements published for the year ended December 31, 1999, did not agree to the city's accounting records. It appears the city's financial statements were published before all transactions had been recorded to its accounting records.

Accurate and complete semiannual published financial statements are necessary to comply with state law and to keep the citizens informed of the financial activity and condition of the city.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare budgets that contain all information as required by state law.
- B. Ensure expenditures are kept within budgeted amounts. If it is necessary to incur additional expenditures, a resolution setting forth the increase and reasons for such should be adopted.
- C. Publish complete and accurate semiannual financial statements for all city funds as required by state law.

**AUDITEE'S RESPONSE**

- A. *We have hired Kraft, Miles, and Tatum to aid in this matter.*
- B. *This recommendation has been implemented.*
- C. *This will be done by Kraft, Miles, and Tatum in the future.*

|                                   |
|-----------------------------------|
| <b>3. Property Tax Procedures</b> |
|-----------------------------------|

- A. The City Collector does not prepare monthly or annual reports of tax collections and delinquent taxes. Sections 79.310 and 94.320, RSMo 1994, require the City Collector to make annual reports of tax collections and delinquent taxes.

Sections 79.310, 94.320, and 94.330, RSMo 1994, require the city collector to prepare monthly and annual reports to the board of aldermen of the amount of taxes collected and to prepare annual lists of delinquent taxes including a detailed list of persons who have not paid. The board is to examine and approve the reports and charge the City Collector to collect the amount of delinquent taxes due.

Detailed annual reports which comply with state law and are classified by type of tax would help provide assurance taxes have been properly collected, written off, or determined to be delinquent. Such a report would summarize all taxes charged to the City Collector, monthly collections, delinquent credits, abatements, and additions. Without such a report, examined by the Board of Aldermen, any errors or irregularities that might occur are likely to go undetected.

- B. The city receives cash and checks for the payment of property taxes. The tax bills which accompany the payment serve as the town's record of receipt; however, the method of payment (cash, check, money order, etc.) is not noted on the tax bills.

To ensure proper handling and safeguarding of town monies, the method of payment should be indicated on the tax bills and the composition of receipts reconciled to the bank deposits.

- C. Throughout most of the year, the City Clerk performs all accounting and record keeping duties regarding the city's property tax system and essentially serves as the City Collector during this time. While the Board of Aldermen has appointed a City Collector, it appears the individual is not involved in the accounting, collection, or record keeping of property taxes during most of the year. The City Clerk collects the receipts, maintains receipt and disbursement records, and makes bank deposits.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded.

If duties cannot be adequately segregated, the board should ensure an independent review of the functions performed by the City Clerk is performed on a periodic basis. This review should include, but not necessarily be limited to, someone other than the City Clerk reviewing the cancelled checks, bank statements, bank reconciliations, and comparing recorded receipts to bank deposits.

**WE RECOMMEND** the Board of Aldermen:

- A. Require the City Collector to prepare and maintain detailed monthly and annual reports of taxes collected and delinquent taxes. In addition, the reports should be reviewed and approved by the Board of Aldermen.
- B. Require the City Collector to record the method of payment on the corresponding tax bills received and reconcile the composition of receipts to bank deposits.
- C. Segregate the duties of receipting and depositing monies from that of preparing bills and recording payments. If proper segregation cannot be achieved, at a minimum, there should be an independent review of the reconciliations between tax payments deposited and recorded.

**AUDITEE'S RESPONSE**

*These recommendations will be implemented immediately.*

The city operates a water and sewage system that provides services to city residents. Meters are read by a city employee around the nineteenth or twentieth of each month, customers are billed on the last day of the month, and payments are due by the fifteenth of the subsequent month. Also included in the billings are charges for trash collection services for participating customers. Our review of the city's billing and collections records and procedures revealed the following concerns:

- A.1. Checks and money orders received are not restrictively endorsed until the deposit is prepared. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- 2. The method of payment received (cash, check, money order, etc.) is not indicated on the water and sewer receipts. To ensure receipts are accounted for properly and transmitted intact, the method of payment should be recorded on the receipt records. The composition of receipts should be reconciled to the composition of deposits.
- B. There is no independent oversight or adequate segregation of duties related to the city's utility system. The Utilities Secretary performs all functions related to generating monthly utility bills, receipting, recording, and depositing utility payments, and making credit adjustments.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receipting and depositing monies from that of preparing bills, recording payments, and following up on delinquent accounts. If a proper segregation of duties cannot be achieved, at a minimum, there should be an independent review of the reconciliations between utility payments recorded and deposits, and an independent review and approval of credit adjustments and delinquent account follow-up.

- C. The city does not perform monthly reconciliations of total amounts billed, payments received, and amounts remaining unpaid for water and sewer services.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and any errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliation should be retained to support conclusions and any corrections made, and to facilitate independent reviews.

**WE RECOMMEND** the Board of Aldermen:

- A.1. Ensure checks and money orders are restrictively endorsed immediately upon receipt.
- 2. Require the method of payment be recorded on the utility bill stub and reconcile the composition of receipts to bank deposits.
- B. Segregate the duties of receipting and depositing monies from that of preparing bills and recording payments. If proper segregation of duties cannot be achieved, at a minimum, there should be an independent review of the reconciliations between utility payments deposited and recorded, and an independent review of and approval for credit adjustments.
- C. Prepare monthly reconciliations of the amounts billed to amounts collected and delinquent accounts.

**AUDITEE'S RESPONSE**

- A.1. *This recommendation will be implemented immediately.*
- 2. *This recommendation has been implemented.*
- B. *This recommendation has been implemented. The City Clerk now reconciles the composition of utility deposits.*
- C. *This recommendation will be implemented within the next few months.*

|                        |
|------------------------|
| <b>5. Fixed Assets</b> |
|------------------------|

The city has not prepared and maintained permanent, detailed property records for general fixed assets, including the cost of land, buildings, equipment, and furniture owned by the city. In addition, it has not prepared and maintained permanent, detailed property records for the water and sewer system. Also, annual physical inventories are not performed.

Property records for general fixed assets are necessary to ensure accountability for all items purchased and owned and for determining the proper amount of insurance coverage.

To develop appropriate records and procedures for general fixed assets, the city needs to undertake a comprehensive review of all property owned by the city. Assets should be counted, tagged for specific identification, and recorded by description and serial number in a detailed property ledger at historical cost or estimated historical cost if the original cost is not available. The city should properly record all fixed asset transactions, and ensure the accuracy of the recorded fixed assets. Periodically, the city should take physical counts of its assets and compare to the detailed records.

**WE RECOMMEND** the Board of Aldermen establish property records for general fixed assets and the fixed assets of the water and sewer system that include all pertinent information for each asset, such as tag number, description, cost, acquisition date, location, and subsequent disposition. In addition, annual physical inventories should be performed.

**AUDITEE'S RESPONSE**

*This recommendation will be implemented within the next few months.*

|                              |
|------------------------------|
| <b>6. Payroll Procedures</b> |
|------------------------------|

- A. Salaries of city officials and employees have not been established by ordinance. Section 79.270, RSMo 1994, requires the Board of Aldermen to fix the salaries of all city officials and employees by ordinance.
- B. The city pays wage and fringe benefit expenses from the general, water, sewer, and street funds. The former City Clerk indicated that she allocates wages based on which funds have monies. Records were not available to support the amounts charged to each of these funds.

Time sheets are prepared by all employees, indicating the total hours worked. However, no documentation is maintained to separately indicate the number of hours related to streets, water and sewer, or other activities.

It is essential that the city properly allocate expenses to various funds. This information is needed for the city to properly establish the user charges for the utilities and to ensure compliance with laws restricting the use of certain revenues.

- C. In April 2000, the city paid a total of \$1,450 in severance pay to the former City Clerk and Chief of Police upon their resignation. This appears to represent additional compensation for services previously rendered and, as such, is in violation of Article III, Section 39 of the Missouri Constitution and contrary to Attorney General's Opinion No. 72, 1955 to Pray, which states "...a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered".

**WE RECOMMEND** the Board of Aldermen:

- A. Fix the salaries of all city officials and employees by ordinance.
- B. Ensure all salary expenses allocated to the various funds are reasonable and are supported by adequate documentation.

- C. Discontinue paying severance pay to city officials.

**AUDITEE'S RESPONSE**

- A. *This recommendation will be implemented immediately.*
- B. *This recommendation is being implemented.*
- C. *We agree with this recommendation. This practice has been discontinued.*

|   |
|---|
| <b>7. Community Oriented Policing Services (COPS) Grant</b> |
|---|

The city received federal assistance from the U.S. Department of Justice under the COPS FAST program to increase the number of law enforcement officers. In December 1995, the city received a grant award of \$42,142 for one full-time officer. In addition, the city received a supplement to this grant in May 1998 for an additional full-time officer and one part-time officer which increased the number of city officers to three (including the Police Chief). Under the grant provisions, the city was required to provide 25% of the cost of employing the additional officers for the first year of the grant, 30 percent for the second year, and 40 percent for the third year leading to 100 percent funding when the grant expires.

The City Clerk is responsible for filing quarterly report/reimbursement request for the COPS Fast Program. The reports were completed and submitted to the Department of Justice electronically via the Phone Activated Paperless Request System (PAPRS). The City Clerk calculated the amounts for reimbursement; however, she did not retain documentation of her calculations or copies of the reports.

To ensure grant funds are properly requested and information is correctly reported to federal programs, the city should ensure expenditures, local match provided, and other data reported on the grant reports/reimbursement requests are accurate, complete, and made in accordance with grant guidelines. In addition, copies of the reimbursement requests should be retained by the city.

**WE RECOMMEND** the Board of Aldermen work with the appropriate officials to ensure adequate documentation is maintained to support grant reports/reimbursement requests required to be filed with the grantor agency and that copies of the reports are retained by the city.

**AUDITEE'S RESPONSE**

*This grant has been discontinued at the advice of the federal government. We will attempt to maintain better documentation for future grants.*

**8.****Minutes**

- A. The minutes of the meetings of the Board of Aldermen did not contain some information required by statute. There were numerous instances where the minutes indicated a motion had passed, but did not indicate the number of votes for and against.

Section 610.020, RSMo, states that the minutes shall include the date, time, place, members present, members absent, and a record of votes taken. Complete and accurate minutes provide an official record of board actions and decisions.

- B. The board regularly conducts closed meetings. Minutes were not prepared to document the matters discussed in closed meetings, and board minutes did not always indicate the reasons for closing the meetings.

Section 610.021, RSMo, allows the board to close meetings to the extent the meetings relate to certain specified subjects, including litigation, real estate transactions, and personnel issues. Section 610.022, RSMo, requires a closed meeting, record, or vote be held only for the specific reasons announced publicly at an open session. This law provides that public governmental bodies shall not discuss other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote.

Without the preparation of closed minutes, there is less evidence that the provisions of the Sunshine Law, Chapter 610, RSMo, regarding these closed meetings, have been followed.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure minutes include all information required by statute.
- B. Ensure minutes are prepared for all closed meetings, and the reasons for closing the meeting are documented in the board minutes as required by law.

**AUDITEE'S RESPONSE**

*These recommendations have been implemented.*

**9.****Municipal Court**

- A. The duties of receiving, recording, and depositing court receipts are not adequately segregated. The City/Court Clerk performs all the duties related to the collection, deposit, and recording of fines, court costs, and bonds. There is not an independent

reconciliation between receipts and deposits. In addition, there is no supervisory review performed of the City/Court Clerk's functions by an independent person.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing court monies from that of recording receipts. If proper segregating of duties cannot be achieved, at a minimum there should be a supervisory review of the reconciliations between receipts and deposits.

- B. Our review noted the following concerns related to receipts:
  - 1) Receipt slips are not issued for some monies received by mail. To adequately account for all receipts and to ensure all receipts are deposited intact, receipt slips should be issued for all monies received, and the numerical sequence of receipt slips should be accounted for properly.
  - 2) The composition of receipt slips issued is not reconciled to bank deposits. To ensure receipts are deposited intact, the composition of receipt slips issued should be reconciled to the composition of bank deposits.
- C. Various records related to the receipt of court monies could not be located for the period reviewed. Receipt books were not kept to account for the sequence of receipts. In addition, data related to tickets issued was deleted from the computer without copies of the information being retained.

Supreme Court Administrative Rule 8 requires that all financial records be maintained for five years or upon completion of an audit. Retention of applicable records is necessary to properly account for all court monies received.

**WE RECOMMEND** the City of Naylor Municipal Division:

- A. Adequately segregate the duties of receiving, recording, and depositing court monies. At a minimum there should be a documented periodic review of the municipal division records by an independent person.
- B. Issue receipt slips for all monies received and reconcile total cash, checks, and money orders received to bank deposits.
- C. Retain all court records in accordance with Supreme Court Administrative Rule 8.

**AUDITEE'S RESPONSE**

*The municipal division has been discontinued.*

This report is intended for the information of the city's management and other applicable officials. However, this report is a matter of public record and its distribution is not limited.

CITY OF LA PLATA, MISSOURI

YEAR ENDED JUNE 30, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-126  
December 20, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**The following problems were discovered as a result of an audit conducted by our office of the City of La Plata, Missouri.**

---

The city relies heavily upon utility and refuse funds to subsidize the city's General, Dispatch, and Library funds. The city operates the General, Dispatch, and Library funds with deficit cash balances throughout the fiscal year, and then transfers utilities and refuse monies, as well as general sales tax revenues, to these funds at the end of the year. These transfers are usually recorded after the city's independent audit is completed.

The Electric, Water and Sewer, and Refuse funds are separate accounting entities designed to account for specific city activities. Utility and refuse revenues should be used to fund the operations of the respective utility and refuse services only. The existing utility and refuse rate structure has allowed the city to, in effect, levy additional taxes without a vote of the citizens. It appears the city has established higher than necessary utility and refuse rate structures in lieu of increasing general revenues or reducing services provided by the city. Without the continued subsidies from utility and refuse funds, the General, Dispatch, and Library funds would be in poor financial condition.

Although the General Fund generally maintains a large negative balance in the city's checking account, some General Fund monies are held in passbook savings accounts, one for the future purchase of a fire truck and the other for monies collected from the city's soda machines. The balances in the accounts at June 30, 2000, were approximately \$25,000 for the fire truck and approximately \$1,900 from the soda machines. Considering the large negative balances of the General Fund in the city's checking account, the board should consider using the monies in the passbook accounts to pay current obligations.

State law prohibits municipalities from budgeting a deficit balance. The city's budgeted disbursements for the year ended June 30, 2000, exceeded available resources by more than \$289,000, \$60,000, and \$8,700, for the General Fund, Dispatch Fund, and Library Fund, respectively. This resulted in budgeted deficit fund balances for these funds. In addition, the city's budget for the year 2001, ending June 30, includes disbursements that exceeded available resources for these funds.

City library monies are held in the custody of both the city and the Library Board. The city has custody of the library's property taxes, interest, grant receipts, operating revenues, and subsidies from other city funds. The Library Board only has custody of donations and memorial contributions received. There is no written agreement between the city and the Library Board to outline the responsibilities of each party. State law indicates all monies

(over)

YELLOW SHEET

received by the city for a city library shall be disbursed to the library board treasurer monthly and city library boards shall have exclusive control of the expenditure of library monies. If the city continues to provide certain accounting and other services to the Library Board, there should be a written agreement which describes the responsibilities of each party.

The city owns a fire station which is occupied by both the La Plata Volunteer Fire Department (LVFD) and the La Plata Rural Fire Protection Association (LRFPA). Other than a building rental agreement between the city and the LRFPA, there are no written agreements between the city and these entities which outline the rights and responsibilities of each party, and as a result, the city has little assurance that city monies and assets are only used to provide fire protection services to city residents. From July 1999 through May 2000, LRFPA and LVFD responded to 37 calls within the city limits and 42 calls outside the city limits. There have been no formal studies regarding the percentage of services provided to city and non-city residents, and other than the building rental agreement, the cost allocations between the city and these entities are based on informal verbal agreements.

The city of La Plata owns the land on which the city cemetery is located. The city allows the La Plata Cemetery Association (LCA) to maintain custody of all monies received for the preservation, care, upkeep, and adornment of the city cemetery, including money received from the sale of cemetery lots, and to make all decisions regarding the use of these monies. However, the city has not entered into a written agreement with the cemetery association defining the rights and responsibilities of each entity, and has not established procedures to ensure the LCA is in compliance with statutory requirements regarding the investment and use of cemetery monies. The city does not require the LCA to be audited or to provide financial reports to the board on a regular basis.

The city owns a golf course and a lake which are operated under the authority of the Park and Recreation Board. Board minutes were not retained for meetings prior to January 24, 2000. In addition, board minutes were not signed. Also, golf course receipts are transmitted to the city approximately once a week and receipts are not always kept in a secure location. Prior to transmittal, some receipts are kept in an unlocked box in an unlocked drawer. Weekly transmittal amounts for the month of June 2000 ranged from \$2,767 to \$5,735.

The city does not have a formal bidding policy. The decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Although it appears the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained for the purchases of a truck (\$23,350), water pipe (\$13,779), and water meters (\$11,463).

The Police Chief and City Collector accrue personal days, vacation leave, and sick leave. The city pays these elected officials for unused leave when they leave office. Annual salaries of city elected officials are set under state law and city ordinance. State law does not authorize compensated leave for elected officials. In addition, the city is not consistently following its leave accumulation policy. Some employees were allowed to exceed the maximum accumulations.

The duties of receiving, recording, reconciling, and depositing monies are not adequately segregated. The City Clerk, Deputy City Clerk, and City Collector collect money and issue receipt slips.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Board of Aldermen  
City of La Plata  
La Plata, Missouri 63549

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of La Plata, Missouri. Our audit of the city included, but was not limited to, the year ended June 30, 2000. The objectives of this audit were to:

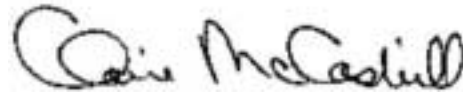

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of La Plata, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" and last name "McCaskill" clearly distinguishable.

Claire McCaskill  
State Auditor

August 4, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF LA PLATA, MISSOURI HISTORY AND ORGANIZATION

The city of La Plata is located in Macon County. The city was incorporated in 1881 and is currently a fourth-class city. The population of the city in 1990 was 1,401.

The city government consists of a mayor and a six-member board of aldermen. The six board members are elected for two-year terms. The mayor is elected for two years, presides over the board of aldermen, and votes only in case of a tie. The other elected officials have two-year terms, except the city marshal has a four-year term. The Mayor, Board of Aldermen, and other principal officials at June 30, 2000, were:

| <u>Elected Officials</u>  | <u>Term Expires</u> | <u>Compensation for<br/>the Year Ended<br/>June 30, 2000</u> | <u>Amount<br/>Of Bond</u> |
|---|---------------------|--|---------------------------|

| Greg Williams, Street<br>Superintendent                           |                     | 24,081   | 0                         |

(1) Elected in April 2000 to replace James Gladbach.

(2) Appointed to replace Teena Herleth who resigned in December 1999 to become City Clerk, and elected to a full term in April 2000. Compensation includes \$2,242 for serving as a city clerical worker prior to being appointed City Collector.

- (3) Appointed to replace Dexter Brookhart who resigned in December 1999, and elected to a full term in April 2000.
- (4) Appointed Interim City Clerk to replace Beverley Richardson who resigned in November 1999. Mrs. Hansen returned to her former position as Deputy Clerk when Teena Herleth was appointed City Clerk in December 1999. Mrs. Hansen was again appointed Interim City Clerk to replace Mrs. Herleth who resigned in June 2000. Compensation includes all payments to Mrs. Hansen for the year ending June 30, 2000, including \$1,200 for serving as Court Clerk for the entire fiscal year. Betty Wheeler was appointed Court Clerk in October 2000, and is paid on an hourly basis.
- (5) Compensation represents total payments to the City Attorney's law firm during the year ended June 30, 2000.
- (6) Appointed to replace Kelly Lyons who resigned in March 2000. Mr. Lyons had been appointed to replace Jeff Harris who resigned in August 1999.

In addition to the officials above, the city has seventeen full-time, six part-time, and nine seasonal employees.

Assessed valuation and tax rate information for 1999 are as follows:

#### ASSESSED VALUATION

|                        |                     |
|------------------------|---------------------|
| Real estate            | \$ 3,933,100        |
| Personal property      | 2,229,830           |
| Railroad and utilities | <u>275,680</u>      |
| Total                  | \$ <u>6,438,610</u> |

#### TAX RATE PER \$100 ASSESSED VALUATION

|                      |                |
|----------------------|----------------|
| General Revenue      | \$ .83         |
| Parks and Recreation | .19            |
| Library*             | <u>.19</u>     |
| Total                | \$ <u>1.21</u> |

- \* The La Plata City Library is a separate political subdivision; however, the library tax monies are in the custody of the city.

The city has a general sales tax of one percent of retail sales within the city.

## MANAGEMENT ADVISORY REPORT

CITY OF LA PLATA, MISSOURI  
SUMMARY OF FINDINGS

1. City Finances and Utility Rates (Pages 9-12)

During fiscal year 1999, the city used \$293,614 in utility and refuse revenues to pay for other city services. Electric and refuse user fees have not been set at a level consistent with the costs of providing the services and administrative costs have not been identified. The city does not generate sufficient unrestricted revenues to pay the expenditures incurred for the city's general operating funds. The Electric Fund was not reimbursed for a pickup truck transferred to the Street Department. Interest is not allocated to some funds maintained in the city's checking account. Some General Fund monies are held in passbook accounts, while the fund's checking account balance is negative.

2. Budgets and Financial Reporting (Pages 12-14)

Budgets did not include some information required by state law, deficit balances were budgeted for three funds, and disbursements exceeded budgeted amounts for four funds. The city's published financial statements are not sufficiently detailed and do not reflect some financial activity and indebtedness of the city.

3. Accounting Controls and Procedures (Pages 14-15)

Accounting duties are not adequately segregated, a \$50,000 certificate of deposit is not recorded on the city's general ledger, and the lists of meter deposits are not reconciled to the balances of the meter deposit funds.

4. Expenditures (Pages 15-16)

The city does not have a formal bidding policy, and receipt of goods is not always documented on invoices.

5. Personnel Policies and Procedures (Pages 16-17)

Time sheets are not always signed by the appropriate supervisor and do not indicate hours worked by activity. The city is not consistently following its leave accumulation policy and some elected officials are inappropriately allowed to accrue compensated leave benefits.

6. Park and Recreation Board Records and Procedures (Pages 17-19)

Controls over receipts need to be improved. Board minutes were not retained for meetings prior to January 2000, and minutes prepared after this date were not signed.

7. City Library (Page 19)

Library receipts are not disbursed to the Library Board Treasurer as required by state law, and the city has not entered into a written agreement with the Library Board.

8. City Cemetery (Pages 19-20)

The city has not entered into a written agreement with the La Plata Cemetery Association. The city does not require the association to provide complete financial reports to the Board of Aldermen on a regular basis and has not established procedures to monitor the cemetery association's compliance with state statutes.

9. Fire Protection Services (Pages 20-21)

The city has not entered into written agreements with the La Plata Volunteer Fire Department and the La Plata Rural Fire Protection Association.

CITY OF LA PLATA, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |  |
|-----------|--|
| <b>1.</b> | <b>City Finances and Utility Rates</b> |
|-----------|--|

- A. The city relies heavily upon utility and refuse funds to subsidize the city library and other city services. Transfers to the city's General, Dispatch, and Library Funds were made from the utility and refuse funds as follows:

| Transfers            | Year ended June 30, |         |         |
|----------------------|---------------------|---------|---------|
|                      | 1999                | 1998    | 1997    |
| Electric Fund        | \$ 148,637          | 250,179 | 221,843 |
| Water and Sewer Fund | 123,459             | 0       | 18,000  |
| Refuse Fund          | 21,518              | 5,950   | 0       |
| Total                | \$ 293,614          | 256,129 | 239,843 |

The city operates the General, Dispatch, and Library Funds with deficit cash balances throughout the fiscal year, and then transfers utilities and refuse monies, as well as general sales tax revenues, to these funds at the end of the year to bring the cash balances to \$0. These transfers are usually recorded after the city's independent audit is completed. The independent audit for the year ended June 30, 2000, has not yet been completed and no transfers have been made for this fiscal year. At June 30, 2000, the net unrestricted cash balance of the General, Dispatch, Library, and Sales Tax Funds was a negative \$300,238, so it appears the city will need to transfer approximately \$300,000 from the utility and refuse funds to eliminate these negative balances.

City officials indicated that part of the utility and refuse transfers are to offset utility and refuse administrative costs, such as bookkeeping and billing costs, that are incurred from the General Fund; however, the city has not specifically identified any administrative costs.

The Electric, Water and Sewer, and Refuse Funds are separate accounting entities designed to account for specific city activities. Utility and refuse revenues should be used to fund the operations of the respective utility and refuse services only. Rates for electric, water, sewer, and refuse services should be set to cover the costs of producing and delivering services (including administrative costs), repaying bonds, and repairing and replacing equipment. These services should not generate profits to fund other services provided by the city. The transfers represented 15-18 percent of the total revenues of the utility and refuse funds.

The existing utility and refuse rate structure has allowed the city to, in effect, levy additional taxes without a vote of the citizens. Property taxes, sales taxes and other fees can be established or increased; but, these require a vote of the citizens.

It appears the city has established higher than necessary utility and refuse rate structures in lieu of increasing general revenues or reducing services provided by the city.

- B. Without the continued subsidies from utility and refuse funds, the General, Dispatch, and Library Funds would be in poor financial condition. Profits from the Electric, Water and Sewer, and Refuse Funds provided approximately 50 percent of the total monies available to operate the General, Dispatch, and Library Funds during the year ending June 30, 1999. In addition, the city owed \$37,314 from the General Fund on outstanding lease obligations for a tractor and a backhoe used by the Street Department, and a police car.

The Board of Aldermen needs to closely monitor the ongoing financial condition of the General Fund and the Dispatch Fund. In addition, the board should decide whether the city should continue to fund the operation of the city library, which is a separate political subdivision under the supervision of the Library Board of Trustees. The Board of Aldermen should develop a plan which will allow the city to operate without subsidies from utility and refuse funds. If the board desires to continue its current level of services, it must increase unrestricted revenues or reduce costs.

- C. In September 1999, the city transferred a three year-old pickup truck from the Electric Department to the Street Department. The General Fund, which funds the operations of the Street Department, did not reimburse the Electric Fund for the fair market value of the pickup truck. The pickup truck was purchased for \$21,193 in 1996, and the National Auto Dealers Association Appraisal Guide for July 2000 indicates a pickup truck of this year, make, and model, has a retail value in excess of \$10,000.

As indicated in Part A. above, utility fund assets should not be used to fund general city operations. The city should reimburse the Electric Fund from the General Fund for the fair market value of the pickup truck.

- D. The city maintains one interest bearing checking account. The interest revenue earned from this account (\$3,261 during the year ended June 30, 2000) is credited to the city's General Fund, instead of being allocated to the various funds which maintain monies in the account. Based on the balances of the various funds, it appears the majority of this interest should have been credited to the Electric Fund and Water and Sewer Fund.

Interest should be credited to the funds which generated the revenue. To ensure all city funds receive the appropriate amount of revenue, interest earned on the city's checking account should be allocated based on the balances maintained by the various funds in the account.

- E. Although the General Fund generally maintains a large negative balance in the city's checking account, some General Fund monies are held in passbook savings accounts. The city maintains a passbook account for unrestricted monies the board decided to save and reserve for the future purchase of a fire truck. Another passbook account is maintained for monies collected from the city's soda machines. The balances in these accounts were \$25,729 and \$1,985, respectively, at June 30, 2000. Considering the large negative balances of the General Fund in the city's checking account, the board should consider using the monies in the passbook accounts to pay current obligations.

**WE RECOMMEND** the Board of Aldermen:

- A&B. Set utility and refuse rates to cover only those costs necessary to provide the related utility and refuse services. In addition, the board should develop a plan to operate the General, Dispatch, and Library Funds without continued subsidies, and limit expenditures and transfers from utility and refuse funds to only those which are necessary to operate the utility and refuse services.
- C. Reimburse the Electric Fund from the General Fund for the fair market value of the pickup truck transferred from the Electric Department to the Street Department.
- D. Allocate the interest income earned on the city's checking account to the various funds maintained in the account.
- E. Consider closing the General Fund passbook accounts and transferring the money to the checking account to help offset the negative checking account balance of the fund.

**AUDITEE'S RESPONSE**

- A&B. *There is no statute or law prohibiting the transfer of revenues from one fund to another. Any increases in utility rates have not kept pace with the general rate of inflation and increases in the costs of providing utility services. According to Missouri Supreme Court decisions, fee increases required in order to maintain and cover increased costs of providing a service are not required to be approved at an election. The city does not believe that the residents of the community desire a tax increase or a reduction in the level of services provided to the public as recommended by the State Auditor.*
- C. *This vehicle and other city vehicles are used by more than one department, therefore, we do not intend to reimburse the Electric Fund for the cost of this particular vehicle. We will consider ways to reasonably allocate vehicle costs to the various funds.*
- D. *We concur.*

- E. *We concur. The General Fund passbook accounts were transferred into the checking account on August 23, 2000.*

### **AUDITOR'S COMMENT**

A&B. We agree that fee increases to cover the costs of providing utility services generally do not require voter approval. However, the net result of the city's current practice is that the citizens of La Plata are paying higher than necessary utility rates to subsidize general city operations. As stated above, transfers represented 15-18 percent of the total utility and refuse funds revenues. While it is common for municipal governments to provide for a gross receipts tax on utility operations, it does not appear reasonable to expect the utilities to provide this amount of funding for general city operations.

|   |
|---|
| <b>2. Budgets and Financial Reporting</b> |
|---|

- A. The city's budgets did not comply with state law or were otherwise insufficient as follows:

1. The budgets did not reflect the actual beginning and projected ending fund balances, and did not include budget messages describing the important features of the budget and major changes from the preceding years.

Section 67.010, RSMo 1994, sets specific guidelines for the format of the annual operating budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of city operations. A complete budget should include the beginning and projected ending balance for each fund and a budget message.

2. For year ended June 30, 2000, budgeted disbursements exceeded available resources by \$289,549, \$60,100, and \$8,750, for the General Fund, Dispatch Fund, and Library Fund, respectively, resulting in budgeted deficit fund balances for these funds. In addition, the city's budgets for the year ending June 30, 2001, include budgeted disbursements that exceeded available resources by \$306,365, \$57,500, and \$13,315 for the General Fund, Dispatch Fund, and Library Fund, respectively.

Section 67.010, RSMo 1994, prohibits municipalities from budgeting a deficit balance.

3. During the year ended June 30, 2000, the city approved disbursements in excess of budgeted amounts for various funds as follows:

| <u>Fund</u>         | <u>Budgeted<br/>Amount</u> | <u>Actual<br/>Disbursements</u> | <u>Actual<br/>over Budget</u> |
|---------------------|----------------------------|---------------------------------|-------------------------------|
| Park and Recreation | \$ 154,850                 | 214,102                         | 59,252                        |
| Refuse              | 59,000                     | 60,471                          | 1,471                         |
| Electric            | 1,022,300                  | 1,023,567                       | 1,267                         |
| Library             | 22,250                     | 23,237                          | 987                           |

The city did not prepare an amended budget or adopt a resolution authorizing the additional disbursements, nor did the city set forth any reasons for exceeding the budgeted amounts in the board minutes.

Section 67.040, RSMo 1994, requires political subdivisions to keep disbursements within amounts budgeted. If there are valid reasons which necessitate excess disbursements, a resolution should be adopted by the governing body setting forth the amount of the budget increase and the facts and reasons.

- B. The city's semi-annual financial statements published for the six months ending June 30, 2000, and December 31, 1999, only presented total receipts and disbursements, as well as transfers in, transfers out, and beginning and ending cash and investment balances. The various revenue sources and disbursement categories were not shown. In addition, the financial statements include combined balances by fund type (general, special revenue, and proprietary), instead of showing each fund separately. For example, the Electric, Water and Sewer, and Refuse Funds are combined into the proprietary fund type, instead of showing each fund separately.

The published financial statements did not report any indebtedness, even though the city had a \$239,000 note payable and approximately \$132,000 in capital lease obligations at June 30, 2000. In addition, the balance of a \$50,000 certificate of deposit was omitted from the cash and investment balances.

Section 79.160, RSMo 1994, requires the Board of Alderman to prepare and publish a full and detailed account of the receipts, disbursements, and indebtedness of the city. Because the publication of such financial statements is intended to provide information to citizens regarding the financial activity and condition of the city, the board should consider showing more detailed revenue and expenditure categories and separate amounts for each city fund.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare budgets containing all information required by state law and refrain from adopting deficit budgets. In addition, the board should ensure actual disbursements do not exceed budgeted amounts. If circumstances require disbursements in excess of amounts budgeted, a formal resolution should be adopted authorizing the additional disbursements and documenting the reasons.

- B. Publish complete, detailed semi-annual financial statements of all financial activity and indebtedness of the city.

**AUDITEE'S RESPONSE**

- A. *We concur. We will prepare and approve budget amendments as needed and make the appropriate changes to the next fiscal year's budget.*
- B. *We concur. More detail will be added to future published financial statements.*

|  |
|--|
| <b>3. Accounting Controls and Procedures</b> |
|--|

- A. The duties of receiving, recording, reconciling, and depositing monies are not adequately segregated. The City Clerk, Deputy City Clerk, and City Collector collect money and issue receipt slips. The City Collector records receipts on the subsidiary accounts receivable records for utility and refuse fees and property taxes, and generates computerized reports indicating the amounts recorded. In addition, the City Collector makes deposits, reconciles receipts to deposits, and prepares reports which summarize and classify the various types of monies received. The City Clerk or Deputy City Clerk use the reports to record receipts on the city's financial records; however, they do not review the report and its supporting documentation to ensure all receipts are being deposited and accounted for properly.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing monies from those of recording receipts and reconciling receipts to deposits. If proper segregation cannot be achieved, at a minimum, procedures for adequate independent review should be established.

- B. In February 2000, the Parks and Recreation Board received a \$50,000 donation to be used for constructing a swimming pool. The \$50,000 was invested in a certificate of deposit in the city's name which is not recorded on the city's general ledger. To ensure all city monies are accounted for, all city monies should be recorded on the general ledger.
- C. The city maintains lists of water and electric customers' meter deposits held by the city; however, the lists are not reconciled to the balances of the meter deposit funds. At June 30, 2000, the balances of the Electric Meter Deposits Fund and the Water Meter Deposits Fund, excluding interest, were \$909 and \$629, respectively, less than the totals recorded on the city's lists. The meter fund balances as of June 30, 1999, agreed to the city's lists for that same date, so it appears the differences occurred during the year ended June 30, 2000.

The city should ensure its meter deposit records are complete and accurate by periodically reconciling the meter deposit fund balances to the totals on the meter deposit lists. Differences should be investigated and resolved.

**WE RECOMMEND** the Board of Aldermen:

- A. Segregate the duties of receiving and depositing monies from those of recording and reconciling receipts. If proper segregation cannot be achieved, procedures for independent reviews of the accounting records should be established.
- B. Ensure all city monies are recorded on the general ledger.
- C. Periodically reconcile the lists of water and electric meter deposits to the balances of the meter deposit funds. Any significant differences should be investigated and resolved.

**AUDITEE'S RESPONSE**

- A. *We concur. Based on standard accounting principles, several changes have already been made that the board feels appropriate and necessary for proper segregation of duties. The city would note that this is an accounting issue, and there has been no law violated.*
- B. *We concur. Based on standard accounting principles appropriate procedures have already been implemented. However, it is important to note that the audit found no evidence of misappropriation or missing funds and that there has been no violation of the law.*
- C. *We concur. A thorough investigation of the deposits on file was done prior to the state audit. The utility computer was updated to reflect correct deposits on file, however the accounting program was not updated. We will make appropriate adjustments to the meter deposit funds. In the future, we will perform regular reconciliations of the meter deposit funds. The city would note that this is an accounting issue, and there has been no violation of the law.*

|                        |
|------------------------|
| <b>4. Expenditures</b> |
|------------------------|

- A. The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Although it appears the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained for the purchases of a truck (\$23,350), water pipe (\$13,779), and water meters (\$11,463).

Formal bidding procedures provide a framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding also helps ensure all parties are

given an opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reason noted why the bid was selected.

- B. Receipt of goods or services is not always indicated on the invoice prior to an expenditure being approved for payment. Documentation of the receipt of goods or services is necessary to ensure the city actually received the items or services being paid.

**WE RECOMMEND** the Board of Aldermen:

- A. Establish formal bidding policies and procedures and retain all bid documentation.
- B. Ensure the receipt of goods is indicated on invoices prior to being approved for payment.

**AUDITEE'S RESPONSE**

- A. *The city is in the process of establishing a bidding policy. The city would note that there is no state law requiring or mandating the adoption of such a bidding policy and thus no law has been violated.*
- B. *We concur. This is a practice already established through purchase orders and verbal confirmation of goods or services received. Signatures of department supervisors will be required on packing slips or invoices in the future.*

|   |
|---|
| <b>5. Personnel Policies and Procedures</b> |
|---|

- A. Department supervisors complete daily reports indicating the number of hours each of their assigned employees worked for each city department. The City Clerk uses the daily reports to allocate salaries and fringe benefits to the appropriate funds. The daily reports are not signed by the preparers or the employees, and are not approved by the supervisors of the other departments to which hours were charged. Time sheets are prepared but are not always signed by the appropriate supervisor and do not indicate the hours worked for each department.

Time sheets which indicate the hours worked for each department should be prepared by each employee and approved by each applicable supervisor. This helps ensure that payroll costs are charged to the appropriate funds.

- B. The city is not consistently following its leave accumulation policy. Some employees were allowed to exceed the maximum accumulations. One employee's sick leave balance exceeded the maximum accumulation by three and one-half days and two other employees' vacation leave balances exceeded the maximum by twenty hours and nineteen hours, respectively. The city should follow its leave accumulation policy to ensure equitable treatment for all employees. Any exceptions to the policy should be approved by the Board of Aldermen.
- C. The Police Chief and City Collector accrue personal days, vacation leave, and sick leave. The city pays these elected officials for unused leave when they leave office. Annual salaries of city elected officials are set under state law and city ordinance. State law does not authorize compensated leave for elected officials.

**WE RECOMMEND** the Board of Aldermen:

- A. Require employees to prepare time sheets which include actual hours worked for each city department. The time sheets should be approved by all applicable supervisors to help ensure employee salary costs and fringe benefits will be properly allocated to the appropriate funds.
- B. Ensure employees are not allowed to accumulate leave balances in excess of the maximum allowed by city personnel policy. Any exceptions to the policy should be approved by the Board of Aldermen.
- C. Discontinue the practice of providing compensated absence benefits to elected officials.

**AUDITEE'S RESPONSE**

- A. *We concur. New time sheets have already been adopted that meet all the necessary requirements to appropriately allocate salaries and fringe benefits to the appropriate funds at the time of payroll.*
- B. *We concur. A personnel policies and procedures manual is in the process of being reviewed with changes being made that the board feels are appropriate based on cost benefit analysis and the best interest of the citizens and employees of the city of La Plata. It is important to note that no law has been violated.*
- C. *We concur. This practice has already been discontinued.*

|           |   |
|-----------|---|
| <b>6.</b> | <b>Park and Recreation Board Records and Procedures</b> |
|-----------|---|

The city owns a golf course and a lake which are operated under the authority of the Park and Recreation Board. Our review noted the following concerns:

- A. Board minutes were not retained for meetings prior to January 24, 2000. Minutes of board meetings should be retained to reflect such public decisions as bidding, contracting, and other significant matters.

In addition, board minutes were not signed. The board minutes should be signed by the board secretary as preparer and board president to provide an independent attestation that the minutes are a correct record of the matters discussed and action taken during the board's meetings.

Section 610.020, RSMo Cumulative Supp. 1999, requires minutes of meetings to be retained by public governmental bodies. Besides being required by state law, minutes provide an official record of board actions and decisions.

- B. The method of payment received (cash, check, credit card) is not recorded on receipt slips issued at the golf course and the lake. To ensure all receipts are properly recorded and deposited, the method of payment received should be indicated on all receipt slips, and the composition of receipt slips should be reconciled to the composition of monies remitted to the city.
- C. Golf course receipts are transmitted to the city approximately once a week and receipts are not always kept in a secure location. Prior to transmittal, some receipts are kept in an unlocked box in an unlocked drawer. Weekly transmittal amounts for the month of June 2000 ranged from \$2,767 to \$5,735. To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be kept in a secure location and transmitted to the city daily or when accumulated receipts exceed \$100.

**WE RECOMMEND** the Park and Recreation Board:

- A. Ensure minutes are retained for all meetings and signed by the board secretary and board president to attest to their completeness and accuracy.
- B. Require the method of payment be recorded on all receipt slips and the composition of receipts be reconciled to the composition of monies transmitted to the city.
- C. Keep monies in a secure location and transmit receipts to the city daily or when receipts exceed \$100.

**AUDITEE'S RESPONSE**

- A. *We concur. Procedures for assuring that appropriate minutes and documentation have already been established and are currently being practiced. Minutes will be maintained in the vault at City Hall.*

*B&C. We concur. Based on standard accounting principles, procedures will be established based on cost benefit analysis. However, it is important to note that this is an accounting issue, and there is no evidence of misappropriation or missing funds and no law has been violated.*

|                        |
|------------------------|
| <b>7. City Library</b> |
|------------------------|

City library monies are held in the custody of both the city and the Library Board. The city has custody of the library's property taxes, interest, grant receipts, operating revenues, and subsidies from other city funds. The Library Board only has custody of donations and memorial contributions received. The Board of Aldermen approves disbursements from the Library Fund within the city treasury and approves the library's annual budget. The city also maintains the library's payroll records. The Library Board approves disbursements of monies held in its custody. There is no written agreement between the city and the Library Board to outline the responsibilities of each party.

Section 182.200, RSMo Cumulative Supp. 1999, indicates all monies received by the city for a city library shall be disbursed to the library board treasurer monthly and city library boards shall have exclusive control of the expenditure of library monies.

**WE RECOMMEND** the Board of Aldermen and Library Board ensure all statutory provisions applicable to city library boards are being met. If the city continues to provide services to the Library Board, these services should be documented in written agreements.

**AUDITEE'S RESPONSE**

*We concur. Changes are in the process of being made that the board and City Attorney feel are appropriate based on cost benefit analysis, the best interest of the citizens of La Plata, and state statutes.*

|                         |
|-------------------------|
| <b>8. City Cemetery</b> |
|-------------------------|

The city of La Plata owns the land on which the city cemetery is located. The city allows the La Plata Cemetery Association (LCA), a benevolent corporation, to maintain custody of all monies received for the preservation, care, upkeep, and adornment of the city cemetery, including money received from the sale of cemetery lots, and to make all decisions regarding the use of these monies; however, the city has not entered into a written agreement with the cemetery association defining the rights and responsibilities of each entity, and has not established procedures to ensure the LCA is in compliance with statutory requirements regarding the investment and use of cemetery monies.

Section 140.040, La Plata City Code, requires all money received from the sale of cemetery lots to be paid into the city treasury to be expended under the direction of the

Board of Aldermen in maintaining, beautifying and improving the cemetery. Section 79.430, RSMo 1994, indicates cities and their officers have jurisdiction over city cemeteries. Chapter 214, RSMo 1994, includes provisions governing the operation of public cemeteries.

The city does not require the LCA to be audited or to provide financial reports to the board on a regular basis. The last financial report the LCA submitted to the board was for the year ending December 31, 1998. The report indicated the LCA had a checking account balance of \$43,312 at January 1, 1998, received \$28,587, disbursed \$26,935, and had a checking account balance of \$44,964 at December 31, 1998, but it did not list the balances of the LCA's other bank accounts. At June 30, 2000, the LCA was holding over \$400,000, in a money market account, a savings account, and certificates of deposit. In addition, the custodian of these funds is not bonded.

If the city plans to continue allowing the LCA to control cemetery monies, the city should obtain a written agreement documenting the rights and responsibilities of each entity. The agreement should require the LCA to provide complete financial reports to the city on a regular basis and require bonding of the custodian of cemetery funds. The city should establish procedures to ensure the cemetery is operated in compliance with Chapter 214, RSMo 1994. Also, the city should review Section 140.040, La Plata City Code, make any necessary revisions, and ensure the city complies with the city code.

**WE RECOMMEND** the Board of Aldermen obtain a written agreement with the La Plata Cemetery Association to ensure the rights and responsibilities of all parties are specifically outlined. The agreement should require the cemetery association to provide complete financial reports to the board periodically and require bonding of the custodian of cemetery funds. In addition, the board should establish procedures to ensure the cemetery is operated in compliance with state law. The board should also consider updating the codification of city ordinances to help ensure all ordinances are current, reflect the board's intentions, and are complied with.

#### **AUDITEE'S RESPONSE**

*We concur. Changes are in the process of being made that the board and City Attorney feel are appropriate based on cost benefit analysis and state statutes.*

|                                    |
|------------------------------------|
| <b>9. Fire Protection Services</b> |
|------------------------------------|

The city owns a fire station which is occupied by both the La Plata Volunteer Fire Department (LVFD) and the La Plata Rural Fire Protection Association (LRFPA). These entities are both not-for-profit corporations. Other than a building rental agreement between the city and the LRFPA, there are no written agreements between the city and these entities which outline the rights and responsibilities of each party, and as a result, the city has little assurance that city monies and assets are only used to provide fire protection services to city residents.

The LVFD serves the city and other areas within a radius of approximately ten miles from the fire station. The operating expenses of the LVFD are paid by the city, and the LVFD also receives money from fundraising activities. During the year ended June 30, 2000, the city paid approximately \$34,000 for personal service and other operating costs of the LVFD. Most of the equipment used by the LVFD is owned by the city.

The LRFPA provides services to areas outside the city limits. Its operations are funded mostly from dues received from its members. The LRFPA owns most of its own equipment, except for a tanker truck which is jointly owned by the city and the LRFPA. The LRFPA reimburses the city for one-half of the operating costs of the tanker, and the LRFPA also makes building rental payments to the city.

The same person serves as the fire chief for both organizations, and most firefighters serve for both organizations. From July 1999 through May 2000 (which is the most recent data provided by the fire chief), these organizations responded to 37 calls within the city limits and 42 calls outside the city limits. There have been no formal studies regarding the percentage of services provided to city and non-city residents, and other than the building rental agreement, the cost allocations between the city and these entities are based on informal verbal agreements.

**WE RECOMMEND** the Board of Aldermen conduct a formal analysis of the fire protection costs incurred by the city, the LVFD, and the LRFPA, and determine the percentage of costs related to residents and property within the city limits. The city should enter into written agreements with the LVFD and LRFPA which clearly document the costs to be paid by each entity and the rights and responsibilities of each party.

#### **AUDITEE'S RESPONSE**

*We feel this is not a major issue and the public benefits greatly by these services. Periodic review of the relationships between the city and the LRFPA and LVFD will be done. Any changes in regard to fire protection services will be made based on cost benefit analysis and the welfare of the citizens of the City of La Plata.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

**REVIEW OF  
GOVERNOR OFFICE BUILDING  
RENOVATION AND LEASE AGREEMENT**

From The Office Of State Auditor  
Claire McCaskill

Report No. 2000-125  
December 14, 2000

There were no significant issues disclosed in the bidding for the renovation contract and the lease agreement for space. Two minor issues regarding expenses and space use were disclosed

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

PERFORMANCE AUDIT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Review of Governor Office Building lease and space use disclosed only minor concerns.**

---

The State Auditor's Office initiated a review of the Governor Office Building to determine if the building renovation was properly bid, the lease rate is reasonable, change orders from the original bid were reasonable, and if the building space is effectively used.

The audit did not disclose any significant problems within the scope of the review. There were two issues of concern that warrant attention.

- **Building renovation costs were inflated by Public Service Commission requirements**

The Public Service Commission, a primary tenant of the Governor Office Building, added a bullet resistant commissioner's bench at a cost of \$6,500. We do not believe this was a prudent use of public funds.

- **Some lease space was not efficient for state purposes**

The Division of Facilities Management is leasing a large ballroom for conferences, but it is not set up for practical use. The annual lease cost is \$33,000. The room is over 3,200 square feet and is not configured for sectioning off into smaller conference rooms. There are few bookings, mainly because the room is too big for most conferences. If the Division intends to continue leasing this space, the addition of room dividers would enhance the room's conference capability. The Division is considering negotiations with the developer to return the ballroom and reduce the lease costs.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

December 14, 2000

Honorable Roger Wilson, Governor  
Room 216 State Capitol  
Jefferson City, MO 65101

Dear Governor Wilson:

The State Auditor's Office initiated a review of the Governor Office Building. The objectives of this review were to determine if

1. The building renovation was properly bid.
2. The current lease rate is reasonable.
3. Change orders from the original request for proposals were reasonable.
3. The building space is being effectively and efficiently used.
4. State tax credits issued during the donation and renovation phases of the building were properly managed.

Our review was limited to specific matters described above and was based on selected tests and procedures considered appropriate in the circumstances.

We did not find any material problems; however, we do have some concerns. First, the Public Service Commission had a bullet resistant commissioners' bench added to the main hearing room in the building, which increased the cost by over \$6,500. This does not appear to be a prudent use of public funds.

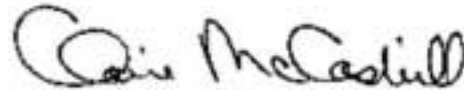

Second, the Division of Facilities Management is leasing the ballroom in the Office Building and using it as a conference room at an annual lease cost to the state of over \$33,000. This 3,268 square foot room is not being used effectively. The ballroom has very few bookings, mainly because it has too much space for most conferences, and it is not configured to be conducive to small conferences. If the Division of Facilities Management plans to continue to lease this space, it appears the addition of room dividers would substantially enhance the room's conference capability. During the course of our review, the Division of Facilities Management began discussion with the developer regarding the possibility of returning the ballroom to the developer with a corresponding reduction of the lease cost paid by the state. The state could then rent the ballroom, as needed.

The scope of the review included examining the project that started when the building was originally donated to the state in 1997. We reviewed the request for proposals, the one-time payment (change order) invoices, and the lease contract. We also toured the newly renovated Governor Office Building and researched the state tax credits involved.

Based on the results of our review of the Governor Office Building we do not plan any additional audit work at this time.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the division's expenditures, contracts, and other pertinent procedures and documents, and interviewed division personnel.

Sincerely,

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

CLAIRE C. McCASKILL  
STATE AUDITOR

STATE OF MISSOURI  
LEASE OF REAL PROPERTY

THIS LEASE, No. 02600971, made and entered into this 19th day of January 1999, by and between Hotel Governor of Jefferson City I, L.P., 232 N. Kingshighway, Apt. 1213, St. Louis, Missouri 63108 (State of Missouri Vendor Number 7280963), hereinafter called the Lessor, and the State of Missouri, by the Office of Administration, Division of Facilities Management, hereinafter called the Lessee, on behalf of the Department of Economic Development, Public Service Commission and Office of the Public Counsel, hereinafter called the Tenant.

WITNESSETH: That the Lessor, in consideration of the covenants of said Lease hereinafter set forth, does by these presents Lease to said Lessee, under the terms and conditions set forth, the premises described as follows:

200 Madison Street, Jefferson City (Cole County), Missouri 65101, hereinafter called "premises" and consisting of 74,589 net rentable square feet.

**1 TERM OF LEASE**

(a) The term of this Lease shall commence on February 15, 2000, and end June 30, 2015. It is understood and agreed between the parties that the Lease is contingent upon the Lessee receiving appropriations therefore from the Missouri General Assembly. Monies are appropriated according to the State of Missouri's fiscal year, which begins July 1, and ends June 30. In the event that sufficient funds are not appropriated by the Missouri General Assembly for any fiscal year during this Lease, Lessee shall immediately notify Lessor of the event of non-appropriation. Lessee shall vacate the premises no later than July 1. The Lease shall be deemed to have expired of its own terms and Lessee shall have no further obligation hereunder.

(b) The Lessor grants to the Lessee the option to extend the Lease for three 2 month periods following the above ending date at the same rental rate as paid during the final renewal period. Lessee must notify Lessor of its intent to exercise the extension no later than 60 days before the expiration date or 30 days before the expiration of any extension period.

**2. RENTS**

The annual rent shall be in the amount of SIX HUNDRED SEVENTY-SEVEN THOUSAND TWO HUNDRED SIXTY-EIGHT DOLLARS AND TWELVE CENTS (\$677,268.12), payable monthly in arrears in the amount of FIFTY-SIX THOUSAND FOUR HUNDRED THIRTY-NINE DOLLARS AND ONE CENTS (\$56,439.01), upon prior invoices submitted by Lessor.

**3. TAXES**

If the base real estate tax rate existing at the time of award increases more than ten percent during the life of the Lease, and the Lessor provides full documentation of such increases, the state will, at its option, either increase the rental rate or provide a lump sum payment for the amount of the tax increase in excess of ten percent.

**4. RENEWAL TERMS**

In the event the Lessee remains in possession of the premises after the expiration date of said Lease or any renewal period without extending the Lease or without executing a new Lease, the Lessee shall be deemed to be occupying the premises as a Lessee from month-to-month, with the parties therefore subject to existing provisions of law and all of the conditions of said Lease insofar as they are applicable to a month-to-month tenancy, except that the Lessor agrees to accept the said rental rate on a monthly basis until the premises are vacated by the Lessee or until the parties enter into a new agreement, whichever is sooner.

**5 CONSTRUCTION AND RENOVATION**

(a) The Lessor shall remodel, construct, and equip the premises in accordance with RFP #02600971 and Bid Proposal, which are made a part hereof by reference, and the premises shall be prepared to the satisfaction of the Lessee. The building and premises must be accessible as defined by the Americans with Disabilities Act Accessibility Guidelines, enacted by the Federal Government on July 26, 1990, which went into effect January 26, 1992.

(b) In the event the Lessor fails to remodel, construct and equip the premises in accordance with Paragraph (4)(a) by the guaranteed occupancy date as stated in Lessor's Bid Proposal, liquidated damages in the amount of twice the per diem rental shall be assessed for each calendar day thereafter that the Lessee is prevented from occupying the premises by reason of such failure, and the rent provided for herein shall be forfeited and shall not be payable until the premises are ready for occupancy.

(c) Extensions of time for the date of occupancy may be granted by Lessee for delays due to abnormal weather which actually impedes work progress. The records of the U.S. Weather Service for the last ten years for the time and place of occurrence of the abnormal weather shall be used to establish what is normal. Time extensions may also be granted for delays due to labor strikes, acts of God, fire, and non-delivery of materials by third persons, provided Lessor provides satisfactory evidence that the materials were ordered in sufficient time to support ordinary construction progress.

(d) The Lessor understands and agrees that all alterations, renovations and improvements, the cost of which exceeds \$25,000.00 made to the premises during the life of the Lease including all renewal and extension periods, shall be made in accordance with requirements as set forth in Chapter 290, RSMo.

**6. SERVICES**

(a) The Lessee agrees to pay for the utilities of heat, air conditioning, water, sewer, light, steam, gas and electricity.

(b) The Lessee agrees to provide and pay for janitorial services, equipment and supplies, including paper products (restroom tissue, paper towels, etc.).

(c) The Lessor agrees to provide 20 vehicle parking spaces located on the premises or within a reasonable distance from the premises.

(d) The Lessor shall furnish all fluorescent and incandescent light bulbs necessary on the premises. Thereafter, the Lessor shall furnish and the Lessor shall install replacements for all fluorescent and incandescent light bulbs necessary on the premises.

(e) The Lessor shall permit the Lessee to install communication systems necessary for the conduct of the Lessee's business and said systems shall remain the property of the Lessee.

(f) The Lessor will provide and pay for general garbage and trash removal from the premises.

(g) The Lessor agrees to direct and pay for removal of snow and ice from the sidewalks and parking area and to provide and pay for general lawn care.

(h) The Lessor agrees to provide and pay for effective and safe pest control (insect and rodent).

**7. USE OF PREMISES**

The Lessee agrees to use the premises for office space, so long as such use shall be deemed feasible by the Lessee, and the Lessee shall have the right to assign its rights under said Lease, in whole or in part, to any other State of Missouri agency, subject to the same conditions of said Lease. Lessee may not assign its rights under said Lease to any non-State of Missouri party

without the written consent of the Lessor. The Lessee, at its option, may sublease all or a portion of the demised space to any State of Missouri, not-for-profit or private entity. When major changes are planned, the Lessee will notify the Lessor of its intentions and request concurrence from the Lessor of the proposed changes. The Lessor will not arbitrarily withhold such concurrence.

**8. ALTERATIONS AND IMPROVEMENTS**

The Lessee shall have the right to make alterations, attach fixtures and erect additions, structures or signs in or upon the premises, which fixtures, additions or structures so placed upon or attached to the premises shall be and remain the property of the Lessee and may be removed and otherwise disposed of by the Lessee. The above changes or alterations shall in no way weaken or cause structural injury to the premises, and the altered part of the premises shall, upon removal by the Lessee, be returned to the condition existing prior to such change, alteration, installation, ordinary wear and tear excepted, if required by the Lessor.

**9. PREMISE MAINTENANCE**

(a) The Lessor shall maintain the premises in good repair and tenantable condition, including buildings, equipment, HVAC filters, fixtures and any other property furnished by the Lessor to the Lessee under said Lease. The Lessor will inspect emergency and exit lighting systems, fire extinguishers and heat and smoke detectors annually. Any malfunctioning equipment must be immediately repaired or replaced. Record of inspections shall be maintained and signed by the inspecting agent with a copy given to the tenant agency. For the purpose of so maintaining the premises and property, the Lessor may, at reasonable time and with the approval of the Lessee's authorized representative, enter and inspect the premises and make any necessary repairs.

(b) In the event the premises fall into disrepair or untenable condition arising from the Lessor's failure to perform maintenance as required by paragraph (8)(a), such that the Lessee or its employees' ability to safely or comfortably conduct business is substantially impaired, the Lessee shall notify the Lessor in writing of the general nature of the disrepair or untenable condition. Lessor shall have 60 consecutive calendar days from the date of this notice to take whatever measures are necessary to correct the disrepair or untenable condition to the Lessee's reasonable satisfaction. If the Lessor fails or neglects to take measures to correct the disrepair or untenable condition within such 60 day period, then the Lessee may, at its option, (1) take measures to correct the disrepair or untenable condition in compliance with applicable Missouri law and procedures governing the same and abate the cost of such corrective measures from the rent otherwise due without prejudice to other judicial remedies the Lessee may seek; (2) exercise its option to terminate said Lease without additional notice, vacate the premises, and recover any rent paid in advance for the period subsequent to the date that Lessee vacates the premises as well as the costs incurred by the Lessee in vacating the premises and in finding a new location; or (3) withhold all rental payments pending correction of the disrepair or untenable condition.

**10. DAMAGE OR LOSS OF PREMISES**

(a) The Lessee agrees to pay for any damage to the premises caused by the acts of Lessee or its employees, ordinary wear and tear excepted.

(b) If the premises are damaged or destroyed by fire or other casualty so as to render the premises untenable, the rent shall be abated or reduced proportionately according to the usable square feet remaining on the premises as determined by the Lessor and Lessee until the premises are restored by the Lessor. The Lessor shall not be obligated to repair or restore the premises in the event of such damage. However, the Lessor shall notify the Director or Assistant Director, Division of Facilities Management, in writing of its intent concerning repair and restoration of the premises within 15 consecutive calendar days after the date of such damage. In the event the Lessor elects not to repair or restore the premises, or in the event the Lessor elects to repair or restore the premises and they are not restored to a condition substantially as good as prior to such damage within 60 consecutive days from the date of such damage, the Lessee may, at its option, terminate the Lease by giving the Lessor ten consecutive calendar days written notice of its intent

to do so, and the Lessor shall return to the Lessee any rent paid in advance for the period subsequent to the effective date of said notice.

**11. DISREPAIR**

If, at any time, during the period of said Lease a public official, agency, architect or professional engineer registered in the State of Missouri determines that the premises do not comply with the model building codes, ordinances and requirements or that the premises are not in an adequate state of repair or are not safe for occupancy, Lessee shall notify Lessor of such fact and the Lessor shall have any such deficiencies corrected within ten consecutive calendar days of the date of such notice, or within an extension period granted at the option of Lessee. If the Lessor fails or neglects to correct such deficiencies within said time period, Lessee may, at its option, terminate said Lease without additional notice, vacate the premises and recover any rent paid in advance for the period subsequent to the date that Lessee vacates the premises as well as the costs incurred by Lessee in vacating the premises and in finding a new location.

**12. INDEMNIFICATION**

The Lessor shall indemnify and hold the Lessee harmless from all liabilities, charges, expenses (including counsel fees) and costs arising on account of or by reason of any injuries, liabilities, claims, suits or losses directly resulting from a dangerous condition existing on the premises at the time of the injury, unless the said dangerous condition shall have been caused or created by or have resulted from the negligence or wrongful act or omission of an employee of the Lessee within the course of said employee's employment.

**13. NOTICES**

(a) Any notice by Lessor concerning said Lease shall be deemed sufficient if sent by certified mail, return receipt requested, to:

Division of Facilities Management  
Facility Leasing Section  
3225 West Truman Boulevard, Suite 100  
Jefferson City, Missouri 65109

(b) In the event of default by Lessor or termination by the Lessee, notice will also be sent to:

Mercantile Bank Community Development Corp. Inc.  
Attention: Kathy Bader  
10 North Hanley  
Clayton, Missouri 63105

Any notice by Lessee concerning said Lease shall be deemed sufficient if sent by the Director or Assistant Director, Division of Facilities Management, by certified mail, return receipt requested, to the mailing address provided and updated by Lessor and subsequently set forth in the Missouri Automated Procurement System.

**14. APPROPRIATIONS**

It is understood between the parties that moneys to fund rental and all other payments due under said Lease are annually appropriated by the Missouri General Assembly for one fiscal year beginning on July 1. It is understood and agreed by the parties that said Lease shall not be binding upon the Lessee unless and until general appropriations have been made by the Missouri General Assembly and, if applicable, funds have been received from the United States Government for payment of rental or for any other payment under said Lease on behalf of the Lessee for any fiscal year during the initial period or any renewal or extension period of said Lease.

**15. BINDING AND ENTIRE AGREEMENT**

The covenants and agreements contained in said Lease shall be binding upon and shall inure to the benefit of the parties of said Lease, their respective successors, administrators, executors and assigns.

IN WITNESS WHEREOF, we have hereunto affixed our signatures.

LESSEE:

Office of Administration

## ADDENDUM TO LEASE

This ADDENDUM TO LEASE (the "Addendum") is attached to and forms a part of that certain LEASE AGREEMENT (the "Lease") dated \_\_\_\_\_, 199\_, by and between HOTEL GOVERNOR OF JEFFERSON CITY I, L.P., as landlord ("Landlord"), and OFFICE OF ADMINISTRATION, ACTING ON BEHALF OF THE STATE OF MISSOURI, as tenant ("Tenant"), which Lease leases and covers certain "Leased Premises" being Suite \_\_\_\_\_, of the Landlord's land and building known as Governor Hotel, 200 N. Madison, Jefferson City, Missouri (the "Project").

Landlord and Tenant hereby agree and provide that the Lease is amended and supplemented by adding the following additional provisions to the Lease, to-wit:

1. Right of First Refusal to Purchase the Project. Provided that Tenant is not then in default under the Lease (beyond the expiration of any applicable grace, notice and cure periods contained in the Lease), Landlord hereby grants unto Tenant the "Right of First Refusal" to purchase the Project during the Term of the Lease (or any renewal term), upon the following terms and conditions, to-wit:

(a) At such time as Landlord determines that it intends or desires to market and sell the Project to third-parties, the Landlord shall give Tenant written notice of Landlord's intent or desire to market and sell the Project to third-parties (the "Landlord's Marketing Notice"); provided, however, that Landlord agrees and covenants that Landlord's actual marketing and sales efforts with respect to the Project shall not begin and commence until the "Marketing Date" as determined below.

(b) The "Marketing Date" shall be that date which is the earlier of: (1) fifteen (15) months after the Landlord's Marketing Notice to Tenant; or (2) the Governor of the State of Missouri signs into law appropriate appropriation and related laws authorizing and funding the purchase of the Project by the Tenant. The Landlord anticipates that the Marketing Date will not occur prior to February 15, 2005.

(c) In the event that, on or after the Marketing Date, the Landlord receives a bona fide written purchase offer (the "Purchase Offer") from a third-party to purchase the Project at a purchase price (and upon other terms and conditions) which Landlord and all of its partners have determined to accept, then Landlord shall give Tenant written notice of such proposed sale of the Project pursuant to such Purchase Offer (together with a copy of the proposed sale contract for such Purchase Offer, for the proposed sale of the Project to such third-party purchaser). Thereafter, Tenant shall have thirty (30) days from Landlord's notice in which to exercise its Right of First Refusal hereunder to purchase the Project for the same purchase price contained in, and upon the same terms and conditions as, the third-party Purchase Offer, except that, notwithstanding the terms of the third-party Purchase Offer, the Landlord and Tenant agree that: (1) the closing of the sale of the Project to Tenant shall not be earlier than sixty days from the date of Landlord's notice to Tenant; (2) the entire purchase price consideration to be paid by Tenant to Landlord shall be in cash; (3) the purchase of the Project by Tenant shall not be subject to any contingencies, other than matters of title and survey; (4) the sale to Tenant shall be closed in accordance with local title company usage and custom, with normal, customary and appropriate prorations and adjustments of rents, security deposits and other items customarily adjusted or prorated (other than real estate taxes); and (5) at the Closing of the sale of the Project by Landlord to Tenant, the Landlord shall convey the Project to Tenant by Special Warranty Deed, free and clear of all mortgages, deeds of trust, and other financing liens and encumbrances whatsoever, but subject to general taxes for the year of closing, and subject to all easements, restrictions, reservations and rights of way of record, and subject to all other assessments and special taxes which are not then due and payable, and subject to all leases and tenancies then in effect. With respect to general taxes for the year of Closing, the parties agree and acknowledge that: the real estate taxes for the year of Closing shall not be prorated or adjusted between the parties; upon Tenant's acquisition of the Project, the Project shall thereupon be and become exempt from further real estate taxes; and Landlord shall pay when due, and be responsible for payment

when due, of all applicable real estate taxes for the Project for the year of Closing, which obligation of Landlord shall survive the Closing. In order to exercise its Right of First Refusal to purchase the Project pursuant hereto, Tenant shall give Landlord written notice of exercise, within the thirty (30) day period specified above.

(d) In the event that, within the thirty (30) day period specified above, the Tenant (by written notice to Landlord) timely exercises its Right of First Refusal, then thereupon the Landlord and the Tenant shall: (1) enter into and execute a contract or agreement for the sale and purchase of the Project consistent with the terms of this Addendum and the terms of the third-party Purchase Offer (as modified by the terms of this Addendum and the Right of First Refusal hereunder); and (2) proceed to the Closing of the sale and purchase of the Project consistent with the terms of this Right of First Refusal.

(e) If Tenant fails to exercise such Right of First Refusal within said thirty (30) day period, then: (1) Landlord may proceed with the sale of the Project to the third-party purchaser on substantially the same terms and conditions set forth in the proposed third-party Purchase Offer submitted by Landlord to Tenant; and (2) upon the expiration of the thirty (30) day period, Tenant shall provide Landlord with the Tenant's written confirmation that it has not exercised its Right of First Refusal under this Lease. Upon the closing in fact of such sale of the Project to the third-party purchaser pursuant to such third-party Purchase Offer, the Tenant's Right of First Refusal shall terminate and the Tenant shall have no further Right of First Refusal to purchase the Project pursuant to the Lease. If the sale of the Project to the third-party purchaser fails to close pursuant to such third-party Purchase Offer, then the Project shall remain subject to the Tenant's Right of First Refusal under this Lease.

(f) The Tenant's Right of First Refusal to purchase the Project shall terminate on the earliest of: (1) the expiration or termination of the term of the Lease without the renewal thereof, or any other termination of the Lease pursuant to its terms; or (2) Tenant's written notification to Landlord (in recordable form) of Tenant's voluntary relinquishment and termination of the Tenant's Right of First Refusal to purchase the Project; or (3) as provided in Section 1(e) of this Addendum, upon the closing in fact of the sale and purchase of the Project to a third-party purchaser pursuant to the third-party Purchase Offer.

(g) The Tenant's Right of First Refusal to purchase the Project shall not be assignable by Tenant. The Tenant's Right of First Refusal shall terminate in the event of any assignment of the Lease by the Tenant to any third-party. The Tenant's Right of First Refusal shall terminate in the event of any termination of the Lease. In addition, Tenant shall not have the right to exercise its Right of First Refusal to purchase the Project in the event that Tenant is in default under the Lease (beyond the expiration of any applicable grace, notice and cure periods contained in the Lease).

(h) Landlord and its General Partner agree, provide and covenant that any and all rights of the General Partner to purchase the Project from the Landlord pursuant to the limited partnership agreement of the Landlord or pursuant to any other agreement between Landlord and General Partner, are and shall be junior, subordinate and inferior to Tenant's Right of First Refusal hereunder. By separate joinder herein, the General Partner agrees to and confirms the foregoing subordination of the General Partner's purchase rights, to the Right of First Refusal granted to the Tenant pursuant to this Addendum. Landlord agrees and covenants that Tenant's Right of First Refusal to purchase the Project pursuant to the Lease is and shall be senior and superior to any and all rights of the General Partner to purchase the Project from the Landlord.

(i) In consideration for the Landlord's grant to the Tenant of the Right of First Refusal contained in the this Addendum, the Landlord and Tenant agree and provide that any and all option(s) to purchase the Project by and in favor of the Tenant contained in and/or granted pursuant to the Lease, the request(s) for proposals, proposal letter(s) (and supplements thereto and/or in connection therewith) from the Landlord or the General Partner to the Tenant, hereby are waived and relinquished by the Tenant, and hereby are deleted from

said documents in their entirety. The parties agree and acknowledge that, at any time, the Tenant may submit to Landlord offers to purchase the Project, not in connection with the Lease and this Right of First Refusal; and nothing contained herein shall affect Tenant's right at any time to offer to purchase the Project from Landlord, not in connection with the Lease and this Right of First Refusal.

2. Disrepair of Premises. Landlord and Tenant agree that Section 11 of the Lease is amended in pertinent part to provide that: (a) the Tenant's notice to Landlord shall contain a detailed description of the repairs or work required; and (b) the ten (10) day cure period contained in Section 11 shall be deemed extended for the appropriate period reasonably required by Landlord to effect cure given the nature of the repairs or work required, provided that, upon Landlord's receipt of Tenant's notice, the Landlord promptly commences cure and thereafter diligently prosecutes cure with due diligence and continuity to completion, and further provided that such cure period not exceed sixty (60) days total.

3. Memorandum of Lease. The parties agree that neither the Lease nor this Addendum shall be recorded, except upon the mutual written agreement of the parties. However, upon the request of either party, Landlord and Tenant agree to execute and record in the Real Estate Recorder's Office for the County of Cole, State of Missouri, a Memorandum of the Lease, this Addendum and the Right of First Refusal to purchase hereunder.

4. Miscellaneous. All Capitalized terms not herein defined shall have the meanings ascribed to such terms in the Lease. As supplemented and amended herein and hereby, the Lease is confirmed and ratified, and is in full force and effect, as of the date hereof. This instrument shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors, heirs and permitted assigns. This instrument shall be governed by and construed in accordance with the laws of the State of Missouri.

IN WITNESS WHEREOF, the parties have executed this instrument as of the dates set forth below their signatures.

LINCOLN COMMUNITY NURSING HOME DISTRICT

YEAR ENDED JUNE 30, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-124  
December 14, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the Lincoln Community Nursing Home District, Lincoln, Missouri.**

-----

The district did not prepare a budget for the year ended June 30, 1998 and the budget prepared for the year ended June 30, 1999 was not adopted by the board. State law requires the preparation of an annual budget which shall present a complete financial plan for the ensuing year. In addition, the approved budget for the year ended June 30, 2000, did not include a budget message, a comparative statement of actual revenues and expenditures by budget category for the two preceding years, or a budget summary as required by law.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of district operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures. A complete budget should include separate revenue and expenditure estimations by account, and include the beginning available resources and reasonable estimates of ending available resources. The budget should also include a budget message and comparisons of actual or estimated revenues and expenditures for the two preceding fiscal years.

For the year ended June 30, 2000, the district approved expenditures in excess of the budgeted amount by \$35,809. The board did not receive periodic reports so that it could compare actual revenues and expenditures to budgeted amounts.

The district did not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase was made on an item-by-item basis. During the past several years, bids were either not solicited, bid documentation was not retained, or the lowest bid was not always accepted. Examples include, bid documentation could not be located for a \$3,341 folding door and the district spent \$9,690 for computers and the lowest bid (which was \$9,290) was not accepted. There was no documentation to indicate the reason why the higher bid was accepted.

Formal bidding procedures for major purchases provide a framework for economical management of district resources and help ensure the district receives fair value by contracting with the lowest and best bidders. Competitive bidding helps ensure all parties are given an opportunity to participate in the district's business.

(over)

YELLOW SHEET

The board conducted several closed meetings during the years ended June 30, 1999 and 2000; however, the minutes did not always document the related vote or the reasons for closing the meeting. State law requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session.

The board minutes did not always include sufficient detail of matters discussed and actions taken at the board's meetings. For example, in March 1998 the district approved a proposal to upgrade the computers. The minutes do not indicate the bids that were submitted and which bid the district approved. In addition, the minutes of the board meetings did not always contain information required by state law. When the minutes indicated a motion had been passed, the minutes did not generally indicate the number of votes for and against.

The district did not have a formal policy regarding public access to district records. A formal policy regarding access to district records would establish guidelines for the district to make records available to the public. This policy should establish a person to contact and an address to mail requests for access to records. State law lists requirements for making district records available to the public.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Board of Directors  
Lincoln Community Nursing Home District  
Lincoln, Missouri 65338

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Lincoln Community Nursing Home District. The nursing home district had engaged Wilson, Toellner & Associates, Certified Public Accountants (CPA), to perform a financial audit of the district for the year ended June 30, 2000. To minimize any duplication of effort, we reviewed the report and substantiating working papers of the CPA. Our audit of the district included, but was not limited to, the year ended June 30, 2000. The objectives of this audit were to:

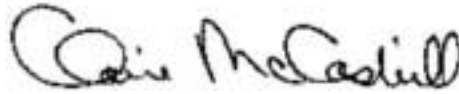

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, policies, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, policies, and various district financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the district and was not subjected to the auditing procedures applied during our audit of the district.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the Lincoln Community Nursing Home District.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

September 26, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     |                       |
|---------------------|-----------------------|

| Audit Manager:      | John Luetkemeyer, CPA |
| Audit In-Charge:    | Nicole Brackman       |

## HISTORY AND ORGANIZATION

## LINCOLN COMMUNITY NURSING HOME DISTRICT HISTORY AND ORGANIZATION

The Lincoln Community Nursing Home District is located in Benton and Pettis Counties and is a nursing home district established pursuant to Chapter 198, RSMo. The district was organized following voter approval in July 1969. The district operates a 60 bed nursing home in Lincoln, Missouri. At June 30, 2000, the district had 60 employees.

A six-member Board is elected for three-year terms, serves without compensation, and is the policy-making body for the district's operations. Members of the Board at June 30, 2000 and their current terms of office are:

| <u>Name and Position</u>              | <u>Current Term Expires</u>    |
|---------------------------------------|--------------------------------|
| Jerry Rank, President                 | April 2003                     |
| Dr. Donald J. Allcorn, Vice President | April 2001                     |
| Janice Swearngin, Secretary           | April 2002                     |
| Barbara Mehrens, Treasurer            | April 2001                     |
| Rhonda Reedy, Member                  | April 2003                     |
| Gary Neumann, Member                  | April 2002                     |
| <br><u>Other Principal Official</u>   | <br><u>Annual Compensation</u> |
| Erma Leming, Administrator            | \$47,629                       |

The elected officials and the employees are covered by a \$2,000,000 public official liability bond for each wrongful act.

Assessed valuation and tax rate information for the district are as follows:

|                    |             |             |
|--------------------|-------------|-------------|
|                    | <u>1999</u> | <u>1998</u> |
| Assessed Valuation | 31,761,219  | 30,571,569  |
| Tax Rate           | .05         | .05         |

## MANAGEMENT ADVISORY REPORT

## LINCOLN COMMUNITY NURSING HOME DISTRICT SUMMARY OF FINDINGS

1. Expenditures (pages 7-9)

The district does not have a formal bidding policy. A listing of checks is not approved by the board prior to payment and included with the minutes and the receipt of goods or services is not indicated on some invoices. The district made some expenditures which were not a prudent use of public funds and supporting documentation was not retained for a disbursement made in 1998.

2. Budgets and Financial Reporting (pages 9-11)

A budget was not prepared for the year ended June 30, 1998 and the budget prepared for the year ended June 30, 1999 was not adopted by the board. The district overspent the budget for the year ended June 30, 2000. Financial reports were not filed on a timely basis with the State Auditor's office.

3. Meetings, Minutes, and Records (pages 11-13)

The minutes did not always indicate why the board went into a closed session. The board minutes were not signed by the president and were not always signed by the secretary. The minutes did not always include sufficient detail of matters discussed and actions taken at the board's meetings. The tentative agenda is not included with the posting of the notice of the monthly board meeting. The district does not have a formal policy regarding public access to district records.

4. Property Records (pages 13-14)

The district has not prepared and maintained detailed property records.

5. By-Laws (page 14)

The district's by-laws have not been updated to reflect current operations.

LINCOLN COMMUNITY NURSING HOME DISTRICT  
MANAGEMENT ADVISORY REPORT –

|           |                     |
|-----------|---------------------|
| <b>1.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. The district does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. During the past several years, bids were either not solicited, bid documentation was not retained, or the lowest bid was not always accepted. Examples include, bid documentation could not be located for a \$3,341 folding door and the district spent \$9,690 for computers and the lowest bid (which was \$9,290) was not accepted. There was no documentation to indicate the reason why the higher bid was accepted.

Formal bidding procedures for major purchases provide a framework for economical management of district resources and help ensure the district receives fair value by contracting with the lowest and best bidders. Competitive bidding helps ensure all parties are given an opportunity to participate in the district's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected.

- B. The Office Manager prepares a listing of checks for the board to review. However, the register is for checks that have already been paid and the listing is not initialed to note approval by the board. The president of the board began signing checks in November 1999; however, the president does not review the supporting documentation. Prior to November 1999, only the Administrator or the Office Manager signed checks.

Good business practices require all disbursements to be closely scrutinized by the board and properly authorized. Failure to properly review supporting documentation and document the board's approval of disbursements increases the possibility of inappropriate disbursements occurring.

- C. In December 1999 and 1998, the district purchased \$50 employee gift certificates from a local merchandise store at a total cost of approximately \$3,500 in both 1999 and 1998. Also, in November 1999 the district purchased turkeys for employees at a total cost of \$715. In addition, the district disburses \$50 in an employee drawing at each pay period. In total, the district spent \$1300 during 1999 for these drawings. This additional compensation is not reported on the employee's W-2. In addition, a vendor invoice or other supporting documentation was not retained for the gift certificates purchased in 1998.

The district's residents place a fiduciary trust in their public officials to expend public funds in a necessary and prudent manner. These purchases do not appear to represent a necessary and prudent use of public funds. In addition, all expenditures should be supported by vendor invoices or paid receipts to ensure the obligation was actually incurred.

- D. Receipt of goods or services is not always indicated on the invoice prior to an expenditure being approved for payment. The office manager indicated that a form is always filled out which notes the date the goods were received, however she does not always retain this document. The documentation of the receipt of goods or services is necessary to ensure the district actually received the items or services being paid.

**WE RECOMMEND** the Board of Directors:

- A. Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected.
- B. Ensure detailed and complete listings of bills are prepared, the board's approval is reflected on the listing, and the listing is retained. In addition, the board should ensure it performs adequate reviews of all disbursements and the supporting documentation.
- C. Ensure all expenditures from district monies are a necessary and prudent use of public funds. In addition, the board should ensure all employee compensation is properly reported to the IRS, and that adequate supporting documentation is retained for all expenditures.
- D. Ensure the receipt of goods or services is indicated on invoices prior to them being approved for payment and this documentation is retained.

**AUDITEE'S RESPONSE**

- A. *The Lincoln Community Nursing Home Board of Directors approved a formal bidding policy in the July 2000 board meeting. A copy of said policy will be placed in the board minutes notebook in the Administrator's office. Since the July 2000 board meeting, all purchases for \$1,000 and under will be the decision of the Administrator, purchases from \$1,000 to \$3,000 will be determined by the Board of Directors and purchases over \$3,000 will be through a bidding process, either by public notice or telephone bids from vendors that deal with the item being selected. Henceforth, all board minutes will be more specific as to why and/or why not bids are accepted. This information will be maintained with board minutes in the month they were discussed, with supporting documentation if available.*
- B. *The Lincoln Community Nursing Home Board of Directors, since June 2000, receives a copy of the prior month's check register and it votes to approve it. The president, treasurer and*

*administrator will sign after approval. This signed copy will be kept in the board minutes notebook in the Administrator's office. The Administrator or Office Manager and one board member must sign all checks. The board accepted this process in October 1999.*

- C. *The Lincoln Community Nursing Home offers an attendance incentive which is the \$50 drawing for each pay period to one employee. This is positive motivation for everyone to work their shifts as posted, and this is in an effort to have staff at work to give proper resident care. Since September 2000 this has been paid on the following paycheck so that it shows up on their W-2 at the end of the year.*

*The turkeys at Thanksgiving and the \$50 gift certificates at Christmas for each employee each year are also positive motivations. These are given to people that are willing to come in and take care of community family members that families are no longer able to take care of on their own. The Lincoln Community Nursing Home Board of Directors feels this is a much more positive motivation action rather than an unnecessary and imprudent use of public funds.*

*The Lincoln Community Nursing Home now has a more efficient record keeping system than in 1998. When an item is purchased the purchasing department head fills out a facility check request form (including vendor, purchase date, date received, account code and Administrator's approval) and attaches it to the invoice. These are then maintained in the business office with the check stub to the vendor.*

- D. *The Lincoln Community Nursing Home Board of Directors feels that with the policy of keeping the facility check request with the invoice with the vendor check stub will produce a paper trail of items received and approved by the Administrator prior to payment. Then, maintaining that information in the business office will ensure it is kept as a part of the permanent records.*

|   |
|---|
| <b>2. Budgets and Financial Reporting</b> |
|---|

- A. The district did not prepare a budget for the year ended June 30, 1998 and the budget prepared for the year ended June 30, 1999 was not adopted by the board. Section 67.010, RSMo 1994, requires the preparation of an annual budget which shall present a complete financial plan for the ensuing year. In addition, the approved budget for the year ended June 30, 2000, did not include a budget message, a comparative statement of actual revenues and expenditures by budget category for the two preceding years, or a budget summary as required by law.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of district operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures. A complete budget should include separate revenue and

expenditure estimations by account, and include the beginning available resources and reasonable estimates of ending available resources. The budget should also include a budget message and comparisons of actual or estimated revenues and expenditures for the two preceding fiscal years.

- B. For the year ended June 30, 2000, the district approved expenditures in excess of the budgeted amount by \$35,809. Currently, the board does not receive periodic reports so that it can compare actual revenues and expenditures to budgeted amounts.

The budget process provides a means to allocate financial resources in advance. Failure to adhere to the expenditure limits imposed by the budgets weakens the effectiveness of this process. Section 67.040, RSMo 1994, allows for budget increases, but only after the governing body officially adopts a resolution setting forth the facts and reasons. Section 67.080, RSMo 1994, provides that no expenditure of public monies shall be made unless it is authorized in the budget. The district should require that timely budget to actual comparisons are received and reviewed prior to approving expenditures.

- C. Section 105.145, RSMo 1994, requires the district to file a financial report with the State Auditor's office annually. The district filed the financial statements for each of the last 5 fiscal years in September 1999. The financial report is to be filed within four months after the end of the district's fiscal year (the requirement is six months after the end of the fiscal year if an audit report prepared by a certified public accountant (CPA) is filed).

**WE RECOMMEND** the Board of Directors:

- A. Prepare and adopt annual budgets in accordance with state law.
- B. Periodically compare actual revenues and expenditures with budgeted amounts to help ensure expenditures do not exceed the amounts approved in the budget. If circumstances require expenditures in excess of amounts budgeted, a formal resolution should be adopted authorizing the additional expenditures and documenting the reasons for such.
- C. Ensure annual financial reports are filed with the State Auditor's office as required and that such reports are filed within four months after the end of the district's fiscal year (or six months after the end of the fiscal year if a CPA audit report is filed).

**AUDITEE'S RESPONSE**

- A. *The Lincoln Community Nursing Home Board of Directors is unaware as to why there were no budgets before 1998, since those Administrators are not present to answer. The Lincoln Community Nursing Home Board of Directors have approved a budget for the years ending June 30, 1999, 2000 and 2001. The budget for 1999 was presented to the board in October*

*1998, but not formally approved, and since that time all budgets have and will continue to be approved before the start of the new budget year. The budget for 2001 does have a message, comparative statement of actual revenues and expenditures by budget category for the two preceding years and a budget summary. The Lincoln Community Nursing Home Board of Directors will ensure that all future budgets carry the necessary components.*

- B. The Lincoln Community Nursing Home Board of Directors now receives a copy of the actual versus budgeted accounting each month for it to review and keep. This is a part of the Treasurer's Report approved each month by the Lincoln Community Nursing Home Board of Directors. The Lincoln Community Nursing Home Board of Directors will monitor and amend the budget according to expenditures through the year, to ensure that expenditures do not exceed the budgeted expenses.*
- C. The Lincoln Community Nursing Home Board of Directors will ensure that each year a copy of the financial report is submitted to the Office of State Auditor on a timely basis. The Board of Directors was unaware, as was the Administrator, that the previous years had not been received until notified on September 23, 1999, by the Office of State Auditor.*

|  |
|--|
| <b>3. Meetings, Minutes, and Records</b> |
|--|

- A. The board conducted several closed meetings during the years ended June 30, 1999 and 2000; however, the minutes did not always document the related vote or the reasons for closing the meeting. Section 610.022, RSMo Cum. Supp. 1999, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session.
- B. The board minutes are prepared by the board secretary, but the minutes are not signed by the President and are not always signed by the board secretary. The board minutes should be signed by the President to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the board's meetings.
- C. The board minutes did not always include sufficient detail of matters discussed and actions taken at the board's meetings. For example, in March 1998 the district approved a proposal to upgrade the computers. The minutes do not indicate the bids that were submitted and which bid the district approved. In addition, the minutes of the board meetings did not always contain information required by statute. When the minutes indicated a motion had been passed, the minutes did not generally indicate the number of votes for and against.

Complete and accurate minutes provide an official record of board actions and decisions. In addition, Section 610.020, RSMo 1994 states that "the minutes shall include the date, time, place, members present, members absent, and a record of votes taken."

- D. The board holds regular meetings on the third Tuesday of each month. Notice of the regular board meetings is posted at the nursing home; however a tentative agenda indicating what is to be discussed at the monthly board meeting is not posted as required. Section 610.020, RSMo Cum. Supp. 1999, requires a tentative agenda to be included in the notice posted for an upcoming meeting.
- E. The district does not have a formal policy regarding public access to district records. A formal policy regarding access to district records would establish guidelines for the district to make records available to the public. This policy should establish a person to contact and an address to mail requests for access to records. Section 610.023, RSMo Supp. 1999, lists requirements for making district records available to the public.

**WE RECOMMEND** the Board of Directors:

- A. Hold a vote to go into closed session, state the reasons for going into closed session, publicly disclose the final disposition of applicable matters discussed in closed session, and ensure only allowable, specified subjects are discussed in closed session as required by state law.
- B. Ensure board minutes are signed by the secretary and by the President to attest to their completeness and accuracy.
- C. Ensure all significant discussions, actions taken, and information required by state law are included in the minutes.
- D. Ensure the notices posted advising the public of upcoming meetings include tentative agendas as required by state law.
- E. Establish formal written policies and procedures regarding public access to district records.

**AUDITEE'S RESPONSE**

- A. *The Lincoln Community Nursing Home Board of Directors agrees that if it goes into closed session it will request the reason, and vote on going into closed session before doing so. This information will be placed in the minutes and maintained as part of the record.*
- B. *The Lincoln Community Nursing Home Board of Directors does agree that the Secretary, President, and Administrator will sign all minutes after approval.*
- C. *The Lincoln Community Nursing Home Board of Directors, since June 2000, has seen to it that the minutes are more detailed and specific information, including attaching any corroborating documentation to the minutes. The Board of Directors, since June 2000, has*

*seen to it that when a vote is taken the number and names of those voting for and against an action will be recorded. This is accomplished in most cases, because our board votes unanimously on an issue.*

- D. The Lincoln Community Nursing Home Administrator, since June 2000 has been placing a copy of the tentative agenda in the usual notice position.*
- E. The Lincoln Community Nursing Home Board of Directors, in July 2000, approved a "request of records" form. This form is to be filled out and returned by anyone requesting records from the Lincoln Community Nursing Home. The request form names the Administrator as the official keeper of records and announces the cost to be incurred for gathering and copying said records, if copies are requested. A copy of said request will be kept in the board minutes notebook in the Administrator's office.*

|                            |
|----------------------------|
| <b>4. Property Records</b> |
|----------------------------|

The district has not prepared and maintained permanent, detailed property records for general fixed assets, including the cost of land, buildings, equipment, and furniture owned by the district. In addition, annual physical inventories are not performed.

Property records for general fixed assets are necessary to ensure accountability for all items purchased and owned.

To develop appropriate records and procedures for general fixed assets, the district needs to undertake a comprehensive review of all property owned by the district. Assets should be counted, tagged for specific identification, and recorded by description and serial number in a detailed property ledger at historical cost or estimated historical cost if the original cost is not available. The district should properly record all fixed asset transactions, and ensure the accuracy of the recorded fixed assets. Periodically, the district should take physical counts of its assets and compare them to the detailed records.

**WE RECOMMEND** the Board of Directors establish property records for general fixed assets that include all pertinent information for each asset, such as tag number, description, cost, acquisition date, location, and subsequent disposition. In addition, annual physical inventories should be performed.

**AUDITEE'S RESPONSE**

*The Lincoln Community Nursing Home Administrator has a departmental inventory of all items in each department at this time. Since some items had been in the facility for some time it was hard to determine the cost of those items, so no dollar value was placed on those items. The inventory list will be maintained and updated with all new purchases as well as the cost of said purchase. This inventory list will be updated annually during the annual inventory for the close of the fiscal year.*

*This assets inventory will be maintained in the Administrator's office, in the budget folder for that year.*

**5.**

**By-Laws**

The district's by-laws are outdated. The district has not reviewed its by-laws to ensure current district operations are in agreement.

For example, the by-laws indicate that the meetings are to be held the first Monday of each month. Currently, the board holds the monthly meetings on the third Tuesday of each month. The by-laws also indicate that checks are to be signed by the secretary and the treasurer. The checks are signed by the Administrator or Office Manager and recently the President also started signing checks.

The district should abide by its by-laws or revise them to reflect the current wishes of the board.

**WE RECOMMEND** the Board of Directors update the by-laws to reflect the board's intentions, and ensure current operations comply with the adopted by-laws.

**AUDITEE'S RESPONSE**

*This recommendation was implemented effective September 2000.*

This report is intended for the information of the district's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

*Missouri State Auditor*

AUDIT OF  
LEASED SPACE  
MANAGEMENT PRACTICES

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-122  
December 5, 2000

Leasing operations are effectively managed, and  
with a few enhancements could be more effective.

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

PERFORMANCE AUDIT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Management of leased space was effective and with some enhancements could be more effective.**

This report addresses the State Auditor's Office assessment of whether Division of Facility Management (DFM) officials have provided effective oversight over the leasing of office space for state agencies and whether agency officials have been encouraged to support the economic development of inner cities through the leasing of office space.

Leasing personnel have successfully used the formal bid, informal bid, or negotiated methods in determining agency lease rates. Our review disclosed that there are some opportunities to improve operations. Currently, leasing personnel are not required to perform market analyses to determine fair market rental rates, nor are they required to document results when negotiating lease renewals or new leases. The lack of market analyses of lease areas under consideration and lack of documented negotiation results raised questions as to whether leasing officials could be assured the lowest possible lease rates were achieved.

Community-based actions challenging leasing decisions have led to delays and changes in leasing decisions. Audit results showed examples where community activists resisted agency placements in the community or agency relocations to another community. In one example, leasing officials attempted to consolidate several agencies at one location, but, community activists succeeded in preventing one agency from relocating out of the community into the new consolidated space in a different community. As a result, two locations are necessary and the state will incur an additional \$268,835 in leasing costs over the next 5 years.

DFM leasing officials have allowed agency officials to fund unique requirements and major renovations to agency leased space through lease payments rather than from agency funds. As a result, lease costs, renovation costs, and the potential for shortfalls in lease funding have increased. For example, one lease will cost the state an estimated additional \$406,000 over the next 10 years because leasing officials allowed unique requirements and major renovations to be paid by the lease. DFM leasing officials now believe unique requirements and major renovations should have been paid out of agency operating funds and are taking action to stop this practice.

(over)

YET LOW SHEET

The state does not have a policy, and leasing officials do not have any guidance addressing locating leased state offices in the inner city as a means of supporting the economic development of those cities. Our review of rationale used by most agency officials for locating leased space in the St. Louis and Kansas City metropolitan areas showed the reasons for locating office space outside these cities were justified. Some agency officials did not have compelling reasons for placing offices outside the city. By locating state agencies in the inner cities, inner cities stand to gain the benefits associated with having additional workers in the city and enhanced employment opportunities that state agencies afford.

**CLAIRE C. McCASKILL**  
Missouri State Auditor

Honorable Roger Wilson, Governor  
Members of the General Assembly  
Commissioner, Office of Administration  
Director, Division of Facilities Management

The State Auditor's Office performed an audit of the management of leased space by the Office of Administration, Division of Facilities Management (DFM), Facilities Leasing Section (FLS). FLS officials manage leases for most state agencies and are responsible for the acquisition of necessary space through the lease process. Audit objectives included determining whether leasing officials have provided appropriate oversight over the leasing of office space for state agencies, and whether agency officials have been encouraged to support the economic development of inner cities through the leasing of office space.

We determined that management of leasing operations was effective. FLS officials successfully used the formal bid, informal bid, or negotiated methods to determine agency lease rates. However, with some enhancements, management officials could be more effective. Leasing policies and procedures do not require leasing personnel to perform market analyses or document negotiation results, and community activists are influencing leasing decisions. In addition, lease rates are increasing because unique agency requirements are being funded through lease agreements rather than agency operating funds. Moreover, the state has no policy on locating leased state offices in the inner cities as a means of supporting the economic development of those cities.

We concluded that DFM officials could improve their operations by: (1) performing market analyses of lease areas under consideration and documenting negotiation results; (2) preplanning for community activists when sensitive leases are being planned; (3) strengthening its guidance concerning base rental rates and one time payments, and (4) requiring agencies to fund unique requirements and major renovations out of agency operating funds.

In addition, inner cities could gain the benefits associated with having additional workers and enhanced employment opportunities that state agencies afford, by locating state agencies in the inner cities.

Claire McCaskill  
State Auditor

October 6, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     | A. Dailey              |

## **RESULTS AND RECOMMENDATIONS**

### **1. DFM Provides Effective Oversight of Leasing Operations and, with Some Enhancements, DFM Could Be More Effective**

Our review of 35 of 451 office leases showed that FLS officials provide effective oversight of leasing operations. Leasing personnel successfully use the formal bid, informal bid, or negotiated methods to determine agency lease rates. However, leasing personnel could improve operations by (i) performing market analyses to determine fair market rental rates; (ii) documenting results when negotiating lease renewals or new leases; and (iii) preplanning for community activists when sensitive leases are being planned. Our review of leasing policies, procedures, and active leases disclosed that

- leasing personnel are not required to conduct a market analysis of areas under consideration by agencies or to document negotiation results; and
- community activists can influence decisions about placing an agency in the community or to move an agency to another community.

The lack of a market analysis of lease areas under consideration and lack of documented negotiation results, raises questions as to whether FLS officials can be assured the lowest possible lease rates are obtained. In addition, community action to influence the placement of agency lease space causes delays in obtaining lease space for agencies and in some cases, causes the state to incur additional lease costs.

### **Background**

The FLS is an integral part of the DFM and is responsible for leased property acquired for use by selected agencies statewide. Leasing officials establish policies and procedures governing the acquisition and management of leased property. The competitive bid process is the state's primary method for the acquisition of leased real property. The competitive bid process involves publicly advertising the terms, conditions, and requirements of a lease and receiving sealed bids which are evaluated. However, FLS policies also allow exceptions to the formal bid process when deemed in the best interest of the state to pursue another process. This occurs usually when the agency needs to expedite obtaining a new lease or when desiring to renew an existing lease. Leasing personnel use two methods of procurement to implement these exceptions—the informal bid process and negotiations.

The informal bid process seeks proposals from vendors without publishing and advertising for bid. They usually use a bidders list to identify vendors. The informal bid process does not require bidders to submit a bid or performance bond, and may not require sealed plans to be submitted.

The negotiation process requires leasing officials to negotiate with prospective landlords to secure the best and most proper terms and conditions.

## Leasing personnel follow policies and procedures

Our review of 35 leases disclosed that leasing personnel followed policies and procedures for procuring leased space for state agencies. Of the 35 leases reviewed, 16 were competitively bid, 3 were informally bid and 16 were negotiated. A description of our results follows.

**Competitive Bids:** Leasing personnel reviewed space requirements, notified potential interested parties, and advertised requirements. They opened and reviewed sealed bids submitted to FLS. A review committee of leasing and agency personnel, evaluated bids with 75 percent of the evaluation based on price and 25 percent based on subjective factors.

Leases were  
bid properly

**Informal Bids:** Leasing personnel selected bidders from whom to solicit bids, reviewed the bids, and selected the winning bidder.

**Negotiated Leases:** Leasing personnel conducted negotiations and received reasonable lease rates.

### Negotiation process lacks market analysis and documented results

Although leasing personnel followed procedures, formal market analyses were not performed to determine the reasonableness of proposed lease rates. FLS procedures did not require a formal market analysis of lease rates. Instead, leasing officials depended on the expertise of area leasing coordinators to know lease rates for the areas under their jurisdiction. The area coordinators based their knowledge on other state lease rates in the area or discussions with local realtors in the area under consideration. A periodic market analysis should be made to ensure that prevailing lease rates are identified and documented to augment the expertise of the area coordinators. This market analysis could be used to evaluate the decisions made by the area coordinators and to expose deviations from prevailing rates. Accordingly, appropriate justifications for deviations could be reviewed and analyzed.

Lease  
documentation  
lacks audit  
trail

We did not find evidence of the negotiations for 13 of the 16 negotiated leases included in our audit. Negotiations were conducted informally, and FLS procedures did not require leasing personnel to document results of the negotiations. Lease coordinators conducted negotiations by telephone, e-mail, or through face-to-face conversations with potential landlords. Leasing coordinators conducted negotiations, and the leasing manager or Assistant Director made final decisions on the reasonableness of lease rates or whether additional negotiations were necessary. For 3 of the 16 leases, we found some evidence of negotiations such as memos in which the landlord or his representative and leasing personnel discussed desired improvements and potential lease costs for the renewed lease.

The lease rates for the 35 leases in our audit were reasonable and comparable to rates in the areas where the leases were located. Therefore, there was not any adverse immediate

effect from the lack of documentation discussed above. However, without appropriate documentation and audit trail, there is no assurance that future leases will meet prevailing rates, or that FLS management will have the appropriate management tools to determine the appropriateness of lease rates.

**Leasing decisions have been impacted by community actions that caused delays and increased lease costs**

According to FLS officials, leasing decisions have been impacted because some community activists resisted the placement of state agency offices in neighborhoods, or other community activists sought to have agencies locate or stay in their communities. This community activism generally would lead to complaints to state legislators who took action to assist the communities in defeating the placement of agencies in their community or helping them keep agencies within their communities.

Community  
activists  
caused delays

In two cases, constituents did not support the proposed inclusion of probation and parole offices in local neighborhoods. Community activists complained to state representatives and state representatives interceded on their behalf. In these cases, leasing officials accommodated the community and legislative representatives by relocating these offices. Although the total cost impact of these moves is not yet known, relocating one of the probation and parole offices with 16,580 square feet is expected to increase the original cost per square foot by \$1.18, or an additional \$205,000 in leasing costs over the next 10.5 years.

In another case, community leaders resisted the state's plan to consolidate agencies in one location by relocating agency offices from two geographic locations into one. Leasing officials awarded a contract through the formal bid process that would have required the office located in one community to relocate to another community. The successful bidder quoted a lease rate of \$7.89 a square foot for the total 29,538 square feet of office space required. Community activists from the losing community succeeded in stopping the move until leasing officials agreed to locate one office within the community's boundaries. As a result, the state had to award leases in two locations instead of one. This increased the total lease cost for space by \$53,767. These lease changes caused one agency to extend a lease because new space was not available at an additional annual cost of \$20,000. Since two leases had to be awarded in two locations, the total square footage required for office space increased by 29 square feet at a cost of \$53,767.

### Comparison of Lease Decisions

| Lease                | Locations               | Total Square Feet | Total Annual Cost |
|----------------------|-------------------------|-------------------|-------------------|
| <b>Original Plan</b> | Farmington              | 29,538            | \$233,000         |
| <b>Revised Plan</b>  | Park Hills & Farmington | 29, 568           | 286,767           |
| <b>Difference</b>    |                         | 29                | 53,767            |

The original bid of \$233,000 represented consolidated space for several agencies. Since the community activists prevailed, the state will now have to lease two buildings in different locations at higher costs. As a result, the state will incur an additional \$53,767 in leasing costs per year, or an additional \$268,835 over the next 5 years.

Community based influence on state agency space location decisions may be reduced by working more closely with affected community activists and state legislators before taking action on sensitive leases.

### Recommendations

We recommend DFM officials strengthen oversight of leasing operations by directing FLS officials to:

- 1.1 perform market analyses of lease locations under consideration and document negotiation results; and
- 1.2 work more closely with communities and legislators in planning where to locate certain agencies in communities prior to initiating the leasing process.

### Office of Administration Comments

*The Director, Division of Facilities Management agreed with the recommendations and provided acceptable implementation plans. Specifically, he agreed to ensure that contract files contain proper documentation of negotiations and a description of the type of market place analysis that was used. The Director also agreed to work with communities and legislators prior to initiating the leasing process for locations with the caveat that care be taken to avoid undo influence on the selection and evaluation process. (See Appendix III, page 16, for detailed comments).*

## **2. Use of Lease Funds to Pay for Unique Requirements and Major Renovations Has Increased Lease Costs**

Leasing officials have allowed agencies to fund unique requirements and major renovations to agency lease space through lease payments. However, leasing officials now believe unique agency requirements and major renovations should have been paid out of agency operating funds and are taking action to stop this practice. This has occurred because leasing

- officials have not been consistent in what they allowed agency officials to include as lease requirements;
- guidance did not specify what requirements should be paid with leasing funds; and
- guidance discouraged one-time payments for agency requirements from agency operating funds.

In addition, leasing officials believe agencies have included unique requirements and major renovations in lease requirements as a means of avoiding having to address those items in agency operating funds budgets.

This has resulted in

- increased lease rates;
- increased statewide average lease costs used by leasing for budget purposes; and
- potential shortfalls in lease funding.

### **Background**

Every year, leasing personnel work with agency officials to determine leased space requirements in order to determine an overall budget for all leased space. Leasing personnel determine an average statewide lease rate for new space requirements and leases coming up for renewal. For renewals, if an agency's lease rate is above the statewide average rate, leasing officials use an assumed inflation rate of about 7 percent, which includes minor renovations of up to \$25,000, for budgeting purposes. This formulates the basis for determining the total budget needed to cover all FLS leases. The state funds lease payments out of funds authorized by House Bill 13 and that act states funds are to be used for real property leases and related services and utilities for various departments of state government.

### **Lease costs have increased as a result of including major renovations and unique requirements in leases**

Leasing officials provided us with case examples where agency unique requirements and major renovations have contributed to increased annual lease costs. One example also demonstrates how leasing officials have been inconsistent by allowing some unique requirements to be paid

with one-time payments from the agency's operating funds while allowing other unique requirements to be included in the lease.

Of the examples, two involve probation and parole offices, one involves a youth services office, and one involves consolidating several agencies at one location.

- The original lease for a probation and parole office located in St Louis included 11,638 square feet at a price of \$11.71 per square foot. The new lease increased the square footage to 20,302 at a price of \$14.36 per square foot. Major renovations were conducted on the existing space as well as construction of the additional space. A leasing official noted that the costs of the lease, without the major renovations, would have increased only a small amount. However, based on their experience with square footage rates in the area, the official believed that at least \$2 of the \$2.65 increase could be attributed to major renovations of the existing space and some unique requirements included in the agency's request. The remaining \$.65 is attributed to inflation. As a result, this will cost the state an estimated additional \$406,000 in leasing costs over the next 10 years. Examples of unique requirements included were:

Unique  
requirements  
included in  
lease

- safety glass windows installed at a cost of \$200 per window;
- convex mirrors installed in hallways and waiting areas;
- keyless locking system installed on staff entrances and an entrance protected from the weather; and
- a urinalysis room equipped with a chemical resistant countertop, lockable storage cabinets above the counter; a floor drain, and a keyless lock on the door.

- The original lease for a probation and parole office located in Kansas City cost \$10.85 per square foot for 5,130 square feet of office space. A leasing official noted that the building had been fire bombed and the landlord had to restore the building to original condition. Probation and parole personnel needed more space, so it was expanded to 12,341 square feet. In addition, the agency personnel requested other major renovations and unique requirements which leasing officials approved. The cost of the lease increased to \$13.81 per square foot for an increase of \$2.96 a square foot. Based on experience with square footage rates in the area, a leasing official estimated that unique requirements and major renovations accounted for approximately \$1.50 of the \$2.96 increase in cost or an additional \$130,000 cost over the next 7 years. The remaining increase can be attributed to increase in square footage and inflation.

Excess costs  
caused by  
state agency

- Another case involved consolidating several agencies at one location. In this example, leasing officials persuaded agencies to make a one-time payment for unique requirements from agency operating funds because leasing officials did not believe agencies should have to absorb additional costs for unique requirements of other agencies. However, leasing officials also allowed some unique requirements to be funded through the lease.

- Examples, along with cost estimates for the items paid from agency operating funds, are shown below.
  - Department of Corrections - Probation and Parole
    - Armory \$15,000
    - Urinalysis Room \$6,900
    - Glass Vision Panels \$3,791
    - Voice data and electrical changes \$983
    - Keyless locks \$1,540
  - Department of Elementary and Secondary Education - Vocational Rehabilitation
    - Pad for satellite dish \$3,791
    - Keyless locks \$1,540
    - Voice data and electrical changes \$4,943
  - Department of Elementary and Secondary Education - Disability Determinations
    - Keyless locks \$3,850
    - Door changes \$850
    - Voice data and electrical changes \$9,329
  - Department of Labor and Industrial Relations - Employment Security
    - Keyless locks \$3,080
    - Voice data and electrical changes \$1,640

Examples of unique requirements that were funded through the lease are shown below.

- Department of Labor and Industrial Relations
  - Sign identifying agency.
  - Power assisted doors
  - Special placement of lobby, restrooms and multipurpose rooms
  - Special requirements for a raised platform for a receptionist
  - Special window in the manager's office
- Department of Elementary and Secondary Education
  - Two entrance doors to interview room.
  - Higher grade door on offices
  - Special requirements to place a satellite dish
- Department of Corrections
  - Special requirements for receptionist area
  - Higher grade insulation in rooms
  - Higher grade doors to work areas

Leasing officials sought competitive bids and awarded a contract for the construction of a new building to house various state agencies. The winning bid came in at \$13.96 a square foot for the office space. When additional agencies needed space, leasing

officials decided to add 10,000 square feet of space. With the additional square footage and the inclusion of unique requirements, the lease rate increased to \$15.02 a square foot. A leasing official, based on experience with the square footage rate in the area, believed that unique requirements, such as those shown above, adversely affected the original lease rate and accounted for approximately 50 percent of the \$1.06 per square foot increase. The remaining increase can be attributed to the increase in square footage. This results in an increase in lease cost to the state of approximately \$281,000 over the 10-year lease.

### **Practice leads to increased budget requests and potential funding shortfalls**

Although leasing officials have not determined the actual impact, they believe their practice of funding unique requirements and major renovations has contributed to the increase in average lease rates used for budgeting purposes and the latest increase to the lease budget. For example, for fiscal years 1999 through 2001, the average statewide rental rates were fairly stable at about \$11.50 to \$12.00 a square foot. However, for fiscal years 2002/2003, the average rental rate increased to \$13.50 a square foot and leasing officials used this rate in formulating the fiscal year 2002/2003 budget request for leasing.

Leasing officials also believe this practice could lead to shortfalls in lease funding. Shortfalls could occur because budget estimates are based on square footage and do not include unique requirements or major renovations. If shortfalls in lease funding occur, FLS officials will have to seek additional lease funding from the state legislature.

### **Guidance has been contradictory and not clear**

FLS guidance states that lease funds should only pay for base rental rates, however, the guidance does not define what is included in base rental rates. In addition, FLS leasing policy is somewhat contradictory in that it also discourages making one-time payments from operating funds in order to pay for unique requirements or major renovations. FLS guidance states, in part, that DFM and the tenant agency will attempt to avoid making one-time payments and if such payments are necessary, they will be funded from the tenant agency's operating funds.

Leasing officials have also contributed to the problem by sending a mixed message to agencies. At times, leasing officials have allowed agencies to include unique requirements and major renovations in lease agreements while at other times they have insisted agency officials pay for these items with agency operating funds. (*See pages 8-9 for case examples.*)

According to leasing officials, House Bill 13 funds are intended to cover only base rental rates. However, they now recognize that legislative and leasing guidance is not clear as to what is covered in base rental rates. In October 2000, FLS officials sought advice from Office of Administration Budget officials on the appropriateness of using lease funds to pay for unique requirements and major renovations. Office of Administration Budget officials proposed that unique requirements be included in the House Bill 13 budget as separate items and that agency officials defend the requests for funding during budget hearings. If approved, the funding would be available to be used for one-time payments for unique requirements. The cost of these

improvements would no longer be included in lease agreements. According to a budget official, the Commissioner for the Office of Administration has approved this proposal and plans to submit it to the governor-elect for his consideration in the December time frame

### **Officials are taking action to limit practice**

Leasing officials' concerns with rising rental rates, the intended use of lease funding, and potential shortfalls in lease funding has caused them to closely review unique requirements and major renovations requested in agency lease requirements. For example, for leases being renewed in calendar year 2000, leasing officials are attempting to prevent agencies from including unique requirements and major renovations in lease requirements. Instead, leasing officials hope to convince agency officials to fund those requirements out of agency operating funds.

#### **Current action by leasing officials is encouraging**

Leasing officials informed us they have several agencies they are currently dealing with that want to include unique requirements or major renovations in lease agreements. For example, one agency has 14 leases that expired on June 30, 2000. Agency officials agreed to renew the leases for another 5 years. Several landlords agreed to renew leases at the current lease rate. However, agency officials now want renovations made to the space that will result in larger than expected increases to lease rates, according to leasing officials. The following are two examples that leasing officials are trying to resolve.

- One landlord has agreed to renew the lease of 9,150 square feet of office space at the existing price of \$9.10 a square foot. With proposed renovations, the landlord wants \$12.50 a square foot—a 37.4 percent increase in the lease rate or a \$31,110 increase in cost per year.
- In another case, the agency wants to relocate most walls and other significant reconstruction done on the space. If done, the cost per square foot will increase from \$7.66 to \$10.16, which is a change of \$2.50—a 32.6 percent increase. With 9,188 square feet of office space, this means an increase of \$22,970 per year.

Leasing officials currently do not plan to allow the proposed renovations to be paid for through the lease. Instead, they plan to renew the leases and advise the agency to seek budgetary approval from the legislature for the renovations. If the agency does not agree, the dispute will likely be escalated to the Commissioner of the Office of Administration for resolution and, according to a leasing official, the Commissioner could overrule leasing officials.

### **Conclusions**

Leasing officials' practice of allowing agencies to fund unique requirements and/or major renovations through leases has contributed to increases in lease rates and the need to increase the overall budget for state leases. If current practices continue, it is likely that budget shortfalls will

occur. In addition, the FLS policy is vague because it does not address the type of agency requirements that can be included in lease agreements, and it is contradictory because it discourages agencies from paying for unique requirements and major renovations with agency operating funds. Agencies have gotten mixed messages from leasing officials on including unique requirements and/or major renovations in lease requirements and are likely to believe it is appropriate.

## **Recommendations**

DFM officials should direct FLS officials to:

- 2.1 clarify and strengthen its policies to ensure that leasing officials have adequate criteria to determine what can be included in lease agreements; and
- 2.2 consistently follow policies and not allow unique requirements and major renovations to be funded through leases.

## **Office of Administration Comments**

*The Director, Division of Facilities Management agreed with the recommendations and provided acceptable implementation plans. The director stated that the special agency requirements should be a separate section within the leasing budget request rather than incorporated into the agency's operating budget. The director plans to use the boilerplate office specifications as the criteria for base rental rates and any deviations by agencies will be incorporated as a separate section of the leasing budget as a one-time decision item. (See Appendix III, page 16, for detailed comments).*

### **3. The State Is Missing an Opportunity to Support the Economic Development of Inner Cities**

The state does not have a policy for locating leased state offices in the inner city as a means of supporting economic development of the inner cities. As a result, FLS does not have any guidance or policies that address this issue. Our review of the rationale for locating leased office space in the St. Louis and Kansas City metropolitan areas showed that the majority of agency officials had sound reasons for locating office space outside these cities. However, we did find that some agency officials did not have compelling reasons for placing offices outside the city. The state does not have a policy because it has not addressed this issue. By not locating state offices in the inner cities, inner cities are deprived of job opportunities, tax revenues, and other benefits.

#### **The state does not have a policy on locating leased space in the inner city**

FLS guidance allows state agency officials to determine where to locate leased space. FLS officials do not question the location of agency offices unless they believe that the agency officials have unduly restricted the area of consideration, which in turn restricts competition. Our review of lease contracts confirmed that state agency officials specified areas in which they wanted to locate offices. None of the agency leasing officials we contacted were aware of any state requirement to locate in the inner cities, nor was it a consideration in their decision making process. Our review disclosed that there was reasonable justification to support decisions for locating offices outside the city in the metropolitan Kansas City and St. Louis areas. For example, of 18 division office locations reviewed, 12 were based on a need to effectively serve clients. Agency officials considered such things as where clients live and the availability of public transportation in locating offices

We found no compelling reasons to support county office location selections for 6 of the 18 divisions. For example, several located outside the cities based on a desire to be close to major highways. However, St. Louis and Kansas City both have good access to major highways.

#### **The federal government has addressed the issue of locating agencies in the inner cities**

The federal government has a policy that encourages the development and redevelopment of cities by locating federal facilities in urban areas. In 1978, the President of the United States issued Executive Order No. 12072, that states in part, “Federal facilities and Federal use of space in urban areas shall serve to strengthen the Nation’s cities and to make them attractive places to live and work. Such Federal space shall conserve existing urban resources and encourage the development and redevelopment of cities”

#### **Conclusion**

We believe inner cities stand to gain the benefits associated with having additional workers in the city and enhanced employment opportunities that state agencies afford by locating state agencies in the inner cities.

## **Recommendation**

We recommend:

- 3.1 the General Assembly consider establishing a policy that requires agencies, when seeking office space, to make an effort to obtain bids in urban areas unless there is a compelling reason for locating elsewhere, or maintain documentation that effort was made to negotiate space in urban areas in those instances where bids were appropriately not sought.

## **Office of Administration Comments**

*The Director, Division of Facilities Management agreed with the recommendations and provided acceptable implementation plans. The director stated that the recommendation will be explored with the new administration and the Joint Committee on Capital Improvements and Leases Oversight.*

## **OBJECTIVE, SCOPE AND METHODOLOGY**

### **Objectives**

Our objectives included determining whether (1) leasing officials have provided appropriate oversight over the leasing of office space for state agencies; and (2) agencies have been encouraged to support the economic development of inner cities through the leasing of office space.

### **Scope and Methodology**

To determine whether leasing officials have provided appropriate oversight, we judgmentally selected 35 of 451 office leases. The 35 leases represented new and renewed leases that were executed under leasing guidance that went into effect in August 1995. The majority of leases selected were located in metropolitan areas, such as St. Louis County, St. Louis City, Jackson County and Clay County. To accomplish our audit we reviewed

- documentation available in lease files and discussed contracts reviewed with knowledgeable officials to determine whether leasing personnel followed prescribed procedures in executing new and renewal lease contracts,
- selected contracts and contacted leasing agency representatives to ascertain the reasonableness of agency rationale used in locating agency-leased space,
- federal guidance used in locating federal agencies within the inner cities, and
- state statutes, and the code of state regulations.

We conducted our review from June through October 6, 2000. The audit was conducted in accordance with generally accepted government auditing standards.

**BACKGROUND**

In 1993, the state centralized leasing operations by creating the DFM under the Office of Administration. FLS officials manage leasing operations for the DFM. FLS officials manage leases for the majority of state agencies by overseeing approximately 600 contracts worth almost \$39 million, as of June 1, 2000. More specifically, FLS leases approximately 3.5 million square feet of office space at an annual cost of approximately \$35 million.

Statewide leasing operations are governed in accordance with Section 34.030 of the RSMo and 1 CSR 35-2 of the Code of State Regulations. Section 34.030 states that the commissioner of administration shall negotiate all leases, except for such departments that derive power to acquire lands from the state constitution.

1 CSR 35-2.040 establishes a uniform procedure for procuring leased real property. All acquisitions of leased property, including both newly executed leases and the extensions of existing leases after all renewal options have expired, shall be procured through publicly advertised competitive proposals, unless the commissioner of administration deems it to be in the best interest of the state to negotiate a particular procurement. For each lease, the commissioner of administration, in conjunction with the tenant/using agency, shall develop a Request for Proposal (RFP) for the property to be acquired. The commissioner of administration may suspend from bidding on state leases any individual or organization who (A) materially fails to comply with the provisions of an award from the state or a lease agreement with the state; (B) submits false or misleading information in response to an RFP; (C) takes actions that are intended to inhibit or prevent the operation of an open, competitive bid or proposal process; or (D) acts in a manner contrary to sound or ethical business practice, or in a manner deemed by the commissioner of administration to be detrimental to state leasing practice. A bidder/lessor may be required to submit a surety document payable to the state of Missouri to insure compliance with the RFP and/or lease. An evaluation of all proposals shall be conducted in accordance with the RFP. The decision to award a lease to a lessor shall be based upon the lowest and best proposal received in accordance with the terms of the RFP.

1 CSR 35-2.050(4) states that the commissioner of administration shall have the authority to make a one-time lump-sum payment to a lessor for renovations to a leased facility under the following conditions: (A) the improvements provide a direct benefit to the operations of the state's programs and are not required for the provision of any of the services covered by the lease, such as maintenance, upkeep or repair of the facility; (B) the amount paid by the commissioner for the construction of the improvements is no more than the reasonable cost to construct the improvements; and (C) the remaining term of the lease, including the lessee's options to renew, exceeds twelve months. A one-time payment may only be made in the last one year renewal period of a lease if necessary to meet unforeseen changes in program requirements.

Roger B. Wilson  
Governor

Richard A. Hanson  
Commissioner

State of Missouri  
**OFFICE OF ADMINISTRATION**  
3225 West Truman Boulevard, Suite 100  
Jefferson City, MO 65109

Linward "Lin" Appling  
Director  
Division of Facilities Management  
(573) 751-1003 Telephone  
(573) 526-4138 Fax

**MEMORANDUM**

**TO:** William D. Miller, CIA  
Director of Audits  
Office of the State Auditor

**FROM:** Lin Appling, Director  
Office of Administration  
Division of Facilities Management

**DATE:** December 4, 2000

**SUBJECT:** Comments to Draft Report, "Audit of Leased Space Management Practices"

We have reviewed the draft report titled "Audit of Leased Space Management Practices," and would like to offer the following comments in regard to the recommendations:

1.1 Perform market analyses of lease locations under consideration and document negotiation results.

**Comment:** DFM concurs with the recommendation. Effective 1/1/01, the contract file for all negotiated actions will contain documentation of the negotiations that took place and a description of the type of market place analysis that was used, i.e., competitive proposals, recent public bids, etc.

1.2 Work more closely with communities and legislators in planning where to locate certain agencies in communities prior to initiating the leasing process.

**Comment:** FLS will increase efforts immediately to identify and work with communities and legislators prior to initiating the leasing process for areas. However, great care must be exercised to avoid undue influence on the selection and evaluation process.

William D. Miller, CIA  
December 4, 2000  
Page 2

2.1 Clarify and strengthen its policies to ensure that leasing officials have adequate criteria to determine what can be included in lease agreements.

2.2 Consistently follow policies and not allow unique requirements and major renovations to be funded through leases.

**Comment:** DFM agrees with the recommendations, except it is believed the funding for special agency requirements should be a separate section within the leasing budget request rather than incorporated into the agency's operating budget. The inclusion of these funds in the leasing budget will enable DFM to better ensure that the items are appropriate, priced reasonably, correctly installed, and paid in a timely manner.

In conjunction with the Division of Budget and Planning, DFM plans to utilize our boilerplate office specifications as the criteria for the base rental rate, and any agency requirements that deviate from the basic specifications will be incorporated in a separate section of the leasing budget request as a one-time decision item. Attached is an outline of the process and the timeframe for implementation.

3.1 The General Assembly consider establishing a policy that requires agencies, when seeking office space, to make an effort to obtain bids in urban areas unless there is a compelling reason for locating elsewhere, or maintain documentation that effort was made to negotiate space in urban areas in those instances where bids were appropriately not sought.

**Comment:** This recommendation will be explored with the new administration and the Joint Committee on Capital Improvements and Leases Oversight.

We look forward to receiving your final report.

Attachment

## **Leasing- HB13 Agency Special Requirements Process**

**Definition:** Any facility item, renovation or enhancement to a leased facility as requested by the tenant agency to support program delivery. Typically these items are in addition to the standard facility specifications and are included in the "Attachment C" of the R.F.P.

### **Process**

#### **1. Identify Needs**

- Agency will determine special requirements as needed for each expiring lease location for the upcoming 2-year biennium cycle.

#### **2. Prepare, submit and present Budget Request**

- Agencies will be responsible for preparing the Form 5 and submitting budget requests for each location requiring a special requirement.
- Agencies will be required to present request(s) to Budget & Planning during the biennium leasing budget meeting.
- Agencies will be responsible for entering the information in BRASS
- All funding for agency special requirements must be requested in a separate section within HB13 and will not be included in the base rent.
- Agencies will be responsible for presenting the budget request for the special requirements to the General Assembly during the HB13 appropriations hearings.

#### **3. Approval of Appropriation**

- All approved funds will be appropriated within HB13.
- Upon approval of funding, the agencies will be responsible for setting priorities for expenditures by location within the total allocated funds.
- DFM will provide project coordination.
- DFM will process one time payment from HB13 to landlord when project is completed.
- DFM will track all payments from the appropriation and one-time payments for agencies may not exceed the total appropriation.

#### **4. One-time payments from Operating Funds**

- If funds are not available in HB13, agencies may use operating funds for special requirements or renovations required for program delivery.

### **FY01 Expiring leases**

- Currently there are several locations where agencies have requested special requirements or renovations to support program issues. Each location will have to be reviewed on a case by case basis to determine if it is cost effective to include the agency special requirements.
- Agency operating funds may be used to provide the special requirements or requested renovations.

### **FY02 and FY03**

- Budget requests for HB13 will be adjusted to include the section for "Agency special requirements."
- Agencies will be required to submit budget requests for special requirements by expiring lease location to DFM and Budget & Planning prior to December 15, 2000.

### **FY04 & FY05**

- See process shown above.

OSAGE COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-121  
December 1, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

December 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like Osage, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

---

This audit of Osage County was a financial and compliance audit of various county operating funds.

- In years past, the county had not sufficiently reduced its property tax revenues by 50 percent of the sales tax revenues as provided in the ballot issue passed by Osage County voters. However, the rollback for each of the two years ended December 31, 1999 and 1998 was sufficient as compared to each year's sales tax collections. The rollback also resulted in a reduction in the amount of prior years' excess property tax revenue collections from approximately \$340,000 at December 31, 1997, to approximately \$285,000 at December 31, 1999. Additional reductions will need to be made in future years to further reduce the amount of prior years' excess property tax revenue collections.

The audit also includes some other matters upon which the county should consider and take appropriate corrective action.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of Osage County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of Osage County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

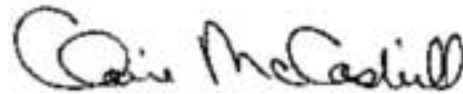

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of Osage County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of Osage County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of Osage County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31,

1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated July 27, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of Osage County, Missouri

We have audited the special-purpose financial statements of various funds of Osage County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated July 27, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

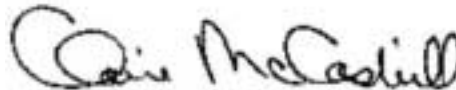

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of Osage County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards* and which is described in the accompanying Schedule of Findings as finding number 99-1. We also noted certain immaterial instances of noncompliance, which we have reported to the management of the county in the accompanying Letter on Other Matters.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of Osage County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material

weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting, which we have reported to the management of the county in the accompanying Letter on Other Matters.

This report is intended for the information of the management of Osage County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## Notes to the Financial Statements

OSAGE COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of Osage County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt formal budgets for the following funds:

| <u>Fund</u>                         | <u>Years Ended December 31,</u> |
|-------------------------------------|---------------------------------|
| Use Tax                             | 1999 and 1998                   |
| Domestic Violence                   | 1999 and 1998                   |
| Circuit Clerk Interest              | 1999 and 1998                   |
| Associate Circuit Division Interest | 1999 and 1998                   |
| Law Library                         | 1999 and 1998                   |
| Sheriff                             | 1998                            |
| Recorder's User Fee                 | 1998                            |

Warrants issued were in excess of budgeted amounts for the Emergency Management Fund in 1998. Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statements did not include the following funds:

| <u>Fund</u>                         | <u>Years Ended December 31,</u> |
|-------------------------------------|---------------------------------|
| Use Tax                             | 1999 and 1998                   |
| Domestic Violence                   | 1999 and 1998                   |
| Prosecuting Attorney Delinquent Tax | 1999 and 1998                   |
| Circuit Clerk Interest              | 1999 and 1998                   |
| Associate Circuit Division Interest | 1999 and 1998                   |
| Law Library                         | 1999 and 1998                   |
| Family Court                        | 1999                            |
| Sheriff                             | 1998                            |
| Recorder's User Fee                 | 1998                            |

2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The county's deposits at December 31, 1999 and 1998, were entirely covered by federal depository insurance or by collateral securities held by the county's custodial bank in the county's name.

3. Property Taxes

Through December 31, 1999, Osage County collected \$285,076 in excess property taxes. Section 67.505, RSMo 1994, requires the county to reduce property taxes for a percentage of sales taxes collected. Osage County voters enacted a 1/2 cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. Tax levies were not reduced sufficiently for actual sales tax collections.

A lawsuit was filed June 30, 1998 by county residents against the county and various county officials alleging the county has collected excess property taxes and has failed to comply with various statutes and the Hancock Amendment. The lawsuit seeks refunds and payment of court costs and attorney fees, as well as an injunction to prevent the various defendants from spending any money that is subject to refund to the taxpayers.

Schedule

OSAGE COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes the audit finding that *Government Auditing Standards* requires to be reported for an audit of financial statements.

|              |                  |
|--------------|------------------|
| <b>99-1.</b> | <b>Sales Tax</b> |
|--------------|------------------|

In years past, the county had not sufficiently reduced its property tax revenues by 50 percent of the sales tax revenues as provided in the ballot issue passed by the Osage County voters under the provisions of Section 67.505, RSMo 1994.

As indicated by the following calculations, the net excess property tax revenues collected as of December 31, 1999 and 1998 have decreased since our prior audit:

|   |    | Year Ended December 31, |             |
|---|----|-------------------------|-------------|
|   |    | 1999                    | 1998        |
| ACTUAL SALES TAX REVENUE  | \$ | 372,119                 | 336,635     |
| Required percentage of revenue reduction                                  | x  | 50%                     | 50%         |
| Required property tax revenue reduction                                   |    | 186,060                 | 168,318     |
| Assessed Valuation  |    | 122,817,418             | 118,400,897 |
| General Revenue Fund tax levy reduction (per \$100 of assessed valuation) | x  | 0.17                    | 0.17        |
| Actual property tax revenue reduction                                     |    | 208,789                 | 201,282     |
| EXCESS PROPERTY TAX REVENUES COLLECTED                                    |    | (22,729)                | (32,964)    |
| Excess property tax revenue collections from prior years                  |    | 307,805                 | 340,769     |
| NET EXCESS  | \$ | 285,076                 | 307,805     |

The rollback for each of the two years ended December 31, 1999 and 1998 was sufficient as compared to each year's sales tax collections and also resulted in some reduction in the balance of prior years' excess property tax revenue collections. Additional reductions will need to be made in future years to offset the balance of prior years' excess property tax revenue collections. A review of 2000 assessed valuations and estimated sales tax revenues indicated that the countywide tax levies would have to be reduced by 37 cents to eliminate all

excess property tax revenues collected for prior years and comply with the sales tax proposal passed by the voters. However, the 2000 general revenue tax rate ceiling is only 31 cents, and the County Commission set the actual tax rate at 13 cents.

This condition was noted in several previous reports.

**WE AGAIN RECOMMEND** the County Commission continue to ensure appropriate adjustments are made to the levy to reduce the amount of excess property taxes collected in prior years.

**AUDITEE'S RESPONSE**

*We concur and will do the best we can to reduce this amount as soon as possible over the coming years.*

## Follow-Up on Prior Audit Findings

## OSAGE COUNTY, MISSOURI FOLLOW-UP ON PRIOR AUDIT FINDINGS

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by Osage County, Missouri, on a certain finding in our prior audit report issued for the two years ended December 31, 1997. The finding is the one that *Government Auditing Standards* requires to be reported for an audit of financial statements.

### Sales Tax

At December 31, 1997, the county had collected \$340,769 in excess property taxes by not adequately reducing property tax levies for sales tax revenues.

### Recommendation

The County Commission ensure appropriate adjustments are made to the levy to significantly reduce the amount of excess property taxes collected in prior years.

### Status

Partially implemented. The County has reduced their excess property tax collections by \$55,693 during the two years ended December 31, 1999. See Finding Number 99-1.

## SECTION ON OTHER MATTERS

OSAGE COUNTY, MISSOURI  
LETTER ON OTHER MATTERS

We have audited the special-purpose financial statements of various funds of Osage County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated July 27, 2000.

We did not review the operations of elected officials with funds other than those presented in the special-purpose financial statements. The operations of such officials will be reviewed and reported on during the state auditor's next scheduled audit of the county.

This Letter on Other Matters presents matters other than the findings, if any, reported in the accompanying Schedule of Findings. These matters resulted from our audit of the special-purpose financial statements of Osage County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*. Nevertheless, the county should consider these matters and take appropriate corrective action.

1.     Time Sheets and Leave Records

Full-time Sheriff's Department deputies do not complete or submit time sheets to the County Clerk to account for hours worked. In addition, each county department is responsible for maintaining leave records on their employees; however, such records are not forwarded to the County Clerk so that centralized leave records may be maintained.

2.     General Fixed Asset Records

A physical inventory was not performed during the two years ended December 31, 1999. Some general fixed asset purchases and dispositions were not recorded on the general fixed asset listing.

3.     Contracts

Osage County receives monthly reimbursements from the City of Linn and the Osage Ambulance District for services, however there are no written agreements with these entities regarding these reimbursements.

This Letter on Other Matters is intended for the information of the management of Osage County, Missouri, and other applicable government officials. However, this letter is a matter of public record and its distribution is not limited.

GASCONADE COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

November 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like Gasconade, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of Gasconade County was a financial and compliance audit of various county operating funds.

The audit includes some other matters upon which the county should consider and take appropriate corrective action.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of Gasconade County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of Gasconade County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

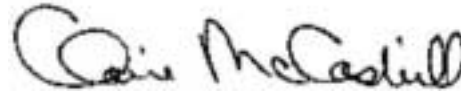

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of Gasconade County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of Gasconade County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of Gasconade County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31,

1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated August 31, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of Gasconade County, Missouri

We have audited the special-purpose financial statements of various funds of Gasconade County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated August 31, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

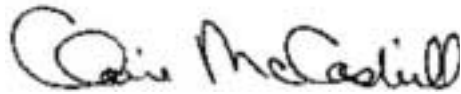

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of Gasconade County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted an immaterial instance of noncompliance, which we have reported to the management of the county in the accompanying Letter on Other Matters.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of Gasconade County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of

the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting, which we have reported to the management of the county in the accompanying Letter on Other Matters.

This report is intended for the information of the management of Gasconade County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

GASCONADE COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of Gasconade County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, Health Center Board, or the Community Mental Health Board. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt formal budgets for the following funds:

| <u>Fund</u>                               | <u>Years Ended December 31,</u> |
|---|---------------------------------|
| Domestic Violence Fund                    | 1999 and 1998                   |
| Helds Island Road Project - CDBG Fund     | 1999                            |
| Sheriff's Department Law Enforcement Fund | 1998                            |
| Family Service and Justice Fund           | 1998                            |

Warrants issued were in excess of budgeted amounts for the following funds:

| <u>Fund</u>                               | <u>Years Ended December 31,</u> |
|---|---------------------------------|
| Law Library Fund                          | 1999 and 1998                   |
| Sheriff's Department Law Enforcement Fund | 1999                            |

Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statement for the year ended December 31, 1999, did not include the Helds Island Road Project - CDBG Fund.

2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depository accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The financial statements do not include the cash balances of the County Collector, who collects and distributes property taxes as an agent for various local governments. However, for the purpose of these risk disclosures, the County Collector's cash balances are included since collateral securities to cover amounts not covered by federal depository insurance are pledged to the county rather than to specific county officials.

Of the county's bank balance at December 31, 1999, \$2,931,201 was covered by federal depositary insurance or by collateral securities held by the county's custodial bank in the county's name and \$2,184,594 was covered by collateral pledged by one bank and held by a correspondent bank but not in the county's name.

Of the county's bank balance at December 31, 1998, \$2,708,344 was covered by federal depositary insurance or by collateral securities held by the county's custodial bank in the county's name and \$1,264,484 was covered by collateral pledged by one bank and held by a correspondent bank but not in the county's name.

The Community Mental Health Board's deposits at December 31, 1999 and 1998 were entirely covered by federal depositary insurance. However, because of significantly higher bank balances at certain times during the year, uninsured and uncollateralized balances existed at those times although not at year-end.

To protect the safety of county deposits, Section 110.020, RSMo 1994, requires depositaries to pledge collateral securities to secure county deposits not insured by the Federal Deposit Insurance Corporation.

Schedule

GASCONADE COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## Follow-Up on Prior Audit Findings

GASCONADE COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

Our prior audit report issued for the two years ended December 31, 1997, included no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## SECTION ON OTHER MATTERS

## GASCONADE COUNTY, MISSOURI LETTER ON OTHER MATTERS

We have audited the special-purpose financial statements of various funds of Gasconade County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated August 31, 2000.

We did not review the operations of elected officials with funds other than those presented in the special-purpose financial statements. The operations of such officials will be reviewed and reported on during the state auditor's next scheduled audit of the county.

This Letter on Other Matters presents matters other than the findings, if any, reported in the accompanying Schedule of Findings. These matters resulted from our audit of the special-purpose financial statements of Gasconade County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*. Nevertheless, the county should consider these matters and take appropriate corrective action.

### 1. Collateral Security and Bank Accounts

The County Treasurer and County Collector do not formally monitor the county's bank balances to ensure the depository banks pledge sufficient collateral securities. Safekeeping receipts for securities pledged to the county and copies of receipts authorizing the release of pledged securities are not always maintained by the County Treasurer.

The County Treasurer does not reconcile the county's disbursement bank accounts on a monthly basis. As a result, unnecessary delays occur in the follow up of old outstanding checks, reallocating monies from voided checks to the appropriate funds, and allocating interest earned on the bank accounts to the appropriate funds.

### 2. County Expenditures

The County Commission does not review invoices or supporting documentation when they sign disbursement checks. Rather, the County Commission signs a summary listing of warrants to be paid and only requests invoices or supporting documentation when there is a question about a specific expenditure.

### 3. Closed Meeting Minutes

While minutes of the regular County Commission meetings indicated the reason for entering closed sessions; minutes were not maintained for closed sessions. In addition, the regular meeting minutes often did not disclose decisions made by the Commission while in closed session, when applicable.

4. Health Center

The duties of transmitting monies to the County Treasurer and reconciling the Health Center receipt slips to the County Treasurer's receipt slips are not adequately segregated. The Office Manager is responsible for receipting monies at the main office, recording transactions, preparing transmittals, transmitting monies to the County Treasurer, and reconciling receipt slips from the County Treasurer to the accounting records. No one independent of these duties performs reconciliations of the various records. In addition, a copy of the receipt slips issued at the time monies are transmitted by the Health Center's satellite offices to the main office are not reconciled to the satellite offices' receipt books.

The Health Center has not recorded fixed assets acquired during the two years ended December 31, 1999 on the property control record and expenditures for fixed asset purchases are not periodically reconciled to the additions to the property control record. Written authorization is not obtained prior to disposition of assets. The Health Center did not conduct annual physical inventories during the two years ended December 31, 1999.

5. Community Mental Health Board

The board did not review contractors' records during the audit period to ensure that the services being billed complied with the contract terms, were properly supported, and were provided to Gasconade County residents. Payments of such billings totaled approximately \$166,000 and \$111,000 during the years ended December 31, 1999 and 1998, respectively.

This Letter on Other Matters is intended for the information of the management of Gasconade County, Missouri, and other applicable government officials. However, this letter is a matter of public record and its distribution is not limited.

MISSOURI 3RD CLASS COUNTIES

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-119  
November 28, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

November 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** This report contains information about the ninety-three (93) Missouri counties which do not have a county auditor (New Madrid County became second class in 1999). Using the most recent audit reports, county budgets, and additional outside information, this report has been compiled to show various comparative financial information.

---

- Counties typically receive and spend a large portion of their receipts to support general county operations and to build and maintain roads and bridges. For 1999, the median (the middle amount in a series of amounts) county receipts for the General Revenue Fund were approximately \$1,198,000 while the median disbursements were approximately \$1,166,000. The median receipts for the Special Road and Bridge Fund were approximately \$1,057,000 and approximately \$1,085,000 for the median disbursements. More counties are consistently maintaining General Revenue fund receipts at a greater level than disbursements, while fewer counties are consistently maintaining Special Road and Bridge Fund receipts at a greater level than disbursements.
- Sales tax is the main source of receipts for most counties, especially the General Revenue Fund, while intergovernmental revenues, such as federal and state aid, are the main source of receipts for the Special Road and Bridge Fund.
- The report provides information on other major funds. These funds represent additional sales taxes approved by voters and earmarked for a specific purpose, including capital improvements, law enforcement, and road and bridge work. Forty-eight of the 93 third class counties have established one or more of these funds. The overall level of activity of receipts and disbursements and the cash balances in these types of funds has increased.
- New Madrid County which had an assessed valuation exceeding \$300,000,000 for five years became second class in January 1999. A further review of the assessed valuations indicates that several other counties now have or will soon be changing classification from third, to first or second class based on their assessed valuations.

(over)

YELLOW SHEET

- Maximizing receipts, minimizing disbursements, and improving the overall efficiency of government are crucial to financial conditions of all counties in the future. Counties must review all sources of receipts to ensure maximum return and timely receipt, and effectively control disbursements. Large disbursements should be bid to ensure the best product or service is purchased at the lowest cost. Counties must also strive to improve their overall financial reporting of activity to ensure the total financial condition can be evaluated.
- The annual report also contains other comparative financial information, including data on the Assessment Fund, and assessed valuations and tax levies of the counties.

**Copies of the audit are available upon request.**

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger B. Wilson, Governor  
and  
Members of the General Assembly  
and  
County Commissions

The Missouri State Auditor's office, as required by Section 29.230, RSMo 1994, performs audits on all counties throughout the state which have not elected a county auditor. An audit report containing financial statements, footnotes, an opinion as to the fairness of the presentation of the financial information, and information regarding improvements in internal controls, statutory compliance, and management practices is issued for each county audit.

This report is titled "Missouri 3rd Class Counties" because the ninety-three counties for which information is presented are counties of the third class (New Madrid County actually became second class in 1999).

Using the most recent audit reports, county budgets, and additional outside information, this report has been compiled to show financial information for the ninety-three counties, some by comparative percentages. Because this report is based upon a combination of audited and unaudited information, no opinion can be expressed as to the accuracy of the unaudited figures. Actual information shown on county budgets is sometimes inaccurate or incomplete, so some adjustments have been made to information shown on the budgets for better comparability with audited years information (See Note 2). However, it is difficult for counties to completely assess their status in relation to other counties without knowing more about operations of the various counties.

The following charts categorize the ninety-three counties based on receipts and disbursements for the three years ended December 31, 1999.

|      |                       | General Revenue Fund |      |      |               |      |      |
|------|-----------------------|----------------------|------|------|---------------|------|------|
|      |                       | Receipts             |      |      | Disbursements |      |      |
|      |                       | December 31,         |      |      | December 31,  |      |      |
|      |                       | 1999                 | 1998 | 1997 | 1999          | 1998 | 1997 |
| \$ < | 500,000               | 4                    | 4    | 6    | 4             | 6    | 6    |
|      | 500,000 - 999,999     | 30                   | 27   | 33   | 29            | 28   | 35   |
|      | 1,000,000 - 1,499,999 | 20                   | 23   | 21   | 21            | 21   | 19   |
|      | 1,500,000 - 2,000,000 | 13                   | 18   | 12   | 16            | 17   | 14   |
|      | > 2,000,000           | 26                   | 21   | 21   | 23            | 21   | 19   |
|      | Total                 | 93                   | 93   | 93   | 93            | 93   | 93   |

|      |                       | Special Road and Bridge Fund |      |      |               |      |      |
|------|-----------------------|------------------------------|------|------|---------------|------|------|
|      |                       | Receipts                     |      |      | Disbursements |      |      |
|      |                       | December 31,                 |      |      | December 31,  |      |      |
|      |                       | 1999                         | 1998 | 1997 | 1999          | 1998 | 1997 |
| \$ < | 500,000               | 3                            | 2    | 3    | 3             | 5    | 3    |
|      | 500,000 - 999,999     | 35                           | 33   | 42   | 37            | 30   | 42   |
|      | 1,000,000 - 1,499,999 | 32                           | 40   | 29   | 33            | 39   | 31   |
|      | 1,500,000 - 2,000,000 | 15                           | 11   | 11   | 12            | 15   | 10   |
|      | > 2,000,000           | 8                            | 7    | 8    | 8             | 4    | 7    |
|      | Total                 | 93                           | 93   | 93   | 93            | 93   | 93   |

For 1999 the median (the middle amount in a series of amounts) county receipts and disbursements were approximately \$1,198,000 and \$1,166,000 respectively, for the General Revenue Fund, and \$1,057,000 and \$1,085,000, respectively, for the Special Road and Bridge Fund.

A more detailed review of the counties' receipts and disbursements data for the three years presented indicated the following regarding the number of counties where receipts exceeded disbursements.

|                              | Receipts Exceeded Disbursements |        |         |         |
|------------------------------|---------------------------------|--------|---------|---------|
|                              | 0 Years                         | 1 Year | 2 Years | 3 Years |
| General Revenue Fund         | 8                               | 29     | 32      | 24      |
| Special Road and Bridge Fund | 4                               | 29     | 46      | 14      |

A further review of individual county amounts indicates more counties are consistently maintaining General Revenue Fund receipts at a greater level than disbursements, and fewer counties are consistently maintaining Special Road and Bridge Fund receipts at a greater level than disbursements. For the majority of counties whose disbursements have consistently exceeded

receipts for the three years presented, there has been a significant negative impact on the county's financial condition. It appears changes between years are due largely to normal growth resulting in an increase of receipts and disbursements, although the fluctuation for some counties was due to significant, but temporary, changes in receipts and/or disbursements resulting from such events as capital improvement projects.

Actions to increase receipts or to control disbursements are ongoing and important. The average cash balance to disbursement ratios shown on Schedules 2-A and 2-B indicate that both the General Revenue Fund ratio and the Special Road and Bridge ratio have experienced little change. These schedules indicate the 1999 average cash balance to disbursement ratio was .20 and .23 for the General Revenue Fund and Special Road and Bridge Fund, respectively. These average ratios indicate cash available at year-end would fund county operations for approximately two to three months. The following charts categorize the ninety-three counties based on the cash balance to disbursements ratios during the last three years.

|                                |             | General Revenue Fund<br>December 31, |      |      |

|                                | .46:1-.60:1 | 4  | 6    | 7    |
|                                | .31:1-.45:1 | 11   | 18   | 15   |
|                                | .16:1-.30:1 | 19   | 20   | 23   |
|                                | .0-.15:1    | 37   | 33   | 33   |
| <                              | 0           | 0  | 0    | 0    |
|                                | Total       | 93   | 93   | 93   |

The charts above show that the majority of counties have a cash balance to disbursements ratio of .30 or less. A declining ratio may be indicative of a poor or worsening financial condition, while a growing ratio might represent a county's effort to accumulate and reserve monies for a significant future purpose or an improved financial condition. While the cash balance to disbursements ratio can assist in analyzing financial condition, such factors as types of receipts, cash flow, receivables, debt, and discretionary versus mandated disbursements also have a significant effect on the financial well-being of a county. Additionally, the availability of other major funds as shown on Schedule 6 and discussed in Note 1, or an unusually large spending level in one year can distort the financial condition analysis.

The percentage composition of receipts shows that sales taxes represent the main source of receipts for most counties, especially for the General Revenue Fund (See Schedule 3-A). Only four counties (Bates, Polk, Reynolds, and Ripley) do not have sales tax monies going into their General Revenue Fund. From 1980, when county sales taxes were initiated, sales tax collections have increased from 4 percent to 40 percent of total receipts of the General Revenue Fund. By contrast, property taxes have decreased from 41 percent to 16 percent of total receipts. Sales tax receipts are used by many counties to assist in meeting the day-to-day operating and law enforcement costs incurred. Without sales taxes, capital improvement projects would have to be canceled, deferred, or funded through other county funds and the services currently provided by the counties may have had to be reduced. The percentage composition of receipts shows that intergovernmental revenues represent the main source of receipts for most counties' Special Road and Bridge Fund (See Schedule 3-B). Among other monies included in this category are state distributions of county aid road trust (CART) monies, federal bridge project and disaster monies, and other government distributions. Schedules 3-A, 3-B, and 4 show that the "Other" receipts and disbursements categories are becoming more significant in some counties. When appropriate, counties need to classify receipts and disbursements in more specific and appropriate categories.

Schedule 4 shows the various disbursement functions for the General Revenue Fund over the three years. There was very little fluctuation in the "average" disbursement amounts as a percentage of the total. However, for counties having a law enforcement sales tax, disbursements for the operation of the sheriff's office and jail may be included in the Law Enforcement Sales Tax Fund rather than from the General Revenue Fund. The 1999 average percentages of total disbursements for the sheriff and jail were 17 and 7 percent, respectively. However, these average percentages are 22 and 11 percent when considering those counties with sheriff and jail expenditures from the General Revenue Fund only. In addition, expenditures from the prosecuting attorney, juvenile officer, and coroner may also be paid from the Law Enforcement Sales Tax Fund. Many counties also have Capital Improvement Sales Tax Funds and/or Road and Bridge Sales Tax Funds. The availability and use of these monies may impact the disbursements of the General Revenue Fund and Special Road and Bridge Fund, and how these funds are utilized. The majority of the counties do not have health and welfare disbursements from the General Revenue Fund. Those with significant disbursements in this category do not have a county health center board.

Assessment Fund expenditures are presented on Schedule 5 for the three years ended December 31, 1999. The funding for the Assessment Fund was established by Section 137.750, RSMo 1994. A separate fund is maintained for the receipts received and restricted for this purpose

including required contributions from the county's General Revenue Fund. As indicated on Schedule 5, the disbursements fluctuate greatly between counties depending largely upon the size of the Assessor's office. In addition, periodic equipment purchases can result in temporary, but significant, increases in disbursements. While 1999 disbursements per parcel averaged \$13, the disbursements per parcel for ninety percent of the counties ranged from \$9 to \$19. Disbursements from the Assessment Fund have steadily increased over the last three years.

Schedule 6 presents receipts, disbursements and cash balance information for other major funds established by the various counties. These funds represent additional sales taxes approved by voters and earmarked for a specific purpose, including capital improvements, law enforcement, and road and bridge work. Of the 93 third class counties, 48 have established one or more of these sales tax funds. A comparison of the 1999 and 1998 data indicates that the overall level of activity of receipts and disbursements and the cash balances in these types of funds has increased.

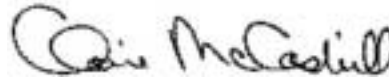

Schedule 7 presents the assessed valuation and tax levies for 1999 and 1998. New Madrid County which has had an assessed valuation exceeding \$300,000,000 for five years became second class in January 1999. A further review of the assessed valuations indicates that within a few years several other counties will also be changing classification from third, to first or second class based on their assessed valuations.

Maximizing receipts, minimizing disbursements, and improving the overall efficiency of government are crucial to the financial condition of all counties in the future. Counties must review all sources of receipts to ensure maximum return and timely receipt, and effectively control disbursements. Large disbursements should be bid to ensure the best product or service is purchased at the lowest cost. Discretionary disbursements should be carefully reviewed and alternatives evaluated. Counties must also strive to improve their overall financial reporting of activity to ensure the total financial condition can be evaluated.

While this report reflects financial information through 1999, various issues will significantly affect county operations during 2000 and subsequent years. Future efforts require county officials to work with the legislature to ensure proposed new legislation will not place undue hardships on the county's financial resources and that changes to promote efficiency are forthcoming.

This is the twenty-first year the State Auditor's office has issued an aggregate report on Missouri 3rd class counties. We have made changes to reflect information of interest to the readers, but are continually looking for new ideas to better communicate the information to those interested. We again solicit suggestions which may be beneficial to those involved in county government and other readers of this report.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

The accompanying Notes to the Schedules are an integral part of this statement.

## NOTES TO SCHEDULES

MISSOURI 3RD CLASS COUNTIES  
NOTES TO THE SCHEDULES

1. Significant Information

Information included in these schedules was compiled from the Missouri State Auditor's most recent audit report of each county; from county budgets for those years currently unaudited; and from other state agency generated reports.

In analyzing these schedules, some disparity will exist due to the use of audited and unaudited information on the same schedules (See Note 2). Counties prepare the budget reports on a cash basis of accounting; accordingly, amounts are recognized when received or disbursed by warrant or in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred. Additionally, the structure and organization of the counties causes some differences. Twenty-three of the ninety-three counties have a township form of government. These counties are as follows:

|          |            |
|----------|------------|
| Barton   | Henry      |
| Bates    | Linn       |
| Caldwell | Livingston |
| Carroll  | Mercer     |
| Chariton | Nodaway    |
| Dade     | Putnam     |
| Daviess  | Stoddard   |
| DeKalb   | Sullivan   |
| Dunklin  | Texas      |
| Gentry   | Vernon     |
| Grundy   | Wright     |
| Harrison |            |

Other differences which may result in comparison problems include:

- A. Special road districts existing in some counties and not in others;
- B. State or federal grants may be received by some counties and not by others;
- C. Counties may have enacted a sales tax at different times;
- D. Counties may have enacted a capital improvement sales tax or a law enforcement sales tax or have had the capital improvement sales tax expire at different times. Some counties establish new funds to account for these monies while other counties placed the monies into the General Revenue or Special Road and Bridge Funds. Therefore, these monies may be shown as an Other Major Fund on Schedule 6.

- E. Some counties may not have a separate tax levy or board for Health Center operations and therefore they account for it as a part of the General Revenue Fund;
- F. Some counties have a branch or additional offices for various officials and some offices are combined under one official;
- G. Some monies available for general purposes may be kept in separate funds; and
- H. Some counties may set up a separate fund for special elections and others account for them through the General Revenue Fund.

These differences, along with classification differences and transfers between funds, may alter the final percentages.

Schedules 1-A, 2-A, 3-A, and 4 present financial data of the counties' General Revenue Fund while Schedules 1-B, 2-B, and 3-B present financial data of the counties' Special Road and Bridge Fund.

Schedule 5 presents disbursements of the Assessment Fund and the number of parcels in each county. The differences in the amounts spent for the operation of the Assessor's office were related to the size of mapping and other contracts, the purchasing of computer equipment, the number of additional personnel hired, and the varying assessment make up of each county. The parcel counts, which represent the number of real estate parcels in each county, were obtained from the state tax commission's most recent data through 1999.

Schedule 6 presents receipts, disbursements and cash balances for additional significant funds of the counties for the years ended December 31, 1999 and 1998. The funds presented are not intended to represent all county funds. Rather, these funds consist of additional sales taxes approved by voters which are not placed in the county's General Revenue or Special Road and Bridge Fund (See Note 3). Approximately 26 capital improvement sales tax funds, 32 law enforcement sales tax funds, and 14 road and bridge sales tax funds were noted. Some counties have more than one of these additional funds, in which case, the amounts have been added together for presentation purposes. The amounts presented were taken from the county budgets unless an audit report had been issued for the year ended December 31, 1998, in which case, audited amounts were presented. Receipts for the sales tax funds totaled approximately \$56,000,000, comprised of approximately \$19,400,000, \$24,600,000, and \$12,000,000 in the capital improvement sales tax funds, law enforcement sales tax funds, and road and bridge sales tax funds, respectively.

Schedule 7, which shows the assessed valuation and tax levies (in cents per \$100 assessed valuation) for 1999 and 1998, was obtained from the Missouri State Tax Commission, the county budgets, and the State Auditor's 1999 Tax Certification Report. All counties have a general revenue tax levy unless it has been reduced voluntarily or as required for sales tax collections. Some counties have special road districts which receive some part of the special road and bridge tax monies, and all non-township counties have a special road and bridge tax

levy unless it is entirely composed of special road districts or if the county voluntarily reduces the rate or is required to for sales tax collections. In 1999, 74 counties had health center levies, 17 had hospital levies, 61 had Senate Bill 40 levies, 15 had senior services levies, and 7 had Johnson Grass levies. Surtax rates, also levied by the counties, have remained the same over the years and have not been presented in this report. The following counties have tax levies which are not common to all counties and have been placed in the other column of Schedule 7:

| <u>County</u>  | <u>Tax</u>         | <u>Tax Levy</u> |             |
|----------------|--------------------|-----------------|-------------|
|                |                    | <u>1999</u>     | <u>1998</u> |
| Gasconade      | Mental Health      | 10              | 10          |
| Macon          | Parks & Recreation | 3               | 3           |
| Newton         | Mental Health      | 7               | 7           |
| Newton         | County Fair        | 1               | 1           |
| Perry          | Mental Health      | 9               | 9           |
| Ray            | Mental Health      | 10              | 10          |
| Ste. Genevieve | Mental Health      | 10              | 10          |
| Wayne          | Debt Service       | 0               | 3           |

## 2. County Budgets

The 2000 county budgets contain historical financial information for 1999 and were used in compiling this report for all counties in 1999. Also, budget reports were used to obtain 1998 information for some counties. To provide comparability for the General Revenue Fund and the Special Road and Bridge Fund, more than one fund may have had to be combined for presentation in some counties.

Because audited figures and unaudited figures are presented in this report, the amounts and percentages shown on the schedules may vary somewhat. The following could be major causes for such variances:

- A. Differences in classifying receipts and disbursements exist between budget documents prepared by county officials and audit reports issued by the State Auditor's office. Differences in budget classifications may also exist from one budget year to the next.
- B. Other differences may include the handling of investment activity, tax anticipation notes, common road districts, loans, sales tax, and CART receipts and transfers. When audited, these items are properly adjusted and reported.

The explanations above could cause deviations in receipts and disbursements. Also, the receipts and disbursements and cash balances may not agree to those presented on the various budgets because of adjustments made to correct errors and reconciliation problems noted. In addition, during the compilation of the budget information, emergency fund disbursements

from the General Funds were added to the "Other" disbursement category for purposes of Schedule 4. For Schedule 3 transfers into the General Revenue and Special Road and Bridge Funds were included in the "Other" receipts category.

In analyzing these schedules, it is important to remember that audited and unaudited information has been used. When actual audit reports for those years shown as unaudited are completed, some differences may result.

### 3. Sales Tax

Section 67.505, RSMo 1994, allows any county governing body, upon approval of a majority vote of its qualified voters, to impose a county sales tax, in conjunction with a property tax reduction for each year in which the sales tax is imposed, for the benefit of the county. More than eighty 3rd class counties have enacted a sales tax pursuant to Section 67.505. RSMo 1994.

In addition, any county may impose an additional sales tax pursuant to Sections 67.547 and 67.582, RSMo 1994, after obtaining a majority approval of the qualified voters. These additional sales taxes do not require a reduction of property tax revenues.

Some counties enacting an alternative sales tax for capital improvements or an additional sales tax for law enforcement purposes pursuant to Sections 67.700 and 67.582, RSMo 1994, respectively, put the proceeds into a regular county fund. Other counties established a separate fund to account for the receipts and disbursements.

The average percentage of sales tax receipts to total receipts as presented on Schedule 3-A and 3-B is the average of all counties. The percentage would change if the average was computed taking into account only those counties which have implemented any of the above sales taxes. The following chart shows these percentages:

| Fund                         | Sales Tax as Percentage<br>Of Total Receipts |      |      |
|------------------------------|--|------|------|
|                              | 1999   | 1998 | 1997 |
| General Revenue Fund         | 41   | 40   | 42   |
| Special Road and Bridge Fund | 22   | 24   | 26   |

BOLLINGER COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-118  
November 15, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

November 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like Bollinger, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of Bollinger County included additional areas of county operations, as well as the elected county officials. The following concerns were noted as part of the audit:

- The county is in poor financial condition. The county's General Revenue Fund has been experiencing a declining cash balance. For 2000, the county budgeted receipts of \$944,793 and disbursements of \$1,015,507, resulting in an estimated ending negative cash balance of approximately \$66,000. In 1999, the county had a cash balance of only \$4,612 in their General Revenue Fund, however the county passed a year 2000 budget that allowed increases in disbursements to exceed anticipated increases in receipts.
- The county does not have written agreements with various political subdivisions and individuals. As noted in our four prior audits, the Sheriff provides dispatching services to an area municipality and an ambulance district. In addition, the county jail is used to board prisoners for other entities. No written agreements exist with these entities regarding the amounts to be paid or the services to be provided. Furthermore, though approved in the budgetary process, there are no written agreements between the county and the Public Administrator or the county and the Prosecuting Attorney for rent and utilities, as well as with the Prosecuting Attorney for the percentage of three secretaries' salaries to be paid by the county.
- The Fair Labor Standards Act requires employers to keep accurate records of actual time worked by employees, including compensatory time earned, taken, or paid. In our last five prior reports we noted a similar condition that the time sheets and/or records tracking accumulated leave balances are not maintained for full-time employees of the Ex-Officio Recorder of Deeds, the County Collector,

(over)

YELLOW SHEET

and the Prosecuting Attorney. Although these records are maintained for employees of the Assessor, Sheriff, and the Road and Bridge department, they are not approved by applicable supervisors. Thus, the County Commission does not have documentation of work performed to support payroll expenditures and does not maintain centralized records of leave balances and leave used and earned.

- Also, noted similarly in our prior audit, the county's listing of general fixed assets is not complete. State law requires that the county officer of each county department shall annually inspect and inventory county property used by that department with an individual original value of \$250 or more and any property with an aggregate original value of \$1,000 or more.
- There were at least three instances where monies received by the Sheriff's office totaling \$736 were not deposited or were found to be missing. The Sheriff's office investigated these instances, but could not determine what happened to these monies. While most of the monies were recovered, cash custody and record keeping functions need to be segregated. Some property taken in criminal cases has not been inventoried and many of the items in the evidence room have been held for a long period of time. As noted in our prior report, the Sheriff has \$2,260 in two old bank accounts that has not been properly disbursed.
- The Circuit Clerk and Ex-Officio Recorder of Deeds does not prepare monthly listings of open items (liabilities) for the fee account. Copy monies are deposited in the Circuit Clerk's interest account and used for various office expenditures rather than being remitted to the county treasury.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of Bollinger County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of Bollinger County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

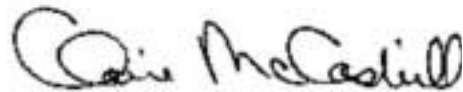

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of Bollinger County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of Bollinger County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of Bollinger County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31, 1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated July 12, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the management of Bollinger County, Missouri, and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

July 12, 2000 (fieldwork completion date)

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of Bollinger County, Missouri

We have audited the special-purpose financial statements of various funds of Bollinger County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated July 12, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

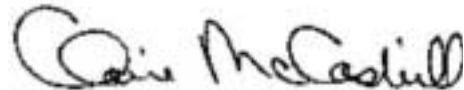

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of Bollinger County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain immaterial instances of noncompliance which are described in the accompanying Management Advisory Report.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of Bollinger County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material

weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting which are described in the accompanying Management Advisory Report.

This report is intended for the information of the management of Bollinger County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is written in a cursive, flowing style.

| Total Disbursements                 | 5,000    | 4,432  | 568                                    |
| RECEIPTS OVER (UNDER) DISBURSEMENTS | 655      | 1,488  | 833                                    |
| CASH, JANUARY 1                     | 2,122    | 2,127  | 5                                      |
| CASH, DECEMBER 31                   | \$ 2,777 | 3,615  | 838                                    |

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

BOLLINGER COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of Bollinger County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, the Health Center Board, or the Senate Bill 40 Board. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt formal budgets for the following funds:

| <u>Fund</u>                      | <u>Years Ended December 31,</u> |
|----------------------------------|---------------------------------|
| Sheriff's Interest Fund          | 1999 and 1998                   |
| Circuit Division Interest Fund   | 1999 and 1998                   |
| Recorder's Grant Fund            | 1999 and 1998                   |
| Sheriff's Building Fund          | 1998                            |
| Sheriff's Donation Fund          | 1998                            |
| Law Enforcement Block Grant Fund | 1998                            |
| Associate Division Interest Fund | 1998                            |
| Probate Division Interest Fund   | 1998                            |
| Law Library Fund                 | 1998                            |

Warrants issued were in excess of budgeted amounts for the Children's Trust Fund in 1999 and the Sheriff's Civil Fund in 1998. Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

Deficit budget balances are presented for the General Revenue and Special Road and Bridge Funds for the years ended December 31, 1999 and 1998. However, the budgets of those funds also included other resources available to finance current or future year disbursements. Generally, other available net resources represented current year property taxes not received before December 31. Such resources were sufficient to offset the deficit budget balances presented.

#### D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statements did not include the following funds:

| <u>Fund</u>                      | <u>Years Ended December 31,</u> |
|----------------------------------|---------------------------------|
| Health Center Fund               | 1999 and 1998                   |
| Senate Bill 40 Board Fund        | 1999 and 1998                   |
| Sheriff's Interest Fund          | 1999 and 1998                   |
| Recorder's Grant Fund            | 1999 and 1998                   |
| Circuit Division Interest Fund   | 1999                            |
| Law Enforcement Block Grant Fund | 1998                            |

## 2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The financial statements do not include the cash balances of the County Collector, who collects and distributes property taxes as an agent for various local governments. However, for the purpose of these risk disclosures, the County Collector's cash balances are included since collateral securities to cover amounts not covered by federal depositary insurance are pledged to the county rather than to specific county officials.

Of the county's bank balance at December 31, 1999, \$227,046 was covered by federal depositary insurance and \$1,749,865 was covered by collateral pledged by one bank and held in the county's name by the safekeeping department of an affiliate of the same bank holding company.

Of the county's bank balance at December 31, 1998, \$225,604 was covered by federal depositary insurance and \$1,580,863 was covered by collateral pledged by one bank and held in the county's name by the safekeeping department of an affiliate of the same bank holding company.

The Health Center and Senate Bill 40 Boards' deposits at December 31, 1999 and 1998 were entirely covered by federal depositary insurance.

Schedule

BOLLINGER COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

Follow-up on Prior Audit Findings for an  
Audit of Financial Statements Performed in Accordance  
With *Government Auditing Standards*

BOLLINGER COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN  
AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE  
WITH *GOVERNMENT AUDITING STANDARDS*

Our prior audit report issued for the two years ended December 31, 1997, included no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Findings

BOLLINGER COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

We have audited the special-purpose financial statements of various funds of Bollinger County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated July 12, 2000.

We also have reviewed the operations of elected officials with funds other than those presented in the special-purpose financial statements. As applicable, the objectives of this review were to:

1. Determine the internal controls established over the transactions of the various county officials.
2. Review and evaluate certain other management practices for efficiency and effectiveness.
3. Review certain management practices and financial information for compliance with applicable constitutional, statutory, or contractual provisions.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed accounting and bank records and other pertinent documents and interviewed various personnel of the county officials.

As part of our review, we assessed the controls of the various county officials to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described in the preceding paragraphs and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Management Advisory Report presents our findings arising from our review of the elected county officials referred to above. In addition, this report includes findings other than those, if any, reported in the accompanying Schedule of Findings. These findings resulted from our audit of the special-purpose financial statements of Bollinger County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*.

|                               |
|-------------------------------|
| <b>1. Financial Condition</b> |
|-------------------------------|

Bollinger County's General Revenue Fund has been experiencing a declining cash balance. The following shows receipts, disbursements, and ending cash balances for the two years ended December 31, 1999:

|                                    |    |                     |
|------------------------------------|----|---------------------|
| Cash Balance, January 1, 1998      | \$ | 20,484              |
| Receipts (less loan proceeds)      |    | 829,017             |
| Disbursements (less loan payments) |    | <u>833,737</u>      |
| Cash Balance, December 31, 1998    |    | 15,764              |
| Receipts                           |    | 851,499             |
| Disbursements                      |    | <u>862,651</u>      |
| Cash Balance, December 31, 1999    | \$ | <u><u>4,612</u></u> |

Included in the 1999 disbursements is approximately \$26,000 transferred from the General Revenue Fund to the Assessment Fund, however based on the Assessment Fund's cash balance and financial resources, it is questionable why this transfer was made.

For 2000, the county budgeted receipts of \$944,793 and disbursements of \$1,015,507, resulting in an estimated ending cash balance of (\$66,102). Although the General Revenue Fund had a cash balance of only \$4,612 at December 31, 1999, the county passed a budget that allowed increases in disbursements to exceed anticipated increases in receipts. Given the county's poor financial condition, it appears the county should attempt to increase the cash balance of the General Revenue Fund.

Additionally, our prior audit report noted that \$30,800 was due from the General Revenue Fund to other county funds and political subdivisions as the result of excess commissions withheld. The County Commission indicated the General Revenue Fund did not have sufficient funds to repay these monies. Only because of non-compliance with state laws, does the county have any cash balance at December 31, 1999 and no corrective actions were apparently taken for 2000.

**WE RECOMMEND** the County Commission consider the various alternatives of increasing receipts and/or reducing disbursements.

**AUDITEE'S RESPONSE**

*We will try to reduce expenditures in the future and will consider various alternatives to increase our revenue base such as a special law enforcement tax.*

The county does not have written agreements with various political subdivisions and individuals as follows:

- A. As noted in our four prior reports, the Sheriff provides dispatching services to an area municipality and an ambulance district. In addition, the county jail is used to board prisoners for other entities. The county receives approximately \$15,000 per year for dispatching services and approximately \$30,000 per year for the board of prisoners. No written agreements exist with these entities regarding the amounts to be paid or the services to be provided.
- B. The Prosecuting Attorney does not have an office in the courthouse; he performs his county duties from an office building used in the operation of his private law practice. In addition, the Public Administrator works from his house. As a result, the county pays \$1,500 per year to the Prosecuting Attorney and \$900 per year to the Public Administrator for rent and utilities. The county also pays approximately \$27,000 per year towards the salaries of the three secretaries working in the Prosecuting Attorney's office.

The agreed upon payments are requested and approved through the county's annual budget process. However, there are no written agreements specifying how the rent and utilities amounts are determined and/or the percentage of secretaries salaries to be paid by the county. In addition, adequate supporting documentation such as employee time sheets is not maintained by the Prosecuting Attorney for filing with the County Clerk (see MAR No. 3.)

- C. Various transactions were entered into for which contracts could not be located. These included two graders purchased with a lease purchase arrangement at a cost of \$120,000, a copier with a maintenance agreement, and a short-term bank loan for \$20,000. The county's inability to ensure the safekeeping of such documents for review and comparison to subsequent payments represents a lack of internal controls. Given the county's financial condition, it is imperative that all financial transactions be fully reviewed and monitored.

Section 432.070, RSMo 1994, requires the county to have all contracts in writing. Written agreements should be prepared and should clearly specify the arrangements between applicable parties. In addition, all agreements should be approved by the County Commission.

**WE RECOMMEND** the County Commission ensure written agreements are entered into with all applicable political subdivisions and individuals documenting each parties contractual obligations.

### **AUDITEE'S RESPONSE**

*We have prepared contracts for the Prosecuting Attorney and the Public Administrator. We will attempt to enter into contracts for dispatching services and board of prisoners. In addition, we will ensure contracts are entered into as needed and documentation maintained.*

|   |
|---|
| <b>3. Personnel and Payroll Policies and Procedures</b> |
|---|

- A. Time sheets and/or records tracking accumulated leave balances are not maintained for full-time employees of the Ex-Officio Recorder of Deeds, the County Collector, and the Prosecuting Attorney. Although these records are maintained for employees of the Assessor, Sheriff, and the Road and Bridge department, they are not approved by applicable supervisors. In addition, the Assessor's office does not turn these records into the County Clerk. As a result, the County Commission does not have documentation of work performed to support payroll expenditures and does not maintain centralized records of leave balances and leave used and earned.

The Fair Labor Standards Act (FLSA) requires employers to keep accurate records of actual time worked by employees, including compensatory time earned, taken, or paid. The time records should be prepared by the employee, approved by the applicable supervisor, and filed with the County Clerk. In addition, without centralized leave records, the County Commission cannot ensure that employees' vacation and sick leave balances are accurate and that all employees are treated equitably. Centralized leave records will also aid in determining unused vacation leave upon termination of employment.

A similar condition was noted in our five prior reports.

- B. Although the County Commission has a written policy regarding sick leave and annual leave, the county's personnel manual does not address compensatory time or overtime. The Sheriff's office pays overtime for work in excess of 171 hours during a one month period. This procedure may not be in accordance with the FLSA. A written personnel policy regarding compensatory time or overtime for all employees is necessary to ensure compliance with the FLSA and to provide assurance that all employees are treated equitably.

**WE RECOMMEND** the County Commission:

- A. Require all county employees to complete time sheets which reflect actual time worked and leave balances earned and used. The time sheets should be prepared by employees, approved by the applicable supervisor, and filed with the County Clerk. In addition, the County Commission should require the County Clerk to maintain centralized leave records for all employees.

- B. Establish a written policy regarding compensatory time and overtime to ensure compliance with the FLSA.

**AUDITEE'S RESPONSE**

- A. *We will require adequate documentation to support all payroll disbursements and will maintain records of accumulated leave. This will become effective with the start of the next pay period.*
- B. *We will implement a written policy immediately.*

|                                |
|--------------------------------|
| <b>4. General Fixed Assets</b> |
|--------------------------------|

The County Commission or its designee is responsible for maintaining a complete detailed record of county property. Currently, the County Clerk maintains a computerized inventory listing of fixed assets held by county officials. However, during our review of equipment purchases, we noted three of thirteen items were not recorded on the county's general fixed asset listing. These items were purchased for approximately \$17,000. Additions to the inventory listing are not reconciled to equipment expenditures or the County Clerk's annual physical inventory to ensure all fixed assets are properly recorded.

Adequate general fixed asset records are necessary to secure better internal control over county property, meet statutory requirements, and provide a basis for determining proper insurance coverage required on county property.

Effective August 28, 1999, Section 49.093, RSMo Cumulative Supp. 1999, provides the county officer of each county department shall annually inspect and inventory county property used by that department with an individual original value of \$250 or more and any property with an aggregate original value of \$1,000 or more. After the first inventory is taken, an explanation of material changes shall be attached to subsequent inventories. All remaining property not inventoried by a particular department shall be inventoried by the County Clerk. The reports required by this section shall be signed by the County Clerk.

Similar conditions were noted in the prior report.

**WE RECOMMEND** the County Commission establish a written policy related to the handling and accounting for general fixed assets. In addition to providing guidance on accounting and record keeping, the policy could include necessary definitions, address important dates, establish standardized forms and reports to be used, discuss procedures for the handling of asset disposition, and any other concerns associated with county property.

**AUDITEE'S RESPONSE**

*We plan to establish a written policy within the next year.*

**5.****Sheriff's Accounting Controls and Procedures**

- A. During our review, it was brought to our attention that there were at least three instances where monies received by the Sheriff's office totaling \$736 were not deposited or were found to be missing. In one instance, a bond form indicated a \$100 bill was received, but the bookkeeper could not locate the cash. The dispatcher indicated the cash was placed in the lockbox along with the bond form. In another instance, an envelope containing a monthly report from the Circuit Clerk's office and a Circuit Division check for \$589 turned up missing. The bookkeeper thought she locked the envelope in a file cabinet, but could not find the envelope after searching the file cabinet. The check was replaced by the Circuit Clerk's office. In a third instance, an individual was arrested with \$47 on his person. The inmate's personal property was placed in a bag in the booking room of the Sheriff's office. When the inmate was released, the cash was missing. The Sheriff's office investigated these instances, but could not determine what happened to these monies.

The Sheriff's office should review these situations and establish procedures to prevent similar situations from occurring in the future. Cash custody and record-keeping functions should be segregated where possible. If duties cannot be segregated, at a minimum, receipts should be reconciled to deposits by someone independent of the cash custody and record-keeping functions.

- B. During the two years ended December 31, 1999, controls over the evidence room used for storing property taken in criminal cases were not adequate. A complete log of seized property was not maintained and occasionally property would turn up missing.

Beginning April 2000, a different officer was assigned to oversee the evidence room. While we noted an improvement in controls over the evidence room, some property items have still not been inventoried. In addition, many of the items in the evidence room have been held for a long period of time.

Considering the often sensitive nature of the seized property, adequate internal controls are essential and would significantly reduce the risk of theft or misuse of the stored items. In addition, Section 542.301(5), RSMo Cumulative Supp. 1999, states seized property may be ordered sold or destroyed by a judge if not claimed within one year from the date of seizure.

- C. The Sheriff has \$2,260 in two old bank accounts that has not been properly disbursed. Of this amount, \$2,144 was received from a Sheriff's sale in January 1994. The remaining \$116 pertains to old outstanding checks. The Sheriff should review the January 1994 Sheriff's sale records to determine how the monies should be disbursed. In addition, any old unclaimed outstanding checks should be disposed of in accordance with state law.

A similar condition was noted in the prior report.

**WE RECOMMEND** the Sheriff:

- A. Adequately segregate duties or ensure independent, documented reviews of the records are performed. In addition, the Sheriff should ensure all missing monies are recovered and distributed to the appropriate parties.
- B. Ensure all evidence is inventoried in the seized property log and dispose of unclaimed items in a timely manner in accordance with state law.
- C. Disburse the amounts remaining from the 1994 Sheriff's sale and attempt to locate the payees of the old outstanding checks and reissue checks if possible. Any remaining unclaimed amounts should be disbursed in accordance with state law.

**AUDITEE'S RESPONSE**

- A. *Controls in this office have been improved since the occurrence of these three instances. In addition, I am currently reviewing the bookkeeper's records approximately every two weeks. The bond was disbursed from interest proceeds.*
- B. *All evidence is currently inventoried. In addition, with the help of the Prosecuting Attorney, we are in the process of identifying items we can dispose of, reducing the property maintained in the evidence room. We hope to have disposed of these items by the end of the year.*
- C. *We have disbursed some of these monies to the appropriate parties and are trying to determine the proper distribution of the remaining monies. Any remaining unclaimed amounts will be disbursed in accordance with state law.*

|  |
|--|
| <b>6. Circuit Clerk and Ex-Officio Recorder of Deeds' Accounting Controls and Procedures</b> |
|--|

During our review of the Circuit Clerk and Ex-Officio Recorder of Deeds' accounting procedures the following concerns were noted:

- A. Monthly listings of open items (liabilities) are not prepared on a timely basis for the Circuit Clerk's fee account. During the audit period, a listing of open items was last prepared for the month of February 1999 by the Office of State Courts Administrator. Consequently, open items have not been periodically reconciled with bank and book balances. At our request, the Circuit Clerk prepared a summary listing of open items by type of case as of June 30, 2000; however, the reconciled cash balance exceeded the total identified open items by \$4,477.

To ensure proper accountability over open cases and ensure monies held in trust by the court are sufficient to meet liabilities, monthly listings of open items should be prepared by the court and reconciled to the reconciled cash balance. Any discrepancies found should be investigated and resolved.

The February 1999 open items listing included numerous old cases, some dating to the 1980's or before, and approximately sixty cases (representing approximately \$13,600) that were at least five years old. If it appears unlikely the remaining amounts owed will be collected, a court order should be obtained to allow the balance in each case to be prorated among the various court costs. Attorney General's Opinion No. 26, 1973 to Osborne, concluded that "If, when liability has been established, accrued costs cannot be collected in full, charges not having any statutory priority or not allocated under court rule should be prorated."

Old inactive case balances increase the volume of cases which must be monitored and controlled, putting a greater burden on limited personnel resources. In addition, failure to prorate available monies when it is unlikely the balance will be collected, deprives the state and county of the use of those monies.

- B. Our review of the Circuit Clerk's interest account found that copy monies are being deposited into the account and used for various office expenditures. From January 1, 1998 to June 1, 2000, copy monies totaling \$3,644 were deposited in the Circuit Clerk's interest account, and only \$1,437 was turned over to the County Treasurer. A similar situation was noted in the prior audit resulting in an additional \$1,334 of copy monies which remain in the account. In addition, approximately \$915 of unidentified monies, \$537 in interest earned on the Recorder's bank account, and \$218 in old outstanding child support checks were deposited in the Circuit Clerk's interest account. As a result, \$5,211 of monies in the Circuit Clerk's interest account needs to be disbursed to the appropriate parties.

Copy monies and interest earned on the Ex-Officio Recorder's account represent accountable fees. Section 50.370, RSMo 1994, requires every county official who receives fees for official services to pay such monies monthly to the county treasury. In addition, to ensure proper accountability over official receipts and reduce the potential for loss, theft, or misuse of funds, prenumbered receipt slips should be issued for all monies received, monies should be deposited intact, and should be remitted to the County Treasurer along with other accountable fees on a monthly basis. Any unidentified monies or old outstanding checks held by the court should be investigated and disposed of in accordance with state law.

Similar conditions were noted in our prior report.

**WE AGAIN RECOMMEND** the Circuit Clerk and Ex-Officio Recorder of Deeds:

- A. Prepare a complete listing of open items on a monthly basis and reconcile the listing to the cash balance. Any discrepancies should be investigated and resolved. In addition, along with the Circuit Judge, review the older cases and determine the appropriate disposition of inactive cases.
- B. Ensure the Circuit Clerk's interest account includes only interest earned on the Circuit Clerk's bank accounts. Copy monies should be receipted, deposited to the fee account, and remitted to the County Treasurer at least monthly, along with any interest earned on the Ex-Officio Recorder's bank account. In addition, any unidentified monies or old outstanding checks held by the court should be investigated and disposed of in accordance with state law.

**AUDITEE'S RESPONSE**

- A. *In the past, monies received from criminal cases were held until final payment was made. We have recently changed our procedure to pro-rate the disbursement of criminal monies. In addition, we are currently reviewing older cases and pro-rating these monies out to reduce our open items balance and attempt to identify the open items difference. Finally, we are also in the process of preparing an open items listing that will be agreed to our cash balance on a monthly basis.*
- B. *Currently, my office only retains interest from the Circuit Clerk's bank account. All other monies, including copy monies, are turned over to the County Treasurer on a monthly basis. Interest is no longer earned on the Ex-Officio Recorder's bank account. In addition, all prior expenditures have been accounted for and the County Commission agrees that the fees paid out were allowable expenditures. In the future, such expenditures will be paid by the County Treasurer instead of the Circuit Clerk.*

This report is intended for the information of the management of Bollinger County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on Prior Audit Findings

BOLLINGER COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by Bollinger County, Missouri, on findings in the Management Advisory Report (MAR) of our prior audit report issued for the two years ended December 31, 1997. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the county should consider implementing these recommendations.

1. Budgets and Financial Statements

- A. The county did not prepare formal budgets for various county funds.
- B. The approved budgets for some county funds did not adequately reflect all available resources.
- C. The county's annual published financial statements did not present information for several county funds.

Recommendation:

The County Commission:

- A. Prepare and/or obtain budgets for all county funds as required by state law.
- B. Include all available resources on the budget document.
- C. Include all county funds in the published financial statements as required by state law, and ensure receipts, disbursements, and beginning and ending balances are presented for each county fund.

Status:

- A&C. Partially implemented. Most of the funds noted in the prior report were budgeted and published in the county's financial statements beginning in 1999; however, a few funds including the Health Center and Senate Bill 40 Board are still not meeting the requirements. Although not repeated in the current MAR, our recommendation remains as stated above.
- B. Implemented. The budgeted beginning cash balances of the General Revenue and Special Road and Bridge funds adequately reflected all available resources beginning with their 1999 and 2000 budgets, respectively.

2. Personnel and Payroll Policies and Procedures

- A. Time sheets were not prepared by some employees.
- B. Centralized records of leave balances and leave used and earned were not maintained by the County Clerk.

Recommendation:

The County Commission:

- A. Require all county employees to complete time sheets which reflect actual time worked. The time sheets should be prepared by employees, approved by the applicable supervisor, and filed with the County Clerk.
- B. Maintain centralized leave records for all county employees.

Status:

- A. Partially implemented. Time sheets are now maintained for several employees; however, some employees still do not prepare time sheets and some time sheets are not filed with the County Clerk. See MAR No. 3.
- B. Not implemented. See MAR No. 3.

3. Statutory Salaries

There was no support for cost of living allowance (COLA) increases given to elected officials effective January 1, 1998.

Recommendation:

The County Commission consult with legal counsel regarding the salary increases and pay only the authorized salary set by the Salary Commission.

Status:

Partially implemented. In 1999, the Salary Commission authorized annual COLA increases. However, no action was taken concerning the 1998 COLA increases. In addition, some disputes have arisen because in the past some officials' salaries were at lower percentages of the statutory maximum than other officials' salaries. Although not repeated in the current MAR, our recommendation remains as stated above.

4. General Fixed Assets

- A. Various fixed asset purchases were not recorded in the fixed asset listing.
- B. Statutorily required information including identification number, description of the item, cost, physical location, date and source of acquisition by fund, and date and method of disposition were not being recorded for most general fixed asset items.

Recommendation:

The County Clerk:

- A. Maintain the general fixed asset records on a current basis to reflect all additions as they occur, and periodically reconcile additions of assets to expenditures for equipment to ensure additions are properly recorded. In addition, the County Clerk should document the annual physical inventory performed and any adjustments made as a result of the physical inventory.
- B. Record all required information in the general fixed asset record and keep the record on a current basis.

Status:

- A. Not implemented. See MAR No. 4.
- B. Partially implemented. Upon implementation of the new computer program for fixed assets, all required information was recorded for many items; however, information on many older assets is no longer available. Although not repeated in the current MAR, our recommendation remains as stated above.

5. Assessor's Accounting Controls and Procedures

- A. Some receipts were not remitted to the County Treasurer. From June 1996 to June 1997, the Assessor's office receipts were at least \$411 more than monies remitted to the County Treasurer.
- B. Receipt slips were not prenumbered prior to June 1998 and were not issued for some monies received.
- C. The method of payment was not always indicated on the receipt slips.
- D. Receipts were not remitted to the County Treasurer on a timely basis.

Recommendation:

The Assessor:

- A. Remit all receipts to the County Treasurer, including the \$411 that cannot be accounted for. In addition, the County Commission should review this situation and decide if further investigation is warranted.
- B. Issue prenumbered receipt slips for all monies received.
- C. Indicate the method of payment on all receipt slips and reconcile the composition of receipt slips to the composition of monies remitted to the County Treasurer.
- D. Remit all monies to the County Treasurer intact daily or when accumulated receipts exceed \$100.

Status:

- A. Partially implemented. Currently receipts are remitted to the County Treasurer; however, no action was taken concerning the \$411. Although not repeated in the current MAR, our recommendation remains as stated above.
- B. Partially implemented. Copy monies are not receipted immediately when received. In some instances, copy monies are not receipted until the monthly turnover is prepared. Although not repeated in the current MAR, our recommendation remains as stated above.
- C. Implemented.
- D. Partially implemented. Monies are remitted to the County Treasurer on a monthly basis; however, these turnovers may exceed \$100. Although not repeated in the current MAR, our recommendation remains as stated above.

6. Circuit Clerk and Ex-Officio Recorder of Deeds' Accounting Controls and Procedures

- A. Monthly listings of liabilities (open items) were not reconciled with the cash balance for the fee account. In addition, the Circuit Clerk deposited \$893 of unclaimed or unidentified monies into the Circuit Division Interest Fund instead of determining the proper disposition of these monies.
- B. Copy monies totaling \$1,334 were deposited in the Circuit Clerk's interest bank account and not receipted or remitted to the County Treasurer.
- C. The Circuit Clerk deposited into the Circuit Clerk's interest bank account \$170 more than actual interest earned.

Recommendation:

The Circuit Clerk and Ex-Officio Recorder of Deeds:

- A. Reconcile the monthly listing of open items to the cash balance for the fee account. In addition, continue efforts to identify all cases with open items. If not identified, any excess monies should be disposed of in accordance with state law.
- B. Ensure all copy monies are receipted, deposited to the fee account, and remitted to the County Treasurer at least monthly.
- C. Refund the appropriate amounts to the applicable bank accounts and ensure the correct amount of interest is deposited monthly to the interest bank account.

Status:

A&B. Not implemented. See MAR No. 6.

- C. Partially implemented. The Circuit Clerk reviewed the activity of the interest account from 1992 to 1998 and came to the conclusion that she did deposit \$170 more than she should have into the interest fund, but later adjusted for this error; therefore, it did not appear to her that a refund was appropriate and no refund has been made in the current audit period. No similar instances were noted in the current audit period.

7. County Collector's Commissions

The County Collector did not refund \$30,800 of excess commissions to other county funds and political subdivisions. These monies were deposited into the General Revenue Fund.

Recommendation:

The County Collector refund the excess commissions to the other county funds and political subdivisions from the General Revenue Fund.

Status

Not implemented. The County Commission indicated the General Revenue Fund did not have sufficient funds to repay these monies.

8. Sheriff's Accounting Controls and Procedures

- A. Bank balances were not reconciled with the accounting records on a monthly basis.

- B. The Sheriff had \$2,260 in two old bank accounts that remained unclaimed. Of this amount, \$2,144 was received from a Sheriff's sale in January 1994. The remaining \$116 pertained to old outstanding checks.
- C. The Sheriff provided dispatching services and boarding of prisoners for other entities. No written agreements existed with these entities regarding the compensation to be paid or the services to be provided.

Recommendation:

The Sheriff:

- A. Perform monthly bank reconciliations and reconcile to the cash control balance.
- B. Disburse the amounts remaining from the 1994 Sheriff's sale and attempt to locate the payees of the old outstanding checks and reissue checks if possible. Any remaining unclaimed amounts should be disbursed in accordance with state law.
- C. Enter into written agreements with political subdivisions for the services provided.

Status:

- A. Partially implemented. Monthly bank reconciliations are performed; however, the book balance exceeds the reconciled bank balance by \$125 and this difference has not been resolved. Although not repeated in the current MAR, our recommendation remains as stated above.
- B. Not implemented. See MAR No. 5.
- C. Not implemented. See MAR No. 2.

9. Health Center Accounting Controls and Procedures

The Health Center approved disbursements in excess of budgeted amounts.

Recommendation:

The Health Center not authorize warrants in excess of the budget.

Status:

Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

# BOLLINGER COUNTY, MISSOURI HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

Organized in 1851, the county of Bollinger was named after George F. Bollinger, the leader of the early pioneers in the area. Bollinger County is a county-organized, 3rd-class county and is part of the 32nd Judicial Circuit. The county seat is Marble Hill.

Bollinger County's government is composed of a three-member county commission and separate elected officials performing various tasks. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials.

Principal functions of these other officials relate to judicial courts, law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records of importance to the county's citizens.

Counties typically spend a large portion of their receipts to support general county operations and to build and maintain roads and bridges. The following chart shows from where Bollinger County received its money in 1999 and 1998 to support the county General Revenue and Special Road and Bridge Funds:

| SOURCE                    | 1999         |            | 1998      |            |
|---------------------------|--------------|------------|-----------|------------|
|                           | AMOUNT       | % OF TOTAL | AMOUNT    | % OF TOTAL |
| Property taxes            | \$ 336,884   | 21         | 315,785   | 20         |
| Sales taxes               | 485,604      | 30         | 455,343   | 28         |
| Federal and state aid     | 578,163      | 36         | 584,156   | 37         |
| Fees, interest, and other | 214,551      | 13         | 247,348   | 15         |
| Total                     | \$ 1,615,202 | 100        | 1,602,632 | 100        |

The following chart shows how Bollinger County spent monies in 1999 and 1998 from the General Revenue and Special Road and Bridge Funds:

| USE                       | 1999         |            | 1998      |            |
|---------------------------|--------------|------------|-----------|------------|
|                           | AMOUNT       | % OF TOTAL | AMOUNT    | % OF TOTAL |
| General county government | \$ 446,013   | 27         | 470,098   | 30         |
| Public safety             | 416,638      | 25         | 423,639   | 27         |
| Highways and roads        | 778,032      | 48         | 687,294   | 43         |
| Total                     | \$ 1,640,683 | 100        | 1,581,031 | 100        |

The county maintains approximately 59 county bridges and 960 miles of county roads.

The county's population was 8,820 in 1970 and 10,619 in 1990. The following chart shows the county's change in assessed valuation since 1970:

|                        |    | Year Ended December 31, |      |       |        |        |
|------------------------|----|-------------------------|------|-------|--------|--------|
|                        |    | 1999                    | 1998 | 1985* | 1980** | 1970** |
|                        |    | (in millions)           |      |       |        |        |
| Real estate            | \$ | 48.4                    | 46.9 | 26.2  | 10.1   | 6.9    |
| Personal property      |    | 19.6                    | 18.4 | 7.4   | 4.8    | 3.2    |
| Railroad and utilities |    | 10.8                    | 10.0 | 9.5   | 11.8   | 7.6    |
| Total                  | \$ | 78.8                    | 75.3 | 43.1  | 26.7   | 17.7   |

\* First year of statewide reassessment.

\*\* Prior to 1985, separate assessments were made for merchants' and manufacturers' property. These amounts are included in real estate.

Bollinger County's property tax rates per \$100 of assessed valuations were as follows:

|                              |    | Year Ended December 31, |      |
|------------------------------|----|-------------------------|------|
|                              |    | 1999                    | 1998 |
| General Revenue Fund         | \$ | .19                     | .19  |
| Special Road and Bridge Fund |    | .25                     | .25  |
| Health Center Fund           |    | .24                     | .24  |
| Senate Bill 40 Board Fund    |    | .10                     | .10  |

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on September 1 and payable by December 31. Taxes paid after December 31 are subject to penalties. The county bills and collects property taxes for itself and most other local governments. Taxes collected were distributed as follows:

|                              | Year Ended February 28, |           |
|------------------------------|-------------------------|-----------|
|                              | 2000                    | 1999      |
| State of Missouri            | \$ 23,814               | 23,141    |
| General Revenue Fund         | 155,607                 | 150,568   |
| Special Road and Bridge Fund | 197,273                 | 191,041   |
| Assessment Fund              | 32,534                  | 30,298    |
| Health Center Fund           | 188,606                 | 182,640   |
| Senate Bill 40 Board Fund    | 78,700                  | 76,368    |
| School districts             | 2,287,671               | 2,097,650 |
| Library district             | 78,842                  | 76,516    |
| Ambulance district           | 157,065                 | 151,913   |
| Fire protection districts    | 47,442                  | 44,556    |
| Drainage district            | 46,662                  | 42,075    |
| Cities                       | 6,705                   | 6,515     |
| County Clerk                 | 756                     | 1,073     |
| County Employees' Retirement | 28,634                  | 29,891    |
| Commissions and fees:        |                         |           |
| County Collector             | 940                     | 855       |
| General Revenue Fund         | 53,759                  | 50,251    |
| Total                        | \$ 3,385,010            | 3,155,351 |

Percentages of current taxes collected were as follows:

|                        | Year Ended February 28, |        |
|------------------------|-------------------------|--------|
|                        | 2000                    | 1999   |
| Real estate            | 89.7 %                  | 90.5 % |
| Personal property      | 87.8                    | 88.6   |
| Railroad and utilities | 100.0                   | 100.0  |

Bollinger County also has the following sales taxes; rates are per \$1 of retail sales:

|         | Rate     | Expiration Date | Required Property Tax Reduction |
|---------|----------|-----------------|---------------------------------|
| General | \$ .0050 | None            | 50 %                            |
| General | .0050    | None            | None                            |

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below.

| Officeholder  | 2000   | 1999   | 1998   |
|---|--------|--------|--------|
| County-Paid Officials:  |        |        |        |
| Ken Trentham, Presiding Commissioner                              | \$     | 20,400 |        |
| Elwood Mouser, Presiding Commissioner                             |        |        | 11,570 |
| Robert Gray, Associate Commissioner                               |        | 3,067  |        |
| Jerry Woodfin, Associate Commissioner                             |        | 15,334 | 11,570 |
| Rod Jetton, Associate Commissioner                                |        | 18,400 | 11,570 |
| Diane Holzum, County Clerk  |        | 27,880 | 25,315 |
| Stephen Gray, Prosecuting Attorney                                |        | 33,621 |        |
| William Hopkins, Prosecuting Attorney                             |        |        | 27,220 |
| Dennis W. Willis, Sheriff   |        | 31,120 | 31,120 |
| Naomi Null, County Treasurer                                      |        | 20,631 | 14,979 |
| Gene Ward, County Coroner   |        | 7,791  | 5,920  |

| Janitor*  | 2                           | 0        |
| Total   | <u>52</u>                   | <u>4</u> |

\* Includes one part-time employee.

\*\* Includes two part-time employees.

\*\*\* Includes five part-time employees.

In addition, the county pays a proportionate share of the salaries of other circuit court-appointed employees. Bollinger County's share of the 32nd Judicial Circuit's expenses is 11.94 percent.

The Bollinger County Health Center with voter approval obtained a \$300,000 bank loan on January 5, 1995, to partially finance the construction of a new building. The loan matures on January 5, 2005. At December 31, 1999, the outstanding balance on the bank loan was \$159,931.

CITY OF BERKELEY, MISSOURI

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

November 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

The accounting and financial records for Berkeley have severely declined since 1996. In March 2000, former Governor Mel Carnahan requested an audit. The findings of our audit fall into eight categories: overall accounting records, police and fire pension fund records, property tax rates, receipt and disbursement procedures, expenditures, city credit cards, payroll processes and municipal court actions. City officials agreed with our recommendations and are already instituting several of them. The following summary highlights our findings.

**Poor records leave city unable to monitor financial status**

Berkeley officials have not been able to adequately monitor the financial condition of their city due to poorly maintained records, an inaccurate general ledger, no monthly financial activity reports and untimely bank reconciliations. Several factors contributed to these issues: vacancies in the city manager and finance director positions, disputes within the city council, and a lack of cooperation or communication between city officials. The city's outside accounting firm began disclosing these significant accounting problems in 1997. Due to the state of the city's records, the outside accounting firm has had to perform routine accounting functions usually left to a city staff.

**Pension fund records not maintained**

The city has not obtained an actuarial study since 1996 to determine the long-term financial condition of the Police and Fire Pension Fund. In addition, city officials have not recorded some fund transactions, regularly invested pension revenues or prepared accurate records of employee's contributions and balances. Because all of an employee's pension fund contributions are refunded to the employee, it is imperative the city have current and accurate employee statements.

Our audit also questioned the Pension Board's travel expenditures, which included pension-related conference trips to Las Vegas, Lake Ozark and Phoenix. These trips totaled nearly \$15,000 in expenses paid by the fund. Some board members were reimbursed for travel expenses in addition to receiving a \$60 daily allowance.

**City overcharged taxpayers \$575,000**

Berkeley set its property tax rate too high, according to state law, and in turn overcharged it residents \$575,000 in property taxes from 1997 to 1999. In April 2000, the city decided to refund the money. Rather than mailing a check, residents seeking a refund had to bring their paid tax receipts to city hall, a method which is not equitable to all residents. As of June 2000, the city had only returned about \$20,000.

YELLOW SHEET

### **One employee records, stores, prints and signs checks**

To safeguard against possible loss or misuse of funds, the city needs to segregate the duties of printing and signing checks from recording check information into the computer. One employee is responsible for all of these duties. In addition, there is no written policy for issuing manual checks to help prevent unauthorized uses.

### **Some city officials reimbursed for travel expenses above allowance**

The city reimbursed several individuals for meals and other costs in addition to the \$50 per diem payment for travel-related expenditures. In one case, the city paid a hotel bill for a trip that included a \$40 room service charge, even though the city had already reimbursed \$350 to the individual for the same trip.

### **Officials do not pay for personal cellular phone calls**

The city does not have a formal written policy on cellular phones and does not require officials to pay for personal calls. City officials said the cellular phones are used for both personal and business use, with all costs paid by the city. During one month, a city council member incurred 1,433 minutes in excess of the free minutes provided by the monthly service plan.

### **Social Security withholdings not reported**

The city did not report city employee wages and withholdings for 1997 and 1998 to the Social Security Administration. The city had corrected the 1998 omission, but had not corrected the 1997 omission.

### **Municipal court bonds not regularly deposited, arrest warrants not timely activated**

Receipts are not transmitted to the city or deposited in the bond bank account on a timely basis, open items are not properly accounted for, the checking account is not reconciled to the court records, and some bond account checks are signed in advance. The court had not properly disposed of some bonds, recorded the disposition of numerous cases on the computer system or activated arrest warrants in a timely manner.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Roger B. Wilson  
Governor of Missouri  
and  
To the Honorable Mayor  
and  
Members of the City Council  
City of Berkeley  
Berkeley, Missouri 63134

By his authority under Section 26.060, RSMo, former Governor Carnahan requested the State Auditor's Office perform an audit of the city of Berkeley in March 2000. In response to this request, the Missouri State Auditor's Office conducted an audit of the city. Our audit of the city included, but was not limited to, the year ended June 30, 2000. The objectives of this audit were to:

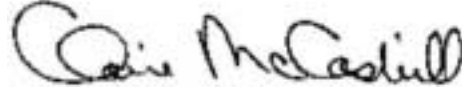

1. Review the city's overall financial records and accounting procedures.
2. Perform procedures we deemed necessary to evaluate citizens' concerns.
3. Review certain internal control procedures, legal compliance issues, and management practices to determine the efficiency and effectiveness of those procedures and practices.

Our audit was made in accordance with applicable generally accepted governmental auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed council minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied during our audit.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Berkeley, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

August 3, 2000 (fieldwork completion date)

## EXECUTIVE SUMMARY

## CITY OF BERKELEY, MISSOURI EXECUTIVE SUMMARY

The city of Berkeley has an annual operating budget of approximately \$10 million and pension fund assets of almost \$13 million. For the past four fiscal years, the city of Berkeley's accounting records have not been accurately maintained and procedures and controls have been inadequate. The city's CPA firm began disclosing significant problems in the city's accounting system in the audit for the year ended June 30, 1997. For the year ended June 30, 1998, the city's CPA firm was unable to express an opinion on the city's financial statements and issued a management letter with 41 recommendations regarding significant deficiencies in the city's accounting controls and procedures. The city's CPA firm has not yet completed an audit for the year ended June 30, 1999. On March 16, 2000, former Governor Carnahan requested the State Auditor to perform an audit of the city.

The city's general ledger, which is a record of all city financial transactions, has not been accurately maintained, and the city has not performed bank reconciliations of its primary bank account. The city has paid more than \$134,000 to its CPA firm for the fiscal year 1999 audit, including a significant amount of work to perform the bank reconciliations, make corrections to the general ledger, re-compute the city's property tax rates, and train new city employees. As a result of the poor financial records, the City Council has not received periodic financial information to monitor the financial condition of the city.

The city maintains a Pension Fund for its police and firefighters. Actuarial studies, which are necessary to determine the long-term financial condition of the Pension Fund, have not been performed since 1996. The city has not maintained sufficient records of pension revenues, expenditures, and balances, and has not been transferring the required amount of property taxes and employee contributions to the pension investment management account on a timely basis.

From 1997 to 1999, the city levied approximately \$575,000 more in debt service property taxes than allowed. In April 2000, the City Council decided to remedy this by making refunds to city taxpayers who brought paid tax receipts to city hall. As of June 30, 2000, the city had refunded only approximately \$20,000, and has taken little additional action to get the refunds to all applicable taxpayers.

The City Council does not exercise adequate control over expenditures. Some expenditures in the areas of travel, cellular phone, and credit card expenditures were not adequately documented or reviewed, and the city did not report Social Security taxes for 1997 and 1998 to the Social Security Administration. In addition, accounting records and controls for the municipal court need improvement.

While improvements in the city's overall accounting records and procedures for the year ended June 30, 2000 have begun, significant improvements are still needed.

The city has experienced significant turnover and vacancies in key personnel, including the positions of City Manager and Finance Director. For much of the time period from 1995 to 1998, the position of City Manager was vacant. The City Council appointed a new City Manager

in September 1998, but because of a dispute over the legality of the appointment, the City Manager was not allowed to assume his duties until May 1999. The position of Finance Director was also vacant for much of 1998 and 1999. The city had an acting Finance Director from December 1999 to August 2000, when a permanent Finance Director was hired. This turnover in personnel, along with disputes within the City Council and a lack of cooperation or communication between the city and the Pension Board, have contributed to the city's current problems.

The city could resolve some of these problems by implementing the State Auditor's recommendations contained in this report. However, the City Council, Pension Board, and city management employees must learn to work together effectively. The city must evaluate management practices to more efficiently use the resources available to the city and ensure an effective system of accounting and administrative controls is in place.

## CITY OF BERKELEY, MISSOURI HISTORY AND ORGANIZATION

The city of Berkeley is located in north St. Louis County with Lambert-St. Louis International Airport on the western border. It was incorporated as a Council-Manager form of government in 1937. The population of the city in 1990 was 12,250.

The city government consists of a mayor and six-member City Council. The mayor and one other Council member are elected at-large; the other five are representatives elected from each ward. All are elected for four-year terms. The Mayor, City Council, and other principal officials at June 30, 2000 were:

| <u>Elected Officials</u>                  | <u>Term Expires</u> | Compensation<br>for the<br>Year Ended<br><u>June 30, 2000</u> |
|---|---------------------|---|
| Babatunde Deinbo, Mayor (1)               | April 2004          | \$ 2,100  |
| Kenneth McClendon, Councilman-at-large    | April 2002          | 2,100   |
| Louis Bowser, Ward One Councilman         | April 2002          | 2,100   |
| Nina Schaefer, Ward Two Councilwoman      | April 2004          | 2,100   |
| Aloha Keeley, Ward Three Councilwoman     | April 2002          | 2,100   |
| Louvenia Mathison, Ward Four Councilwoman | April 2004          | 2,100   |
| VACANT, Ward Five Councilman(2)           |                     |   |

| <u>Other Principal Officials</u>               | Compensation<br>for the<br>Year Ended<br><u>June 30, 2000</u> |
|--|---|
| Karl J. Reid, City Manager/Chief of Police (3) | \$ 66,725   |
| Jean Holmes, Acting Finance Director (4)       | 39,051  |
| Sarita Kimble, Acting City Clerk (5)           | 26,884  |
| George Staton, Human Resource Manager (6)      | 38,061  |
| Donnell Smith, City Attorney                   | 30,000  |
| Renee' Hardin-Tammons, Municipal Judge (7)     | 14,510  |
| Felicia Ezell-Flewellen, Prosecuting Attorney  | 14,807  |
| Diane Downey, Court Clerk                      | 32,679  |

- (1) Theodore Hoskins was removed from office in June 1999. Kenneth McClendon, Councilman-at-large, served as Acting Mayor until Babatunde Deinbo was elected in April 2000.
- (2) Jean Montgomery won a special election in September 2000 to fill this position. Babatunde Deinbo held this position until he was elected Mayor in April 2000.

- (3) No additional compensation was paid to Karl Reid for serving as Chief of Police. Gertrude Bogan was appointed Chief of Police in August 2000.
- (4) Phyllis Mitchell served as Finance Director until December 1999. Della Ellis was appointed Finance Director in August 2000.
- (5) Doris Jackson served as City Clerk until March 2000.
- (6) Resigned on July 3, 2000, and the position remains vacant.
- (7) Timothy Devereaux served as Municipal Judge until August 1999.

As of June 30, 2000, the city of Berkeley employed 136 full-time employees.

Assessed valuation and tax rate information for tax year 1999 are as follows:

#### ASSESSED VALUATION

|                   |                      |
|-------------------|----------------------|
| Real estate       | \$113,831,438        |
| Personal property | <u>\$ 52,777,880</u> |
| Total             | <u>\$166,609,318</u> |

#### TAX RATE PER \$100 ASSESSED VALUATION

|                      |               |
|----------------------|---------------|
| General Revenue Fund | \$ .69 *      |
| Debt Service Fund    | .36 **        |
| Pension Fund         | <u>.09</u>    |
| Total                | <u>\$1.14</u> |

\* Of the \$.69 General Fund levy, the city uses \$.21 for the Park Fund and \$.03 for the Revolving Equipment Replacement Fund.

\*\* The city levied \$.36; however, the State Auditor's Office certified a tax rate ceiling of \$.24.

The city also has the following sales taxes; rates are per \$1 of retail sales:

|                      | <u>Rate</u> | <u>Expiration<br/>Date</u> |
|----------------------|-------------|----------------------------|
| General              | \$ .01      | None                       |
| Capital improvements | .005        | None                       |

## HISTORY AND ORGANIZATION

## MANAGEMENT ADVISORY REPORT

CITY OF BERKELEY, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |  |
|-----------|--|
| <b>1.</b> | <b>Overall Accounting Records and Procedures</b> |
|-----------|--|

The adequacy of the city's financial accounting records and procedures has severely declined over the past four fiscal years. The city's CPA firm began disclosing significant financial reporting deficiencies for the year ended June 30, 1997, and could not conclude the city's financial statements for the year ended June 30, 1998, were fairly presented due to the city's poor records and procedures. The CPA firm has not yet completed audit work for the year ended June 30, 1999. Our review of the city's overall accounting records and procedures noted the following concerns:

- A. The city maintains a general ledger to account for revenues, expenditures, and balances for each city fund. The city has not been accurately recording accounting entries from the daily receipt listings and check registers to the general ledger and therefore, the general ledger is not accurate. As a result, the city's CPA firm has proposed numerous general ledger corrections for the years ended June 30, 1999 and 1998. In addition, the city's CPA firm noted that copies of the general ledger were not always printed.

Reconciling the general ledger to other accounting records helps ensure all transactions are accurately recorded and helps ensure the city's revenues, expenditures, and balances are fairly stated. At least monthly, the city should ensure that city receipt listings and check registers agree to the general ledger. In addition, fund balances should be reconciled to bank balances, to ensure monies are properly recorded and handled. The ledger should be printed at least monthly, and retained with documentation of the reconciliations.

- B. Bank reconciliations have not been performed on a regular basis. The city's CPA firm reconciled the city's bank accounts at June 30, 1999, because no reconciliations had been performed by the city. As of June 30, 2000, the city Finance Department had reconciled seven of the nine city bank accounts but had not yet reconciled the general fund account, which is the largest city account. In addition, audit adjustments for the year ended June 30, 1999, have not been recorded on the general ledger. Monthly bank reconciliations are necessary to ensure the accounting records are in agreement with the bank records and to help detect errors on a timely basis.
- C. Monthly financial activity reports are not submitted to the City Council. Article III, Section 3 of the City Charter requires the City Manager to keep the City Council fully advised on the financial condition of the city. The city should provide accurate monthly financial summaries to the City Council to ensure the City Council properly monitors the financial condition of the city.

- D. As noted above, the city's CPA firm has not yet issued an audit report for the year ended June 30, 1999, and no audit has yet been performed for the year ended June 30, 2000. The city paid the CPA firm \$134,464 during the year June 30, 2000. The CPA firm performed significant accounting and reconciling procedures for the city, including performing bank reconciliations for the city's bank accounts as noted above. The CPA firm apparently spent a significant amount of time training new city employees because of turnover in the city's accounting personnel, and re-computing the city's debt service tax rates (See MAR No. 3).

Beginning in December 1999, the city has paid \$11,741 to another CPA to perform accounting services on a part-time basis. Her main duties were to help with the bank reconciliations and prepare an open-items list for the court bond account. The city has just contracted with this CPA to perform additional services for the city from October 1 to December 31, 2000, for a fee of \$7,500.

In March 2000, the city's Police and Fireman's Pension Board engaged a CPA firm to perform an audit of the city's Pension Fund for the years ended June 30, 1996 through 1999, and the CPA firm started audit fieldwork in July 2000. The audit fees will be \$90 per hour for professional staff and \$50 per hour for clerical support staff. Although the audit is in progress the total cost of this audit has not yet been estimated. Even though the city's annual CPA audits for 1996, 1997 and 1998 included the Pension Fund, (and the 1999 audit will include the Pension Fund) the Pension Board is paying to have these years audited again. The Board indicated the audit was needed due to the city's inadequate financial records of the Pension Fund (see Management Advisory Report No. 2) and the lack of timely audits performed on the city's financial statements.

The city should ensure its financial and accounting records are up-to-date to reduce the audit costs and ensure timely audits. The City Council and the Pension Board should work together to ensure audits of the Pension Fund are done on a timely basis and to avoid duplicate or unnecessary audit expenses. The city has used the same CPA auditing firm for more than 10 years and has not periodically solicited proposals for auditing services. The city should periodically solicit proposals for auditing services to ensure it receives the best value.

**WE RECOMMEND** the City Council:

- A. Ensure the city's general ledger is accurately maintained, reconciled to applicable accounting records, printed, and permanent copies retained.
- B. Ensure accurate bank reconciliations are prepared monthly for all city accounts.
- C. Ensure monthly financial reports are prepared for the Council to review and monitor the financial condition of the city.

- D. Ensure all accounting records, including bank reconciliations, are kept up-to date to help reduce audit costs, and work with the Pension Board to ensure the city does not incur any duplicate or unnecessary audit costs. In addition, the council should periodically solicit proposals for auditing services.

### **AUDITEE'S RESPONSE**

- A. *Implemented. Financial reports were printed in consolidation form for the period 07/01/99-06/30/00 and are filed. Monthly financial reports were printed for periods 07/00, 08/00 and 09/00. The finance department is currently in the process of reconciling each month's activity and verifying the accuracy of the information.*
- B. *Implemented/In process. Reconciliation of the general fund account is still in process, and we estimate approximately two months until completion. All other bank accounts have been reconciled through 08/30/00.*
- C. *Will implement. The City Council currently receives monthly revenue reports. Expenditure and fund balance reports are in process.*
- D. *Will implement. We are currently in the process of hiring additional staff and preparing policies and standard operating procedure manuals for the finance department. We have implemented new revenue collection and purchasing procedures.*

*The Finance Director is actively involved with the Pension Board. There is better communication and we are currently reviewing policies and procedures for necessary changes to ensure proper approval process and accountability.*

*The city has prepared a request for proposal and is ready to proceed with solicitations for audit services.*

|  |
|--|
| <b>2. Police and Fire Pension Fund</b> |
|--|

The city has established a Pension Fund for police and fire employees. A separate Pension Board, comprised of a current police employee, a current fire employee, a member of the City Council, the City Manager, and two citizen representatives, oversees the operations of the Pension Fund. The Pension Board is responsible for investing the Pension Fund assets and approving disbursements from the fund. The City Finance Director serves as treasurer of the Pension Board. Our review of the Pension Fund and Pension Board noted the following concerns:

- A. The Pension Board has not obtained an actuarial report on the Pension Fund since June 30, 1996. An actuarial report assesses the solvency of the Pension Fund and helps determine whether the city is properly funding the Pension Fund. An actuary was hired to prepare a report for the two years ended June 30, 1998; however, a

formal actuarial report was never issued. The Pension Board has hired another firm to complete actuarial reports for the years ended June 30, 2000 and 1999. The firm has not yet completed the reports because the firm has not received some necessary information from the city.

Section 200.170 of the City Municipal Code requires the Pension Board to retain a competent actuary on an annual basis. Without annual actuarial reports, the board cannot determine the long-term financial condition of the Pension Fund and cannot make sound decisions concerning the operations of the fund. The Pension Board and city officials should work with the actuary to ensure the fiscal year 1999 report can be prepared immediately and that future actuarial reports are prepared on a timely basis.

- B. The city has not maintained accurate and complete records of financial transactions of the Pension Fund. For the last three fiscal years, the city has not adequately recorded Pension Fund transactions to the general ledger nor maintained cash and investment balances for the Pension Fund.

A portion of the city's property tax levy is earmarked for the Pension Fund. In addition to property taxes, Pension Fund revenues consist of employee contributions and investment income. In May 2000, the city Finance Department recorded property tax revenues and employee contributions to the Pension Fund for the first 10 months of the year ended June 30, 2000, and subsequently transferred this amount to the pension investment management account. No investment income has been recorded on the general ledger for the year ended June 30, 2000.

The city relied on their CPA firm to calculate the amounts of property taxes and employee contributions to be transferred from the General Fund to the Pension Fund for the years ended June 30, 1999 and 1998. At June 30, 1998, the CPA's calculations indicated the city owed \$160,223 from the General Fund to the Pension Fund. During fiscal year 1999, the city made two large transfers to the Pension Fund and had overpaid the Pension Fund by \$29,300. Therefore, the city should offset future pension fund transfers by this amount.

The city has a fiduciary responsibility to ensure all Pension Fund revenues are recorded and all pension monies are transferred to the investment management account on a timely basis. The city should ensure all Pension Fund transactions are recorded at least monthly to the general ledger, and transferred to the investment management account.

- C. Neither the board nor the city has prepared accurate, up-to-date statements of contributions and balances for all employees contributing to the Pension Fund.

When an employee leaves employment with the city, all employee contributions to the Pension Fund are refunded to the employee. Therefore, it is important for the city to have up-to-date information of total contributions for each employee. Monthly

statements of contributions and balances for each employee are also necessary to ensure employee and city records agree and to detect errors in a timely manner. The Finance Department and Pension Board should work together to prepare current statements and ensure the statements are updated monthly and verified for accuracy.

- D. Minutes of Pension Board meetings are not signed. In addition, the board could not locate minutes for several meetings. The Board Chairman indicated that all meetings are recorded on cassette tapes, but some minutes were not typed because the board does not have a secretary. As a result, some minutes were not approved in a timely manner. For example, the board approved the minutes for February 2000 at the May 2000 meeting.

All board minutes should be prepared prior to and approved at the next subsequent board meeting. The minutes should be signed by the preparer, and signed by the Board Chairperson to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken.

- E. Pension Board approval is not documented for some disbursements. In July 1999, a former police department employee was paid approximately \$20,600 from the Pension Fund for benefits due to him. While the board did retain support for the calculation of this amount, board approval of this disbursement was not documented in the board minutes. To help ensure all disbursements are for valid pension-related purposes, board approval should be documented for all disbursement made from the Pension Fund.

- F. Neither the city nor the board maintain adequate supporting documentation for some Pension Fund expenditures, and some expenditures paid from the Pension Fund did not appear to be prudent uses of pension assets. Board members attend various pension-related conferences which are paid from the Pension Fund. Expenses for trips to Las Vegas, Nevada, in February 1999 totaling \$5,942; Lake Ozark, Missouri, in September 1999 totaling \$2,069; and Phoenix, Arizona, in February 2000 totaling \$6,981; were reviewed and the following concerns noted:

- 1) Invoices were not retained for registration, airfare, lodging, or other expenses incurred for some of these trips. Due to inadequate documentation, it was difficult to determine the attendees at these conferences. Original invoices or other supporting documentation is necessary to ensure that disbursements are for legitimate pension-related purposes.
- 2) Pension board members are paid per diems of \$60 per day to cover miscellaneous travel expenses. The board members are not required to document actual expenditures paid from the per diem payments, and these amounts are not included on their W-2 forms. In addition, some board members were reimbursed for miscellaneous travel expenses, such as

gasoline, room service, telephone calls, and photocopies, in addition to the per diem payments.

The Pension Board should adopt travel policies to ensure the city pays for only actual and reasonable travel expenses. If the board continues to provide per diem payments, the city should require the submission of receipts or other documentation to support the actual expenses covered by the per diem payments or include per diem payments as income on applicable W-2 forms.

- 3) It had been a practice of the Pension Board to pay for members' spouses or guests to attend these conferences. The Board Chairman requested the applicable board members to reimburse the pension fund for spouse and guest expenses incurred for the February 2000 trip to Phoenix. In June 2000, the Board Chairman drafted a memo summarizing the total amounts reimbursed for spouse and guest expenses for the Phoenix trip, as well as reimbursements for a hotel overpayment, airline cancellation, and reimbursement of mileage paid to two board members for the same trip. The total reimbursement to the pension fund, according to the memo, was \$1,893; however, only \$1,813 of deposits (a difference of \$80) could be traced to the pension account bank statements.

The board should adopt a formal policy regarding allowable expenses to be reimbursed. In addition, the records should be carefully reviewed to ensure all reimbursements received are deposited.

- 4) The Pension Board authorized the transfer of \$2,823 from the pension investment account to the city's checking account in September 1999, to pay for board travel expenses for the conference in Lake Ozark. City records show that only \$2,069 was actually spent for this conference, but there was no record that the difference (\$754) was transferred back to the pension investment account. The city and the Pension Board should follow up on this matter and determine whether the \$754 should be transferred back to the pension investment account or city expenditures records are in error.
- 5) Disbursements for the trip to Phoenix were made by the Pension Board's investment management bank directly upon the authorization of the Board Chairman. Section 200.420 of the City Municipal Code requires that all disbursements from the Pension Fund be made by checks drawn by the city Finance Director based on vouchers approved by the Pension Board. Because checks were not issued by the Finance Director, the city did not have a record of these payments.

**WE RECOMMEND** the City Council work with the Pension Board to ensure:

- A. Annual actuarial reports are obtained for the Pension Fund.

- B. All Pension Fund transactions are recorded to the general ledger and funds transferred to the pension investment management account in a timely manner.
- C. Accurate monthly statements of employee contributions and balances are prepared.
- D. All Pension Board minutes are prepared, reviewed and approved at the subsequent board meeting, and signed by both the preparer and the Board Chairman.
- E. Approval for all Pension Fund disbursements is documented in the minutes.
- F.1. Invoices or other documentation is maintained to support all expenditures from the Pension Fund.
  - 2. Only actual and necessary travel expenses are reimbursed to board members. If per diem payments continue to be made, the city should require receipts or other documentation for the spending of per diems or include these payments as income on applicable W-2 forms.
  - 3. Adopt a policy regarding allowable expenses to be reimbursed. In addition, the city should ensure all reimbursements for the conference in Phoenix were deposited into the pension bank account.
  - 4. The \$754 difference between the amount transferred to the city checking account and actual conference expenses is investigated and resolved.
  - 5. All Pension Fund disbursements are made by checks drawn by the City Finance Director pursuant to the City Municipal Code.

#### **AUDITEE'S RESPONSE**

- A. *Will implement. The Finance Director did contact the current actuarial firm, Milliman & Robertson, Inc., to assess the status of information needed to complete the actuarial reports for 1999 and 2000. According to the firm, they have completed a report for 1998. The 1999 report is currently in process.*
- B. *Will implement. All tax revenues are recorded to the general ledger each month. Employee contribution transactions are recorded bi-weekly or monthly. Investment activity has been calculated but not entered due to prior period audit adjustments due to the Pension Fund.*

*Property tax calculations are done via spreadsheet every month before entering into the general ledger. The city is scheduled to make another property tax contribution totaling \$32,333.33 to the pension investment account in October 2000. Future transfers will be made on a monthly basis.*

*The Pension Fund overpayment will be verified and accounted for in future Pension Fund transfers.*

- C. Will implement. This function will be implemented by the Finance Department upon completion of the Pension Fund audit.*
- D. Will implement. As communication gaps are eliminated among the Pension Board, City Administration and City Council, policies and procedures will be reviewed and changed where necessary to ensure compliance with all Pension Board rules and regulations. Additional rules and regulations will also undergo review to ensure compliance with federal, state and local Pension Board laws.*
- E. Will implement. Policies and procedures will be reviewed and changes implemented where needed. The Finance Director will also ensure proper approval and adequate documentation is obtained prior to issuing disbursements from the Pension Fund. Part of new purchasing procedures in the Finance Department require each department to obtain prior approval of charges from the department head which then must have city manager approval before incurring any liabilities. Purchase orders, contracts, etc. are then issued and vouchers are completed, which must also have the department head and City Manager approval prior to payment of invoices.*

*A similar process will be reviewed and implemented for disbursements from the Pension Fund.*

- F.1. Will implement. See comments above for part E.*
- 2. Will implement. Travel policies do exist for regular city travel. These policies will be reviewed and updated and extended to travel procedures for the Pension Fund as well.*
- 3. Will implement. See comment above for travel policies. The Finance Department will investigate reimbursement for the Phoenix conference to verify if all deposits were made into the pension bank account.*
- 4. Will investigate and present findings to Pension Board for resolution if needed.*
- 5. Will implement. The Finance Director will review the number of authorized signatories with the investment manager and discuss/implement changes necessary to ensure limited authorization to pension funds.*

|  |
|--|
| <b>3. Debt Service Property Tax Levy</b> |
|--|

The city levies a debt service property tax to pay off the city's general obligation bonds. The State Auditor's Office is required to review all local government property tax rates to determine whether the tax rates have been set in accordance with state law. For tax years

1999 and 1998, the city provided insufficient data to the State Auditor's Office of its debt service calculations, and therefore, the State Auditor's Office could not certify these tax levies. The State Auditor's Office certified the 1997 debt service levy as \$0.33 per \$100 assessed valuation, but this levy was calculated based on inaccurate data submitted by the city. With the help of the city's CPA firm, new calculations of the debt service levy were made and submitted to the State Auditor's Office for tax years 1999, 1998 and 1997, as follows:

| Tax<br>Year | Allowable Rate<br>per \$100 of<br><u>Assessed Valuation</u> | Actual Rate Levied<br>per \$100 of<br><u>Assessed Valuation</u> |
|-------------|---|---|
| 1999        | \$ 0.24   | \$ 0.36   |
| 1998        | 0.25  | 0.36  |
| 1997        | 0.25  | 0.36  |

As a result of these errors, the city overcharged taxpayers approximately \$575,000 during this three-year period. In April 2000, the City Council decided to make refunds of overpayments for the 1999, 1998, and 1997 debt service taxes. Because the St. Louis County Collector collects property taxes for the city, the city requested the collector's office to assist in calculating the amounts to be refunded. The collector's office provided the city a list of all real and personal property tax overcharges for these three years, which is more than the actual amounts overpaid because some charged taxes are never collected. The city calculated the amounts to be refunded for railroad and utility taxes.

On April 17, 2000, the city posted a notice in the newspaper to instruct taxpayers to claim their tax refunds at city hall. To receive a refund, the taxpayers were required to bring copies of their paid tax receipts. At June 30, 2000, the city had made approximately 520 tax refunds totaling only \$20,310.

By requiring taxpayers to come to city hall and claim their refunds, substantial amounts of tax refunds may remain unclaimed. To ensure equitable treatment of all taxpayers, the city needs to make an effort to locate all taxpayers who are due a refund. The city should request the St. Louis County Collector to provide a list of all taxpayers who overpaid. The city should consider obtaining current addresses of the taxpayers and mail refund checks to all applicable taxpayers. In addition, since the balance of the city's Debt Service Fund is needed to calculate future debt service tax rates, the city should transfer the total amount of the calculated refunds from the Debt Service Fund to an escrow account, and all refunds should be made from the escrow account.

**WE RECOMMEND** the City Council ensure future debt service tax rates are properly calculated and adequate supporting documentation of the calculations is sent to the State Auditor's Office. In addition, the city should transfer the remaining amount of the calculated tax refunds into an escrow account and issue tax refund checks from the escrow account to all taxpayers who are due a refund.

## **AUDITEE'S RESPONSE**

*The current year tax calculations have been submitted to the State Auditor's Office and certification notice was received by the city indicating the tax rate ceiling calculations were certified. This information was also forwarded to the St. Louis County Collector's Office.*

*The city will address transferring the remaining funds into an escrow account and pursue other avenues to refund more of these tax dollars. The city will target businesses to refund taxes and discuss other alternatives for retrieving tax payment information from the St. Louis County Collector's Office.*

|   |
|---|
| <b>4. Receipt and Disbursement Procedures</b> |
|---|

- A. The duties of entering check information into the computer system, printing checks, and signing checks with a check signing machine are not segregated. The Accounts Payable Clerk performs all of these duties. In addition, the Accounts Payable Clerk has possession of all blank checks.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. To achieve this, the duties of entering check information into the computer should be segregated from printing and signing the checks.

- B. When checks are processed, the Accounts Payable Clerk generates an accounts payable check register; however, the check register is not a complete and accurate listing of checks issued by the city. We compared the check register to the city's general ledger for the month of July 1999, and noted that only 278 checks were listed on the check register while approximately 380 checks were issued during this time period. Two checks were recorded as void in the city's general ledger, yet no similar void entries were made in the accounts payable check register. In addition, several checks were issued out of sequential order.

The accounts payable check register should be a complete listing of all checks issued in numerical order. This would help ensure that all checks are properly accounted for and are recorded on the general ledger. In addition, checks should be issued in numerical sequence.

- C. The city has no written procedures for writing and processing manual checks. Currently, manual checks are issued when payroll adjustments are necessary or in situations when the city determines monies are needed immediately. We reviewed ten manual checks and noted that supporting documentation for one manual check did not contain the proper authorized signature. In addition, our review noted a manual check, dated August 4, 1999 in the amount of \$3,245, was not recorded on

the city's general ledger. Lack of internal controls over manual checks could allow unauthorized use and errors or irregularities to occur or go undetected.

- D. The city requires all disbursements to be made pursuant to a disbursement order or purchase order. Supporting documentation, such as vendor invoices, must be attached to the order, and the Finance Director and City Manager must sign the order before disbursement is made. Of 42 disbursements reviewed, six payments (14 percent) were processed without the proper authorized signatures. To ensure all obligations were actually incurred and are reasonable, all disbursement orders and purchase orders should indicate approval by the appropriate individuals.
- E. There is a lack of segregation of duties in the city's Finance Department. City receipts are recorded by city employees into a centralized computerized cash register. In September 1999, the city hired a cashier who is responsible for counting monies, reconciling composition of receipts to cash register reports, recording receipts to the city's records, and preparing the city's deposits. The cashier also records correcting entries to the city's records when necessary.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. This could be achieved by segregating the cash receipting and depositing duties from the duties of posting to the city's accounting records. In addition, someone independent of the receipting and posting duties should perform the bank reconciliations and reconcile receipts to bank deposits.

**WE RECOMMEND** the City Council:

- A. Adequately segregate the duties of entering check information into the computer from printing and signing the checks.
- B. Ensure all checks are recorded on the accounts payable check register and reconciled to the city's general ledger each time checks are processed. In addition, checks should be issued in numerical sequence.
- C. Develop a formal written policy regarding the writing and processing of manual checks and ensure all manual checks are posted to the general ledger.
- D. Ensure all disbursement orders and purchase orders contain the proper authorized signatures.
- E. Segregate the duties of cash receipting and depositing from the duties of recording receipts to the city's accounting records. In addition, someone independent of the receipting and recording duties should perform the bank reconciliations and reconcile receipts to bank deposits.

## **AUDITEE'S RESPONSE**

- A. *Implemented. Two individuals currently perform the accounts payable function. Invoices received are logged daily and vouchers are prepared in finance. Invoices must have an approved purchase order, contract, etc. and proper receipt documentation before processing a voucher can take place. Once vouchers are prepared, they are sent to department heads for approval and then to the Finance Director and City Manager for final approval.*

*Once this process is complete, the second individual, who inputs the information into the computer system and prints the checks, then enters the approved vouchers. Checks are reviewed by the Finance Manager and given back to the second accounts payable individual for mailing. The Finance Manager also maintains a log of all blank checks that includes the check series numbers and the date each batch is used along with the name of the individual requesting the check(s).*

- B. *In process. When checks are printed, the information is automatically updated to the general ledger system. Cash disbursement journals are printed and filed for reconciliation to the check register that is printed at the end of the month.*

*The Finance Manager maintains a list of check numbers printed during each check run to ensure sequential check processing.*

- C. *In process. Policies and Standard Operating Procedures are currently in development. Once completed a thorough review will be performed with all members of the Finance Department.*

- D. *Implemented. See comments provided above for part A. A current list of authorized signatures is on file in the Finance Department.*

- E. *Will implement. The Finance Department is currently seeking a revenue clerk whose primary duties will be receipting all city revenue. This position will act under an Accountant Analyst who will verify daily revenue reports and bank reconciliations each month.*

|                        |
|------------------------|
| <b>5. Expenditures</b> |
|------------------------|

- A. The City Manager, Mayor, and members of the City Council attend in-state as well as out-of-state conferences. The city has a policy which states the city will reimburse costs for travel, lodging, registration, parking fees, and official long distance phone calls, and pays a per diem of \$50 per day to cover meals and other travel-related expenses. For the year ended June 30, 2000, the city made approximately \$3,200 in per diem payments. The employees and officials are not required to submit receipts or other documentation to support the spending of these per diem payments nor does the city include these payments on their W-2 forms.

There were numerous instances of the city reimbursing individuals for meals and other costs in addition to paying per diems. For example, the city paid a city council member's hotel bill for a trip to Los Angeles, California, which included room service charges of \$40. The city had also paid per diems totaling \$350 to this council member for this trip.

The city should review its travel policies and ensure the city pays for only actual and reasonable travel expenses. If the city continues to provide per diem payments, the city should require the submission of receipts or other documentation to support the actual expenses covered by the per diem payments or include per diem payments as income on the employees' and officials' W-2 forms.

- B. The city does not have a formal written policy for the usage of cellular telephones and radios. During the year ended June 30, 2000, the city spent \$23,057 on cellular services for seven cellular telephones, 19 cellular telephones which additionally function as two-way radios, and four cellular two-way radios. These phones and radios are assigned to department heads, council members, police officers, and city street employees. The city pays for monthly service plans ranging from \$40 to \$59 per month, which includes 250 free minutes for each phone and a pool of 250 minutes for all radios.

Several city officials and employees regularly incurred airtime in addition to the free minutes provided by the monthly service plans. The city's cellular service invoice for May 2000 included \$606 in total additional airtime. The largest individual charge, \$315, was incurred by a council member who incurred 1,433 minutes in excess of free airtime minutes. The next largest charge, \$170, was also for a council member who incurred 774 minutes in excess of free airtime minutes. City officials indicated that the cellular phones incur both city and personal usage; however, the city does not require employees or officials to reimburse the city for personal calls.

The city should develop policies and procedures for cellular phone and radio usage and review which employees and officials require a phone or radio. In addition, the city should monitor cellular usage to ensure all costs are related to city business and require reimbursement for any personal usage costs.

**WE RECOMMEND** the City Council:

- A. Review its travel policies and ensure only actual and necessary travel expenses are incurred. If the city continues to make per diem payments, the city should require receipts or other documentation to support the spending of per diems or include these payments as income on applicable W-2 forms.
- B. Establish a policy for cellular telephone and radio usage stating the individuals authorized to be assigned a phone or radio, and allowable use of the phones and radios. All billings should be reviewed for reasonableness and the city should ensure

cellular phones and radios are used for city business only or require reimbursement for personal usage.

**AUDITEE'S RESPONSE**

- A. *The Berkeley City Council implemented bill number 3345 which became ordinance number 3287 detailing travel and expense policies. The council will reinforce this policy with the City Manager and Finance Department to ensure adherence to the travel policy.*

*The city of Berkeley is willing to amend its policy regarding the per diem limit and documentation requirements.*

*The Finance Department will implement better accounting procedures to review and ensure proper documentation is submitted before payment of travel related expenses.*

- B. *Will implement. The city of Berkeley is in the process of adopting an official cellular telephone use policy. The city will identify all necessary users and keep an inventory of assigned telephones. The policy will place emphasis on usage restriction, specifying business use only. The policy will also detail requirements for all city personnel and/or council members to pay for personal usage.*

*The Finance Department is currently in the process of analyzing cellular phone usage incurred throughout the fiscal period ending 06/30/00. At its conclusion, each city employee and/or council member will be required to submit a statement of business use/personal use. ALL PERSONAL USE CHARGES will be billed to said employee and/or council member.*

*This practice has been performed on an inconsistent basis over the fiscal period ending 06/30/00. This practice will be implemented and performed on a monthly basis to ensure timely billing and receipt of any personal use charges.*

**6.**

**City Credit Cards**

- A. The city spent approximately \$80,000 on fuel for city vehicles during the year ended June 30, 2000. The city uses fuel credit cards, and a separate card is assigned to each of the city's 83 vehicles. City employees must enter a personal identification number (PIN) and the vehicle odometer reading into the computer at the fueling station when using the card. The city employee is then responsible for submitting all fuel credit slips to the city's Purchasing Clerk. While a detailed report of all fuel card transactions is sent to the city monthly, the city does not reconcile these reports to the credit slips or review the reports for reasonableness.

Several fuel credit slips for the month of March 2000 were missing, and numerous odometer readings recorded at the time of purchase were not valid. This information helps the city to monitor the reasonableness of fuel purchases.

- B. The city has 15 credit cards from various stores for purchasing supplies. These cards are held by the City Manager; Purchasing Clerk; and Fire, Police, and Street Departments. Three laser-jet printers, a fax machine, and a refrigerator were purchased with the credit cards without maintaining any bid documentation. City policy requires the solicitation of at least three oral bids for items costing more than \$400. The city should ensure that all credit card purchases comply with its bidding policies.
- C. The city has eight Visa credit cards that are primarily used by the City Manager, Mayor, and City Council for lodging and travel expenses. Supporting documentation such as invoices and credit card slips, was not maintained for several credit card payments. In one case, the city made a payment of \$3,044 in January 2000 for the balance of a credit card statement, but no invoices or credit card slips were attached to the statement. At our request, the city obtained the supporting invoices, and these expenses comprised of lodging for a trip to Los Angeles, California, by the Mayor and certain council members.

The city has not adopted formal policies and procedures for the use of city credit cards. Such policies and procedures, such as a policy prohibiting the personal use of city credit cards, are necessary to help ensure city credit cards are used only for city business. In addition, the city should carefully evaluate the need for each credit card.

**WE RECOMMEND** the City Council evaluate the need for each city credit card and cancel any cards which are determined unnecessary. Formal policies and procedures should be adopted for credit card use, including policies which prohibit the personal use of city credit cards, require all credit slips be submitted prior to payment of credit card invoices, and require credit card purchases to comply with city bidding policies. The policy for fuel credit cards should include a requirement that valid odometer readings be entered for all fuel credit purchases and fuel invoices be reviewed for reasonableness.

### **AUDITEE'S RESPONSE**

*Will implement. The City Manager and City Council will review all credit cards to determine their necessity and if cancellation(s) is/are warranted.*

*Formal credit card use policies will be implemented and provide for proper authorization, usage, and incorporate spending limits. The policies will also include support documentation requirements.*

*A review of city bidding policies will be monitored on a regular basis to ensure compliance. Currently, oral bids are obtained when using the credit cards.*

*Monthly fuel reports are currently reviewed for reasonableness and reconciled to the credit card slips. The City Purchasing Agent is currently performing this function each month. If credit card slips are missing, a memo is forwarded to each department head notifying them of the missing slip(s)*

*and giving them two business days to turn the slips in. If slips are not turned in within the time allotted, possible reprimand and/or suspension of gas service will occur. This function will be assumed by the City Accountant.*

|  |
|--|
| <b>7. Payroll and Related Procedures</b> |
|--|

The city's payroll was processed by city employees until September 1999, when the city contracted with a local company to process its payroll. During our review, we noted the following concerns relating to payroll:

- A. While it appears the city has properly withheld and remitted Social Security taxes for city employees, the city did not submit copies of employee W-2 forms to the Social Security Administration (SSA) for the years ended December 31, 1998 and 1997. As a result, the SSA had no record of city employee or employer social security contributions, totaling approximately \$555,566 and \$562,058, respectively.

The SSA brought the 1998 reporting error to the attention of the city in February 2000, after a city employee noted the SSA had no record of her social security earnings for 1998 or 1997. The city Finance Department submitted copies of city employee W-2 forms to the SSA in July 2000, for 1998; however, the city has not submitted copies of employee W-2 forms for 1997.

The city believes that changes in personnel may have caused the 1998 and 1997 reporting omissions. For 1999, the city's payroll company sent the required information to the SSA.

The city should immediately send copies of 1997 W-2 forms to the SSA and work with the SSA to ensure all city employees' social security records are properly updated for 1997 and 1998.

- B. The city did not issue any Forms 1099-Miscellaneous for the year ended December 31, 1999. Forms 1099-Miscellaneous were issued for prior years and city officials indicate this was just an oversight for 1999. Sections 6041 through 6051 of the Internal Revenue Code require non-employee compensation of at least \$600 in one year, to an individual or unincorporated business, to be reported to the Federal government.
- C. The city did not perform a formal selection process for payroll processing services or perform an analysis of the costs and benefits of outsourcing these services. Total payments of \$22,440 were made to the company during the year ended June 30, 2000. Also, the city continues to employ a full-time payroll clerk who had previously performed most of the payroll processing duties.

The city should perform a formal study to compare the costs and benefits of performing payroll processing services with city employees and city equipment verses contracting with a vendor to perform these services. If the city determines that it is beneficial to contract with a vendor to provide these services, the city should procure these services using a formal selection process, including soliciting proposals from various vendors and documenting the reasons for selecting the winning vendor.

**WE RECOMMEND** the City Council:

- A. Work with the SSA to ensure that the 1998 reporting error has been corrected, and correct the 1997 reporting error by sending copies of all W-2 forms to the SSA. In addition, the city should ensure that W-2 forms are properly submitted to the SSA in the future.
- B. Issue Forms 1099-Miscellaneous for the year ended December 31, 1999, and ensure this is done in the future.
- C. Perform a formal cost/benefit study for using city employees and equipment for payroll processing versus contracting with a vendor for these services. If the city decides to continue contracting with a vendor for these services, the vendor should be chosen using a formal selection process in which proposals are solicited from various vendors and the reasons for choosing the winning vendor are documented.

**AUDITEE'S RESPONSE**

- A. *Implemented. The 1998 reporting error has been corrected. Copies of all W-2 forms were restructured to complete the W-3 summary form and information submitted to the Social Security Administration and to the Internal Revenue Service. The 1997 reporting error is in process.*

*B&C. Will implement.*

|                           |
|---------------------------|
| <b>8. Municipal Court</b> |
|---------------------------|

- A. During the year ended June 30, 2000, receipts of approximately \$600,000 were processed by the Municipal Court.

Checks and money orders are not restrictively endorsed upon receipt and receipts are not transmitted to the city treasury on a timely basis. Receipts are transmitted approximately one to three times per week and the endorsement is not applied until after the transmittals are made to the city. The average transmittal during the month of November 1999 was \$10,306.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt and monies should be transmitted daily or when accumulated receipts exceed \$100.

- B.1. Bond receipts are not deposited on a timely basis. Deposits are generally made two or three times per month and average approximately \$3,200. To adequately safeguard bond receipts and reduce the risk of loss or misuse of funds, deposits should be made daily or when accumulated receipts exceed \$100.
2. Monthly listings of open items (liabilities) are not prepared. Open bonds shown on the bond ledger as of June 30, 2000, totaled \$55,740. However, the reconciled bond checking account balance at June 30, 2000, was only \$50,183. While this difference indicates there could be a shortage of as much as \$5,557 in the bond account, it appears the court may not be properly recording some bond dispositions as they occur.

Monthly open-items listings should be prepared and reconciled to the available cash balance to ensure proper accountability over open cases and ensure monies held in trust are sufficient to meet liabilities. The court should immediately investigate the difference between open items and the available cash balance and reimburse the account for any shortages.

3. The court does not maintain an accurate ledger balance for the bond checking account. While the general ledger and reconciled bank balance maintained by the City Finance Department was \$50,183 at June 30, 2000, the balance in the Court Clerk's checkbook ledger was only \$8,294. This discrepancy went undetected due to an apparent lack of communication between the court and the city's Finance Department and no reconciliation between the court's and Finance Department's records.

To ensure bonds are properly accounted for, accurate checkbook ledger balances should be recorded and agreed to the reconciled bank balances. The difference between the current checkbook ledger balance and reconciled bank balance should be investigated and resolved.

4. The court does not adequately follow up on old bonds. As of June 30, 2000, the bond ledger included bond receipts totaling \$10,900, which had been held for at least one year, with the oldest bond being held for more than three years.

An attempt should be made to determine the proper disposition of these bonds. A review should be made of any bonds posted by persons who failed to make the required court appearance to determine if the bonds should be forfeited and if monies should be paid over to the city treasury as provided by Section 479.210 RSMo 1994. Those bonds which cannot be forfeited and remain unclaimed for one year after

disposition should be turned over to the state's Unclaimed Property Section in accordance with Section 447.595, RSMo 1994.

5. The bond account requires two signatures for all disbursements. The checks are sometimes signed in advance by the City Manager. Signing checks in advance does not allow for proper review of the documentation to support the disbursement and diminishes the control intended by dual signatures.
- C. The final disposition of each case is manually recorded on the court docket by the Court Clerk and subsequently entered into the court's computer system. The computer tracks payment history as well as amounts due to the court.

There were numerous drawers full of cases for which the final dispositions had not been entered into the computer system. According to the Court Clerk, there were several months in 1998 when she was working alone with no assistant clerks and she has not been able to enter numerous case dispositions into the computer system.

The court allows defendants to make partial payments of fines and court costs. Although the court's computer system tracks payment history as well as amounts owed to the court, the accounts receivable records are not accurate because of the numerous case dispositions which have not been entered into the computer system.

To ensure the court records are accurate and up-to-date, the ultimate disposition of each case should be entered into the court's computer system in a timely manner.

- D. We reviewed four case files which court records indicated warrants had been issued for defendants. However, the police department's computer system did not indicate active warrants for any of these four defendants. According to the court's records, the warrants were issued nearly a month earlier. To ensure all warrants are current, warrants should be activated on a timely basis.

Warrants that remain in the police department's computer system for periods greater than three years are automatically purged, and warrants recalled by the police department are not always recorded on the court's records. Some warrants which were canceled or purged as far back as 1993 are still indicated as active cases in the court's records. To ensure proper disposition of all cases, the police warrant records should be periodically compared to the court's records and differences should be resolved.

**WE RECOMMEND** the Municipal Court:

- A. Restrictively endorse checks and money orders immediately upon receipt and transmit court receipts daily or when accumulated receipts exceed \$100.
- B.1. Deposit bond monies daily or when accumulated receipts exceed \$100.

2. Prepare monthly listings of open items (liabilities) and reconcile the listings to the bond checking account balance. In addition, the court should investigate the difference between the open-items balance and the bond account balance and reimburse the account for any shortages.
  3. Maintain an accurate bond checkbook ledger balance, and investigate the difference between the checkbook ledger and the reconciled bank balance.
  4. Implement adequate procedures to follow up on old outstanding bonds and dispose of them in accordance with state law.
  5. Discontinue the practice of signing bond checks in advance.
- C. Enter the dispositions of all court cases into the computer system on a timely basis.
- D. Work with the police department to ensure warrants are activated in a timely manner and the police and court's warrant records are in agreement.

#### **AUDITEE'S RESPONSE**

- A. *We now endorse checks and money orders immediately upon receipt, and we transmit all receipts to the city daily.*
- B.1. *We intend to work with the Police Chief to ensure bond monies are transmitted to the court daily, to be deposited.*
2. *We agree that monthly listings of open items should be prepared and reconciled to the bond checking account. The city has contracted with a CPA to help resolve the differences noted. Once a correct balance has been determined, the REJIS computer system will aid in maintaining a monthly open items listing.*
  3. *We agree that an accurate ledger balance for the bond checking account should be maintained. The city has contracted with a CPA to help resolve the difference.*
  4. *We will implement this recommendation.*
  5. *The practice of signing checks in advance has been discontinued.*
- C. *The Court Clerk and another city employee have begun entering the final dispositions of those cases which had not previously been entered into the computer system. Currently, all case dispositions are entered into the computer system daily.*
- D. *Warrants are issued by the court and sent to the Police Department for activation. The Court Clerk currently maintains a file of warrants which are pending activation by the Police Department. The Court Clerk will begin following-up on any warrants that are not*

*activated by the Police Department in a timeframe of two weeks to ensure all warrants are activated timely.*

*In addition, REJIS sends a listing of all warrants which will be purged from the computer system. Before warrants are actually purged, cases are docketed for the court's review. When the court decides to purge a warrant rather than reactivate it, the Court Clerk and Police Clerk will work together to ensure warrants are deleted from the computer system so that police and court records agree.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

November 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Our office conducted an audit of the Ex-Officio County Collector, Grundy County, Missouri.**

---

State statute requires the state auditor to audit the office of the County Collector after being notified of a vacancy in that office. On August 8, 2000, a vacancy occurred in the office of the Ex-Officio County Collector of Grundy County, Missouri; a successor was appointed effective August 25, 2000.

This audit report includes no findings arising from our audit of the Grundy County Ex-Officio County Collector.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the County Commission  
and  
Ex-Officio County Collector  
Grundy County, Missouri

Section 52.150, RSMo 1994, requires the state auditor to audit the office of the County Collector after being notified of a vacancy in that office. On August 8, 2000, a vacancy occurred in the office of the Ex-Officio County Collector of Grundy County, Missouri; a successor was appointed effective August 25, 2000.

To satisfy our statutory obligation we have audited the operations of the Ex-Officio County Collector of Grundy County, Missouri. The scope of this audit included, but was not necessarily limited to, the period March 1 to August 8, 2000, and the year ended February 29, 2000. In accordance with Section 52.150, RSMo 1994, our responsibilities during this audit were to:

1. Determine the financial condition of the accounts of the office of the Ex-Officio County Collector.
2. Determine the proper compensation that should have been paid to the replaced Ex-Officio County Collector during the past three years and the compensation actually paid during such period.
3. File a report of our findings with the County Commission and the person appointed to fill the vacancy in the office of the Ex-Officio County Collector.

Section 52.150, RSMo 1994, requires the County Commission to accept the state auditor's report and, if necessary, to take certain specific actions if the state auditor finds any monies owing to the county or the past Ex-Officio County Collector.

Our audit was conducted in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed accounting and bank records and other pertinent documents and interviewed various personnel of the Ex-Officio County Collector.

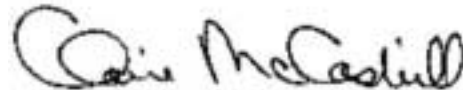

As part of our audit, we assessed the controls of the Ex-Officio County Collector to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to controls, we obtained an understanding of

the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the Ex-Officio County Collector and was not subjected to the procedures applied in the audit of that office.

The accompanying Management Advisory Report presents our findings arising from our audit of the Ex-Officio County Collector.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

October 6, 2000 (fieldwork completion date)

MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

GRUNDY COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

This report includes no findings arising from our audit of the Ex-Officio County Collector.

This report is intended for the information of the Ex-Officio County Collector and the management of Grundy County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

HISTORY, ORGANIZATION, AND  
STATISTICAL INFORMATION

GRUNDY COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR  
HISTORY, ORGANIZATION, AND  
STATISTICAL INFORMATION

The Ex-Officio County Collector and the township collectors bill and collect property taxes for the county and most local governments.

Helen Frisbie served as Ex-Officio County Collector until August 8, 2000. Colleen Kidd was appointed the Grundy County Ex-Officio Collector effective August 25, 2000.

The Ex-Officio County Collector received compensation of \$9,449 for the period April 1 to August 8, 2000. During the years ended March 31, 2000, 1999, and 1998, the Ex-Officio County Collector received compensation of \$26,512 per year. Compensation was in accordance with statutory provisions.

The following schedule reflects amounts from the records of the Ex-Officio County Collector on the modified accrual basis. The schedule does not include any of the operating costs of the Ex-Officio County Collector's office other than commissions retained. Operating costs are paid from the General Revenue Fund of the county.

CITY OF LAKE OZARK, MISSOURI

YEAR ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-115  
November 9, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Lake Ozark, Missouri.**

The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Although it appears the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained in some instances. Examples include \$22,655 for a loader lease/purchase, \$35,438 for an excavator lease/purchase, \$1,835 for a postage meter, \$2,996 for police handheld radios, and \$1,325 for utility poles.

Formal bidding procedures provide a framework for the economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in the city's business.

The board does not review complete listings of all disbursements including the related invoices. Several expenditures were noted which do not appear to be a prudent use of public funds. Supporting documentation was not available for some credit card purchases and reimbursement requests.

Accounting duties are not adequately segregated and improvements are needed in controls over receipts.

The city's board minutes do not include sufficient detail of matters discussed and actions taken. The board minutes did not always include an adequate description of motions made and resolutions passed. The minutes and meeting agendas do not document the specific reasons for going into a closed session. Furthermore, the actions taken by the board in closed meetings are not generally recorded in the regular minutes or otherwise publicly posted.

The city has not performed a formal review of the adequacy of the sewer rates. The city's audited financial statements have shown losses of approximately \$498,000 and \$89,000 in the Sewer Fund during the years ended December 31, 1999 and 1998, respectively.

The city has not entered into formal written agreements for some services, including sewer, legal, accounting, and cleaning services.

(over)

YELLOW SHEET

The city's budgets are not retained with the official minutes and are not signed by the board to denote approval. In addition, budgets prepared by the city did not include some information required by state law, such as budget messages or general budget summaries describing the important features of the budget and major changes from the preceding years.

The city does not maintain complete records to account for all property owned by the city.

As also noted in our prior report for the municipal division, accounting duties are not adequately segregated. Monthly listings of open items are not prepared for the fine account. Procedures are not in place to follow up on old outstanding checks and bonds held by the municipal division. Warrants are not always issued when applicable for nonpayment or failure to appear. Police department employees responsible for collecting bonds are not bonded. Adequate records are not maintained to account for traffic tickets issued and their ultimate disposition.

City of Lake Ozark  
Lake Ozark, Missouri 65049

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Lake Ozark, Missouri. Our audit of the city included, but was not limited to, the year ended December 31, 1999. The objectives of this audit were to:

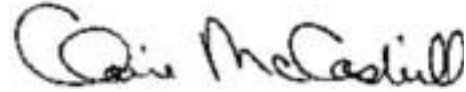

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Lake Ozark, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

March 8, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF LAKE OZARK, MISSOURI HISTORY AND ORGANIZATION

The city of Lake Ozark is located in Miller and Camden County. The city was incorporated in 1966 as a fourth-class city. The city consolidated with the village of Lake View in November 1998 and the village of Lakeland in May 1999. The population of the city in 1999 was estimated at 1,046.

The city government consists of a mayor and six-member board of aldermen. The six board members are elected for two-year terms. The mayor is elected for a two-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor, Board of Aldermen, and other principal officials at December 31, 1999, were:

| <u>Elected Officials</u>    | <u>Term Expires</u> | <u>Actual Compensation for the Year Ended December 31, 1999</u> | <u>Bond Amount</u> |
|-----------------------------|---------------------|---|--------------------|
| Gary Weber, Mayor           | April 2001          | \$ 1,800  | \$                 |
| Steven Dalton, Alderman (1) | April 2000          | 900   |                    |
| Larry Gridley, Alderman (1) | April 2000          | 900   |                    |
| Paul Sale, Alderman (2)     | April 2000          | 900   |                    |
| Carolyn Berger, Alderwoman  | April 2001          | 900   |                    |
| Garrett Holmes, Alderman    | April 2001          | 900   |                    |
| Jill Wade, Alderwoman (3)   | April 2001          | 675   |                    |

## Other Principal Officials

|   |        |        |
|---|--------|--------|
| Herb Llewellyn, City Administrator                | 42,000 | 10,000 |
| Rachel Kelley, City Clerk                         | 21,947 | 20,000 |
| Judy Noser, City Treasurer/Court Clerk            | 18,356 | 60,000 |
| Sandy Venis,<br>Planning & Zoning Coordinator (4) | 18,225 | 10,000 |
| Shelly Cato, Collector of Revenue (5)             | 3,840  |        |
| Richard Ward, City Attorney                       | 14,400 |        |
| D. Rodney Fire, Police Chief                      | 30,741 |        |
| Rick Sturgeon, Superintendent of Public Works     | 32,773 |        |

- (1) Steven Dalton was reelected in April 2000, running against Larry Gridley after the city changed its ward boundaries. Margaret Spurrier was also elected in April 2000.
- (2) Paul Garison was elected in April 2000 to replace Paul Sale.
- (3) Replaced Michael Coppinger in April 1999.
- (4) Sandy Venis was the City Collector thru September 1999, when she became the Planning & Zoning Coordinator and Assistant to the City Administrator. Greg Smith served as the Planning and Zoning Coordinator thru July 1999.

- (5) Shelly Cato was hired in November 1999. Shelly resigned in June 2000, and was replaced by Wilma Edwards.

Assessed valuation and tax rate information for 1999 and 1998 are as follows:

ASSESSED VALUATION

|                     | <u>1999</u>          | <u>1998</u>       |
|---------------------|----------------------|-------------------|
| Real estate         | \$ 39,050,084        | 23,609,312        |
| Personal Property * | <u>3,760,856</u>     | <u>2,886,017</u>  |
| Total               | \$ <u>42,810,940</u> | <u>26,495,329</u> |

TAX RATES PER \$100 ASSESSED VALUATION

|              |         |      |
|--------------|---------|------|
| General Fund | \$ 0.23 | 0.26 |
|--------------|---------|------|

\* The city did not levy personal property taxes in 1999.

The city had the following sales taxes, rates are per \$1 of retail sales:

|                      | <u>Rate</u> | <u>Expiration<br/>Date</u> |
|----------------------|-------------|----------------------------|
| General              | .010        | none                       |
| Capital improvements | .005        | none                       |
| Transportation       | .005        | none                       |

## MANAGEMENT ADVISORY REPORT

CITY OF LAKE OZARK, MISSOURI  
SUMMARY OF FINDINGS

1. Expenditures (pages 9-12)

The city has no formal bid policy. The Mayor and the Board of Aldermen approve listings of bills, but do not review related invoices and supporting documentation. The city made several expenditures which do not appear to be a prudent use of public funds. Supporting documentation was not retained for some credit card purchases and mileage reimbursements were not properly documented. Expenditures are allocated to various funds without adequate supporting documentation.

2. Accounting Controls and Procedures (pages 12-14)

Accounting duties are not adequately segregated and improvements are needed in controls over receipts.

3. Board Meetings, Minutes, and Ordinances (pages 14-16)

The board minutes do not always include sufficient detail of matters discussed and actions taken by the Board of Aldermen. Board minutes also do not list the specific reason for going into closed session and the final disposition of matters resolved in closed session is not publicly disclosed. The city has negotiated additional provisions in sewer extensions which are not formally adopted in the city's ordinances.

4. City Sewer Rates (pages 16-17)

The city has not performed a formal review of the adequacy of the sewer rates.

5. City Contracts (pages 17-18)

The city has not entered into formal written agreements with the city of Lakeside for sewer services, the City Attorney, the local CPA for accounting services, and the cleaning service for City Hall.

6. Compensation (pages 18-19)

The board does not review and approve payments to the city employees. Several payments to city employees were not properly reported to the IRS as wages. Forms 1099 are not always filed as required.

7. Property Tax Procedures (pages 19-20)

The City Collector does not prepare monthly or annual reports of taxes collected or those that remain delinquent. In addition, the city is not billing delinquent taxes.

8. Budgetary Practices (pages 20-21)

Budgets were not prepared in accordance with state law and were not retained in the official minutes or signed by the board to indicate approval.

9. Property Records (page 21)

The city does not maintain complete records to account for all property owned by the city.

10. Municipal Division (pages 21-24)

Accounting duties are not adequately segregated. Monthly listings of open items are not prepared for the fine account. Procedures are not in place to follow up on old outstanding checks and bonds held by the municipal division. Warrants are not always issued when applicable for nonpayment or failure to appear. Police department employees responsible for collecting bonds are not bonded. Adequate records are not maintained to account for traffic tickets issued and their ultimate disposition.

CITY OF LAKE OZARK, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                     |
|-----------|---------------------|
| <b>1.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Although it appears the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained in some instances. Examples include \$22,655 for a loader lease/purchase, \$35,438 for an excavator lease/purchase, \$1,835 for a postage meter, \$2,996 for police handheld radios, and \$1,325 for utility poles.

Formal bidding procedures provide a framework for the economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and the reasons noted why the bid was selected. The bidding policy should also address procedures for opening sealed bids.

- B. The City Clerk provides the board monthly listings of bills to be paid; however, this listing does not include payroll and regular monthly expenditures. Fifteen of the twenty-three disbursements we selected were not recorded on the listings. In addition, although board minutes make a general reference that the listing of bills is approved for payment, the listings are not signed or initialed by the board members and retained with the official board minutes. Invoices are retained in monthly files, but these invoices are not reviewed by the board members.

To adequately document the board's review and approval of all disbursements, complete listings of bills should be signed or initialed by the board members to denote their approval and retained with the official minutes. In addition, the board members should review supporting documentation before payment is made to ensure all disbursements represent valid operating costs of the city.

- C. The following expenditures do not appear to be a prudent use of public funds:
1. The city holds an annual Christmas party which all city officials and employees, their spouses, and children are invited to attend. The city pays all of the costs related to the party which totaled approximately \$1,475 for the year ended December 31, 1999.

2. The board also approved a performance stipend of \$50 for all full time city employees. These cash payments totaling \$1,400 which appear to be bonuses were distributed to the city employees at the Christmas party.

Bonuses given to employees appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39 of the Missouri Constitution and are contrary to Attorney General's Opinion No. 72, 1955 to Pray, which states, "...a government agency deriving its power and authority from the Constitution and laws of the state would prohibit from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

3. The city made a donation of \$245 during the year ended December 31, 1999 to the March of Dimes for a fund raiser.

The city's residents place a fiduciary trust in their public officials to expend public funds in a necessary and prudent manner. The above expenses do not appear to represent a necessary and prudent use of public funds.

- D. The city has two credit cards used by city employees for travel and other purposes. Adequate supporting documentation was not submitted or retained for some charges. Some items paid including meals and seminar costs were not supported by receipts or credit card slips.

Adequate supporting documentation should be retained for all credit card purchases, and reconciled to credit card statements to ensure the propriety of the charges. Adequate supporting documentation will help the city evaluate the necessity and reasonableness of credit card purchases.

- E. Reimbursements made to employees for mileage were seldom supported by adequate documentation. Many employee expense reports did not contain sufficient information such as the date of trip, trip origin, destination, and purpose. A detailed travel expense report including documentation supporting the expenses claimed will help the city determine the propriety of payments made for travel expenses.

Failure to require adequate supporting documentation for expenditures increases the risk that the city will pay for items not related to city purposes.

- F. Procedures established through city ordinance 88-25 to properly allocate expenditures among the various funds are not always followed.

1. The superintendent of public works' salary is allocated equally from the street and sewer fund. In addition, the city transfers monies from the sewer fund to the general fund monthly to reimburse it for administrative expenses. This allocation and transfer are not supported by adequate documentation.

2. Vehicles purchased for the sewer department and paid for out of the sewer fund, are also used by the street department for snow removal.

It is essential that the city properly allocate expenses to the various funds. Furthermore, the uses of certain funds, such as capital improvements and transportation sales taxes and state motor vehicle-related revenues, are limited by state law for specified purposes. Therefore, documentation and proper allocation of expenses is useful for both management and compliance purposes.

- G. The city does not always code expenditures to the appropriate expenditure line item. The board approved a training expenditure to be paid out of a capital line item. The board approved coding this expenditure in this manner because the training line item had been depleted. City personnel acknowledge this practice of coding expenditures where funds are available occur although it does not represent an accurate accounting of the actual expenditures. The city should ensure all expenditures are appropriately classified and amend the budget if necessary.
- H. During 1999, the city paid approximately \$14,700 to pave Lakeview Boulevard. Board minutes indicate all board members approved this transaction, including former Alderman Paul Sale, who lives on Lakeview Boulevard. Citizen concern was voiced because of the appearance of a possible conflict.

City officials should avoid any type of involvement in city decisions that relate to themselves. Discussions and decisions concerning transactions where potential conflict of interest exists should be completely documented and retained by the city to provide assurance that no city official has benefited improperly.

**WE RECOMMEND** the Board of Alderman:

- A. Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected and procedures for opening sealed bids.
- B. Ensure listings of bills include all disbursements. Approval should be adequately documented by retaining a signed copy of the listing of bills with the board minutes. In addition, the board should review all invoices.
- C. Ensure all expenditures from city monies are a prudent use of public funds.
- D. Ensure adequate supporting documentation is submitted for all credit card purchases and reconciled to credit card statements to ensure the propriety of the charges.
- E. Ensure reimbursement requests include the purpose of miles driven, date, and destination.

- F. Ensure all expenditures are properly allocated to the various funds and the allocations are supported by adequate documentation.
- G. Ensure all expenditures are charged to the correct line item and amend the budget if necessary.
- H. Avoid transactions that represent actual conflicts of interest or the appearance of conflicts of interest. Such matters and transactions should be completely documented and retained in city records so the public has assurance that no city official has benefited improperly.

**AUDITEE'S RESPONSE:**

- A. *The city has adopted, by ordinance, a procurement policy.*
- B. *The bill paying procedure placed into effect this year is as follows: A bills list is first approved by the Board of Aldermen, then signed by the Mayor, and then checked by the City CPA to make sure that only the bills approved have been paid. A Finance Committee, made up of two members of the Board of Aldermen and the City CPA will be formed to review all bills before being presented to the Board of Aldermen for approval.*
- C. *The Board of Aldermen will ensure all expenditures of city monies are a prudent use of city funds.*
- D. *These bills are now reviewed by the Finance Committee before being approved by the Board and any undocumented bills will not be reimbursed.*
- E. *A standard form with all requested information is now being filled out by the employee and checked by the City Administrator or Finance Committee.*
- F. *The city will re-analyze appropriate mechanisms during the budget process to ensure revenues and expenses are attributed to proper funds.*
- G. *All expenditures will be recorded to the proper line item even if that item goes over the budget. The Board of Aldermen will then make, through ordinance, any adjustments necessary.*
- H. *The Board of Aldermen will always ask the City Attorney for his opinion prior to voting on issues where a conflict may appear.*

|           |   |
|-----------|---|
| <b>2.</b> | <b>Accounting Controls and Procedures</b> |
|-----------|---|

- A. The following concerns were noted related to receipts:
  - 1. Receipt slips are not issued for all monies received by the city. Receipt slips are only issued for cash payments. To help ensure receipts are

properly recorded and deposited, official prenumbered receipt slips should be issued for all monies received immediately upon receipt.

2. The method of payment (i.e., cash, check, or money order) is not recorded on the receipt slips or the utility payment stubs. To ensure all receipts have been recorded properly and deposited intact, the method of payment should be recorded on each receipt slip or utility payment stub and the composition of receipts should be reconciled to the composition of bank deposits.
3. Receipt slips are not issued in numerical sequence for monies received by the city. To adequately account for all receipts, receipt slips should be issued in numerical order for all monies received and the numerical sequence should be accounted for properly. In addition, voided receipt slips are not retained. To ensure all receipt slips are properly accounted for, all voided receipt slips should be properly defaced and retained.
4. Checks and money orders received are not restrictively endorsed until the deposit is prepared. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
5. Receipts are kept in a file folder on the City Collector's desk until the deposit. To reduce the risk of theft, loss or misuse of funds, receipts should be kept in a secure location until deposited.
6. Some monies are not deposited intact. The city requires contractors to post an excavating bond when applying for an excavation permit. The monies are kept in a file cabinet until the work is complete and then given back to the contractor. Also, a property tax payment was returned to the payee due to overpayment rather than being deposited and the overpayment subsequently disbursed by city check.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits should be made intact and all disbursements should be made by check.

- B. Accounting duties are not adequately segregated. The City Collector collects all monies, records transactions, prepares deposits, and makes the deposit. The City Clerk indicated she reviews the deposit, but this review is not documented.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the reconciliation between receipts and deposits.

**WE RECOMMEND** the Board of Aldermen:

- A.1. Require receipt slips be issued for all monies received.
2. Ensure the method of payment is recorded on each receipt slip or utility stub, and the composition of receipts is reconciled to the composition of deposits.
3. Require receipt slips to be issued in numerical sequence and ensure the numerical sequence of receipt slips is accounted for properly. In addition, voided receipts should be properly defaced and retained.
4. Restrictively endorse all checks immediately upon receipt.
5. Ensure receipts are kept in a secure location until deposited.
6. Deposit all monies intact and make subsequent refunds by check.
- B. Adequately segregate duties. If duties cannot be adequately segregated, at a minimum, there should be a documented review of the reconciliation between receipts and deposits.

**AUDITEE'S RESPONSE:**

- A.1. *The staff has been instructed to issue receipts for all moneys received.*
2. *The staff has been instructed to record the method of payment on all receipts.*
3. *The city now uses pre-numbered receipts and the staff has been instructed to attach voided receipts.*
4. *All checks are endorsed "For Deposit Only" upon receipt.*
5. *The city has installed a cash drawer at the counter to ensure security.*
6. *The city staff has been instructed to deposit all funds and issue checks for refunds.*
- B. *The staff has added additional checks and balances to segregate duties.*

|   |
|---|
| <b>3. Board Meetings, Minutes, and Ordinances</b> |
|---|

- A. The board minutes do not include sufficient detail of matters discussed and actions taken. The board minutes did not always include an adequate description of motions made and resolutions passed.
  1. The city entered into a lease agreement in July 1998 for sewer improvements constructed by a Neighborhood Improvement District

(NID). The lease agreement refers to a city resolution. However, there is no documentation of a formal resolution made by the board.

2. Although it appears the board approved the extension of the sewer line approximately two miles beyond the NID, along Highway HH, board minutes did not adequately document the motion made. The minutes stated only that a motion was made to accept the recommendation of the Public Works Director. No description of the recommendation was given.
3. The city sold two used police cars in January 2000. Although the sale was advertised and city records indicate the highest bid was accepted, board minutes contained no documentation of board discussion or approval of the sale of these vehicles.

The minutes are the official record of the actions of the board. Care should be taken to ensure the minutes are complete and provide reasons and specific intentions behind board decisions. Inadequate or unclear minutes can lead to subsequent confusion as to board intentions and possible incorrect interpretation of board actions by the general public, future board members, or other outside entities.

- B. The board minutes and the meeting agendas do not document the specific reasons for going into a closed session. The tentative agenda and the minutes normally list litigation, real estate transactions, and personnel issues as the reason to go into a closed session. In addition, several instances were noted where a reason was not specified.

Section 610.021, RSMo, allows the board to close meetings to the extent the meetings relate to certain specified subjects, including litigation, real estate transactions, personnel issues, some competitive bidding issues, confidential or privileged communications with auditors, etc. Section 610.022, RSMo, requires a closed meeting, record or vote be held only for the specific reasons announced publicly at an open session. In addition, this law provides that public governmental bodies shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote.

- C. The city has a Sewer Extension Policy (Chapter 710, Municipal Code) which requires the developers to pay the costs of extending city sewer services to the new development. In addition, any system upgrades required by the city will be paid for by the city. On several occasions the city has made additional provisions in approving sewer extensions that call for the city to refund one-half (50 percent) of the new impact fees for connections to the line installed by the developer until their costs have been recovered, or for a period of five years, whichever comes first. These additional provisions have not been established by ordinance. To ensure equitable treatment to all parties, all provisions in granting sewer extensions should be defined by city ordinance and followed by the city.

- D. Actions taken by the board in closed meeting are not generally recorded in the regular minutes or otherwise publicly posted. Instead, the city's policy is to make them available upon request. Section 610.021, RSMo 1994, requires certain matters discussed in closed meetings to be made public upon final disposition.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure all significant discussions and actions taken are adequately documented in board minutes.
- B. Ensure minutes and the agenda state the specific reason for going into closed session, as required by state law.
- C. Ensure all provisions related to sewer extensions are formally adopted by city code.
- D. Publicly disclose the final disposition of applicable matters discussed in closed session.

**AUDITEE'S RESPONSE:**

- A. *The City Clerk will ensure that adequate discussion is contained in the minutes.*
- B. *The City Clerk will ensure that city records include reasons for convening into executive session.*
- C. *Each situation is different and the cost will vary considerably as well as the number of customers that will be served. The Board of Aldermen feels that each situation has to be based on its own merits.*
- D. *The city will publicly disclose the final disposition of applicable matters discussed in closed session.*

|                            |
|----------------------------|
| <b>4. City Sewer Rates</b> |
|----------------------------|

The city has not performed a formal review of the adequacy of the sewer rates. The city's audited financial statements have shown losses of approximately \$498,000 and \$89,000 in the Sewer Fund during the years ended December 31, 1999 and 1998, respectively. In addition, the city entered into an agreement with the Lake Region Water and Sewer Company (LRWS) in March, 2000, to accept all wastewater generated by the region at a rate significantly less than the rate proposed by a professional study that calculated service charges.

City Ordinance 705.150 requires sewer user charges to be reviewed every year and that the sewer rates be set at an amount adequate to generate revenues to cover the costs of operation, maintenance, and replacement of the system. Although the city approves the

sewer rates in May of each year, no formal review has been performed to document the adequacy of the rate structure.

**WE RECOMMEND** the Board of Aldermen review the sewer rates to ensure revenues are sufficient to cover all costs of providing this service. In addition, the city should review the agreement with the LRWS to ensure rates are sufficient to cover all costs.

**AUDITEE'S RESPONSE:**

*The city will ensure that rates are analyzed annually (in May) and that the rates are sufficient to cover all costs.*

|                          |
|--------------------------|
| <b>5. City Contracts</b> |
|--------------------------|

The city has not entered into formal written agreements for some services.

- A. The city provides sewer services to the city of Lakeside. The city of Lakeside is billed at the city's rate plus a 25 percent surcharge. The city made a verbal agreement with the city of Lakeside regarding this rate, but a written agreement does not exist.
- B. The city annually appoints a local attorney to serve as City Attorney. Payments to the City Attorney totaled \$14,400 for the year ended December 31, 1999. The city has not entered into a written agreement with this individual.
- C. In 1993, the city entered into a contract with a local CPA for management advisory and financial accounting services. Although the fees paid to the CPA have increased since that time, the original contract has not been updated. Payments to the CPA totaled \$6,224 for the year ended December 31, 1999.
- D. The city has used the same individual to clean City Hall for several years. This individual is paid \$100 per month. The city has not entered into a written agreement for cleaning services.

Section 432.070, RSMo 1994, requires contracts for political subdivisions to be in writing. The city should enter into written contracts for services rendered or obtained. A written contract, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to provide protection to both parties.

**WE RECOMMEND** the Board of Aldermen enter into formal written contracts, in accordance with state law, which specify the goods or services to be provided and the amount of compensation to be paid. Contracts should adequately detail the rights and duties of all parties and should be properly updated and/or extended when necessary.

### **AUDITEE'S RESPONSE:**

*The city's policy has been to charge entities outside of the city limit a 25 percent surcharge. During the revision of the sewer extension policy, the surcharge amount has inadvertently been omitted while the city practice continued assessing the 25 percent surcharge. The city will review the ordinance and up date the surcharge amount. The city will enter into contracts with the City Attorney, CPA, and with the cleaning service.*

|                        |
|------------------------|
| <b>6. Compensation</b> |
|------------------------|

A. The city has a policy to pay for sick leave and vacation leave under certain situations (to reward full attendance and vacation pay if unable to use within a year of earning the vacation time). The city's policy requires the city administrator to approve payment of any unused vacation. During the year ended December 31, 1999, the City Administrator requested payment totaling \$1,292 for his "wellness days" and unused vacation time without obtaining approval from the board. In effect, the City Administrator authorized his own payment without the approval of the Board of Aldermen.

B. The following payments to city employees were not properly reported to the Internal Revenue Service (IRS):

1. The payment made to the City Administrator totaling \$1,292 (see Part A, above), was not included on his W-2 form.
2. The city distributed bonuses (MAR No. 1.C.) totaling \$1,400 (\$50 per full time employee) which was not included on the employee's W-2 forms.
3. A phone allowance of \$32 per month is paid to the City Administrator, the Police Chief, and the Superintendent of Public Works and \$6 per month to the City Treasurer in addition to their salary. These individuals are not required to submit to the city an itemized report of phone expenses incurred on the city's behalf, and this expense allowance is not reported on the W-2 forms.

Internal Revenue Service Regulation No. 31.3401(a)-4 specifically requires expenses not accounted for to the employer to be considered as gross income and also requires payroll taxes to be withheld from this gross income.

4. The City Administrator and the Mayor received \$200 each in 1999 for working the firework displays on the lake. The fireworks display is sponsored by the Betterment Committee. The additional compensation was not included on the W-2 forms. In addition, the payments to the Mayor appear to violate Section 105.458, RSMo 1994, which prohibits elected officials from performing services for additional compensation.

- C. The city did not always file Forms 1099 with the Internal Revenue Service. The Internal Revenue Code requires payments of \$600 or more for services by nonemployees (other than corporations) be reported to the federal government on Forms 1099. During the year ended December 31, 1999 the city paid one individual \$600 for the public restrooms lease and another individual \$1,325 for installing five utility poles.

**WE RECOMMEND** the Board of Aldermen:

- A. Review and approve all payments to the City Administrator.
- B. Ensure all employee compensation is properly reported to the IRS. The city should require documentation of actual expenses incurred or include the amounts on the employees W-2 forms and withhold applicable payroll taxes from the allowances. In addition, the city should refrain from paying additional amounts to the Mayor or Board of Aldermen that is not specifically approved by ordinance.
- C. Ensure that IRS Forms 1099 are filed as required for prior years as well as the future.

**AUDITEE'S RESPONSE:**

- A. *Any payments to the City Administrator other than his regular paycheck will be approved by the Board of Aldermen and the check signed by the Mayor.*
- B. *The staff will ensure that all employee compensation is reflected on W-2 forms.*
- C. *Our new accounting system will allow us to flag any person receiving \$600 or more to receive a form 1099.*

|                                   |
|-----------------------------------|
| <b>7. Property Tax Procedures</b> |
|-----------------------------------|

- A. The City Collector's duties include billing, collecting, and depositing property tax receipts. Monthly and annual reports were not prepared by the City Collector summarizing the amount of property taxes collected as well as those that remain delinquent.

Sections 79.310, 94.320, and 94.330, RSMo 1994, require reports to be submitted to the board of aldermen indicating the amount of taxes collected and taxes remaining delinquent. The board is to examine and approve the lists and charge the tax collector with the collection of delinquent taxes. Section 94.330, RSMo 1994, also provides that the board may declare worthless any and all personal delinquent taxes which they may deem uncollectible.

Monthly and annual reports which comply with state law and are classified by type of tax would help provide assurance taxes have been properly collected, written off, or determined to be delinquent.

- B. The City Collector has not billed delinquent taxes in the past. The City Collector indicated only current taxes can be billed through the computer system. Past due amounts have to be manually entered on the computer and will be for this year's billings.

**WE RECOMMEND** the Board of Aldermen:

- A. Require monthly and annual reports of property taxes collected and delinquent.
- B. Pursue collection of all delinquent taxes.

**AUDITEE'S RESPONSE:**

- A. *The City Collector will issue a monthly report to the Board of Aldermen listing all delinquencies in taxes, sewer, water, and trash.*
- B. *The Board of Aldermen will adopt a policy to dispose of property with delinquent taxes owed during the next year.*

|                               |
|-------------------------------|
| <b>8. Budgetary Practices</b> |
|-------------------------------|

Although the board minutes make general references that the annual budgets were adopted, the budgets are not retained with the official minutes and are not signed by the board to denote approval. In addition, the budgets prepared by the city for the years ended December 31, 2000 and 1999, did not include some information required by state law. The budgets did not include budget messages or general budget summaries, describing the important features of the budget and major changes from the preceding years. The budget prepared for the year ended December 31, 1999, did not include beginning and projected ending fund balance or a statement of estimated or actual revenues and expenditures for the two preceding budget years.

Sections 67.010 through 67.040, RSMo 1994, set specific guidelines as to the format and approval of the annual operating budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of city operations. A complete budget should include appropriate revenue and expenditure estimations by classification, and include beginning and estimated ending fund balances. Prior year comparisons of actual revenues and expenditures need to be included to help ensure accurate amounts are budgeted.

**WE RECOMMEND** the Board of Aldermen sign or initial budgets and retain them with the official minutes. In addition, the board should ensure annual budgets include all relevant information required by state law.

**AUDITEE'S RESPONSE:**

*This will be done with the next budget process.*

|                            |
|----------------------------|
| <b>9. Property Records</b> |
|----------------------------|

The city does not maintain complete records to account for all property owned by the city. Property records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur. The record should include a detailed description of the assets including the name, make and model numbers, an asset identification number, the physical location of the assets, and the date and method of disposition of the assets when disposed of. In addition, all property items should be identified with a tag or other similar device, and the city should conduct annual inventories.

Adequate general fixed asset records are necessary to secure better internal control and safeguard city assets which are susceptible to loss, theft, or misuse, and provide a basis for determining proper insurance coverage required on city property. A similar comment was made by the city's auditor during their annual audit.

**WE RECOMMEND** the Board of Aldermen ensure property records are maintained which include all pertinent information for each asset such as tag number, description, costs, acquisition date, location, and subsequent disposition. Additionally the city should properly tag, number, or otherwise identify all applicable city property and conduct an annual inventory.

**AUDITEE'S RESPONSE:**

*The staff will develop a plan to track fixed assets and present the plan to the Board of Aldermen for approval within the next year.*

|                               |
|-------------------------------|
| <b>10. Municipal Division</b> |
|-------------------------------|

- A. Accounting duties are not adequately segregated. Currently, the Court Clerk is responsible for receiving, recording, and depositing all monies and for preparing and signing checks and reconciling bank statements. There is no independent review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for and assets are adequately safeguarded. Internal controls could be improved by segregating the duties of receiving and depositing monies from that of recording receipts and preparing disbursements. If proper segregation of duties cannot be achieved, at a minimum, there should be an independent review of the reconciliations between

receipts and deposits and an independent review of bank statements and bank reconciliations.

- B. Monthly listings of open items (liabilities) are not prepared for the fine account. At our request, the Court Clerk prepared a listing as of December 31, 1999. The cash balance exceeded the open items listing by \$2,299. In addition, the listing included restitution and overpayments dating back to 1996.

Monthly listings of open items should be prepared and reconciled to cash balances to ensure monies have been properly recorded and handled and sufficient funds are available for the payment of all liabilities. Any differences identified through the reconciliation process should be resolved in a timely manner. The Court Clerk should attempt to disburse restitution and overpayments and identify the remaining balance in the account. Unidentified or unclaimed monies remaining in the account should be disbursed in accordance with state law.

- C. Outstanding checks totaling \$2,741 in the bond bank account and \$1,189 in the fine bank account have been outstanding for more than one year. Outstanding checks should be periodically reviewed to determine if the payees can be readily located and if there is a need to reissue the checks. If payees cannot be located, Sections 447.500 through 447.595, RSMo 1994, which relate to unclaimed property, should be used to disburse these monies.

- D. The municipal division has not implemented adequate procedures to follow up on cash bonds held for more than one year. As of December 31, 1999, the balance of the municipal division's bond account included bond receipts totaling \$3,540, which have been held in excess of one year.

An attempt should be made to determine the proper disposition of these bonds. A review should be made of any bonds posted by persons who failed to make the required court appearance to determine if the bonds should be forfeited and if monies should be paid over to the city treasury as provided by Section 479.210, RSMo 1994. For those bonds which cannot be forfeited and remain unclaimed, Section 447.595, RSMo 1994, requires cash bonds remaining unclaimed for one year after disposition of the case be turned over to the state's Unclaimed Property Section.

- E. In three instances out of sixty cases reviewed the Court Clerk failed to issue a warrant or an order to show cause for nonpayment or failure to appear. There were also five instances when the case file indicated a warrant had been issued, but the warrant did not appear on the state warrant system.

Proper and timely issuance of warrants for amounts due to the court and for failure to appear helps to maximize court revenues along with providing equitable treatment for those citizens who are paying fines and court costs when due.

- F. Employees of the police department collect cash bonds. These individuals are not bonded. Failure to properly bond all persons with access to assets exposes the municipal division and the city to risk of loss.
- G. Neither the police department nor the municipal division maintains adequate records to account for traffic tickets issued and their ultimate disposition. Although the Court Clerk maintains a log of tickets issued, that log does not include voided tickets or tickets filed with the state court.

Without a proper accounting of the numerical sequence and ultimate disposition of all tickets, the police department and the court cannot be assured that all tickets issued are properly submitted to the traffic violations bureau (TVB) or Associate Circuit Court.

- H. The city operates a TVB to receive payment of fines and court costs at times other than during court. A schedule which specifies the offenses which may be paid at the TVB and the amount of fines and costs to be imposed for each offense has been established; however, this schedule of fines and court costs has not been prominently posted at the TVB. Section 479.050, RSMo 1994, and Supreme Court Rule 37.49 requires a schedule which designates the offenses within the authority of the TVB clerk and the amount of fines and costs to be imposed for each offense to be prominently posted at the TVB.

Conditions similar to A-D, F, and G were noted in the prior audit report of the city of Lake Ozark Municipal Division for the two years ended December 31, 1995. The Municipal Division responded that it would implement these recommendations; however, little or no corrective action has been taken. These deficiencies are serious and should be corrected immediately.

**WE RECOMMEND** the city of Lake Ozark Municipal Division:

- A. Adequately segregate duties or establish procedures for independent review.
- B. Prepare monthly listings of open items and reconcile to the cash balance. Any differences should be investigated and resolved in a timely manner. In addition, the municipal division should attempt to disburse restitution and overpayments and identify and disburse the remaining balance in the account. Any remaining unidentified monies should be disbursed in accordance with state law.
- C. Periodically review outstanding checks to determine if the payees can be located and if the checks can be reissued. If the payees cannot be located, the monies should be disbursed in accordance with state law.
- D. Implement procedures to follow up on cash bonds in a timely manner and dispose of them in accordance with state law.
- E. Ensure warrants are issued when necessary and that all warrants are properly recorded on the state warrant system.

- F. Request the city to obtain bond coverage for all persons handling municipal division monies.
- G. Maintain a complete ticket log in order to account for the numerical sequence and ultimate disposition of all tickets assigned and issued.
- H. Prominently post the schedule of fine and costs at the TVB as required.

**AUDITEE'S RESPONSE:**

- A. *The City Clerk is now reviewing the financial aspects of the court.*
- B. *The administrative staff is now reconciling monthly cash balances.*
- C. *The staff has been instructed to annually review outstanding checks.*
- D. *The staff has implemented procedures to follow up on cash bonds.*
- E. *The staff will issue warrants when necessary.*
- F. *Bond coverage for all employees has been obtained.*
- G. *The staff is updating the ticket log to include all tickets issued by the Police Department.*
- H. *The TVB fine schedule has been posted.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

WORTH COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-114  
November 8, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like Worth, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of Worth County was a financial and compliance audit of various county operating funds.

- The county spent more than was budgeted in several funds during 1999 and 1998. While the County Clerk prepares periodic budget-to-actual reports, they were apparently not effectively used for the Special Road and Bridge Fund. For the years ended December 31, 1999 and 1998, the county spent more than the budgeted amounts in the Special Road and Bridge Fund by more than \$88,000 and \$116,000 respectively. The majority of the overspending involved disbursements for two federally-funded bridge projects. The county received and spent significantly more than the budgeted amounts for these projects, but failed to adequately compare the budgeted and actual amounts and therefore, did not prepare budget amendments.

The audit also includes some other matters upon which the county should consider and take appropriate corrective action.

**Copies of the audit are available upon request.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

To the County Commission  
and  
Officeholders of Worth County, Missouri

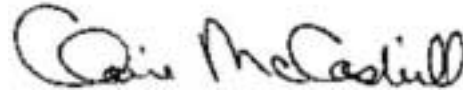

We have audited the accompanying special-purpose financial statements of various funds of Worth County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of Worth County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of Worth County.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of Worth County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31, 1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated June 14, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is written in a cursive, flowing style.

Claire McCaskill  
State Auditor

June 14, 2000 (fieldwork completion date)

**Missouri State Auditor**

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of Worth County, Missouri

We have audited the special-purpose financial statements of various funds of Worth County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated June 14, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of Worth County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards* and which is described in the accompanying Schedule of Findings as finding number 99-1. We also noted certain immaterial instances of noncompliance, which we have reported to the management of the county in the accompanying Letter on Other Matters.

Internal Control Over Financial Reporting

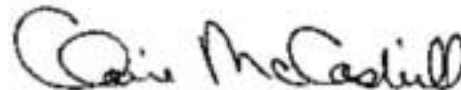

In planning and performing our audit of the special-purpose financial statements of various funds of Worth County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted a certain matter involving the internal control over financial

reporting and its operation that we consider to be a reportable condition. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the county's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements. The reportable condition is described in the accompanying Schedule of Findings as finding number 99-1.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we do not believe that the reportable condition described above is a material weakness. We also noted other matters involving the internal control over financial reporting, which we have reported to the management of the county in the accompanying Letter on Other Matters.

This report is intended for the information of the management of Worth County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

## Notes to the Financial Statements

WORTH COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of Worth County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, or the Senior Citizens Services Board. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt formal budgets for the Local Emergency Planning Committee, POST, and Law Library funds for the years ended December 31, 1999 and 1998.

Warrants issued were in excess of budgeted amounts for the following funds:

| <u>Fund</u>                    | <u>Years Ended December 31,</u> |
|--------------------------------|---------------------------------|
| General Revenue Fund           | 1998                            |
| Special Road and Bridge Fund   | 1999 and 1998                   |
| Law Enforcement Sales Tax Fund | 1998                            |
| Bad Check Fund                 | 1999                            |
| COPS Fast Grant Fund           | 1999                            |
| Circuit Clerk Interest Fund    | 1998                            |

Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statements for the years ended December 31, 1999 and 1998, did not include the Circuit Clerk Interest Fund, and Law Library Fund.

2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions. The county's deposits at December 31, 1999 and 1998, were entirely covered by federal depositary insurance or by collateral securities held by the county's custodial bank in the county's name.

Schedule

WORTH COUNTY, MISSOURI  
SCHEDULE OF FINDINGS  
YEARS ENDED DECEMBER 31, 1999 AND 1998

This schedule includes the audit finding that *Government Auditing Standards* requires to be reported for an audit of financial statements.

|              |                                |
|--------------|--------------------------------|
| <b>99-1.</b> | <b>Overspending of Budgets</b> |
|--------------|--------------------------------|

Disbursements were made in excess of the approved budgets in the following funds during the two years ended December 31, 1999, as follows:

| Fund                      |    | Year Ended December 31, |         |
|---------------------------|----|-------------------------|---------|
|                           |    | 1999                    | 1998    |
| General Revenue           | \$ | N/A                     | 3,981   |
| Special Road and Bridge   |    | 88,441                  | 116,409 |
| Law Enforcement Sales Tax |    | N/A                     | 4,409   |
| Bad Check                 |    | 717                     | N/A     |
| COPS Fast Grant           |    | 84                      | N/A     |
| Circuit Clerk Interest    |    | N/A                     | 655     |

While the County Clerk prepares periodic budget to actual reports, they were apparently not effectively used for the Special Road and Bridge Fund. The majority of the overspending involved disbursements for two federally-funded bridge projects. The county received and spent significantly more than the budgeted amounts for these projects, but failed to adequately compare the budgeted and actual amounts and, therefore, did not prepare budget amendments.

It was ruled in State ex. rel. Strong v. Cribb, 364 Mo. 1122, SW 2d 246 (1954), that strict compliance with the county budget law is required by county officials. If there are valid reasons which necessitate excess expenditures, budget amendments should be made following the same process by which the annual budget is approved, including holding public hearings and filing the amended budget with the State Auditor's office. In addition, Section 50.622, RSMo Supp. 1999, provides that counties may amend the annual budget during any year in which the county receives additional funds which could not be estimated when the budget was adopted and that the county shall follow the same procedures required for adoption of the annual budget to amend its budget.

**WE RECOMMEND** the County Commission adopt procedures to compare budgeted and actual disbursements and ensure the county and applicable officials do not authorize disbursements in excess of budgeted expenditures. If valid reasons necessitate excess expenditures, the original budgets should be formally amended.

**AUDITEE'S RESPONSE**

*We agree and we will amend the budgets as needed in the future. We will more closely monitor budgeted and actual expenditures.*

## Follow-Up on Prior Audit Findings

WORTH COUNTY, MISSOURI  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

Our prior audit report issued for the three years ended December 31, 1997, included no audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

## SECTION ON OTHER MATTERS

## WORTH COUNTY, MISSOURI LETTER ON OTHER MATTERS

We have audited the special-purpose financial statements of various funds of Worth County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated June 14, 2000.

We did not review the operations of elected officials with funds other than those presented in the special-purpose financial statements. The operations of such officials will be reviewed and reported on during the state auditor's next scheduled audit of the county.

This Letter on Other Matters presents matters other than the findings, if any, reported in the accompanying Schedule of Findings. These matters resulted from our audit of the special-purpose financial statements of Worth County but do not meet the criteria for inclusion in the written report on compliance and on internal control over financial reporting that is required for an audit performed in accordance with *Government Auditing Standards*. Nevertheless, the county should consider these matters and take appropriate corrective action.

### 1. Financial Condition

The county's General Revenue Fund is in poor financial condition. The county relies on tax anticipation notes (TANs) to maintain a positive cash flow in the General Revenue Fund. The past two years, the county has borrowed on TANs as early as February in order to operate the remainder of the year. The balance of outstanding TANs has increased steadily over the past five years, from \$46,012 at December 31, 1995, to \$121,380 at December 31, 1999 (approximately 40 percent of the 1999 total General Revenue Fund revenues). In addition, the county made an interfund loan of \$9,798 from the Capital Improvements Sales Tax 40 % Fund to the General Revenue Fund in 1999 which was primarily repaid in 2000.

### 2. Personnel Policies and Procedures

The county's compensatory time policy for its employees may not comply with the Fair Labor Standards Act. Time sheets and leave records for the Sheriff's deputies are not routinely submitted to the County Clerk's office.

### 3. County Expenditures

The county did not always advertise and solicit bids, nor was bid documentation always retained for various purchases.

### 4. Vehicle and Equipment Usage Logs

Usage reports for county vehicles are prepared by the Sheriff's Department, but the reports are not reviewed by the County Commission. Usage reports are not prepared for the road and

bridge vehicles or equipment. The county allows the Road and Bridge Supervisor to drive his county vehicle to his residence, but does not report the value of the commuting mileage on his W-2 form.

5. Emergency Preparedness Program

The county operates an emergency preparedness program which is funded from federal assistance, payments from cities, and the county's General Revenue Fund. Written agreements between the county and the cities outlining the terms and responsibilities of the cities' participation have not been developed.

6. General Fixed Assets

The county's general fixed asset records do not include some county property. Additions per the general fixed asset records are not reconciled periodically to fixed asset purchases. Property tags are not attached to assets designating the items as county property.

This Letter on Other Matters is intended for the information of the management of Worth County, Missouri, and other applicable government officials. However, this letter is a matter of public record and its distribution is not limited.

CITY OF BELL CITY, MISSOURI

YEAR ENDED JUNE 30, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-113  
October 26, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Bell City, Missouri.**

Inadequate oversight and monitoring by the Board of Alderman and inadequate records and procedures have contributed to a serious financial situation for the city. The city operated with very low cash balances in many funds. Due to the inadequate cash balances in some funds, the city has at times paid bills from whichever funds had money available. Also, the low cash balances have necessitated the city purchasing used equipment which later required significant repairs.

Inadequate records and procedures have inhibited the board's ability to effectively monitor and manage the city and have resulted in or contributed to the city's problems. These weaknesses include inadequate detail in the budgets and other financial reports, lacking of bidding for various purchases, inadequate segregation of accounting duties or review of work performed, inadequate collection procedures on delinquent utility accounts and a lack of reconciliations over utility billings, payments, and accounts receivable.

In July 1998, the city purchased land and a new metal building to house city hall for \$26,500. The city spent approximately \$4,700 more to renovate the building for offices. The city did not maintain documentation of the estimates for the various options it had considered prior to the purchase of the building. In addition, the minutes of the board meetings contain no discussion of these various options or cost estimates. Also, the city did not obtain a professional appraisal to value the land and building to purchase. The bank, which wrote the loan, informally appraised the property and building at \$40,000 to \$45,000 whereas the Stoddard County Assessor, after the improvements were made by the city, appraised the land and building at \$27,300.

The city has not taken adequate steps to ensure the timely collection of delinquent accounts. According to the Mayor, the board was unaware the problem was significant until the new City Clerk prepared a delinquent list in April 2000, which showed the delinquent accounts for water, sewer, and trash services totaled approximately \$16,000. Several customers on the list had been delinquent for three to four years with some account balances over \$1,000. The city also has not adequately accounted for water meter deposits, has not created and funded reserve accounts required by its sewer bond, and has not obtained annual audits.

(over)

YELLOW SHEET

The city's purchasing ordinance requires advertising for sealed competitive bids for all purchases of goods or services exceeding \$100. However, we noted bids or proposals were not solicited, or bid documentation was not retained, for several purchases, such as asphaltting (\$9,654) and insurance (\$9,044).

The city entered into several installment loans with a local bank. A 10-year loan was obtained in July 1998, for the purchase of the city hall totaling \$30,371. Another loan was for 30 months obtained in March 1999, for the purchase of a 1987 pickup truck totaling \$3,863. The contracts obligate the city to payments up to 10 years without any option to renew the contracts on a yearly basis. Extending the contracts over multi-year periods without the right of withdrawal obligates the city for future periods which appears to violate the intent of the Missouri Constitution on legal indebtedness absent a vote of city taxpayers.

The city financed its premiums for various insurance policies with one company at a 16.25 percent and 17 percent interest rate through an insurance premium financing company. This method of paying insurance premiums is very costly.

The city maintains two non-interest bearing bank accounts. The average month-end bank balance in the general account for the year ended June 30, 2000, was \$25,068. To maximize revenues, city monies should be deposited into interest-bearing accounts.

The city paid the maintenance employee an additional \$200 on July 16, 1999. Also, while the former police resigned effective July 2, 1999, the city paid him \$200 on July 16, 1999 and on July 30, 1999. There is no documentation of additional hours worked by these employees to support the payments and they were apparently additional payments for services previously rendered. These payments appear to be bonuses. In addition, all city employees received a \$50 and \$25 Christmas bonus in December 1999 and 1998, respectively. These bonuses violate the Missouri Constitution.

Additionally, in December 1998, a city employee received his payroll check one week in advance of the date earned. In June 1998, the city loaned the former police officer \$500 to be repaid weekly in \$25 installment payments. Such payments violate the Missouri Constitution, which prohibits any political subdivision of the state from granting or lending money to an individual. In addition, it is not prudent for a city to compensate employees in advance.

The maintenance employee was the sole bidder for the city's 1975 pickup truck. The minutes documented the approval of the sale of the truck to the employee for \$500. While the title was transferred to the employee, the city was never paid for the truck. According to the Mayor, the truck was instead given to the employee in lieu of the rest of a retroactive raise. Such a gift or bonus is prohibited by the Missouri Constitution. Furthermore, in January 2000, the city sold its 1987 truck to the Mayor's father-in-law without publicizing or soliciting bids.

The city does not have a formal policy regarding public access to city records. A formal policy regarding access to and copies of city records would establish reasonable guidelines for the city to make the records available to the public. The board meeting minutes do not always include sufficient detail of matters discussed or action and votes taken. For example, the minutes did not document the various options discussed prior to the purchase of the new city hall land and building.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
And  
Members of the Board of Aldermen  
City of Bell City  
Bell City, Missouri 63735

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Bell City, Missouri. Our audit of the city included, but was not limited to, the year ended June 30, 2000. The objectives of this audit were to:

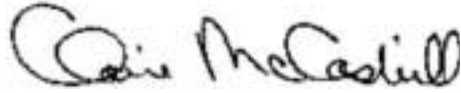

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied during our audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Bell City, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

July 27, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## HISTORY AND ORGANIZATION

# CITY OF BELL CITY, MISSOURI HISTORY AND ORGANIZATION

The city of Bell City is located in Stoddard County. The city was incorporated in 1955 as a fourth-class city. The population of the city in 1990 was 469.

The city government consists of a mayor and a four-member board of aldermen. The four board members are elected from two wards in staggered elections for two-year terms. The mayor is elected for a two-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor, Board of Aldermen, and other principal officials at June 30, 2000, were:

| Elected Officials                          | Term Expires | Actual Compensation for the Year Ended June 30, 2000 | Amount of Bond |
|--|--------------|--|----------------|
| David Scherer, Mayor                       | April, 2001  | \$ 25  | \$ 0           |
| Howard Pikey, Alderman, Ward One           | April, 2001  | 12   | 0              |
| David Lewis, Alderman, Ward Two            | April, 2001  | 12   | 0              |
| Lula Maestas, Alderwoman, Ward One (1)     | April, 2002  | 0  | 0              |
| Kay Hughes, Alderwoman, Ward Two (2)       | April, 2002  | 0  | 0              |
| <b>Other Principal Officials</b>           |              |  |                |
| Billy Harrison, City Clerk/Court Clerk (3) |              | 3,520  | 5,000          |
| Robbie Hale, Police Officer (4)            |              | 6,600  | 0              |
| Donald Rhodes, City Attorney               |              | 0  | 0              |

Other city employees include one full-time and three part-time employees.

- (1) Elected in April 2000 to replace Tim Hall.
- (2) Elected in April 2000 to replace Johnny Dover.
- (3) Appointed to replace Mildred Rivers who retired in March 2000.
- (4) Appointed to replace Joel Moyers who resigned in January 2000. Joel Moyers replaced Larry Gammons who resigned in July 1999.

Assessed valuation and tax rate information for tax year 1999 is as follows:

## MANAGEMENT ADVISORY REPORT

CITY OF BELL CITY, MISSOURI  
SUMMARY OF FINDINGS

1. Financial Oversight and Monitoring (page 11-12)

The Board of Aldermen has not provided adequate oversight and monitoring of city operations. Records and procedures are inadequate and the city is in a serious financial situation.

2. City Hall Purchase (pages 12-13)

The board did not maintain documentation of estimates obtained for various options it had considered prior to the purchase of a new building. The city did not obtain a professional appraisal valuing the land and building prior to the purchase. The city spent approximately \$4,700 for labor and materials to renovate the building without soliciting bids.

3. Water, Sewer, and Trash Systems (pages 13-17)

The city does not reconcile total billings to payments received and amounts remaining unpaid for utility services. The city has not taken steps to ensure the timely collection of delinquent accounts. The city has not established a system to account for each customer account. The city does not reconcile total gallons of water billed to customers to gallons of water pumped. Records of customers paying the meter deposit are not adequately maintained. The city has not established the two revenue bond reserve accounts as required by the bond covenant. The balance which should be in the Debt Service Reserve Account and the Depreciation and Replacement Accounts at June 30, 2000 is \$2,213 each. The city's water and sewer systems have not been audited as required by state law. In addition, the city has not established procedures to ensure all customers receiving trash services are billed.

4. Disbursements (pages 17-20)

Bids or proposals were not solicited or bid documentation was not retained for several purchases. The Board of Aldermen does not document the review of invoices prior to payment and supporting documentation was not adequate for some disbursements. The city entered into several bank loans which appear to violate the Missouri Constitution. The city is paying a high interest rate for its insurance premium and did not seek other alternatives for paying the insurance premiums.

5. Accounting Controls and Procedures (pages 20-22)

The board has not appointed separate individuals to serve as City Treasurer or City Collector. The Mayor and one of the Aldermen sign checks, but are not bonded. Receipts are not deposited intact and the City Clerk does not adequately perform

reconciliations of the various accounting records. The city deposits city funds in non-interest bearing accounts. The city has not prepared or maintained permanent, detailed property records of fixed assets.

6. Ordinances, Records, and Board Minutes (pages 22-24)

Many of the city's ordinances are old and outdated. In addition, the city does not maintain a listing of all ordinances passed and repealed. The city does not have a formal policy regarding public access to city records. Board meeting minutes are not adequately maintained and are not signed by the Mayor, the City Clerk, or any of the board members.

7. Budgets and Financial Reporting (pages 24-26)

Budgets are not prepared in accordance with statutory requirements and the city approved expenditures in excess of budgeted amounts. An annual maintenance plan for city streets has not been prepared and the city's published financial statements are not sufficiently detailed.

8. Personnel Policies and Procedures (pages 26-28)

Bonuses were paid to city employees, a city employee was paid his payroll check one week in advance of the date earned and the city loaned the former police chief \$500. The city does not have an annual ordinance to establish the compensation of the City Clerk and other employees, time sheets are not prepared, and records of vacation and sick leave are not maintained.

9. Restricted Revenues (page 28-29)

The city has not established procedures to ensure expenditures are properly allocated among the various funds. Some expenses charged to the Motor Fuel Fund appear inappropriate while other expenses allowed by state law are not charged to the fund (i.e., police officer's salary).

10. City-Owned Vehicles (pages 29-31)

Vehicle logs are not adequately maintained. Several problems were noted with the purchase and sale of city vehicles, including not soliciting bids and giving a truck to an employee. The city has not adequately planned for replacing its vehicles and equipment resulting in purchasing poor quality equipment.

CITY OF BELL CITY, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |   |
|-----------|---|
| <b>1.</b> | <b>Financial Oversight and Monitoring</b> |
|-----------|---|

Inadequate oversight and monitoring by the Board of Aldermen and inadequate records and procedures have contributed to a serious financial situation for the city.

The city has operated with very low cash balances in many funds. Due to the inadequate cash balances in some funds, the city has at times paid bills from whichever funds had money available. As noted elsewhere in this report, the city has also not consistently allocated costs to the various funds benefiting from the expenditures and as a result, restricted receipts may have been used improperly. Also, the low cash balances have necessitated the city purchasing used equipment which later required significant repairs and financing its insurance premiums at a high rate of interest. The city also has not established the reserve bond accounts required by its revenue bond covenant.

Inadequate records and procedures have inhibited the board's ability to effectively monitor and manage the city and have resulted in or contributed to the problems noted above. These weaknesses include inadequate detail in the budgets and other financial reports, lack of bidding for various purchases, inadequate segregation of accounting duties or review of work performed, inadequate collection procedures on delinquent utility accounts and a lack of reconciliations over utility billings, payments, and accounts receivable.

The Board of Aldermen should review disbursements, reducing discretionary spending as much as possible, and ensure adequate revenues exist to fund the necessary core city services as well as to properly fund revenue bond reserve accounts. These plans should be formalized in a detailed annual budget. In addition, the board should ensure adequate accounting records and an effective system of accounting and administrative controls are in place, including procedures to frequently monitor budgeted and actual activity. The specific recommendations contained in the following MARs, if implemented, will help establish these records, controls, and procedures.

**WE RECOMMEND** the Board of Aldermen review the current financial condition of the city's funds, and consider the various alternatives of reducing disbursements and/or increasing receipts. In addition, the board should ensure adequate budgets and financial records are prepared and maintained in the future, and adequate controls and procedures are in place to properly oversee city operations.

**AUDITEE'S RESPONSE**

*The board agrees with the recommendation and is aware of the city's poor financial condition. It indicated it will continue to consider ways to improve the financial condition and noted the city has already begun implementing several procedures to increase collections of delinquent*

*utility accounts. It also indicated it will develop and maintain adequate records and controls, as addressed in detail later in the audit report.*

|                              |
|------------------------------|
| <b>2. City Hall Purchase</b> |
|------------------------------|

In July 1998, the city purchased land and a new metal building to house city hall for \$26,500. The city spent approximately \$4,700 more to renovate the building for offices. The city obtained a \$30,000 loan from a local bank for the purchase of the land and building. During our review of the purchase, we noted the following concerns:

- A. The Mayor and board members indicated that prior to purchasing the new building, they had reviewed other options. They indicated they obtained estimates for purchasing two separate existing buildings within the city, repairing the erosion and deterioration problem with the old city hall, and contracting for a building to be built (similar to the one purchased). The Mayor indicated the estimates for the various options ranged from approximately \$28,900 to \$30,000. However, the city did not maintain documentation of such estimates for the various options it had considered prior to the purchase of the building. In addition, the minutes of board meetings contain no discussion of these various options or cost estimates.

Without supporting documentation, there is little assurance the board took appropriate steps to ensure the decision to purchase the building was the most beneficial to the city. In addition, discussions of such major transactions should be fully documented in the board meeting minutes.

- B. The city did not obtain a professional appraisal to value the land and building prior to purchase. The bank which wrote the loan indicated an informal, in-house appraisal valued the property and building at \$40,000 to \$45,000. According to the Stoddard County Assessor, the appraised value of the land and building at January 1, 2000, (after the additional improvements were made by the city) was \$27,300.

The disparity between the county assessor's appraisal and the bank's in-house appraisal supports the importance or significance of an independent appraisal in establishing the market value of the land and building as a basis for determining the reasonableness of the asking price.

- C. The city spent approximately \$4,700 for labor and materials to renovate the building for two offices and a restroom. Except for a wall dividing the garage and the office area, the building was basically a shell when it was purchased.
- 1) Beginning in November 1998, the board hired and paid \$1,752 to an individual to build the offices and restroom facility without soliciting bids and without a written contract. The project was completed in April 1999,

or nine months after the building was purchased. According to the Mayor, the project took longer and the cost of labor was significantly more than the board had anticipated. However, there is no documentation to support the agreement with the contractor, or the cost the board anticipated.

Written contracts establish payment terms, clarify responsibilities and expectations of both parties, and help ensure the city receives the services it desires. Section 432.070, RSMo 1994, requires all contracts to be in writing. In addition, the city should compare invoices to contract terms to provide assurance the city is paying the appropriate amounts for services.

- 2) Of the \$4,700 spent to renovate the building, approximately \$2,840 was used to purchase materials. The materials were purchased from seven different vendors without soliciting bids. As noted in MAR No.4, competitive bids help ensure the city receives fair value by contracting with the lowest and best bidders.

Had competitive bids been solicited, the board could have better ensured the reasonableness of the labor cost, the quantity and type of materials needed, and the length of time to complete the project.

**WE RECOMMEND** the Board of Aldermen solicit bids, estimates, and/or appraisals for all major purchases. In addition, ensure documentation of estimates or bids taken and discussion of major transactions is adequate and all agreements are in writing.

### **AUDITEE'S RESPONSE**

*The board agrees and indicated it will ensure in the future that bids, estimates, and appraisals are obtained when applicable and that all applicable information is adequately documented.*

|   |
|---|
| <b>3. Water, Sewer, and Trash Systems</b> |
|---|

The city provides water, sewer, and trash services to its residents. Water meters are read on approximately the twentieth of each month and a combined water, sewer, and trash utility bill is mailed on the last day of the month. Payments are due by the tenth of the following month. Our review of the utility systems and related procedures identified the following concerns:

- A. While the city maintains individual customer account sheets, the city does not maintain a control ledger to account for total billings and payments received each month. As a result, monthly reconciliations of total billings, payments received, and amounts remaining unpaid are not performed.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and any errors or discrepancies

are detected on a timely basis. Complete documentation of the reconciliations should be retained to support conclusions and any corrections made, and to facilitate independent reviews.

- B. The city has not taken adequate steps to ensure the timely collection of delinquent accounts. Periodic listings of delinquent utility account balances were not prepared and reviewed by the board. According to the Mayor, the board was unaware the problem was significant until the new City Clerk prepared a delinquent list in April 2000 which showed the delinquent accounts for water, sewer and trash services totaled approximately \$16,000. Several customers on the list had been delinquent for three to four years with some account balances over \$1,000.

City ordinance No. 28.910 requires a \$5 penalty for any water or sewer bill not paid by the tenth of the month be added to the bill. In addition, if the bill is not paid for 30 days, water service is to be discontinued and not reconnected until all past due bills are paid in full along with a reconnect fee. The city has not enforced the penalty on delinquent water bills or disconnected delinquent accounts.

To maximize receipts and ensure equitable treatment to customers who pay timely, the city should prepare periodic listings of delinquent accounts and take steps necessary to ensure timely collection of the delinquencies.

- C. The city has not established a system to ensure it accounts for all customer accounts. The city maintains a separate utility ledger sheet for each customer and a meter reading sheet for customers receiving water services. However, account numbers are not assigned, nor are the utility billing statements prenumbered. As a result, there is not adequate assurance all meters are read and that all customers are properly billed for services.

The city does not account for all utility ledger sheets. The former City Clerk removed customer ledger sheets for closed accounts or customers who had moved and filed them in various other locations. Account numbers would help ensure all customers are accounted for, properly billed, and collections properly recorded. In addition, a log of all assigned account numbers would provide a summary control record of all customer accounts in use and/or closed.

- D. The city has not obtained annual audits of its combined water works and sewage system. Section 250.150, RSMo 1994, requires the city to obtain annual audits of the combined water works and sewage system, and the cost of the audits is to be paid from the revenues received from the system.

In addition to being required by state law, annual audits of the city funds would help:

- 1) Ascertain the stewardship of the public officials who handle and are responsible for the financial resources of the city.
- 2) Determine the propriety and accuracy of its financial transactions.
- 3) Ensure revenues of the system are adequate to meet the expenses of providing the service.

E.1. The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. The individual customer account sheets report the gallons of water used each month from the individual meter readings. The maintenance supervisor records the daily meter readings from the city's well, but the gallons pumped are not reconciled to the total gallons billed. The gallons of water billed in January 2000 were 23 percent less than the gallons of water pumped. The Public Service Commission generally recommends investigation if the usage not billed exceeds 15 percent.

To help detect significant water loss on a timely basis and to help ensure all water usage is properly billed, the city should reconcile the total gallons of water pumped to the gallons of water billed on a monthly basis and investigate significant differences.

2. The city does not adequately account for water meter deposits. The city requires each customer to pay a refundable water meter deposit. These monies are credited to the Meter Deposit Fund. The city currently has approximately 200 customers and the balance in the fund as of June 30, 2000, was \$2,077. The meter deposit was \$10 until it was increased to \$25 in August 1983. Based on the number of customers and the balance in the Meter Deposit Fund, it appears the balance may not be enough to cover meter deposits for existing customers.

A permanent summary record listing the customer deposits held at any particular date has not been established. The only record the city maintains of customer deposits is the copy of the receipt slip issued to the customer at the time of payment and the fund ledger which indicates the total deposit collected each month along with refund information which includes the date, customer name and refund amount. Without a listing of customer deposits the risk of refunding an incorrect amount is increased.

A permanent summary record listing the customer deposits would allow for periodic reconciliations between deposits, refunds and cash on hand. Without these reconciliations, the possibility of errors going undetected is increased. In addition, the city should determine what the correct balance of the Meter Deposit Fund should be and transfer any necessary funds from the Water Fund.

- F. The city has not created and funded all reserve accounts required by its sewer revenue bond. In September 1996, the city issued \$100,000 in revenue bonds to partially finance the construction of extensions and improvements of the sewer system.

The revenue bond covenant requires the establishment of a Debt Service Reserve Account to be funded by a monthly transfer of approximately \$49 beginning October 1996 until the balance reaches \$5,900. These funds are to be expended only to prevent any default in the payment of interest on or principal of the bond. In addition, the bond covenant requires the establishment of a Depreciation and Replacement Account to be funded by a monthly transfer of approximately \$49 beginning in October 1996 until the balance reaches \$5,900. These funds are to be expended only for the purpose of making unusual or extraordinary replacements and repairs in and to the sewer system. A portion of monthly sewer fees is to be used to fund the reserve accounts; however, all monies are deposited into the Sewer Fund. As of June 30, 2000, the balances in each of these accounts should have been \$2,213.

The failure of the city to adequately maintain the required reserve accounts could allow the bondholders to take legal action to force compliance or immediate payment of the bond.

- G. The city has not established procedures to ensure all customers receiving trash services are billed. The city's maintenance employee indicated he is not provided with a list of customers, but collects trash wherever it is set out. As a result, the city may not be billing all customers to whom service is provided and losing revenue.

**WE RECOMMEND** the Board of Aldermen:

- A. Require the City Clerk to maintain a summary record of billings and payments and to perform monthly reconciliations of the amounts billed to amounts collected and delinquent accounts.
- B. Ensure delinquent utility account lists are prepared and periodically reviewed by the board and take all necessary steps to ensure timely collection of delinquencies.
- C. Establish an account number system and control log to ensure all utility customers are accounted for and billed for services.
- D. Ensure annual audits of the water and sewer system are obtained.
- E.1. Compare the gallons of water pumped to the gallons billed on a monthly basis and investigate significant differences.

2. Ensure a list of all water meter deposits is prepared and reconciled to the balance in the Meter Deposit Fund. The board should transfer the necessary monies from the Water Fund to cover any deficiency.
- F. Establish and fund all accounts required by the bond covenants. In addition, the board should determine how much should be transferred into the Debt Service Reserve Account and the Depreciation and Replacement Account from the Sewer Fund.
- G. Establish procedures to ensure all customers receiving trash services are billed.

### **AUDITEE'S RESPONSE**

A,C,

*&E.1. The board agrees and indicated the city will implement these recommendations by the end of calendar year 2000.*

*B. The board agrees and indicated it has already implemented the recommendation. The city has collected a significant portion of the delinquencies noted and has established payment agreements for most delinquent accounts. The board will continue to closely monitor delinquent accounts.*

*D. The board agrees and will try to ensure annual audits are obtained.*

*E.2,*

*&G. The board agrees and will try to implement these recommendations by the end of calendar year 2000.*

*F. The board agrees and believes the prior city clerk has already established these accounts. However, if it discovers the accounts have not been established, this will be done immediately. The board also indicated it will begin making the required monthly transfers immediately and will develop a plan to repay the accumulated accounts owed.*

|           |                      |
|-----------|----------------------|
| <b>4.</b> | <b>Disbursements</b> |
|-----------|----------------------|

- A. The city's purchasing ordinance requires advertising for sealed competitive bids for all purchases of goods and services exceeding \$100. However, we noted bids or proposals were not solicited, or bid documentation was not retained, for several purchases. Following are some examples:

|                            |          |
|----------------------------|----------|
| Asphalting                 | \$ 9,654 |
| Insurance                  | 9,044    |
| Trucks                     | 4,300    |
| Truck repairs              | 1,016    |
| Sewer materials            | 273      |
| Chemicals                  | 795      |
| Grant application services | 350      |

The Mayor indicated that informal phone quotes were usually obtained from several vendors; however, documentation of the quotes was not maintained.

Competitive bidding helps ensure the city receives fair value by contracting with the lowest and best bidders. Bidding helps ensure all parties are given an equal opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bids, or by advertised sealed bids. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the winning bid was selected.

- B. The Board of Aldermen indicated it reviews and approves all invoices prior to payment. However, the approval is not documented on the invoices or listing of bills to be paid. The only documentation of the board's approval is a general statement in the minutes that bills were approved. Without documentation of approval on the invoices and/or the listing of bills, it is not clear which invoices were approved.

In addition, no one independent of the check preparation and signing process compares actual checks written with the approved invoices and approved listing of bills.

All disbursements should be closely scrutinized by the board or someone independent of the disbursement process and properly authorized. Failure to properly review all invoices and other supporting documentation, and to document authorization, increases the possibility of inappropriate disbursements occurring.

- C. The city did not have bills-of-sale, purchase contracts, or invoices to support the purchase of two pickup trucks costing \$3,000 and \$1,300.

All disbursements should be supported by paid receipts or vendor-provided invoices to ensure the obligations were actually incurred and the disbursements represent appropriate uses of public funds.

- D. The city entered into several installment loans with a local bank. A 10-year loan was obtained in July 1998 for the purchase of the city hall totaling \$30,371. Another loan was for 30 months obtained in March 1999 for the purchase of a

1987 pickup truck totaling \$3,863. The contracts obligate the city to payments up to 10 years without any option to renew the contracts on a yearly basis.

Article VI, Section 26(a), of the Missouri Constitution states that no city shall become indebted in an amount exceeding in any year the income and revenue provided for such year plus any unencumbered balances from previous years, except as otherwise provided in the constitution. Article VI, Section 26(c), of the Missouri Constitution allows cities to incur debt by bond issue only after approval of two-thirds of the qualified electors voting thereon.

The city's beginning balance and anticipated revenue for fiscal year 1999 was already obligated when it entered into the loan agreements for these purchases, and it had already allocated all but \$2,669 of its total available funds. Extending the contracts over multi-year periods without the right of withdrawal obligates the city for future periods which appears to violate the intent of the Missouri Constitution on legal indebtedness absent a vote of city taxpayers.

- E. The city financed its premiums for various insurance policies with one company at a 16.25 percent and 17 percent interest rate through an insurance premium financing company for the fiscal years ended June 30, 2000 and 1999, respectively. For that period, the finance charges totaled \$182 and \$210, for insurance premiums totaling \$4,088 and \$3,778, respectively.

This method of paying insurance premiums is very costly. The city should seek other alternatives to reduce the amount of finance charges being paid for insurance premiums, including contacting the insurance company to determine if it will accept periodic payments. The insurance company indicated to us that semi-annual, and possibly quarterly, deferred payments can be made with no finance charge.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure bids are solicited for all applicable purchases in accordance with city ordinance. Documentation of the bidding process should be maintained in all cases. If the city believes that it is not practical to obtain bids on certain purchases, documentation explaining why bids were not obtained should be maintained.
- B. Ensure the board's approval of invoices is documented. In addition, approved invoices and listings of bills should be compared to checks written by someone independent of the check preparation and signing process.
- C. Ensure all disbursements are supported by paid receipts and/or vendor-provided invoices which contain an adequate description of the goods and services received.

- D. Not incur debt in violation of the constitution.
- E. Seek other alternatives for paying the city's insurance premiums to reduce the finance charges currently being paid.

### **AUDITEE'S RESPONSE**

- A. *The board agrees with the recommendation and indicated it will probably need to consider changing the ordinance to establish more reasonable thresholds. In addition, the board will ensure the city complies with the ordinance and maintains applicable documentation.*
- B&E. *The board agrees and will attempt to implement these recommendations immediately.*
- C. *The board agrees with the recommendation and indicated it will ensure supporting documentation for purchases is retained.*
- D. *The board agrees and will ensure the recommendation is followed in the future.*

|           |   |
|-----------|---|
| <b>5.</b> | <b>Accounting Controls and Procedures</b> |
|-----------|---|

- A. The City Clerk also serves as the City Treasurer and City Collector, and is responsible for all of the record keeping duties of the city. These duties include receiving and depositing monies, preparing invoices for payment, preparing and co-signing checks, performing bank reconciliations, and preparing monthly financial reports. The City Clerk also performs all functions related to generating monthly utility bills, receipting and recording utility payments, making credit adjustments, monitoring delinquent accounts, and initiating service shutoff orders. The board does not provide adequate supervision or an independent review of the work performed by the City Clerk.

Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these three offices, by the same person at the same time would be incompatible. This situation does not allow the separation of duties necessary for a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances intended by state law.

If segregating these offices is not feasible, at a minimum, procedures for adequate independent review should be established.

- B. The City Clerk, the Mayor, and a designated alderman are authorized to sign checks. Although dual signatures are required on each check, only the City Clerk is bonded. Failure to properly bond individuals who have access to funds exposes

the city to risk of loss. In addition, the bond covenants for the city's sewer revenue bonds require all officers handling funds and accounts of the system to be adequately bonded.

- C. Receipts are not deposited intact. While deposits are made daily, varying amounts of cash were withheld from deposits to use as a change fund. In addition, the City Clerk did not indicate the method of payment on the daily collection sheet. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits should be made intact and the composition of receipts should be documented and reconciled to the amount deposited. If a change fund is needed, it should be established and maintained at a constant amount.
- D. While the bank balance is reconciled to the check register balance, it is not reconciled to the fund ledger balances. For the year ended June 30, 2000, the bank balance was \$556 less than the total fund ledger balances of all city funds. In addition our review of the fund ledgers disclosed several errors in the fund balances. Adequate reconciliation procedures ensure errors or irregularities are detected in a timely manner.
- E. The city maintains two non-interest bearing bank accounts. The average month-end bank balance in the general account for the year ended June 30, 2000, was \$25,068. To maximize revenues, city monies should be deposited into interest-bearing accounts.
- F. The city has not prepared or maintained permanent, detailed property records for fixed assets, including the cost of land, buildings, equipment, and furniture owned by the city. Also, annual physical inventories are not performed.

Property records are necessary to ensure accountability for all items purchased and owned and for determining the proper amount of insurance coverage.

To develop appropriate records and procedures for fixed assets, the city needs to undertake a comprehensive review of all property owned by the city. Assets should be counted, tagged for specific identification, and recorded by description and serial number in a detailed property ledger at historical cost or estimated historical cost if the original value is not available. The city should properly record all fixed asset transactions and ensure the accuracy of the recorded fixed assets. Periodically, the city should take physical counts of its assets and compare to the detailed records.

**WE RECOMMEND** the Board of Aldermen:

- A. Appoint separate individuals to the positions of City Clerk, City Collector and City Treasurer. If this is not possible, at a minimum, procedures for an adequate independent review should be established.

- B. Obtain bond coverage for all persons with access to city assets.
- C. Ensure monies are deposited intact and the composition of receipt records is reconciled to bank deposits. In addition, the change fund should be maintained at a constant amount.
- D. Ensure bank balances and the check register balance are reconciled to the total fund ledger balances each month.
- E. Ensure city monies are deposited into interest bearing accounts.
- F. Establish property records for fixed assets that include all pertinent information for each asset, such as a tag number, description, cost, acquisition date, location, and subsequent disposition. In addition, annual physical inventories should be performed.

#### **AUDITEE'S RESPONSE**

- A. *The board agrees and will establish procedures to ensure an independent review is performed immediately.*
- B. *The board agrees with the recommendation and indicated it will look into obtaining bond coverage for all applicable officials.*
- C&E. *The board agrees and has already implemented these recommendations.*
- D. *The board agrees and indicated the City Clerk is now working on these reconciliations.*
- F. *The board agrees and will implement this recommendation immediately.*

|           |   |
|-----------|---|
| <b>6.</b> | <b>Ordinances, Records, and Board Minutes</b> |
|-----------|---|

- A. Improvement is needed in the organization and documentation of the city's ordinances. The ordinances were last codified in March 1982 and many of the ordinances are old and outdated. In addition, a listing of ordinances passed since the last codification is not maintained. Instead, updated ordinances are kept in a file by the year they were adopted, making it difficult to locate the latest update to an ordinance or determine if an ordinance has been updated or rescinded since the last codification.

Since ordinances represent legislation which has been passed by the Board of Aldermen to govern the city and its residents, it is important that the city's ordinances be maintained in a complete, well organized and up-to-date manner. An index of all ordinances passed and repealed by the city could help keep track of additions and changes made to the city ordinances.

- B. The city does not have a formal policy regarding public access to city records. A formal policy regarding access to and copies of city records would establish reasonable guidelines for the city to make the records available to the public. This policy should establish a contact person, an address for mailing such requests, and the cost for providing copies of public records.

Section 610.023, RSMo Cumulative Supp. 1999, lists requirements for making city records available to the public. Section 610.026, RSMo Cumulative Supp. 1999, allows the city to charge fees for copying public records, not to exceed the city's actual cost of document search and duplication.

- C. The board minutes are prepared by the City Clerk; however, they are not signed by the Mayor, the Clerk, or any of the board members.

The board minutes should be signed by the Clerk, and the Mayor, or a designated member of the board, to provide an independent attestation that the minutes are a complete and correct record of matters discussed and actions taken during the board meetings.

- D. The board meeting minutes do not always include sufficient detail of matters discussed or action and votes taken. For example, the minutes did not document the various options discussed prior to the purchase of the new city hall land and building in July 1998, the gift of a 1975 truck to the maintenance employee in July 1999, the sale of a 1987 truck to the Mayor's father-in-law in January 2000, or approval of the City Clerk's raise in June 2000.

Section 610.020, RSMo 1994, requires minutes of meetings be taken and retained by all governmental bodies and to include the date, time, place, members present, members absent, and a record of votes taken. Complete and accurate minutes of the board's meetings are necessary to retain a record of the business conducted and to provide an official record of board actions and decisions.

**WE RECOMMEND** the Board of Aldermen:

- A. Update and codify the city's ordinances and ensure a complete set of ordinances is maintained. In addition, the city should consider establishing an index of all city ordinances passed and rescinded.
- B. Establish formal written policies and procedures regarding public access to and/or copies of city records.
- C. Ensure all board minutes are properly signed, to attest to their accuracy.
- D. Ensure complete and accurate minutes of the board's meetings are maintained, including all significant discussions, actions and votes taken, and information required by state law.

## **AUDITEE'S RESPONSE**

- A. *The board agrees with the recommendation. The board indicated the city has already begun updating the ordinances; however, the project will take time to complete and the board cannot commit to an implementation date at this time.*
- B&C. *The board agrees and will implement these recommendations immediately.*
- D. *The board agrees and will begin reviewing immediately to ensure board meeting minutes are complete.*

|   |
|---|
| <b>7. Budgets and Financial Reporting</b> |
|---|

- A. The budgets for the years ended June 30, 2001, 2000, and 1999 do not include a budget message or general budget summaries describing the important features of the budgets and major changes from the preceding years. The budgets combine receipts and disbursements of all funds into one budget rather than presenting a separate budget for each fund. They also do not include a statement of estimated or actual revenues and expenditures for the two preceding budget years, or the beginning and estimated ending available resources. In addition, the Board of Aldermen does not periodically compare actual revenues and expenditures to the budgeted amounts. While the board receives a monthly report of actual receipts and disbursements, this report does not include a comparison to amounts budgeted.

Sections 67.010, RSMo 1994, requires each political subdivision of the state to prepare an annual budget with a budget message and comparisons of actual revenues and expenditures for the two preceding fiscal years. Prior year comparisons of actual revenues and expenditures need to be included to help ensure accurate amounts are budgeted. A budget should include appropriate revenue and expenditure estimations by classification, and include the beginning available resources and reasonable estimates of the ending available resources. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area.

- B. During the years ended June 30, 2000 and 1999, the city approved expenditures in excess of budgeted amounts totaling \$21,819 and \$39,743, respectively. For the year ended June 30, 1999, expenditures exceeded the budgeted amounts largely due to the purchase of the new city hall, which cost \$30,000. The city did not prepare an amended budget, nor did the city adopt a resolution authorizing additional expenditures.

Section 67.040, RSMo 1994, requires political subdivisions to keep expenditures within amounts budgeted. If there are valid reasons which necessitate excess

expenditures, a resolution should be adopted by the governing body setting forth the amount of the budget increase and the facts and reasons for such increases.

- C. A formal maintenance plan for city streets has not been prepared annually. A maintenance plan should be prepared in conjunction with the annual budget and include a description of the streets to be worked on, the type of work to be performed, a cost estimate, the dates such work could begin, and any other relevant information. The plan should be included in the budget message and be approved by the board. In addition, a public hearing should be held to obtain input from the city residents. During the years ended June 30, 2000 and 1999, street repair expenditures totaled \$7,143 and \$6,433, respectively.

A formal maintenance plan would serve as a useful management tool and provide greater input into the overall budgeting process. Such a plan provides a means to continually and more effectively monitor and evaluate the progress made in the repair and maintenance of streets throughout the year.

- D. While the city published semi-annual financial statements, the financial statements only presented the beginning cash balance, total receipts, total disbursements, and ending cash balance of each fund presented. The various revenue sources and disbursement categories were not shown.

Section 79.160, RSMo 1994, requires the board of aldermen to prepare and publish semi-annually, a full and detailed account of the receipts, disbursements, and indebtedness of the city. Complete financial statements are necessary to keep the citizens informed of the financial activity and condition of the city.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare budgets that contain all information as required by state law. In addition, the board should periodically compare actual revenues and expenditures with budgeted amounts to monitor city finances and ensure actual expenditures do not exceed budgeted amounts.
- B. Ensure actual expenditures do not exceed budgeted amounts. If circumstances require expenditures in excess of amounts budgeted, a formal resolution should be adopted authorizing the additional expenditures and documenting the reasons for such before they are incurred.
- C. Prepare a formal maintenance plan for city streets at the beginning of the year and periodically update the plan throughout the year. In addition, the board should review the progress made in the repair and maintenance of streets to make appropriate decisions on future projects.
- D. Publish complete, detailed semi-annual financial statements of all of the financial activity and indebtedness of the city.

## **AUDITEE'S RESPONSE**

- A. *The board agrees and will ensure budgets are complete, beginning with the fiscal year 2002 budget. In addition, the board indicated it will begin immediately to monitor city finances more closely.*
- B. *The board agrees and will begin immediately to monitor the budgeted and actual expenditures and will prepare budget amendments when necessary.*
- C. *The board agrees that a maintenance plan is a good tool and should be done, as long as the plan remains flexible. The board indicated it will begin working on its street maintenance plan between now and Spring 2001.*
- D. *The board agrees and will implement the recommendation when the next semi-annual financial statements are prepared.*

|   |
|---|
| <b>8. Personnel Policies and Procedures</b> |
|---|

- A. We noted the following concerns regarding compensation to employees:

- 1) The city paid the maintenance employee an additional \$200 on July 16, 1999. Also, while the former police officer resigned effective July 2, 1999, the city paid him \$200 on July 16, 1999 and on July 30, 1999. The Mayor indicated these were partial retroactive payments of raises which had been previously approved a year earlier. There is no documentation of additional hours worked by these employees to support the payments and they were apparently additional payments for services previously rendered. Therefore, these payments appear to be bonuses. In addition, all city employees received a \$50 and \$25 Christmas bonus in December 1999 and 1998, respectively.

The bonuses appear to represent additional compensation for services previously rendered and violate Article III, Section 39 of the Missouri Constitution. Attorney General's Opinion No. 72, 1955 to Pray, states, "...a government agency deriving its power and authority from the Constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

- 2) In December 1998, a city employee received his payroll check one week in advance of the date earned. Also, in June 1998, the city loaned the former police officer \$500 to be repaid weekly in \$25 installment payments. The amount was deducted from the employee's weekly payroll check until the loan was paid in full on October 28, 1998.

Such payments appear to violate Article VI, Section 23 of the Missouri Constitution which prohibits any political subdivision of the state from granting or lending money to an individual. In addition, it is not prudent for a city to compensate employees in advance. Doing so could result in the city paying an individual for services not performed.

- B. The city has not adopted an annual ordinance to establish the compensation or the term of office of the City Clerk and other employees. The budgets also do not provide a detail of salaries paid to each appointed official and employee. During our audit, the new City Clerk received a \$50 per week raise effective June 1, 2000. Also, in March 2000, the board approved free water, sewer, and trash services for all full-time employees, as a benefit to city employees, but did not adopt an ordinance to establish the additional compensation.

Sections 79.270 through 79.320, RSMo 1994, require that duties, powers, compensation, and the term of office of city officials and employees be established by ordinance. Also, compensation rates set by ordinance, in addition to meeting statutory requirements, document the approved amounts to be paid and reduce potential misunderstandings regarding the amount of pay each city official and employee is to receive. In addition, ordinance hearings provide for public input and information concerning the salaries and benefits paid.

- C. The city has three full-time employees and three part-time employees. Full-time employees do not prepare time sheets. As a result, there is no documentation to support the city's allocation of payroll expenditures to the various funds. Time sheets are necessary to document hours actually worked, substantiate payroll expenditures and the allocation of payroll costs to the various funds, and to provide the board with a method to monitor hours worked.
- D. Records of vacation and sick leave earned and used are not maintained. City ordinance requires the City Clerk to maintain records of vacation leave allowance and use. Adequate documentation of leave time earned and used is necessary to ensure that leave time is not abused.

**WE RECOMMEND** the Board of Aldermen:

- A.1. Refrain from paying bonuses or additional compensation for services previously rendered.
- 2. Discontinue the practice of paying employees in advance or making loans to employees.
- B. Establish by ordinance the salaries or pay rates and applicable terms of office for all officials and employees, and ensure changes to these officials' compensation do not occur during a term of office, in accordance with state law.

- C. Require time sheets be completed for each employee showing actual hours worked by function or activity as a basis to properly allocate payroll costs to the appropriate funds and to monitor hours worked.
- D. Require the City Clerk to maintain records of vacation and sick leave.

### **AUDITEE'S RESPONSE**

- A.1. *The board agrees with the recommendation but disagrees that the payments in July 1999 were bonuses. It indicated these were retroactive payments for raises previously agreed upon. The board indicated it will not pay any bonuses or make retroactive raises in the future.*
- A.2. *The board agrees with the recommendation and indicated this practice has not happened again since December 1998.*
- B&C. *The board agrees and will address these recommendations immediately.*
- D. *The board agrees and will develop leave records as soon as possible.*

|           |                            |
|-----------|----------------------------|
| <b>9.</b> | <b>Restricted Revenues</b> |
|-----------|----------------------------|

Procedures have not been established to ensure expenditures are properly allocated among the various funds benefiting from the expenditures and to ensure restricted revenues are expended only for their intended purposes.

The police officer's salary was primarily paid from the General Fund until April 2000 when the city began paying it out of the Motor Fuel Fund. The City Clerk, assistant City Clerk, and maintenance employees' salaries are paid from the General Fund, Water Fund, Sewer Fund, Solid Waste Fund and the Motor Fuel Fund. While the clerks and maintenance employees are responsible for various duties related to city utilities such as collection and billing, reading water meters, and collecting trash, the salaries are not allocated based on work performed. The former City Clerk indicated expenses are paid from the funds that have available cash balances. As noted in MAR No.8 C, time sheets are not prepared by all employees for use as a basis to allocate payroll costs and shared expenses.

Of the \$34,000 in net salaries paid to the City Clerk, assistant City Clerk, and maintenance employees for the fiscal year ended June 30, 2000, approximately \$4,697 was paid from the Motor Fuel Fund even though these employees did little or no work on street projects. However, \$7,755 of the police officer's net salary was paid from the General Fund, but would have been an allowable expenditure from the Motor Fuel Fund. The Missouri Constitution, Article IV, Section 30(a) (2), requires the city to use those funds only for construction, reconstruction, maintenance, repair, policing, signing, lighting, and cleaning roads and streets. Documentation to support the number of hours

worked related to streets, is necessary to ensure the city is using motor fuel related receipts to pay only expenses authorized by state law.

It is essential that the city properly allocate expenses to the various funds. In January 1999, the board authorized an increase in trash rates. Allocation of expenses is necessary for the city to ensure the water, sewer and trash rates are sufficient to cover the cost of providing the service without generating profits to subsidize other city services. Furthermore, the uses of certain funds, such as motor vehicle-related revenues, are limited by state law for specified purposes. Therefore, documentation and proper allocation of expenses is useful for both management and compliance purposes.

**WE RECOMMEND** the Board of Aldermen ensure all expenditures are properly allocated to the various funds and the allocations are supported by adequate documentation.

### **AUDITEE'S RESPONSE**

*The board agrees and will begin implementing the recommendation immediately; however, it indicated that developing the methodology for allocating expenditures to the various funds will take some time and it cannot commit to when this will be fully implemented.*

|                                |
|--------------------------------|
| <b>10. City-Owned Vehicles</b> |
|--------------------------------|

The city has one patrol car, a trash truck, and two pickup trucks. During our review of the city's policies and procedures for protecting the city's interest in these vehicles, we noted the following concerns:

- A. Logs which document vehicle usage are not adequately maintained. The City Clerk began maintaining a gasoline usage log in June 2000. While the log documents the date, the vehicle, and number of gallons pumped from the city's gas pump, the vehicle's odometer reading is not documented. The city's maintenance employee fueled his personal vehicle (which he began using for city business after the city's maintenance truck broke down in April 2000) ten times in twenty days totaling approximately 134 gallons of gasoline, and the police officer fueled the patrol car eleven times during the same period totaling 123 gallons of gasoline. Odometer readings would help ensure fuel is used in the identified vehicle and would allow for the calculation of fuel efficiency to evaluate the reasonableness of fuel usage.

Logs are necessary to document appropriate use of the vehicles and to support gasoline expenditures. The logs should include the purpose and destination of each trip, the daily beginning and ending odometer readings, and the operation and maintenance costs. These logs should be reviewed by a supervisor to ensure all mileage is recorded, the vehicles are being properly utilized, and to help

identify vehicles which should be replaced. Information on the log should be reconciled to gasoline usage/purchases and other maintenance charges.

- B. The city owned a 1975 pickup truck which broke down and was going to require significant repairs. Rather than repair the truck it was sold to a sole bidder in April 1999. In March 1999, the city purchased a 1987 pickup truck for \$3,000 to replace the 1975 truck. Over the following eight months, the city spent approximately \$800 in repairs and discussed the need for an additional \$3,000 in repairs to the truck. In January 2000, the city sold the 1987 truck for \$1,300 and in February 2000 purchased a 1986 pickup truck for \$1,300. In April 2000, the engine on the 1986 truck quit, with repair costs estimated at \$3,800. Our review of the purchase and sale of these vehicles disclosed several problems as follows:

- 1) Based on our review of the board meeting minutes, the sole bid for the 1975 truck was from the maintenance employee. The minutes documented the approval of the sale of the truck to the employee for \$500. While title was transferred to the employee, the city was never paid for the truck. According to the Mayor, the truck was instead given to the employee in lieu of the rest of a retroactive raise he was to receive in July 1999.

The board meeting minutes did not document the board's discussion or approval of giving the truck to the maintenance employee. As noted in MAR No. 8, such a gift or bonus would be prohibited by Article VI, Section 23 of the Missouri Constitution.

- 2) In January 2000, the city sold the 1987 truck to the Mayor's father-in-law without publicizing or soliciting bids. The Mayor indicated he was not involved in the decision to sell the truck to his father-in-law. However, when we questioned two of the current aldermen who served on the board at the time about the sale, neither of them could remember any of the details of the sale. The board meeting minutes do not document the board's discussion or approval of the sale of the truck, thus it is not clear who authorized the transaction.

The board should publicize or solicit bids to ensure the best price is obtained for property sold. Documentation of bids received should be maintained.

Discussions and decisions concerning transactions where potential conflicts of interest exist should be completely documented so that the public has assurance that no city official or city employee has benefited improperly. In addition, the board should consider establishing a policy which addresses these types of situations and provides a code of conduct for city officials.

- 3) The city trash truck, police car, and maintenance trucks purchased in the past few years have required significant repairs. When the 1986 truck stopped working in April 2000, the maintenance employee began using the 1975 truck for city business that the city had previously given him. The city has purchased a number of pieces of used equipment which required significant repairs within a short time after purchase. The Mayor and former City Clerk indicated that the city's lack of funds prevents the city from purchasing new equipment. However, the city has not prepared a feasible plan for replacing its vehicles or equipment. With adequate planning and a conscientious effort to build up the city's reserves for equipment replacement, the city would be in a better position to purchase better quality equipment.

**WE RECOMMEND** the Board of Aldermen:

- A. Maintain complete and accurate usage logs for each vehicle. The logs should be reviewed by a supervisor or the board periodically for completeness and reasonableness.
- B.1.  
&2. Avoid apparent conflicts of interest and ensure board meeting minutes clearly document discussions and decisions concerning transactions where potential conflicts of interest exist. In addition, the board should consider adopting a code of conduct for city officials and refrain from granting anything of value to city employees.
- B.3. Establish a feasible plan for replacing the city's vehicles/equipment.

**AUDITEE'S RESPONSE**

- A. *The board agrees and will implement the recommendation immediately. It indicated that it has already begun to monitor the usage records and will continue to do so. It indicated it is also in the process of replacing the city truck so it is not necessary for the employee to use his private vehicle.*
- B.1.  
&2. *The board agrees with the recommendation and that it is important to avoid actual conflicts as well as the appearance of conflicts of interest. The board will ensure in the future that all discussions are fully documented in the board meeting minutes.*
- B.3. *The board agrees that planning is necessary, but feels that given the city's current financial condition, full implementation may be out of the board's control. It indicated that it will continue to work on strengthening the city's financial condition.*

This report is intended for the management of the city of Bell City and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger B. Wilson, Governor  
and  
Roy C. Wilson, M.D., Director  
Department of Mental Health  
and  
Mental Health Commission  
and  
Richard Scotten, Executive Director  
Southwest Missouri Psychiatric Rehabilitation Center  
El Dorado Springs, Missouri 65744

We have audited the Department of Mental Health, Southwest Missouri Psychiatric Rehabilitation Center. The scope of this audit included, but was not necessarily limited to, the years ended June 30, 1999 and 1998. The objectives of this audit were to:

1. Review certain management practices and financial information for compliance with applicable constitutional provisions, statutes, regulations, and administrative rules.
2. Review the efficiency and effectiveness of certain management practices.
3. Review certain revenues received and expenditures made by the Southwest Missouri Psychiatric Rehabilitation Center.

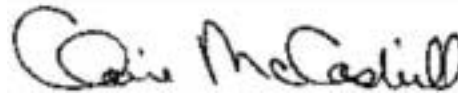

Our audit was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the facility's revenues, expenditures, rules, regulations, and other pertinent procedures and documents, and interviewed facility personnel.

As part of our audit, we assessed the facility's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the facility's management and was not subjected to the procedures applied in the audit of the Department of Mental Health, Southwest Missouri Psychiatric Rehabilitation Center.

The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Mental Health, Southwest Missouri Psychiatric Rehabilitation Center.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

February 9, 2000 (fieldwork completion date)

## MANAGEMENT ADVISORY REPORT SECTION

DEPARTMENT OF MENTAL HEALTH  
SOUTHWEST MISSOURI PSYCHIATRIC REHABILITATION CENTER  
SUMMARY OF FINDINGS

1. El Dorado Springs Facility (pages 7-8)

The Department of Mental Health (DMH) and the Southwest Missouri Psychiatric Rehabilitation Center (SWMPRC) did not adequately plan or monitor the design of the new facility. As a result, additional costs were incurred and potential reimbursements for client care may have been lost.

2. Expenditures and Related Items (pages 8-10)

The facility allowed other DMH facilities to expend funds from SWMPRC's appropriations. The facility also purchased property items in advance of need and did not adequately assess the need for some cellular phones and pagers.

3. Supported Community Placement Operations (pages 10-12)

Several problems were noted during our review of client funds maintained by community placement facilities.

4. Fixed Assets (pages 12-13)

A physical inventory of fixed assets is not conducted on an annual basis and the physical inventory is not performed by an individual independent of the record-keeping duties. Fixed assets purchased were not always recorded on the fixed asset listing. Written authorization is not always required for all property dispositions and the method of disposition is not adequately documented. Property tags are not assigned and placed on the items upon the receipt of fixed assets.

5. Vehicle Usage (pages 13-14)

The facility needs to reevaluate the use of some state-owned vehicles. Vehicle logs are not complete or properly monitored.

6. Inventory Records and Procedures (pages 14-15)

The facility has not established adequate inventory records and procedures for certain inventory supplies.

7. Receipt Controls and Procedures (pages 15-16)

Controls over receipts are in need of improvement. The method of payment is not recorded on the receipt slips and checks issued are not always signed by two of the designated cosigners.

8. Employee Meals (pages 16-17)

The facility needs to review the practice of providing meals to employees.

DEPARTMENT OF MENTAL HEALTH  
SOUTHWEST MISSOURI PSYCHIATRIC REHABILITATION CENTER  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S FINDINGS

|           |                                   |
|-----------|-----------------------------------|
| <b>1.</b> | <b>El Dorado Springs Facility</b> |
|-----------|-----------------------------------|

As a result of a legislative action in December 1991, much of the state owned property from the Nevada State Hospital was transferred to the city of Nevada when the state hospital was closed. After the transfer of this property to the city of Nevada, the state continued to use (rent free) part of this property to operate the Southwest Missouri Psychiatric Rehabilitation Center (SWMPRC), formerly Southwest Missouri Mental Health Center. In July 1994, the city of Nevada started charging the state rent for the space they had occupied since the closure of the Nevada State Hospital. From July 1994 until October 1997, the state continued to use this space and paid \$246,167 in rent to the city of Nevada. SWMPRC continues to maintain some administrative offices in the city of Nevada.

In May 1995, a 15-year lease contract was awarded for the construction of a new facility for the SWMPRC. This building was designed to provide office space and a 12 bed residential treatment facility in El Dorado Springs. Before construction began on the new facility, the original plans were substantially modified to provide for administrative offices and a 24 bed residential treatment facility. Our review disclosed that the Department of Mental Health (DMH) and SWMPRC did not adequately plan or monitor the design of this new facility to meet Medicaid standards, and did not ensure that certain safety features were included. Furthermore, since neither the DMH nor the SWMPRC indicated compliance with the Medicaid standards was a requirement, the Office of Administration (OA) did not specify compliance with such standards when bidding the project. These design deficiencies have resulted in potential lost client revenue and additional construction and rental costs for the state.

For DMH facilities to receive Medicaid reimbursements, the facilities must meet minimum federal standards relating to room size, physical facilities, programming, staffing, etc. The process by which it is determined whether federal standards are met is called certification. Beds are "certified" when they have been determined to meet these standards. The client rooms at SWMPRC do not meet specific size requirements and, therefore, are not certified. As a result, the new El Dorado Springs facility is unable to seek reimbursement from Medicaid for those clients that would otherwise qualify. It should be noted that certain private insurance companies also require Medicaid standards be met to qualify for reimbursement. The amount of potential reimbursement revenue that has been lost by the state could not be determined.

The SWMPRC's 15-year lease contract for the facility in El Dorado Springs commenced April 1997. Terms of the contract required a one time payment of \$31,319 and annual rent of

\$106,628. However, before the SWMPRC could move into the new facility, several changes had to be made to the new building. The state paid \$101,038 to the lessor to make needed improvements related to the types of clients to be served by the facility. These modifications included items such as changes to shower and sprinkler heads, alterations to shower bases, and changes to light switches in some common areas of the building. It appeared these modifications to the new facility were for items that should have been included in the original proposal. Furthermore, while these modifications were being made, the SWMPRC paid \$36,222 in rent payments to the city of Nevada to continue to use their existing facility while also paying \$65,997 in lease payments for the new building for the months April through October 1997.

To protect the interests and resources of the state, construction and acquisition of facilities must be adequately planned and monitored. Inadequate planning and monitoring of the new SWMPRC has resulted in the state incurring additional construction costs of more than \$101,000, additional rental costs of at least \$36,222, and the inability to seek reimbursement for client care from Medicaid for some clients that would otherwise qualify for benefits.

**WE RECOMMEND** the DMH and SWMPRC ensure all future projects are adequately planned and monitored. Furthermore, considering the length of the SWMPRC lease, the department should evaluate all available options, including whether it would be cost beneficial to pursue a different facility for the SWMPRC that would meet Medicaid standards.

**AUDITEE'S RESPONSE:**

*We agree that all future projects should be adequately planned and monitored as has been done in the past. The Department has and will continue to plan and monitor all projects. This planning and monitoring process is evident in that over the last several years multiple new facilities have been built and are in operation serving hundreds of individuals statewide. However, we will reevaluate the current lease for the facility in relation to the program/clients being served. Any reimbursement for services may be limited as the role and responsibility of this facility is as a "safety net" for individuals in the region after they had exhausted all other resources. It was anticipated that a client with any third party insurance/resource would be referred to the private sector for services. Additionally, individuals between the ages of 21 to 65 are not eligible for their services to be covered by Medicaid while in an institute for mental disease.*

|  |
|--|
| <b>2. Expenditures and Related Items</b> |
|--|

- A. During the year ended June 30, 1999, the SWMPRC received pharmacy medication credits resulting from the pharmacy not properly billing Medicaid for eligible prescriptions for the year ended June 30, 1998. The error was discovered and the pharmacy began applying credits to the year ended June 30, 1999 expenditures. As a result of these credits being applied to fiscal year 1999 medication costs, the facility

estimated approximately \$217,700 of its fiscal year 1999 appropriations would not be spent and would lapse at year end. Because of these anticipated unspent appropriations, the DMH directed the SWMPRC to pay costs of the Fulton State Hospital from its anticipated unspent fiscal year 1999 appropriations.

Our review found that more than \$161,200 was expended from the SWMPRC's appropriations for operating costs of the Fulton State Hospital. These expenditures were represented and processed as SWMPRC's expenditures. As a result, the SWMPRC's operating costs are overstated and the DMH circumvented the legislative intent by allowing Fulton State Hospital to inappropriately charge expenditures to SWMPRC's appropriation. Section 33.040, RSMo 1994, provides that expenditures shall be within the purpose of the appropriation, and Section 33.170, RSMo 1994, states that no claim shall be paid unless the money for such claim has been previously appropriated by law. Furthermore, the SWMPRC falsely certified that the amounts presented for payment were proper and valid charges against the fund and the SWMPRC's appropriations.

- B. The facility purchased \$25,686 of various assets (bedroom and living furniture and various recreational items) for a proposed expansion of the El Dorado Springs Facility in June 1999. The expansion (an amendment to the 15 year lease) was not approved until October 1999 by the OA-Division of Facilities Management, and the bids for the building project have not yet been awarded. Therefore, the items purchased for the expansion remain idle in storage. In addition, several of the items purchased (television, stereo, and VCR) were stolen from the storage facility in January 2000.

Buying items before they are needed is an unnecessary use of state funds. In addition, failure to utilize all available property increases the possibility that unused assets will be lost, stolen, or otherwise misused.

- C. The facility expended \$6,017 and \$10,576 for cellular phone charges for the year ended June 30, 1999 and 1998, respectively. Thirteen phones are maintained for various employees including the executive director, personnel director, unit manager, the business office, and the residential care department. The executive director and unit manager both maintain two cellular phones and a pager which resulted in costs to the facility of \$4,439 during the two years ended June 30, 1999 (at least \$2,207 in unnecessary or excessive costs). It does not appear reasonable for these two individuals to each have two cellular phones and a pager.

**WE RECOMMEND** the facility:

- A. Along with the DMH, discontinue the practice of allowing other DMH facilities to expend funds from SWMPRC's appropriations.

- B. Cease purchasing property items in advance of the need.
- C. Review and assess the need for the cellular phones utilized by SWMPRC personnel.

**AUDITEE'S RESPONSE:**

- A. *We understand the State Auditor's concern and agree with the recommendation. However, throughout our system the increasing cost of clinically appropriate medications have impacted on the ability to maintain desirable levels of care. Over the past few years the Governor and Legislature have recognized the need in this area and have been responding with additional funding dedicated for drugs, especially the newer generations of psychotropic medication. Their efforts are making strides in alleviating much of the impact of medication cost increases. However, in the Fiscal Year 1999 there were huge pressures on facilities operating budgets resulting mainly from medication cost increases. For instance, Fulton State Hospitals medication usage increased by over 63% (\$600,000+) between 1996 and 1999. The new funding received prior to 1999 did not cover the increased cost the system was experiencing. Southwest Missouri Psychiatric Rehabilitation Center's medication cost in FY 1999 was materially less than in prior years due to one-time credits received from their supplier. This one-time savings in medication cost at Southwest was used to assist Fulton with their medication costs.*
- B. *Southwest Missouri Psychiatric Rehabilitation Center does not normally purchase items in advance of the need. Correspondence from the Office of Administrations Division of Facilities Management regarding "Acceptance of the proposal" was dated November 2, 1998 and the "Notice of Award to Amend" lease was dated December 15, 1998. These dates were prior to the June 1999 purchases. The first bid for construction was not successful, which caused an unanticipated delay. It should be noted the bidding process was conducted by the city.*
- C. *We have reviewed the number of cellular phones and pagers currently in use and have eliminated one cellular phone and one pager by effective September 1, 2000. We feel the remaining cellular phones and pagers are essential to our operation based in extreme rural Southwest Missouri. Our staff are responsible for the life, safety, and well being of our clients and must be accessible.*

|  |
|--|
| <b>3. Supported Community Placement Operations</b> |
|--|

Through Community Placement (CP), the SWMPRC purchases residential care in community-based facilities for clients who would otherwise require institutionalization. These placement facilities include residential care centers, group homes, foster homes, supervised apartments, and nursing homes providing intermediate or skilled nursing care. The SWMPRC and the placement facility enter into a master agreement which is a contract specifically identifying all services to be performed by both parties.

As a part of our review of the CP Program, we visited six placement facilities. A review of client funds and their property being maintained at those facilities disclosed the following concerns:

- A. Three of the CP facilities visited maintained client funds in the CP facility's operating account. This procedure of commingling the client's personal money with the facility's operating funds is a violation of the contract between the SWMPRC and the placement facility. Furthermore, it increases the likelihood that client monies are not being adequately safeguarded or accounted for properly.
- B. At two of the CP facilities, clients were not always required to initial their ledger sheets when obtaining their personal allowances in the form of cash. Not only is this in violation of the master agreement, this practice increases the risk of misuse of client funds.
- C. Three of the CP facilities reviewed did not always retain invoices or vouchers to support the disbursements made from client funds. The master agreement requires adequate documentation to support the expenditure of client funds. Without original invoices or vouchers, it is not possible to verify that clients' monies are spent only for their benefit.
- D. At one of the six facilities, client purchases exceeding \$100 were not approved by SWMPRC prior to the transaction, as required by the master agreement. All purchases exceeding \$100 should be approved prior to the purchase to ensure they are necessary and for the direct benefit of the client for whom the purchase is being made.
- E. Three CP facilities visited allowed some client accounts to maintain a negative balance. The noted deficits were as large as \$127 in September 1999. The master agreement between the SWMPRC and the placement facilities prohibits using monies of one client to defray expenses of another. Allowing some clients to have negative balances results in other clients' monies being used to cover their expenses.

**WE RECOMMEND** the SWMPRC require the CP facilities to:

- A. Cease commingling client funds with the general operating funds of the placement facility.
- B. Require the clients to initial their ledger sheets when obtaining cash.
- C. Retain adequate documentation, such as original invoices, to support expenditures made from client funds.
- D. Obtain prior approval from the SWMPRC for client purchases that exceed \$100.

- E. Monitor the client accounts to ensure negative account balances do not occur.

**AUDITEE'S RESPONSE:**

*A-E. We concur with the recommendations and will strengthen existing monitoring procedures to ensure compliance with contract provisions.*

|                        |
|------------------------|
| <b>4. Fixed Assets</b> |
|------------------------|

Our review of the fixed assets and related record-keeping procedures indicated the following areas where improvements are needed:

- A. A physical inventory is not performed annually. One physical inventory was performed during the two years ending June 30, 1999; however, the date of the physical inventory was not documented, and the physical inventory counts were not reconciled to the perpetual inventory records. In addition, the physical inventory was performed by the same person who was responsible for maintaining the property records.

To provide assurance that all property exists and can be located, the facility should ensure the physical inventories are fully completed and reconciled to the perpetual inventory records. The physical inventory should be performed by someone other than the individual who maintains the fixed asset records to ensure adequate control over fixed assets.

- B. Fixed asset purchases and dispositions are not reconciled to the fixed asset listings. We noted the facility failed to record purchases of furniture items totaling \$34,874, a vehicle costing \$17,891, and a water softener filtration system costing \$4,200. In addition, dispositions are not recorded on a timely basis.

Adequate fixed asset records are necessary to provide better controls over state-owned property and provide a basis for proper financial reporting. Reconciliations are necessary to ensure all property items purchased or disposed are being properly recorded and controlled.

- C. Supervisory approval is not required for any dispositions to the fixed asset records. In addition, the method of disposition is not documented. The lack of adequate procedures for dispositions recorded to the fixed asset records diminishes the control over state-owned property.
- D. Property control tags are not always affixed to the items immediately upon receipt. Property items purchased after July 1, 1999, had not been tagged. Property control

tags help identify property and safeguard the property from loss.

**WE RECOMMEND** the facility:

- A. Conduct a physical inventory of fixed assets on an annual basis and ensure the physical inventory of fixed asset items is performed by an individual independent of the record-keeping duties.
- B. Include all fixed asset purchases and dispositions on the property records and periodically reconcile purchases and dispositions to the records to ensure all items purchased and disposed of are properly and promptly recorded.
- C. Ensure written authorization is required and maintained for all property dispositions, and the method of disposition is adequately documented.
- D. Assign and affix property tags to fixed assets upon receipt.

**AUDITEE'S RESPONSE:**

*A-D. We concur with the recommendations and will continue to comply with applicable regulations. Annual physical inventories were taken. However, the DMH Property Control System was not available to us for use as of July 1999 as it was closed pending conversion to SAM II. We will insure this process is formalized in the future.*

**5.**

**Vehicle Usage**

At June 30, 1999, the facility had eight state-owned vehicles, consisting of three vans, three passenger cars, one sport utility vehicle, and a pickup truck.

- A. The facility allows the Executive Director and the Unit Manager to use a state-owned vehicle to commute from their homes to the El Dorado Springs Office. The Executive Director commutes from his home in Walker to El Dorado Springs, or approximately a 50-mile daily round trip. Total mileage driven by this employee in the state-owned vehicle for commuting purposes was approximately 7,800 out of the 12,446 total miles (63 percent) driven during the year ending June 30, 1999. The Unit Manager commutes from her home in Foster, or approximately a 100-mile daily round trip. Total mileage driven by this employee in the state-owned vehicle for commuting purposes was approximately 23,100 out of the 25,809 total miles (90 percent) during the year ending June 30, 1999.

We also noted that the facility allows the Assistant Center Director to use a state vehicle to drive from the Nevada facility to the El Dorado Springs facility. The facility justifies this by indicating the Assistant Center Director picks up the interoffice mail. This employee resides in Nevada, however, is officially domiciled

at the El Dorado Springs facility. This employee does not report any taxable fringe benefit for this usage of the state vehicle.

Considering the level of business miles driven, the vehicles used by the Executive Director and Unit Manager do not appear to be justified for business purposes. The facility should ensure that all state vehicles are appropriately used and justified for business purposes.

- B. Mileage logs maintained by the facility do not always indicate the purpose of the trips. Furthermore, there is no indication of any periodic reviews of the vehicle logs. Facility policy requires the purpose of the trip be recorded. Such documentation and reviews of the logs are necessary to determine if the vehicles are being used efficiently and only for official state business.

**WE RECOMMEND** the facility:

- A. Reevaluate the use and need for the abovementioned state-owned vehicles and ensure all vehicles are used appropriately and justified for business purposes.
- B. Ensure the purpose of trips is recorded on the vehicle logs and periodically review these logs to ensure the vehicles are being used efficiently and appropriately.

**AUDITEE'S RESPONSE:**

*A&B. We concur with the recommendations and have reviewed all vehicle assignments.*

|  |
|--|
| <b>6. Inventory Records and Procedures</b> |
|--|

- A. During December 1997, the SWMPRC investigated an employee for alleged stealing from the facility's general, food and medical inventory supplies. The facility does not maintain any records relating to the general, medical, and food inventory supplies and therefore was not able to substantiate any shortages of supplies. Without adequate inventory records and procedures, the facility is not able to identify or investigate possible misuse or theft of inventory items.
- B. The facility contracts with a local pharmacy to provide all patient medications. The inventory records for prescription medications and narcotic drugs appear to provide adequate control. However, inventory records are not maintained for all nonprescription drugs. A perpetual inventory record for nonprescription drugs would provide controls over nonprescription drugs.

**WE RECOMMEND** the facility:

- A. Establish adequate inventory records and procedures for the inventory supplies.
- B. Evaluate the feasibility of establishing perpetual inventory records for all nonprescription drugs.

**AUDITEE'S RESPONSE:**

*A&B. Currently the facility does not maintain an inventory of either supplies or pharmacy items as we have gone to a "just in time" purchase system for supplies. This system does not require large warehousing of inventories. Additionally, we have contracted with a local pharmacy to provide medications.*

|   |
|---|
| <b>7. Receipt Controls and Procedures</b> |
|---|

- A. Moneys received at the El Dorado Springs facility are opened by two clerks in the executive office. These clerks forward the receipts to a clerk in the business office who prepares a generic receipt slip, restrictively endorses the checks, and places the receipts in a mail bag to be taken to the Nevada facility. When receipts are delivered to the Nevada facility, a clerk prepares a listing of the receipts and the deposit slip. The receipts are then given to the accountant who writes an official state receipt and enters the receipts on the computer. Each Monday, the accountant takes the receipts and related records back to El Dorado Springs where she reconciles her records with the business office clerk's receipt slips. Finally, the deposit is made by the accountant in El Dorado Springs.

We noted the following concerns related to the facility's procedures related to the handling of receipts:

- 1) An initial receipt record or mail log of receipts is not prepared immediately by the mail opener.
- 2) Receipts are handled by five individuals and transported back and forth from two facilities before being deposited. Receipts should be recorded and deposited daily or when accumulated receipts exceed \$100.
- 3) Checks are not restrictively endorsed immediately upon receipt.

To reduce the risk of loss or misuse of funds, checks should be restrictively endorsed and an initial record or mail log should be prepared for all receipts immediately upon receipt. Receipts should be recorded and deposited daily.

- B. The facility accepts cash, checks, and money orders. Receipt slips issued do not indicate the method of payment received. To ensure all receipts are deposited intact, the method of payments received should be indicated on the receipt slips. The composition of receipt slips issued should be reconciled to the composition of the bank deposits.
- C. Checks written from the petty cash funds require two signatures. We noted that checks are sometimes only signed by one of the cosigners. When this occurs, the accountant contacts the bank to notify them that the checks will only have one signature. This practice weakens administrative control and defeats the purpose of a dual signature system.

**WE RECOMMEND** the facility:

- A. Restrictively endorse all checks and prepare an initial record or mail log of all receipts immediately upon receipt. In addition, receipts should be recorded and deposited daily or when accumulated receipts exceed \$100.
- B. Record the method of payment on the receipt slip and reconcile daily the composition of cash and checks deposited to the receipt slips.
- C. Ensure checks are signed by two of the designated cosigners.

**AUDITEE'S RESPONSE:**

- A. *Checks are restrictively endorsed immediately after verification that Southwest Missouri Psychiatric Rehabilitation Center is the intended payee.*

*B&C. This is our policy.*

|                          |
|--------------------------|
| <b>8. Employee Meals</b> |
|--------------------------|

Section 630.186, RSMo 1994, states "Any purchase of food in any institution under the control of the department, other than the usual quantity purchased for the patients or residents thereof, to be used by or for anyone other than the patients or residents of such institution shall be charged directly to the individual responsible for such purchase."

The SWMPRC provides meals to employees at no charge as part of a "modeling" program. The purpose of the program, according to facility personnel, was to encourage employees to eat with the clients to set a good example. The program had an estimated cost of \$29,371 for the year ended June 30, 1999. The providing of free meals to employees appears to violate the abovementioned state law.

**WE RECOMMEND** the facility review the practice of providing free meals to employees.

**AUDITEE'S RESPONSE:**

*We do not consider the modeling program as providing free meals to employees rather it is a responsibility of the direct care staff to eat with the clients. The modeling program teaches the clients daily living skills and taking meals with the clients is only a part of the program. Tasks such as cleaning their rooms, proper hygiene, and laundry are other examples of the skills being taught through the modeling program. Only the direct care staff responsible for this program, eat with the clients.*

This report is intended for the information of the management of the Southwest Missouri Psychiatric Rehabilitation Center and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

## History, Organization, and Statistical Information

DEPARTMENT OF MENTAL HEALTH  
SOUTHWEST MISSOURI PSYCHIATRIC REHABILITATION CENTER  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

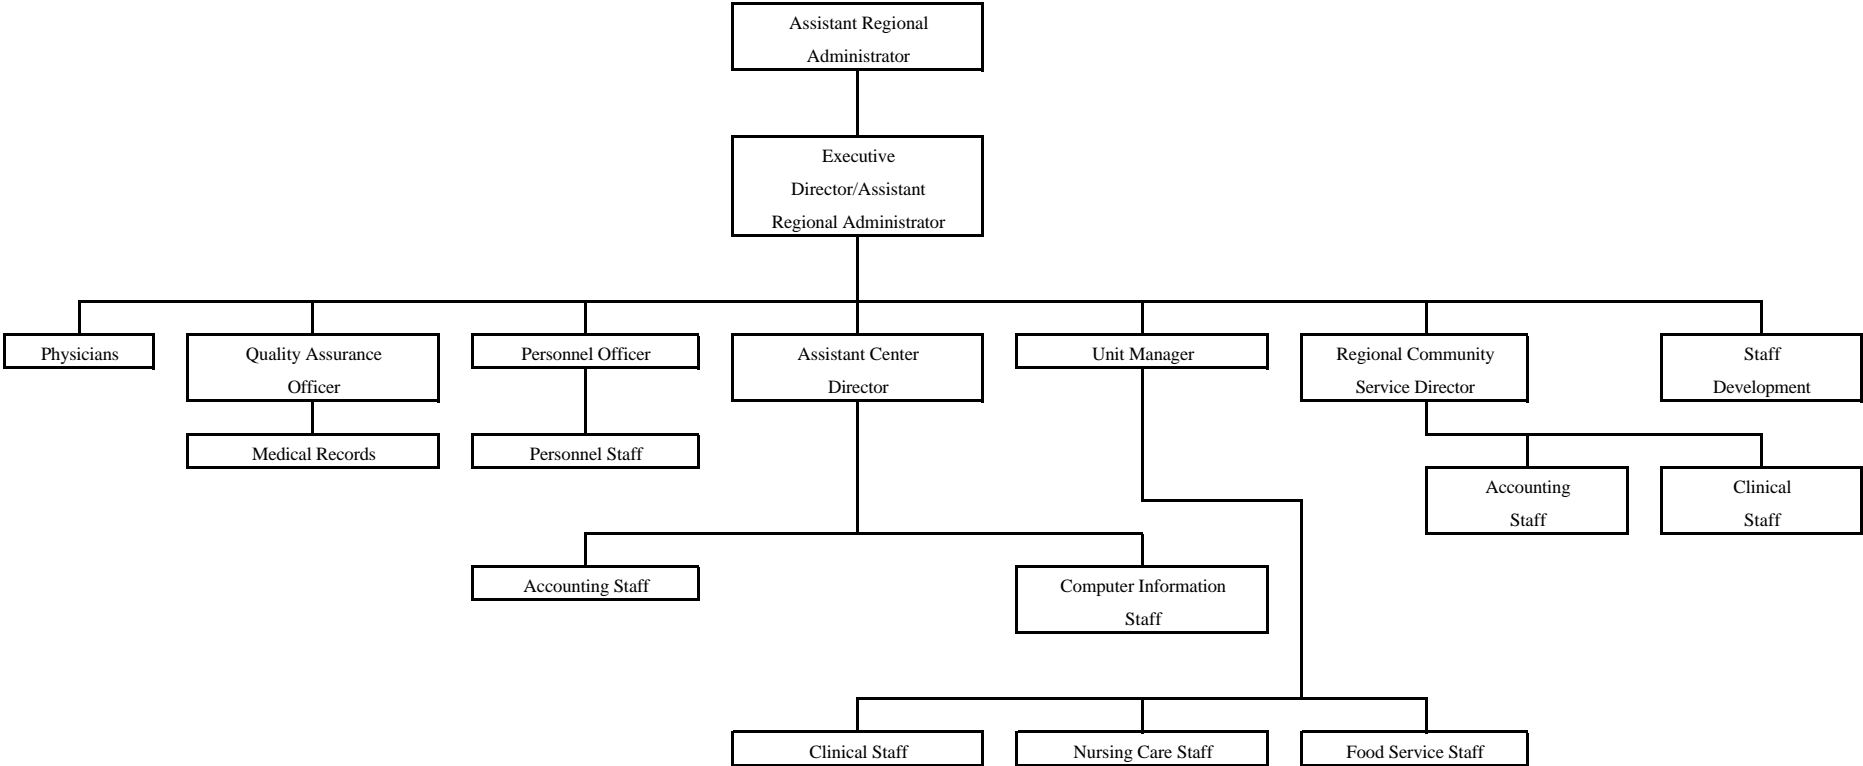

In December, 1997, Southwest Missouri Psychiatric Rehabilitation Center (SWMPRC) formerly Southwest Missouri Mental Health Center, moved into a new facility in El Dorado Springs from its previous location in Nevada. The 24-bed, adult psychiatric treatment facility provides both acute and long-term care. SWMPRC continues to maintain some administrative offices in the city of Nevada.

The facility accepts those persons in need of treatment for serious mental illness and mental disorders. The staff of the facility provide psychological rehabilitation to enable the clients to return to the community. Following discharge, community-based care and treatment is provided by staff of the Administrative Agents through the Purchase of Service Program, the decentralized community placement program, and the Medicaid-funded targeted case management and Community Psychiatric Rehabilitation Center programs. Treatment services are monitored by the staff of the southwest Regional Supported Community Living Program, located in Nevada.

The cost of care, both in-patient treatment and supported community living patients, is shared by the client, based on ability to pay, and the Department of Mental Health.

At June 30, 1999, the SWMPRC had 148 employees. These employees were assigned to various administration, medical and service functions. Richard Scotten serves as the Executive Director. Statistical data and an organization chart follows.

DEPARTMENT OF MENTAL HEALTH  
FULTON STATE HOSPITAL

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-111  
October 24, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

Fulton State Hospital, which is administered by the Department of Mental Health, spent nearly \$400,000 above its state budget during a two-year period. The hospital paid these excess costs with the subsequent year's appropriations and money authorized for a separate, unrelated rehabilitation center.

Our office noted this concern in an audit of Fulton State Hospital for the years ended June 30, 1999 and 1998. Our audit's findings focused in three main areas:

- Overspending appropriations
- Providing services to other entities
- Monitoring the Supported Community Living Program

**Hospital circumvents state budget process**

The hospital went around the state's appropriation process when it spent more than its budget and used its subsequent year's appropriations and Southwest Missouri Psychiatric Rehabilitation Center's appropriations to pay the excess. We recommend that the hospital either keep its expenditures within its budget or request additional funding. (See page 6)

**Hospital services to other entities do not cover costs**

The compensation the hospital receives does not cover the cost of the services it provides. The hospital does laundry for four other state mental health facilities, but only charges two facilities for the service and, in some cases, does not have a written contract for these services.

In addition, the hospital provides meal services and bed space to other entities, in exchange for food purchases from one entity and in-kind services from another entity. This practice of charging expenditures to other state appropriations violates the intent of the appropriation process and state law. We recommend the hospital create written contracts for all services it provides, create an internal service fund to account for these costs, and change budgeted funds so all facility costs are paid from the hospital's approved appropriations. (See page 7)

YELLOW SHEET

### **Supported Community Living program needs better monitoring**

The Supported Community Living Program, which serves about 775 clients in various housing setting, needs a better system to track deficiencies and client expenditures. Although the program's staff made monitoring visits, there were very few written reports documenting the visits. The reports also did not always adequately describe the specific deficiencies.

Quarterly reports from vendors on how clients spend their money are not always available, which does not ensure that the clients' funds are spent appropriately. In addition, the hospital is not always documenting the vendors' monitoring visits or reviewing the reports, which provides little assurance that the required visits occurred. We recommend timely monitoring reports, quarterly reports of clients' monies, and complete vendor monitor reports. (See page 9)

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Roger B. Wilson, Governor  
and  
Mental Health Commission  
and  
Roy C. Wilson, M.D., Director  
Department of Mental Health  
and  
Felix T. Vincenz, Ph.D., Superintendent  
Fulton State Hospital  
Fulton, Missouri 65251

We have audited the Department of Mental Health, Fulton State Hospital. The scope of this audit included, but was not necessarily limited to, the years ended June 30, 1999 and 1998. The objectives of this audit were to:

1. Review certain management practices and financial information for compliance with applicable constitutional provisions, statutes, regulations and administrative rules as we deemed necessary or appropriate in the circumstances.
2. Review the efficiency and effectiveness of certain management practices.
3. Review certain revenues received and certain expenditures made by the facility.

Our audit was conducted in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the facility's revenues, expenditures, contracts, applicable legal provisions, rules and regulations, and other pertinent procedures and documents, and interviewed facility and other state personnel.

As part of our audit, we assessed the facility's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

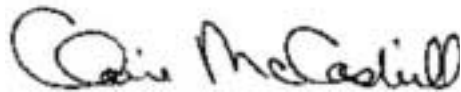

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional

procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the facility's management and Statewide Accounting for Missouri (SAM) system and was not subjected to the procedures applied in the audit of the Department of Mental Health, Fulton State Hospital.

The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Mental Health, Fulton State Hospital.

A handwritten signature in black ink, appearing to read "Claire McCaskill".

Claire McCaskill  
State Auditor

January 10, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## MANAGEMENT ADVISORY REPORT SECTION

DEPARTMENT OF MENTAL HEALTH  
FULTON STATE HOSPITAL  
SUMMARY OF FINDINGS

1. Overspending of Appropriations (pages 6-7)

For the fiscal years ended June 30, 1999 and 1998, the Fulton State Hospital (FSH) incurred obligations in excess of its appropriations from the General Revenue Fund-State by approximately \$192,000 and \$206,000, respectively. These costs were paid from the subsequent years' appropriations and from appropriations for the Southwest Missouri Psychiatric Rehabilitation Center.

2. Services Provided to Other Entities (pages 7-8)

The FSH provides laundry and other services to various entities. Written contracts have not been obtained for some services provided, and the compensation received for providing these services does not appear to cover the related costs.

3. Supported Community Living Program (pages 9-10)

A review of the Supported Community Living program noted missing or inadequate documentation in the following required reports: 1) quality assurance monitoring of client files, 2) vendor reports of how clients' money is spent, and 3) vendor monitoring reports.

DEPARTMENT OF MENTAL HEALTH  
FULTON STATE HOSPITAL  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

|           |                                       |
|-----------|---------------------------------------|
| <b>1.</b> | <b>Overspending of Appropriations</b> |
|-----------|---------------------------------------|

For the fiscal year ending June 30, 1999 and 1998, Fulton State Hospital (FSH) overspent its appropriation from the General Revenue Fund-State by approximately \$192,000 and \$206,000, respectively. The facility exceeded its appropriation each year because of obligations that were incurred which could not be paid from that fiscal year's appropriation. Of these amounts, \$31,000 and \$206,000 for fiscal years 1999 and 1998, respectively, were paid from FSH's subsequent years' appropriations. In addition, over \$161,000 of obligations incurred by FSH during the fiscal year ending June 30, 1999, were paid from appropriations for the Southwest Missouri Psychiatric Rehabilitation Center. FSH personnel indicated that expenditures are closely monitored and controlled, but the appropriation amounts are not sufficient to cover some necessary operating expenditures.

Article IV, Section 28, of the Constitution of Missouri provides that no obligation shall be incurred unless there is in the appropriation an unencumbered balance sufficient to pay it. By incurring obligations in excess of the appropriation, the facility has circumvented the appropriation process.

**WE RECOMMEND** the FSH closely monitor and review total operating expenditures and keep actual expenditures within the appropriated amounts. If this cannot be done, the FSH and the department should request additional funding.

**AUDITEE'S RESPONSE**

*We understand and agree with your concern. Relative to this question, the hospital's year-end purchase plans are based on three key principals:*

- 1. Routine operational needs - Expenditures noted by the audit team regarding items that are ordered in one fiscal year and paid for in the following year were for supplies, services and equipment that are essential to client care and daily hospital operations. Thus, the dates on which these items are ordered and subsequently paid relative to the end of one fiscal year and the beginning of the next are moot.*
- 2. Planning for change - The audit team also refers to planned inventory investments that enable the hospital to anticipate obligations in the upcoming fiscal year due to special needs or strategic demands so that it can operate within available resources. Examples include mandated training that may affect hundreds of staff, occupancy that exceeds the hospital's capacity, etc. While the audit report judges such actions to be outside the hospital's*

*legislative authority, FSH would suggest that the hospital is exercising effective fiscal and operations management to fulfill the mission of the facility and to maximize the impact of taxpayer funds for client care.*

3. *Regular payoff of compensatory and holiday time - The majority of the \$206,000 incurred in FY98 but paid from FY99 was for a year-end payoff of overtime and holiday pay not previously paid. This expenditure served two key purposes: (1) it avoided the incremental higher cost created by the cost-of-living increase that became effective in FY99; and, (2) provided payment for these balances to employees in as timely a manner as reliable projections of the hospital's financial position allowed.*

*Regarding the payment of FSH expenditures from the Southwest Missouri Psychiatric Rehabilitation appropriation, we understand the State Auditor's concern and agree with the recommendation. However, throughout our system the increasing cost of clinically appropriate medications have impacted on the ability to maintain desirable levels of care. Over the past few years the Governor and Legislature have recognized the need in this area and have been responding with additional funding dedicated for drugs, especially the newer generations of psychotropic medication. Their efforts are making strides in alleviating much of the impact of medication cost increases. However, in FY 99 there were huge pressures on facilities operating budgets resulting mainly from medication cost increases. For instance, FSH's medication usage increased by over 63 percent (\$600,000+) between 1996 and 1999. The new funding received prior to 1999 did not cover the increased cost the system was experiencing. Southwest Missouri Psychiatric Rehabilitation Center's medication cost in FY 1999 were materially less than in prior years due to one-time credits received from their supplier. This one-time savings in medication cost at Southwest was used to assist FSH with their medication costs.*

## **AUDITOR'S COMMENT**

The expenditures referred to above were both ordered and received in one fiscal year and paid from the following years' appropriations or from appropriations of a separate facility. Because of budgetary restrictions, we see no issues in this particular situation that are "moot". While we agree it is necessary for the FSH to plan for change, this does not justify spending beyond available resources, or spending resources specifically designated for other, unrelated facilities. Such a practice is clearly a circumvention of the appropriation process.

|   |
|---|
| <b>2. Services Provided to Other Entities</b> |
|---|

The FSH provides laundry services to four other state mental health facilities and two state correctional facilities. The FSH also provides meal services to one state correctional facility and the Callaway County Jail, and provides bed space to the state Department of Corrections. While there are written contracts for many of these agreements, there are no written contracts with two

of the mental health facilities for laundry services. Written contracts are necessary to designate the services and compensation to be provided and to help prevent misunderstandings.

Our review of these service agreements noted that the FSH may not be receiving adequate compensation to cover the costs of providing these services. For example, two of the four mental health facilities provide no compensation to the FSH for laundry services. For the other two facilities, the FSH is allowed to charge \$5,000 annually in operating expenses to one facility's appropriation, and to charge operating expenses to the other facility's appropriations equivalent to a fixed rate per pound of laundry processed for that facility. In addition, the second facility pays for one full-time employee who works in the FSH's laundry operation. The correctional facilities provide compensation in the form of four full-time inmate workers for FSH's laundry operation.

Regarding meal services and bed space, the FSH has agreements in which the entities receiving the meal services purchase food for the FSH and the entity receiving the bed space provides certain in-kind services to the FSH.

The compensation received by the FSH for laundry and other services provided does not appear to fully cover the costs of providing these services. In addition, the practice of allowing FSH to charge expenditures to other state appropriations violates the intent of the appropriation process and applicable state laws. The FSH should consider establishing an internal service fund to account for the costs paid and compensation received for providing these services. Compensation rates should be set to cover the entire costs of providing these services.

**WE RECOMMEND** the FSH evaluate the establishment of an internal service fund to account for the costs and compensation received for laundry and other services provided to other entities. In addition, written contracts should be obtained from all facilities which receive these services, and the compensation received should be sufficient to cover the costs of providing the services. Furthermore, the department should pursue changes in the facility's budgeted funds to allow all costs of the facility and its operations to be paid from appropriations to or for the FSH.

### **AUDITEE'S RESPONSE**

*We concur. Within the next 90 days, FSH will:*

- 1. Submit written contract proposals to those facilities that do not compensate FSH for identified services.*
- 2. In collaboration with the Division of Comprehensive Psychiatric Services, evaluate the cost and feasibility of a legislatively appropriated account for the costs and compensation received for services provided to other entities.*

**3.****Supported Community Living Program**

The FSH serves as the location for a regional Supported Community Living (SCL) program. The SCL program serves about 775 clients residing in a array of housing settings, and starting February 1999, the program is supervised by a Central Regional Manager. The major functions of the SCL program are case management, client monitoring, and facility monitoring/inspections. Program personnel are responsible for reviewing spending of the clients' monies, reviewing invoices from the various vendors when providing services, performing annual inspections of the vendors, and performing quality assurance reviews of all related aspects of the clients and files. Our review of this program noted the following concerns:

- A. Even though quality assurance monitoring visits were made, SCL personnel had apparently prepared very few quality assurance monitoring reports during the period of May 1998 through March 1999. From discussions with program employees, the program was without a director for a period of time and other tasks were given priority. As of October 1999, most of the monitoring reports for the period ending March 1999 had been prepared; however, SCL personnel need to ensure all quality assurance monitoring visits are documented on a timely basis.

A review of quality assurance monitoring reports prepared as of October 1999 noted the following; 1) many reports indicated there was at least one deficiency in the client's case file, but there weren't always adequate explanations to describe the specific deficiencies, 2) some reports were either not signed by the case worker and/or the supervisor, and 3) some reports were not dated by the worker and/or supervisor.

Quality assurance guidelines are necessary to assess the performance of the SCL in providing effective services, meeting needs of clients, and ensuring satisfaction of its customers. To ensure client files are complete and accurate and that any deficiencies are corrected in a timely manner, the quality assurance monitoring reports should be prepared on a timely basis and should include all necessary information.

- B. The FSH is not always receiving quarterly reports of the vendors' spending of clients' monies. The facility maintains documentation of requests for these reports, but these reports are not always included in the vendors' files. Therefore, it is unclear whether the facility did not receive the applicable reports, or the reports were received and not filed. In addition, some reports that we requested were in the possession of case workers rather than being filed.

To ensure the clients' funds are being appropriately spent and properly monitored, quarterly reports should be obtained from the vendors detailing how the client funds are spent. The appropriate documentation should be retained in the files.

- C. Documentation of vendor monitoring visits performed by case managers was not always included in the applicable files. Therefore, the facility has little assurance that the required monitoring visits were performed. In some instances, only part of the monitoring report was in the file. In addition, some monitoring reports were not dated and were not signed by a supervisor to show that an independent review was made of the monitoring visit.

To ensure the individual vendors are properly monitored, all monitoring reports should be fully completed and reviewed by a supervisor, and all monitoring reports should be appropriately filed.

To ensure appropriate monitoring of youth clients, appropriate documentation should be maintained in the files as required by facility policy and state regulations.

**WE RECOMMEND** the FSH require the SCL program:

- A. Prepare quality assurance monitoring reports of client files on a timely basis, and ensure the reports are appropriately completed and properly signed and dated by both the caseworker and supervisor.
- B. Ensure quarterly reports of how clients' monies are spent are received and properly included in the respective files.
- C. Ensure that all vendor monitoring reports are included in the applicable files, and that the monitoring reports be dated and have the appropriate supervisor's signature to indicate that an independent review had been conducted.

**AUDITEE'S RESPONSE**

- A. *We partially concur. The quality assurance monitoring reports referred to were formal internal reviews, by the prior director, of each SCL case manager's documentation. We do not intend to continue the same type reviews. Many SCL case management responsibilities are in the process of being transferred to administrative agents. We do intend to monitor the case management functions performed by the agents after the transfer is complete and their contracts have been revised. Until then, SCL supervisors will review the work performed by their staff as part of basic supervision.*
- B. *We concur. We make a diligent effort to obtain these reports from the facilities. Sometimes reports are missing from the files, because the case managers are reviewing them. We have the reports on 50 of the 66 facilities and have mailed notices to the others. We expect to have the remainder by October 31, 2000.*
- C. *We concur. We have completed annual facility review forms on 72 of the 83 facilities and expect to have the remainder completed by October 31, 2000.*

This report is intended for the information of the management of the Fulton State Hospital and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

DEPARTMENT OF MENTAL HEALTH  
FULTON STATE HOSPITAL  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

Fulton State Hospital, established by the General Assembly in 1847 and opened in 1851, is the oldest public mental health facility west of the Mississippi River. The 508-bed hospital provides inpatient adult psychiatric services, including long-term care, for a thirty-one county area in the state's northeast quadrant, and maximum and medium security units for males and females from the entire state. Services include geriatric care, social learning programs, cognitive behavioral programs, psychiatric rehabilitation, alcohol and drug abuse treatment, and group home settings.

The hospital has been accredited by the Joint Commission on the Accreditation of Healthcare Organizations since 1984. At June 30, 1999, the facility had 21 beds certified for federal Medicaid or Medicare reimbursement.

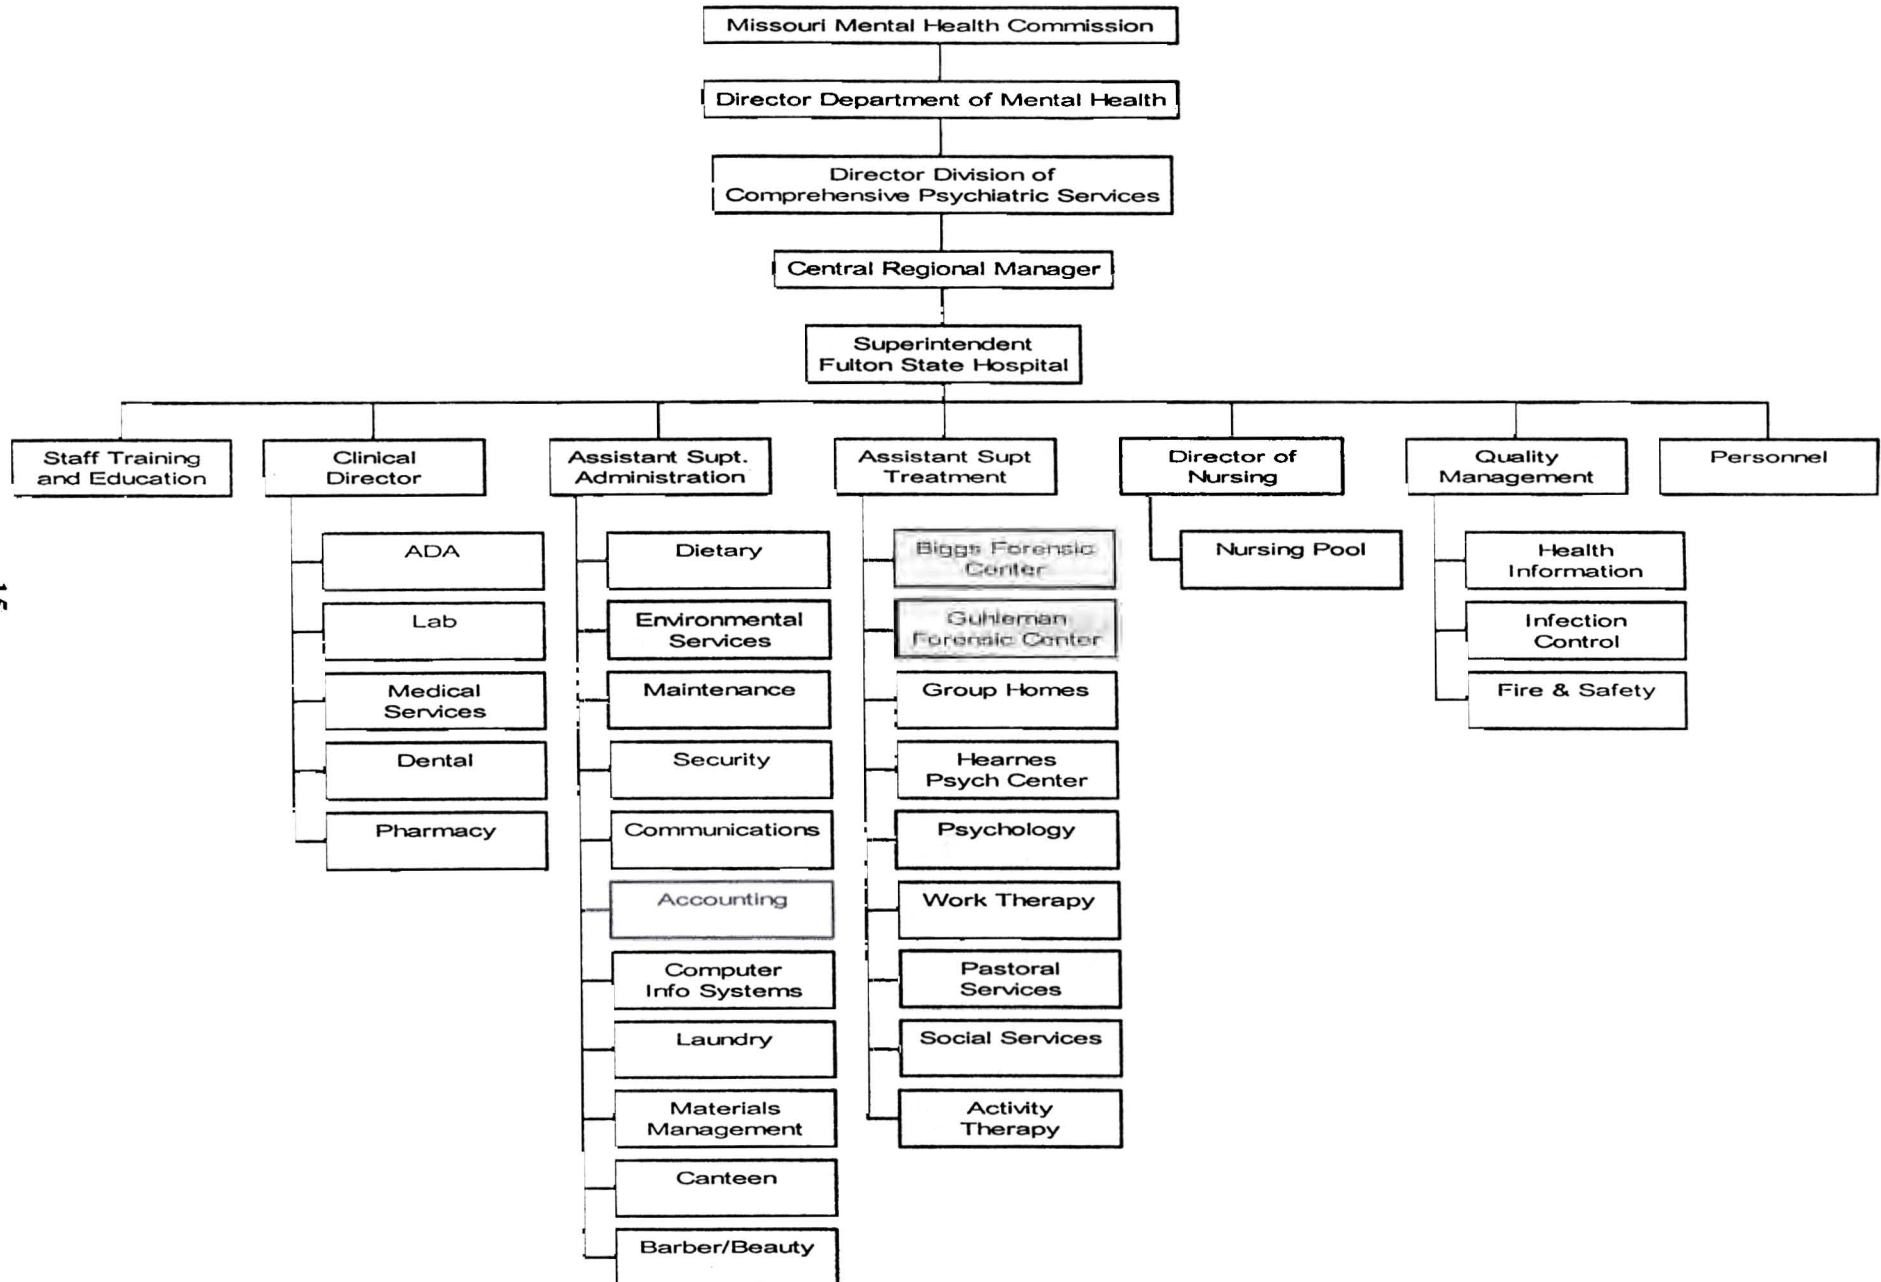

The 64-bed Hearnes Psychiatric Center offers psychosocial rehabilitation services for long-term care patients. The Guhleman Forensic Center is a 175-bed medium-security environment that offers a variety of inpatient treatment services to male and female patients who are progressing toward increased liberty and responsibility but not yet appropriate for a minimum-security environment. The Biggs Forensic Center is a 227-bed maximum-security unit that offers a variety of inpatient treatment services to male and female patients who have historically demonstrated dangerous behavior toward others in combination with a serious psychiatric and/or personality disorder. The 18-bed Alcohol and Drug Abuse Unit provides a treatment program for alcohol and drug abuse patients. The hospital also operates a 24-bed group home complex.

The hospital owns approximately 259 acres of land in and around Fulton. As of June 30, 1999, Fulton State Hospital had approximately 399 inpatients and 19 group home clients, and employed approximately 1,380 individuals assigned to various administrative, service and support sections. Stephen C. Reeves served as Superintendent from January 1, 1991, until his resignation effective January 29, 1999. Felix T. Vincenz, Ph.D., was appointed as Superintendent effective February 1, 1999, and presently serves in that capacity.

The hospital campus also serves as the location for a regional Supported Community Living Program or SCL. As of February 1999, this program is supervised by the Central Regional Manager. The SCL program serves about 775 clients residing in a array of housing settings within the same 31 county area served by the long-term inpatient programs offered by the hospital. The SCL program receives selected support services from the hospital for office space, accounting and associated needs.

Note: The appropriations presented above are used to account for and control the facility's expenditures from amounts appropriated to the facility by the General Assembly. The facility administers transactions from the appropriations presented above. However, the state treasurer as fund custodian and the Office of Administration provide administrative control over the fund resources within the authority prescribed by the General Assembly. This does not represent all expenditures of the facility. Some expenditures relating to state facilities are charged to department-wide appropriations and not identified by facility. Expenditures charged to department-wide appropriations that are identified to FSH are noted in Appendix B.

MISSOURI TECHNOLOGY CORPORATION

TWO YEARS ENDED JUNE 30, 2000

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-110  
October 12, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

Our office is required by state law to regularly audit the Missouri Technology Corporation, an organization which helps strengthen the state's economy through the development of science and technology.

We audited financial statements for two years ended June 30, 1999 and 2000, and have no findings or concerns. We did note:

- The corporation's financial statements fairly represent the financial position of the organization.
- The corporation's operations and general cash flow follow accepted accounting procedures.
- The corporation's internal control over financial reporting has no material weaknesses.

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Honorable Mel Carnahan, Governor  
and  
Joseph L. Driskill, Director  
Department of Economic Development  
and  
Members of the Board of Directors  
Missouri Technology Corporation  
Jefferson City, Missouri 65102

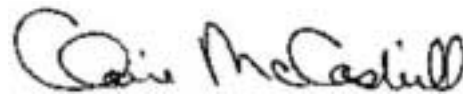

We have audited the accompanying financial statements of Missouri Technology Corporation, as of and for the years ended June 30, 2000 and 1999, as identified in the table of contents. These financial statements are the responsibility of the corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the Missouri Technology Corporation, as of June 30, 2000 and 1999, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated August 24, 2000, on our consideration of the corporation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the corporation's management and was not subjected to the auditing procedures applied in the audit of the financial statements referred to above.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

August 24, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Honorable Mel Carnahan, Governor  
and  
Joseph L. Driskill, Director  
Department of Economic Development  
and  
Members of the Board of Directors  
Missouri Technology Corporation  
Jefferson City, Missouri 65102

We have audited the financial statements of the Missouri Technology Corporation, as of and for the years ended June 30, 2000 and 1999, and have issued our report thereon dated August 24, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

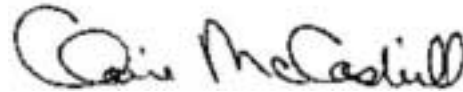

Compliance

As part of obtaining reasonable assurance about whether the financial statements of the Missouri Technology Corporation are free of material misstatement, we performed tests of the corporation's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

## Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements of the Missouri Technology Corporation, we considered the corporation's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the management of the Missouri Technology Corporation, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

Claire McCaskill  
State Auditor

## Notes to the Financial Statements

MISSOURI TECHNOLOGY CORPORATION  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

These financial statements present the Missouri Technology Corporation (MTC), a not-for-profit corporation.

Expenses presented for the corporation may not reflect the total cost of the corporation's activities. Other direct and indirect costs and services provided by the Department of Economic Development and other state agencies are not allocated to the corporation.

B. Basis of Accounting

The financial statements for the MTC are prepared in conformity with generally accepted accounting principles. The statements are presented on the accrual basis of accounting which recognizes revenues when earned and expenses when the related liability is incurred.

C. Fiscal Authority and Responsibility

Fiscal authority and responsibility rests with the Board of Directors of the corporation.

2. Cash

Cash was maintained in a negotiable order of withdrawal (NOW) account and two certificates of deposits at June 30, 2000, and a NOW account at June 30, 1999. At June 30, 2000 and 1999, the reported amount and book balance was \$48,620 and \$48,838, respectively. The interest rate for the NOW account at June 30, 2000 and 1999, was 2.25 percent and the two certificates of deposits was 5.95 percent and 5.50 percent. The corporation's deposits at June 30, 2000 and 1999, were entirely covered by federal depositary insurance.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

## MISSOURI TECHNOLOGY CORPORATION HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

The Missouri Technology Corporation (MTC) was authorized by Section 348.263, RSMo 1994, to replace the Missouri Business Modernization and Technology Corporation. The MTC was organized and held its first board meeting on November 16, 1994, and its Articles of Incorporation were filed with the Secretary of State on January 10, 1995.

The purposes of the MTC are to contribute to the strengthening of the economy of the state through the development of science and technology, to promote the modernization of Missouri businesses by supporting the transfer of science, technology and quality improvement methods to the workplace, and to enhance the productivity and modernization of Missouri businesses by providing leadership in the establishment of methods of technology application, technology commercialization and technology development.

The board of directors of the MTC is composed of fifteen persons and shall consist of the following members:

- 1) The director of the Department of Economic Development, or the director's designee;
- 2) The president of the University of Missouri system, or the president's designee;
- 3) A member of the state senate, appointed by the president pro tem of the senate;
- 4) A member of the house of representatives, appointed by the speaker of the house;
- 5) Eleven members appointed by the governor, two of which shall be from the public sector and nine members from the private sector who shall include, but shall not be limited to, individuals who represent technology-based businesses and industrial interests. The governor shall also appoint one of the members, who must be from the private sector, as chairman.

Members of the MTC board of directors at June 30, 2000, were:

Mr. Frank Stokes, Chairman  
Dr. John T. Park, Vice-Chairman  
Mr. David Corwin, Secretary/Treasurer  
Ms. Lynda K. Andrews  
Dr. David L. Bodde  
Mr. Bill Borgmeyer  
Dr. Delbert Day  
Mr. Joseph L. Driskill  
The Honorable Jerry T. Howard  
Dr. Manuel Pacheco  
Mr. Dennis D. Roedemeier  
Ms. Carol Rosenbaum  
Mr. David Steward

There were two vacancies on the MTC board of directors at June 30, 2000.

DUNKLIN COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-109  
October 11, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**The following findings were noted as a result of an audit conducted by our office of the Ex-Officio County Collector, Dunklin County, Missouri.**

---

State statute requires the state auditor to audit the office of the County Collector after being notified of a vacancy in that office. On April 30, 2000, a vacancy occurred in the office of the Ex-Officio County Collector of Dunklin County, Missouri; a successor was appointed effective May 1, 2000.

Monthly listings of liabilities are not prepared and reconciled to cash balances. Several errors occurred during the audit period and were not detected in a timely manner because of the lack of such reconciliations. For example, \$10,484 received and deposited in June 1999 was not disbursed to applicable political subdivisions until April 2000.

As of April 30, 2000, the reconciled bank balance was approximately \$43,000 more than April distributions including unidentified monies totaling \$18,092 and undistributed interest totaling \$18,099. The Ex-Officio County Collector has not distributed interest for several years.

Additionally, tax receipts and other monies received are not reconciled to the composition of bank deposits. The Ex-Officio County Collector does not post the paid tax bills to the accounting records on a daily basis or generate a daily abstract.

For the year ended February 29, 2000, the annual settlement of the Ex-Officio County Collector had not been completed and filed with the County Commission as of June 2000. State law requires settlements be filed with the County Commission. In addition, timely completion of the settlement is necessary to permit the prompt review and verification of the tax book charges and credits.

The audit also recommended improvements related to bank reconciliations, drainage and levee district records, purchases made from political subdivisions' tax monies, and excess interest transferred to the County Special Road and Bridge Fund.

Several similar conditions had been noted in our prior report on Dunklin County for the two years ended December 31, 1998. The Ex-Officio County Collector indicated these recommendations would be implemented, however, no improvements were noted.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the County Commission  
and  
Ex-Officio County Collector  
Dunklin County, Missouri

Section 52.150, RSMo 1994, requires the state auditor to audit the office of the County Collector after being notified of a vacancy in that office. On April 30, 2000, a vacancy occurred in the office of the Ex-Officio County Collector of Dunklin County, Missouri; a successor was appointed effective May 1, 2000.

To satisfy our statutory obligation, we have audited the operations of the Ex-Officio County Collector of Dunklin County, Missouri. The scope of this audit included, but was not necessarily limited to, the period March 1 to April 30, 2000, and the year ended February 29, 2000. In accordance with Section 52.150, RSMo 1994, our responsibilities during this audit were to:

1. Determine the financial condition of the accounts of the office of the Ex-Officio County Collector.
2. Determine the proper compensation that should have been paid to the replaced Ex-Officio County Collector during the past three years and the compensation actually paid during such period.
3. File a report of our findings with the County Commission and the person appointed to fill the vacancy in the office of the Ex-Officio County Collector.

Section 52.150, RSMo 1994, requires the County Commission to accept the state auditor's report and, if necessary, to take certain specific actions if the state auditor finds any monies owing to the county or the past Ex-Officio County Collector.

Our audit was conducted in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed accounting and bank records and other pertinent documents and interviewed various personnel of the Ex-Officio County Collector.

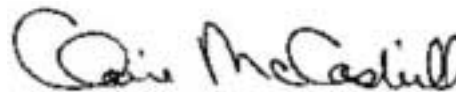

As part of our audit, we assessed the controls of the Ex-Officio County Collector to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to controls, we obtained an understanding of

the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the Ex-Officio County Collector and was not subjected to the procedures applied in the audit of that office.

The accompanying Management Advisory Report presents our findings arising from our audit of the Ex-Officio County Collector of Dunklin County, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

DUNKLIN COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR  
MANAGEMENT ADVISORY REPORT –  
STATE AUDITOR’S FINDINGS

|           |  |
|-----------|--|
| <b>1.</b> | <b>Reconciliation of Ex-Officio County Collector’s Records</b> |
|-----------|--|

- A. Monthly bank reconciliation procedures during the audit period were inadequate. The bank reconciliations did not include as deposits in transit monies collected in one month but not recorded by the bank until the next month. In addition, although two checks had been reissued to replace two voided checks, the bank reconciliation showed the two voided checks as being outstanding. Accurate and complete bank reconciliations are necessary to ensure all receipts and collections are properly accounted for and facilitate reconciliation procedures between cash in the bank and liabilities.
  
- B. Monthly listings of liabilities are not prepared and reconciled to cash balances. Several errors occurred during the audit period and were not detected in a timely manner because of the lack of such reconciliations. For example, \$10,484 received and deposited in June 1999 was not disbursed to applicable political subdivisions until April 2000. The Ex-Officio County Collector did not realize these monies remained in her bank account until delinquent tax statements were sent to individuals. Several individuals responded that their taxes had been paid and subsequent review determined some monies received and deposited in June 1999 had not been posted to the accounting records. In addition, payment in lieu of taxes totaling \$4,991 had not been disbursed to the applicable drainage and levee districts as of April 30, 2000. Of this amount, \$1,911 was received in July 1999 and the remaining \$3,080 was received in December 1999. Also, taxes totaling \$402 received by the Ex-Officio County Collector for the Varney River Drainage District during the period March 1997 to December 1999 had not been disbursed as of April 30, 2000.

These errors were not detected because the Ex-Officio County Collector did not prepare and reconcile monthly listings of liabilities to the bank balance. As of April 30, 2000, the reconciled bank balance was approximately \$43,000 more than April distributions, including unidentified monies totaling \$18,092. Identification of month-end liabilities is necessary to ensure all receipts and collections are properly accounted for and cash in the bank is adequate to meet liabilities.

- C. The method of payment received (cash, check, and money order) is not consistently indicated on the receipt slip or on the paid tax receipt. Additionally, tax receipts and other monies received are not reconciled to the composition of bank deposits. The Ex-Officio County Collector does not post the paid tax bills to the accounting records on a daily basis or generate a daily abstract. As a result,

\$10,484 received in June 1999 was not posted to the accounting records and the error was not detected until April 2000. (See B above).

To properly reconcile receipts to deposits and ensure all monies are being deposited intact, a daily abstract should be generated and the method of payment should be reconciled to the composition of deposits.

These conditions were also noted in our report on Dunklin County, and the Ex-Officio County Collector indicated these recommendations would be implemented. However, no improvements were made regarding these conditions.

**WE AGAIN RECOMMEND** the Ex-Officio County Collector:

- A. Perform accurate monthly bank reconciliations.
- B. Prepare monthly listings of liabilities and reconcile the listings to the reconciled bank balances.
- C. Record the method of payment on each receipt slip issued and each paid tax receipt. In addition, the Ex-Officio County Collector should prepare a daily abstract of all receipts and reconcile the composition of receipts per the daily abstract to the composition of bank deposits.

### **AUDITEE'S RESPONSE**

*The current Ex-Officio County Collector provided the following responses:*

- A&B. Beginning with the August 2000 bank reconciliation, these procedures will be implemented.*
- C. Receipts will be entered into the computer daily. The composition of receipts will be indicated and will be compared to the deposits. This will be implemented when the computer system is able to perform this procedure. We anticipate this will be in September 2000.*

|  |
|--|
| <b>2. Ex-Officio County Collector's Accounting Controls and Procedures</b> |
|--|

Our review indicated many significant problems in the control procedures used by the Ex-Officio County Collector:

- A. The receipt slip books used for some drainage districts and levee collections are not prenumbered. In addition, different receipt slip books are used for each drainage and levee district and the Ex-Officio County Collector used multiple receipt slip books for the same drainage or levee district even though the receipt

slip book had not been completed. Consequently, the numerical sequence of receipt slips issued is not accounted for.

Also, the Ex-Officio County Collector was unable to locate all of the receipt slip books and other records applicable to the drainage and levee districts. Thus, there is no assurance that all monies received for drainage and levee districts had been appropriately deposited and disbursed to the districts.

To adequately account for receipts, prenumbered receipt slips should be issued for all receipts and the numerical sequence accounted for properly. In addition, records for drainage districts and levee districts should be maintained in a manner to ensure all monies received have been distributed.

- B. During the period March 1 to April 30, 2000 and the year ended February 29, 2000, the Ex-Officio County Collector did not distribute interest earned on bank deposits. As of April 30, 2000, cumulative interest totaled approximately \$18,099. According to the Ex-Officio County Collector, the interest had not been disbursed because she was not sure how to allocate the interest monies to the various political subdivisions.

Section 110.150.2, RSMo Cum. Supp. 1999, and Missouri Attorney General's Opinions No. 126, 1981 to Antonio; No. 108, 1981 to Busker; No. 148, 1980 to Antonio; and No. 40, 1965 to Owensby, provide the interest on school funds, county hospital and hospital district funds, health center funds, library funds, special road and bridge funds, assessment funds, and bond debt service funds, be placed to the credit of those funds, and the interest on all other funds to the credit of the county's General Revenue Fund. To allocate the interest equitably, the percentage of tax collections should be used.

- C. For the year ended February 29, 2000, the annual settlement of the Ex-Officio County Collector had not been completed and filed with the County Commission as of June 2000. Section 139.160, RSMo 1994, requires settlements be filed with the County Commission by the first Monday in March. In addition, timely completion of the settlement is necessary to permit the prompt review and verification of the tax book charges and credits.
- D. At April 30, 2000, the Ex-Officio County Collector's bank account had \$349 in outstanding checks that were over a year old. In addition, the Ex-Officio County Collector had \$430 in outstanding checks written in 1997 from a previous bank account. Checks totaling \$363 from the previous bank account were written to political subdivisions and should be reissued. These old outstanding checks create additional and unnecessary record-keeping responsibilities. Procedures should be adopted to routinely follow up on old outstanding checks. If the payees cannot be located, various statutory provisions including Sections 447.500 through 447.595, RSMo 1994 provide for the disposition of unclaimed monies.

- E. During the period March 1 to April 30, 2000 and the year ended February 29, 2000, the Ex-Officio County Collector purchased postage stamps totaling \$1,980 with checks drawn on the Ex-Officio County Collector bank account. The Ex-Officio County Collector had no authority to make purchases from political subdivisions' tax monies. These monies were only available in the account due to poor internal controls and a lack of reconciliation procedures by the Ex-Officio County Collector.
- F. As of May 1999, the Ex-Officio County Collector held \$142,780 of county receipts and related interest of \$4,956 in the Ex-Officio County Collector's bank accounts rather than in a County Treasurer's bank account. In July 1999, the Ex-Officio County Collector disbursed \$153,324 to the County Treasurer's bank account and credited this amount to the Special Road and Bridge Fund. Supporting documentation could not be located to determine how the \$153,324 amount was calculated. Based on our review of additional interest accrued through July 1999, the Ex-Officio County Collector disbursed \$4,185 more in interest to the County Treasurer's Special Road and Bridge Fund than applicable. This amount needs to be returned to the Ex-Officio County Collector's bank account.

Conditions similar to A-C were also noted in our report on Dunklin County, and the Ex-Officio County Collector indicated these recommendations would be implemented. However, no improvements were made regarding these conditions.

**WE RECOMMEND** the Ex-Officio County Collector:

- A. Issue prenumbered receipt slips for all monies received and account for the numerical sequence of those receipt slips. Records should be adequately maintained to ensure all monies collected have been disbursed to the drainage districts and levee districts.
- B. Allocate interest in accordance with state statutes and Attorney General's opinions.
- C. Ensure annual settlements are completed in a timely manner.
- D. Attempt to resolve the old outstanding checks and establish routine procedures to investigate checks outstanding for a considerable time.
- E. Discontinue the practice of purchasing postage stamps from the Ex-Officio County Collector's bank account. Reimbursement of \$1,980 should be obtained from the General Revenue Fund.
- F. Obtain reimbursement of \$4,185 from the Special Road and Bridge Fund.

## **AUDITEE'S RESPONSE**

*The current Ex-Officio County Collector provided the following responses:*

- A. The drainage districts provide us with receipt slips to use for their collections. However, last month, we started keeping an additional receipt slip book to help keep track of monies collected to ensure monies get disbursed.*
- B. Interest has been disbursed.*
- C. I am still working on the annual settlement. It should be filed in September 2000.*
- D. Some of these checks have been reissued. I will check to see if the other checks can be resolved.*
- E. We will stop purchasing postage stamps from this account. Reimbursement will be made from the General Revenue Fund in September 2000.*
- F. This will be transferred during September 2000.*

This report is intended for the information of the Ex-Officio County Collector and the management of Dunklin County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## FOLLOW-UP ON PRIOR AUDIT FINDINGS

DUNKLIN COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR  
FOLLOW-UP ON PRIOR AUDIT FINDINGS

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by the Ex-Officio County Collector of Dunklin County, Missouri, on the applicable finding in the Management Advisory Report (MAR) of our prior audit report issued for the two years ended December 31, 1998, on Dunklin County.

The prior recommendations which have not been implemented, but are considered significant, are repeated in the current MAR. Although the remaining unimplemented recommendations are not repeated, the Ex-Officio County Collector should consider implementing those recommendations.

8. Ex-Officio County Collector's Accounting Controls and Procedures

- A. Receipt slips were not issued for partial payments received and receipt slip books used for some drainage districts and levee collections were not prenumbered. Consequently, the numerical sequence of receipt slips was not accounted for.
- B. The method of payment received (cash, check, and money order) was not consistently indicated on the receipt slip or on the paid tax receipt. Additionally, the tax receipts were not reconciled to the composition of bank deposits and a daily abstract was not prepared.
- C. Monies received were not deposited intact as personal checks were cashed for county employees from the daily receipts.
- D. The Ex-Officio County Collector did not distribute interest totaling \$10,125 earned on bank deposits.
- E. Annual settlements were not completed on a timely basis.
- F. The Ex-Officio County Collector's bank account included land tax sale monies totaling approximately \$13,000.
- G. Monthly bank reconciliations procedures during the audit period were inadequate and monthly listing of liabilities were not prepared and reconciled to cash balances resulting in unidentified monies totaling \$4,411 being held in the Ex-Officio County Collector's bank account. In addition, \$147,736 of county receipts and related interest were being held in the Ex-Officio County Collector's bank accounts instead of a County Treasurer bank account.

Recommendation:

The Ex-Officio County Collector:

- A. Issue prenumbered receipt slips for all monies received and account for the numerical sequence of those receipt slips.
- B. Record the method of payment on each receipt slip issued and each paid tax statement. Reconcile the composition of receipts to the paid tax bills and to bank deposits. Furthermore, prepare a daily abstract to reconcile collections per books to bank deposits.
- C. Deposit all receipts intact and discontinue the practice of cashing personal checks.
- D. Allocate interest in accordance with state statutes and Attorney General's opinion.
- E. Ensure annual settlements are completed in a timely manner.
- F. Disburse surplus monies from land tax sales to the County Treasurer.
- G. Perform monthly bank reconciliations on all bank accounts, prepare monthly listings of liabilities and reconcile the listings to the reconciled bank balances.

Status:

A,D,

&E. Not implemented. See MAR No. 2.

B. Not implemented. See MAR No. 1.

C. Implemented.

F. Partially implemented. As of April 30, 2000, the Ex-Officio County Collector's bank account still included \$273 of land tax sale monies. Although not repeated in the current report, our recommendation remains as stated above.

G. Partially implemented. Monthly bank reconciliations are performed, however, the bank reconciliations are not adequate. Monthly listings of liabilities are not prepared and reconciled to the bank balances. See MAR No. 1.

HISTORY, ORGANIZATION, AND  
STATISTICAL INFORMATION

DUNKLIN COUNTY, MISSOURI  
EX-OFFICIO COUNTY COLLECTOR  
HISTORY, ORGANIZATION, AND  
STATISTICAL INFORMATION

The Ex-Officio County Collector and the township collectors bill and collect property taxes for the county and most local governments.

Jeris Warrington served as Ex-Officio County Collector until April 30, 2000. Nina Rhew was appointed the Dunklin County Ex-Officio County Collector effective May 1, 2000.

The Ex-Officio County Collector received compensation of \$3,336 for the period April 1 to April 30, 2000. During the years ended March 31, 2000, 1999, and 1998, the Ex-Officio County Collector received compensation of \$40,137, \$40,175, and \$40,110, respectively. Compensation was in accordance with statutory provisions and includes drainage districts commissions.

The following schedule reflects amounts from the records of the Ex-Officio County Collector on the modified accrual basis. The schedule does not include any of the operating costs of the Ex-Officio County Collector's office other than commissions retained. Operating costs are paid from the General Revenue Fund of the county.

CITY OF PINE LAWN, MISSOURI

YEAR ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-108  
October 2, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

October 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Pine Lawn, Missouri.**

The City of Pine Lawn has failed to implement 25 of the 35 recommendations made in our prior audit that covered the year ended June 30, 1994. Although the city indicated in that report that most of the recommendations would be implemented, we have repeated many recommendations in the current report. These include violations of IRS regulations, lack of bid documentation, inadequate controls over credit card purchases, inadequate controls over seized and forfeited property, inadequate collection of delinquent trash collection fees, the lack of ordinances establishing the duties of various city employees, failure to publish financial statements, budgets not approved on a timely basis, inadequate financial reporting not provided for the board, inadequate property records, and inadequate controls in the municipal court.

The city did not properly plan for a construction project. In January 1995, there was significant interest in possibly converting a donated school building into a city community center. In October 1996, the city contracted with an architect to prepare a feasibility study. In October 1997, the city entered into a second contract with the architect, which provided that the architect would be compensated at the rate of 4.4 percent of total construction costs. The firm was also supposed to help promote the bond issue to finance the complex. In addition, the city did not have plans to obtain additional funding for the project at the time they entered into the second agreement. The city did not obtain at least three proposals from architectural firms, which is required by state law, before entering into the agreements. The city ultimately decided not to construct the center and the architect sued the city for services provided on the second agreement. The city reached a settlement with the architect for \$13,358 and expended approximately \$9,400 in legal fees related to this case. The city spent significant amounts of city monies on architectural plans for and promotion of a project that was ultimately never started.

The city charges citizens a user fee for trash collection services; however, the monies received do not cover the cost of trash collection services. The city has not adequately pursued delinquencies. As of June 30, 1999, city records show approximately \$656,000 in uncollected trash fees.

The Board of Alderman discussed items in closed session that are not allowed to be discussed under the provisions of the Sunshine Law. In addition, the Board of Alderman discussed items in closed session that were not included on the closed session agendas.

(over)

YELLOW SHEET

The city's purchasing ordinance requires advertising for bids for all purchases of goods and services in the amount of \$5,000 or more. However, although the city indicated in our prior audit that they would watch this more closely, bids or bid documentation was not retained for many purchases. Some items purchased without documentation of bids and/or advertisements include home demolition projects, gas purchases, and a 4x4 truck.

The city deposits seized money into a bank account. This account contains a balance of \$40,342 as of May 2000. Some of the money has been held for several years including approximately \$20,000 that we commented on in our prior audit report. The police department's log of evidence and seized property is not adequate. The log does not indicate the date the property or evidence was seized or evidence taken or the disposition of the item.

The Board of Aldermen does not receive enough information to monitor the budget and evaluate the financial position of the city's funds. The city overspent the approved General Revenue budget by \$10,616 and \$10,470 for the years ended June 30, 1999 and June 30, 1998, respectively.

The municipal court division has not implemented adequate procedures to follow up on bonds held for more than one year. As of June 30, 1999, the balance of the city's bond account included bond receipts totaling \$8,747 which have been held at least two years.

The city has not disbursed the domestic violence fees collected to St. Louis County for disbursement to a local domestic violence shelter.

CITY OF PINE LAWN, MISSOURI

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
And  
Members of the City Council  
City of Pine Lawn  
Pine Lawn, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Pine Lawn, Missouri. The city had engaged Schmersahl Treloar & Co., P.C., Certified Public Accountants (CPA's), to perform a financial audit of the city for the year ended June 30, 1999. To minimize any duplication of effort, we reviewed the report and substantiating workpapers of the CPA firm. Our audit of the city included, but was not limited to, the year ended June 30, 1999. The objectives of this audit were to:

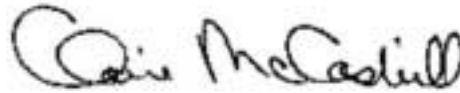

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to auditing procedures applied during this audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Pine Lawn, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

May 12, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF PINE LAWN, MISSOURI HISTORY AND ORGANIZATION

The City of Pine Lawn was incorporated as a fourth-class city in 1947 and is located in north St. Louis County. The population according to the 1990 census was 5,092.

The city government consists of a Mayor and an eight-member Board of Aldermen. The eight members are elected from four wards for two-year terms, one from each of the four wards each year. The Mayor is elected for two years, presides over the Board of Aldermen, and votes only in the case of a tie. The Mayor, Board of Aldermen, and other principal officials at June 30, 1999 were:

|  | Term           | Compensation<br>Paid<br>For the<br>Year Ended | Amount         |
|--|----------------|---|----------------|

| George Prophete, Street Supervisor       |                | 24,080  | 0              |
| Harlan Brooks, Building Commissioner (6) |                | 24,705  | 1,000          |

- (1) Elected in the April 1999 election.
- (2) Replaced by Pelton Jackson in the April 2000 election.
- (3) Replaced by Chester Brown in the April 2000 election.
- (4) Reelected in the April 2000 election.
- (5) Mark Zoole became City Attorney in July 2000.

(6) Employment terminated in January 2000. Alvin Winton is currently the part-time Building Commissioner.

(7) In addition to this amount, the treasurer receives a monthly expense allowance of \$75.

(8) This amount represents monthly retainer fees of \$550 a month which is paid to the City Attorney's law firm. Other payments made to the City Attorney's law firm for legal fees for the year ended June 30, 1999 totaled \$19,847.

The city did not have a Police Chief as of June 30, 1999. Donald Hardy became Police Chief on July 9, 1999.

Assessed valuation and tax rate information for 1999 is as follows:

ASSESSED VALUATION

|                   |                             |
|-------------------|-----------------------------|
| Real Estate       | \$ 11,880,480               |
| Personal Property | <u>3,546,001</u>            |
| Total             | <u><u>\$ 15,426,481</u></u> |

TAX RATES PER \$100 ASSESSED VALUATION

|         |         |
|---------|---------|
| General | \$ 0.24 |
|---------|---------|

The city also has the following sales taxes; rates are per \$1 of retail sales:

|  | <u>Rate</u> | <u>Expiration<br/>Date</u> |

## MANAGEMENT ADVISORY REPORT

CITY OF PINE LAWN  
SUMMARY OF FINDINGS

1. City Expenditures (pages 9-12)

Monthly expense allowances and uniform allowances are not properly reported to the Internal Revenue Service. There were expenditures for which the public purpose was questionable. The city does not always obtain bids or solicit proposals for purchases. The city does not document its approval of purchases made with the city's credit card. The city does not have a formal travel expense policy.

2. Inadequate Planning (pages 13-15)

The city did not properly plan for the building of a proposed community center and did not properly obtain proposals from architectural firms when selecting the architect for the project. In addition, the city paid \$3,300 to purchase and install park equipment in a playground the board voted to demolish six months later.

3. Evidence and Seized Property Controls and Procedures (pages 15-16)

The police department does not maintain an adequate record of evidence and seized property. There is \$40,343 in seized money that has been held in a separate account for many years.

4. Delinquent Trash Collection Fees (pages 16-18)

The city has not properly pursued the collection of delinquent trash collection fees and as of June 30, 1999, the city had approximately \$656,000 of delinquent fees.

5. City Business Licenses (page 18)

The city does not have an adequate system in place to ensure compliance with city business license and building code ordinances.

6. Board Meetings and Ordinances (pages 19-20)

The city is not in compliance with the Sunshine Law and the city needs to adopt ordinances regarding duties of several city employees and the Senior Citizen Building.

7. Budgets and Financial Reporting (pages 20-22)

The city does not publish semiannual financial statements and city budgets are not approved on a timely basis. The Board of Aldermen does not receive complete financial information to make informed decisions and properly manage city monies.

8. City Property Records (pages 22-24)

The city has not established records to annually inventory and account for city property. In addition, the city does not reconcile the gallons of gas purchased to gallons of gas pumped and on hand. Complete logs are not maintained for city-owned vehicles documenting their use.

9. Miscellaneous Records and Procedures (pages 24-27)

Several city employees do not maintain time sheets and adequate leave records are not maintained by the city. Law Enforcement Training and Domestic Violence Shelter fees were not properly handled by the city. The city does not separately account for restricted sales tax monies. Occupancy permits are not required to be on file for all candidates for city office.

10. Municipal Court Division (pages 27-30)

Several weaknesses were noted in the internal control procedures and accounting records of the municipal court.

CITY OF PINE LAWN, MISSOURI  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S FINDINGS

|           |                          |
|-----------|--------------------------|
| <b>1.</b> | <b>City Expenditures</b> |
|-----------|--------------------------|

- A. Uniform allowances of \$300 are paid annually to the police officers. In addition, the street commissioner was paid an expense allowance of \$280 during the year ended June 30, 1999. The officers and street commissioner are not required to submit an itemized report of expenses and these amounts are not reported on the employees' W-2 forms.

Internal Revenue Service (IRS) Regulation No. 31.3401(a)-4 requires expenses not accounted for to the employer to be considered as gross income and also requires payroll taxes to be withheld from this gross income. The failure to properly submit the required forms could result in penalties to the city. In addition, it would appear more appropriate for the city to reimburse these employees for actual documented costs.

This condition was also noted in our 1994 prior report. The city indicated at that time it would review this with its CPA. Although the IRS requires this reporting, the city has not implemented the recommendation.

- B. The city made several expenditures which do not appear to be a prudent use of public funds.

- 1) The city routinely sends flowers to funerals in cases of death in an employee's family. The city expended \$1,041 for these payments from July 1, 1998, through March 31, 2000. These expenditures do not appear to be necessary costs of operating the city. Public funds should be expended only for costs necessary to operate the city.
- 2) The city reimburses residents age sixty-five and older 50 percent of city utility franchise taxes paid on utility bills. During the period of July 1, 1998, through March 31, 2000, the city expended approximately \$15,000 for the senior citizen utility tax rebate program.

These payments are not conditioned on financial need. The city's authority or the municipal purpose to make such payments has not been researched and documented.

These conditions were noted in our prior report.

- C. The city's purchasing ordinance requires advertising for bids for all purchases of goods and services in the amount of \$5,000 or more. However, although the city indicated after our prior audit that they would watch this more closely, bids or bid documentation was not retained for many purchases. The following items were purchased from July 1, 1998, through March 31, 2000, without documentation of bids and/or advertisements:

| <u>Item</u>                        | <u>Cost</u> |
|------------------------------------|-------------|
| Home demolition projects           | \$ 76,825   |
| Gas purchases                      | 38,000      |
| 4X4 truck                          | 28,667      |
| Computer purchase and installation | 10,250      |
| Sewer project                      | 10,000      |
| Playground equipment               | 6,032       |
| Lawn mowers                        | 5,970       |

While the city indicated the purchase of the truck had been bid, no documentation could be located. Competitive bidding helps ensure the city receives fair value by contracting with the lowest and best bidders. Bidding helps ensure all parties are given an equal opportunity to participate in the city's business. In addition, complete documentation should be maintained of all bids received. If other than the lowest bid is selected, the reasons should be adequately documented.

- D. The city entered into a contract for engineering services related to a street repair project. Although the city indicated it solicited proposals for this service, no documentation of this was maintained.

Sections 8.289 and 8.291, RSMo 1994, provide that when obtaining engineering services for any capital improvement project, at least three highly qualified firms should be considered. The firms should be evaluated based on specific criteria including experience and technical competence, capacity and capability of the firm to perform the work in question, past record of performance, and the firm's proximity to and familiarity with the area in which the project is located.

See also MAR 2.A. for additional comments related to obtaining proposals.

- E. The city maintains a credit card for the purchase of items from vendors with whom the city does not have an account. Most purchases made by employees of the city require a purchase order, which is approved by the City Clerk prior to making the purchase. However, a purchase order is not required to be obtained prior to the use of the credit card. The city indicated that purchases made with the credit card are approved prior to the purchase, but there is no documentation maintained of this approval.

The city should establish procedures to ensure purchases made with the city's credit card are properly approved and appropriate documentation is maintained of the approval process.

Although the city indicated in the prior report that it would document approvals as recommended, this has not been done.

- F. City ordinance number 822 establishes the salaries of the members of the Board of Alderman. This ordinance states that board members will not be entitled to any expense recovery for ordinary expenses incurred in the office of alderman. It further states that any extraordinary expenses shall be subject to prior approval by the Board of Aldermen.

There has been considerable disagreement between the city officials as to what constitutes an ordinary or extraordinary expense. In addition, the city has no written travel and expense policies. Without written, documented policies, the types of expenses that can be incurred, the extent of those expenses which will be paid by the city, and the appropriate payment mechanism for the expenses may not be known.

To avoid confusion, the city should clearly define its travel and expense policy. This would include defining what constitutes an ordinary as opposed to an extraordinary expense.

**WE RECOMMEND** the Board of Aldermen and the Mayor:

- A. Require the police officers and Street Commissioner to submit itemized reports of uniform expenses or report the allowances as other income on the employees' W-2 forms. In addition, the city should consider filing amended W-2 forms for the unreported employee compensation.
- B. Ensure expenditures are limited to those necessary to properly operate the city and within the city's authority.
- C. Ensure bids are solicited for all applicable purchases in accordance with city ordinance. Documentation of the bidding process should be maintained in all cases. If the city feels that it is not practical to obtain bids on certain purchases, documentation explaining why bids were not obtained should be maintained.
- D. Solicit and document proposals for engineering services.
- E. Ensure purchases made with the city's credit card are properly approved and documentation of the approval is maintained.
- F. Adopt a formal policy regarding travel expenses which includes a definition of ordinary versus extraordinary expenses.

## **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

- A. *The City intends to implement the reporting of uniform allowances for police officers and an expense allowance for the street commissioner immediately. This method of reporting will be incorporated with the W-2 for the current calendar year.*
- B. *With regard to the purchase of flowers, the city's position is unchanged. Certain good-will expenditures are part of doing business within our community as well as with other communities and their elected officials.*

*The senior citizen utility franchise tax reimbursement program will continue. Due to the large numbers of senior citizens living on a fixed income within the community, the city officials believe there is a moral obligation to offer this reimbursement. We will consult with our legal counsel again to ensure that it is within our authority.*

- C. *The city has always acquired bids for projects prior to awarding the bid to the contractor. Sometimes bids have been acquired in an emergency in order to correct a problem immediately and avoid legal liability for a safety hazard, but the lowest bid was always accepted. Though some of the records may not have been readily available for review, the city will be more vigilant in safeguarding the records and making them available for review.*
- D. *The city solicited bids for engineering service upon recommendations received from St Louis County. The city invited various engineering firms via telephone to bid on the street project; however, a limited response was received. The bid that was eventually accepted by the elected official was within the accepted industry range. In the future, the city will retain documentation of who they contacted.*
- E. *Effective immediately, all purchases made by credit card will be well documented and approved by the proper authority prior to purchase even though we believe our current practice is appropriate.*
- F. *The city intends to implement a formal written policy defining ordinary and extraordinary expenses for employees and elected officials. The policy will be implemented within 120 days upon conclusion of a public hearing.*

## **AUDITOR'S COMMENT**

- 1.D. Although the city states that proposals were solicited, no documentation of this was maintained. The city should maintain all records to document it complied with the law.

- A. On January 23, 1995, the St. Louis Archdiocese donated a school building to the city of Pine Lawn. At that time, there was significant interest among board members and citizens regarding the possibility of converting the school building into a city community center. In October 1996, the city contracted with an architect to prepare a feasibility study regarding converting the school into a city complex that would include a city hall building, a police station, and a community center. This study cost the city \$2,200 and the architect concluded the cost of reconfiguring the existing building into a city complex would be \$2,037,440 and the cost of demolishing the existing building and constructing a completely new city complex would be \$3,097,776.

In October 1997, the city entered into a second contract with the architect. This contract provided that the architect would be compensated at the rate of 4.4 percent of total construction costs of the city complex. In addition to providing architectural services, the firm was to help promote the bond issue to finance the complex. The contract outlined six “public information” services they were to provide and stipulated that if the bond issue did not pass, there would be no charge for the “public information” work, but if the bond issue did pass, the architect would provide the architectural services for the project.

On April 7, 1998, Pine Lawn voters passed a bond issue of one million dollars for the purpose of providing funding for the construction of a community center in the city.

The city did not obtain at least three proposals from architectural firms before entering into the agreements. Sections 8.289 and 8.291, RSMo 1994, provide that when obtaining architectural services for any capital improvement project, at least three highly qualified firms should be considered. The firms should be evaluated based on specific criteria including experience and technical competence, capacity and capability of the firm to perform the work in question, past record of performance, and the firms proximity to and familiarity with the area in which the project is located.

In addition, the city did not have plans to obtain the additional funding at the time they entered into the second agreement with the architect or when the bond issue was passed. The City Administrator indicated they researched other funding options; however, no documentation of this was available.

The city ultimately decided not to construct a city complex and the architect sued the city for \$44,911 as payment for services provided on the second agreement. The city reached a settlement with the architect to pay him an additional \$13,358 for these services. In addition, the city expended approximately \$9,400 in legal fees related to this case from February 1999 thru March 2000.

The city's failure to properly plan for the construction and financing of this project resulted in the city spending significant amounts of city monies on architectural plans for and promotion of a project that was ultimately never started.

- B. On March 12, 1999, the city paid approximately \$3,300 to purchase and install a swing set and a "merry-go-round" in Council Grove Park. On October 11, 1999, the Board of Alderman passed Ordinance Number 824 which transferred ownership of Council Grove Park and several other adjoining lots to a construction company for the purpose of constructing new homes. The park was demolished and the new playground equipment was removed. The merry-go-round was placed in another city park and the swing set was dismantled and placed in city storage for future use.

While the city did not have the developer in place at the time the new equipment was installed in the Council Grove Park, it appears they had considered the Council Grove Park site as a potential location for new homes to be built. In addition, although the equipment purchased by the city is still usable by the city at other park locations, the cost of installing the equipment at the Council Grove location was approximately \$1,200.

The city's failure to adequately plan for the development of this site caused monies and city workers' time to be wasted.

**WE RECOMMEND** the Board of Aldermen and Mayor, in the future:

- A. Ensure that adequate funding is in place to complete the project before putting a project up for a vote of the citizens or signing any contracts for work. In addition, the city should solicit and document proposals for architectural services.
- B. Consider the future uses of property before making improvements to the property to ensure city funds are put to the best possible use.

### **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

- A. *The city acknowledges the importance of soliciting bids and documenting construction proposals and will be carefully monitoring all future endeavors to ensure they comply with accepted practices. Internal procedures will be reviewed and new procedures will be adopted where necessary. In the case of the proposed Community Center, although the citizens approved the bond issue, city officials decided not to pursue the plan at that time because of the potential burden of increased taxes on the senior population and those citizens living on a fixed income. When all financial obligations can be met without unduly taxing residents, city officials will look at new opportunities with proper planning.*

- B. *It appears that the auditors did not consider all the relevant factors surrounding this issue due to rapid changes in revitalizing the depressed community. In order to change the infrastructure and improve the outlook of the community, the city elected officials need to react quickly to accept or act upon whatever growth opportunities they can bring to Pine Lawn without any expense to the city. Although it may not have appeared to be "adequate planning", the current economic situation requires us to do whatever we can to accommodate long-term, beneficial investments in the community.*

*Due to the fact that we have encouraged new housing construction by removing dilapidated and vacant properties without committing any city dollars, we disagree with the auditor's recommendation. We will be careful in future planning, however, we will not hesitate to make investment decisions for the community as they become necessary to improve and beautify the city.*

|  |
|--|
| <b>3. Evidence and Seized Property Controls and Procedures</b> |
|--|

The police department maintains records and custody of evidence and seized property. During our review, we noted the following concerns relating to evidence and seized property:

- A. The police department's log of evidence and seized property is not adequate. The log does not indicate the date the property was seized or evidence taken or the disposition of the item. The current log shows only the case number, description of evidence or property seized, and the name of the officer who seized the property. In addition, the evidence receipts are not prenumbered.

A complete log of evidence and seized property should be maintained to ensure these items are adequately safeguarded. Periodically, an inventory should be taken of all the evidence and seized property and reconciled to the log. In addition, evidence receipts should be prenumbered and the numerical sequence accounted for to ensure that all items are recorded and disposed of properly.

This condition was noted in the prior report.

- B. The city deposits seized money into a bank account. This account contains a balance of \$40,342 as of May 2000. Some of the seized money has been held for several years including approximately \$20,000 that we commented on in our prior report.

The city should begin forfeiture proceedings on any money subject to forfeiture. All other monies should be returned.

**WE AGAIN RECOMMEND** the Board of Aldermen and the Mayor:

- A. Require a complete log of all seized property, be maintained, prenumbered evidence receipts be obtained, and the numerical sequence of the evidence receipts issued be

accounted for properly. In addition, a periodic inventory should be taken and reconciled to the log.

- B. Consult with legal counsel and determine the proper disposition of these monies.

#### **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

- A. *We will consult with our Certified Public Accountant regarding inadequate seized property procedures during our upcoming FY 2000 audit. We will implement whatever procedures are recommended.*
- B. *We will consult with our legal counsel and appropriate officials in St. Louis County to determine the proper disposition of seized monies and property. It is difficult to provide the exact time for resolving this issue since we are dependent on outside agencies and their approval, however, we intend to bring this issue to complete closure.*

|  |
|--|
| <b>4. Delinquent Trash Collection Fees</b> |
|--|

The city began charging citizens a user fee for trash collection services in 1992. The city's legal counsel advised the city this was a proper user fee. In addition, to ensure the fee was allowable, the city voted in the fee in August 1999. However, due to a large amount of uncollected trash bills, the monies received are not enough to cover the cost of trash collection services. The city's CPA audit report for the year ended June 30, 1999, stated that the city has paid over \$200,000 during the last several years from the General Fund to help pay for trash collection services. As of June 30, 1999, city records show approximately \$656,000 in uncollected trash fees.

Although we commented on this in our last report, the city has still not adequately pursued the delinquencies. The city's CPA audit report also had a similar comment. The city has not issued citations for citizens who remain delinquent for a period in excess of 90 days. In addition, the city does not review delinquent lists prior to the issuance of city permits and licenses.

City ordinance number 705 which authorizes the trash billing system states that "any owner of premises who appears on the delinquent list and further remains delinquent for a period in excess of 90 days shall receive a citation from the City which shall carry a \$50 fine for said violation." The ordinance further states that "no owner shall be issued any license or permit unless the collection charge for his residence has been paid." The city ordinance also allows for a lien for the amount of delinquent trash bills to be filed against the owner's property.

Since some residents are paying timely for this service, it does not appear equitable to allow other residents to receive the same services for free.

If the city continues to contract with a trash hauler and bill residents for this service, delinquent fee collection procedures need to be instituted. The city should consider issuing citations, not issuing licenses and permits, or filing liens against property owners who are delinquent in paying their trash bills. The city should consider whether it would be beneficial to hire a collection agency to help reduce the delinquent amount. Delinquent bills that are considered uncollectable should be written off by the city.

**WE AGAIN RECOMMEND** the Board of Aldermen and the Mayor ensure citations are issued to property owners who are delinquent in excess of 90 days, and ensure no permits or licenses are issued to any property owner who appears on the delinquent list. The board should consider instituting other procedures to collect the delinquencies as the city deems appropriate. Amounts that are deemed uncollectible should be written off of the city's records.

### **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

*This issue is difficult to address because of its complexity and unpopularity with our elected officials, given the political implications. However, the current administration will dedicate and devote the time to bring this issue to the table and to discuss all pertinent aspects of collectibility. Presently, we are seriously debating the following options:*

- a. To hire an outside agency to collect the delinquent trash fees.*
- b. To give landlords an option to pay delinquent trash fees in full within 90-120 days and forgive the accumulated interest and penalties as of the implementation date.*
- c. To forgive delinquent trash fees for those citizens who are unable to pay a large sum due to their fixed income or for whom the amount creates a real financial hardship.*
- d. To hire additional staff to administer trash billing in-house in order to gain better control of delinquent trash fees.*

*However, your recommendation that we issue citations every 90 days and place liens on property involves real legal and practical problems such as lack of personnel to administer and enforce the program. The current court system is overloaded with moving and non-moving violations and would be overwhelmed with the addition of more housing citations. In conclusion, we will review all the options available to us along with our current ordinance, which may require some changes pertaining to trash fee collectibility. It is our intention to adopt the most workable and enforceable solution within 120 days.*

|                                  |
|----------------------------------|
| <b>5. City Business Licenses</b> |
|----------------------------------|

The city does not have an adequate system in place to ensure compliance with city business license and building code ordinances. One local garage has been operating without a valid city license for at least two years. Ordinance section 600.040 expressly prohibits any Pine Lawn business from operating without a valid city business license. Although the city has been attempting to regulate this business for several years, the garage continues to operate in violation of city code. On January 20, 2000, the owner paid \$164 for a business license; however, when the city Building Inspector conducted an inspection, he noted several areas that were not in compliance with the building codes. As of March 31, 2000, the city has not yet issued the license and the garage continues to operate without a business license.

In addition, from July 1, 1998 to March 31, 2000, the city made payments to this company totaling \$443 for towing and tire repair of city vehicles. Utilizing the services of a company which is operating without a business license, does not appear appropriate for the city. Based on discussions with city officials, it appears that other garages in the city could also potentially be out of compliance with city codes. City ordinances represent laws of the city and should be properly enforced.

**WE RECOMMEND** the Board of Aldermen and the Mayor ensure that a system is in place to enforce city ordinances regarding business licenses and building codes. In addition, the city should discontinue the practice of utilizing the services of a business that does not have a current business license.

### **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

*The city does have an adequate system in place to monitor city business licenses and building code enforcement. Currently, the individual whose license was revoked is involved in pending litigation with the city, and we reserve the right to not address this specific finding.*

### **AUDITOR'S COMMENT**

It appears the city does not have an adequate system in place to monitor city business license and building code enforcement. This business has continued to operate in violation of city codes and without a license for at least two years.

|   |
|---|
| <b>6. Board Meetings and Ordinances</b> |
|---|

- A. The Board of Alderman discussed items in closed session that are not allowed to be discussed under the provisions of the Sunshine Law. In addition, the Board of Alderman discussed items in closed session that were not included on the closed session agendas.

Section 610.021, RSMo Cumulative Supp. 1999, allows the board to close meetings to the extent the meetings relate to certain specified subjects, including litigation, real estate transactions, personnel issues, some competitive bidding issues, confidential or privileged communications with auditors, etc. Section 610.022, RSMo Cumulative Supp. 1999, requires a closed meeting, record or vote be held only for the specific reasons announced publicly at an open session. In addition, this law provides that public governmental bodies shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote.

B. The city has not adopted ordinances which are required by state law or would provide helpful guidelines for city operations:

1. Although we recommended in our prior audit that the city adopt ordinances to establish the duties of several city officials including the City Administrator, Building Commissioner, Street Supervisor, Police Clerk and City Attorney, the city has not done so. To better clarify the expected duties and responsibilities of city employees, the city should have written job descriptions for all positions at the city. In addition, Section 79.290, RSMo 1994, requires that the duties of officers of the city be prescribed by ordinance.
2. The city owns a Senior Citizen Building next to City Hall and allows various groups to rent the building. While the city does have an informal policy, they do not have a written policy or ordinance outlining for what purposes the Senior Citizen Building can be used and the fee charged for rental of the building.

An ordinance outlining the city's policy regarding use of this building and fees charged would help avoid confusion and ensure all citizens and groups are treated equitably.

**WE RECOMMEND** the Board of Aldermen and the Mayor:

- A. Ensure minutes and agendas state the specific reasons for going into a closed session, as required by state law, and that only the items specified in the agenda are discussed in the closed meeting. In addition, ensure that only items allowed in Section 610.021, RSMo Cumulative Supp. 1999, are discussed in closed meetings.
- B.1. Enact an ordinance establishing duties and descriptions of all city positions that are not currently in the City Code.
2. Enact an ordinance establishing policies regarding the rental of the Senior Citizen Building.

## **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

*The city appreciates the auditors' observation and comments. Because allegations of prior statutory violations (minor and technical) of the Sunshine Law are involved, the city does not intend any of its response to be construed as any type of admission. The city has recently appointed a new legal counsel, who will provide model ordinances, procedures and resolutions to ensure that the Sunshine Law is fully observed to accommodate the rights of the citizens and the media. Since the administrative staff is very limited and performs overlapping duties, it is difficult to establish and determine specific job descriptions. However, we will consider the recommendation as suggested with our legal counsel to rectify this issue. Regarding use of all public buildings for personal or political use, the city intends to enact an ordinance or adopt a policy and procedures within 120 days.*

|   |
|---|
| <b>7. Budgets and Financial Reporting</b> |
|---|

A. The city does not publish semiannual financial statements. Section 79.160, RSMo 1994, requires the Board of Aldermen to prepare and publish semiannual statements of receipts, expenditures, and indebtedness of the city. In addition, Section 79.165, RSMo 1994, states that the treasurer shall not pay out any money of the city after the end of the month in which such financial statement should have been published, until such time as such financial statement is published.

B. City budgets are not approved on a timely basis. The city operates on a July 1 to June 30 fiscal year. The budgets for fiscal years beginning July 1, 1998 and 1999, were not approved until October 1998 and February 2000, respectively.

Section 67.010, RSMo 1994, requires each political subdivision to prepare a budget for the ensuing year. To be of maximum benefit to the taxpayers and the city, the budget should be prepared and adopted prior to the beginning of the fiscal year. In addition, the city's lease agreement with the Pine Lawn Municipal Assistance Corporation stipulates that the lease agreement is terminated if the city fails to have an approved budget by November 1 of each year of the lease agreement.

C. The Board of Aldermen does not receive enough information to monitor the budget and evaluate the financial position of the city's funds. A list of expenditures is prepared each month for the board to approve and the Treasurer reports whether there is enough money to pay the bills for the month. However, the balances of each fund, and an analysis of the budgeted and actual revenues and expenditures to date, are not provided. As a result, the city overspent the approved General Revenue budget by \$10,616 and \$10,470 for the years ended June 30, 1999 and June 30, 1998, respectively. This concern was also noted in the city's CPA audit report.

The budget process provides a means to allocate financial resources in advance. Failure to adhere to the expenditure limits imposed by the budgets weakens the effectiveness of this process. Section 67.040, RSMo 1994, allows for budget increases, but only after the governing body officially adopts a resolution setting forth the facts and reasons. Section 67.080, RSMo 1994, provides that no expenditure of public monies shall be made unless it is authorized in the budget. The Board of Aldermen should review budget to actual comparisons prior to approving expenditures.

For the aldermen to properly manage the finances of the city, they should be provided with the balances of funds held by the city and an analysis of budgeted and actual revenues and expenditures to date periodically.

These conditions were noted in our prior report and the city at that time indicated it would implement the recommendations.

**WE AGAIN RECOMMEND** the Board of Aldermen and the Mayor:

- A. Prepare and publish semiannual financial statements in accordance with state law.
- B. Adopt the city budget prior to the beginning of the city's fiscal year, as required by state law and lease provisions.
- C. Require complete information regarding the financial position of the city, including balances of funds held by the city and a comparison of budgeted and actual revenues and expenditures to date each month. In addition, the Board of Aldermen should ensure expenditures for individual funds do not exceed the amounts approved in the budget, unless proper and timely amendments are made prior to the expenditures.

#### **AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

*It is not always practical to implement or enforce the steps required to perform precisely the duties outlined by Missouri statutes. However, the city intends to correct and adopt the following measures:*

- a. *To ensure semi-annual financial statements are published as suggested effective FY 2001, etc. A financial statement will be published for the period ending December 31, 2000.*
- b. *To try to adopt its budget prior to the beginning of each fiscal year.*
- c. *To consider some other cost-efficient method and less cumbersome plan of furnishing the required financial information to enable elected officials to evaluate the financial*

*position of the city; due to the limited technical skills of the administrative staff, it will be difficult to implement and provide complete city financial data on a monthly basis. We will implement some method of reporting by June 30, 2001.*

**8.**

### **City Property Records**

- A. The city has not established adequate records to account for city property. Property records are necessary to secure better internal controls over assets and provide a basis for determining insurance coverage.

The city should establish adequate detailed property records. All property items (including land) should be recorded at historical cost or estimated historical cost, if historical cost is not available. The records should be maintained on a perpetual basis, accounting for property additions and dispositions as they occur. In addition, all items should be identified as city property with a tag or similar device and an annual inventory of property should be performed and agreed to the detailed property records.

A similar concern was noted in the city's CPA audit report.

- B. The city, through its various departments, owns and operates approximately 23 vehicles. The city owns a gas tank that is filled up approximately weekly. During our review of city vehicle and gasoline usage, we noted the following concerns:

1. Each vehicle has a log sheet that documents when the vehicle is filled with gas. This log shows the date, gallons of gas pumped, mileage, and the person who pumped the gas. However, the city does not maintain information regarding the total amount of gas pumped from the tank.

The city should periodically determine and document the number of gallons pumped during that period. To ensure all fuel is properly recorded on the vehicle logs and accounted for, the city should reconcile gallons of gas pumped to gallons of gas recorded on the vehicle logs and reconcile the gallons of gas purchased to the gallons of gas pumped and remaining on hand.

2. Complete logs are not maintained for city-owned vehicles documenting their use. While the logs above document the vehicle mileage and number of gallons used, they do not document the purpose and destination of each trip. In addition, the city does not have a policy which addresses the appropriate use of city vehicles. Logs are necessary to document appropriate use of the vehicles and to support gasoline charges. A policy helps ensure that vehicles are used in a manner approved by the Board of Aldermen.

The logs should include the purpose and destination of each trip, along with the odometer readings and gas usage information. These logs should be reviewed to help ensure vehicles are used for city business only, are being properly utilized, and to help identify vehicles which should be replaced. Information on the logs should be reconciled to gasoline and other maintenance charges.

These conditions were noted in our prior report and the city indicated at that time that it would implement the recommendations.

**WE AGAIN RECOMMEND** the Board of Aldermen and the Mayor:

- A. Establish complete and detailed property records that account for all property items of the city. These records should be updated for any property additions or dispositions as they occur. In addition, all items should be tagged or otherwise identified as city property and an annual physical inventory should be taken of all city-owned property.
- B.1. Maintain records of the gallons of gas pumped and reconcile these records to the gallons of gas recorded on the vehicle logs and the gallons of gas purchased.
- 2. Establish a written policy for the use of city vehicles and require a complete and accurate log be maintained for each vehicle.

**AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

*The City intends to adopt the following:*

- A. *To implement a plan that requires: proper listing of fixed assets with a useful life of 3 or more years, a listing of each item purchased and deleted during the fiscal year, reconstruction of a list of existing fixed assets and their usefulness, and an annual inventory procedure. This will be done by June 2001.*
- B. *To implement procedures for reconciliation between gasoline used and gasoline purchased each month, without impacting the service to the citizens and to neighboring municipalities according to the Mutual Aid contractual agreement. Identifying the purpose of the trip and destination of each trip will be difficult and time-consuming to implement for the majority of city vehicles, which are used by police officers and street department employees to conduct their business. A written policy will be established by June 30, 2001.*

**9.****Miscellaneous Records and Procedures**

- A. The City Clerk, City Administrator, Court Clerk and Assistant Court Clerk do not prepare time sheets. Time sheets are necessary to document hours actually worked, substantiate payroll expenditures and the allocation of payroll expenditures to the various funds, and to provide the board with a method to monitor hours worked. To support payroll expenditures, the city should require all employees prepare detailed time sheets.
- B. Records of vacation or sick leave earned and taken and accumulated balances are not updated timely and do not appear complete. The city does not document the accumulated balances of leave at the end of each month.

Adequate documentation of leave earned, taken and accumulated is necessary to ensure employees are properly compensated for accumulated leave and to ensure time used is not in excess of time accumulated.

This condition was noted in our prior report.

- C. From the period of July 1998 through January 2000, the city's municipal court collected a total of \$20,015 of police training monies. Of the three dollar fine charged on each case in the municipal court, two dollars is for local law enforcement training and the other dollar is the Peace Officer Standards and Training Commission (POSTC) fee and is to be remitted to the state. In addition, the municipal court has collected a one dollar domestic violence fee as allowed in Section 479.261, RSMo Cumulative Supp. 1999, for several years. We noted the following concerns related to the handling of these fees:
  - 1. Approximately \$13,300 of the total police training monies collected were for the purpose of local law enforcement training. While the city expended \$7,306 on police training out of the city's general fund during the two years ended June 30, 1999, the city has not established a separate fund or separate accounting to ensure these receipts are expended only for the purpose of local law enforcement training.
  - 2. The city has not disbursed the state's portion of the POSTC fees collected. Section 590.140, RSMo Cumulative Supp. 1999, requires these fees to be distributed monthly to the state.
  - 3. The city has not disbursed the domestic violence fees collected to St. Louis County for disbursement to a local domestic violence shelter.
- D. The city collects a one half of one percent sales tax for the purpose of improving parks and storm water control in the city. While the city can determine the amount of

sales tax receipted and expended each year for this purpose, the unspent balance of these sales tax monies is not accounted for separately. Section 644.032, RSMo Cumulative Supp. 1999, requires these monies be deposited in a special trust fund to be used for funding storm water control and local parks. A separate accounting of any unspent balance along with future years receipts and disbursements of sales tax monies would help ensure these receipts are expended only for the purpose intended by the sales tax.

- E. When a candidate files for city office, the city does not check to ensure a current occupancy permit is on file. Two of the three current board members who do not have occupancy permits on file have been residents for many years prior to the city requiring all residents to have occupancy permits. However, there has been some controversy regarding the third board member's residency in Pine Lawn. Requiring all candidates for elected office to have an occupancy permit on file with the city would help to validate the residency of all candidates for the Board of Aldermen and avoid controversy.

**WE RECOMMEND** the Board of Aldermen and the Mayor:

- A. Require all city employees to prepare detailed time sheets.
- B. Ensure records are maintained for all employees to document vacation and sick leave earned, taken, and accumulated on a monthly basis.
- C.1. Establish a separate fund or accounting of the local law enforcement training fees to ensure these funds are spent only for the purposes of police training.
  - 2. Determine the total amount of POSTC fees due to the state and remit these fees in accordance with the law.
  - 3. Determine the total amount of domestic violence fees owed to St. Louis County and remit as required.
- D. Establish a separate fund for these sales tax monies to ensure these receipts are spent in accordance with the purpose of the sales tax.
- E. Require all candidates for elected office in the city to have an occupancy permit on file with the city in order to validate residency.

**AUDITEE'S RESPONSE**

*The Mayor and City Administrator responded:*

- A. *We will require court clerks to submit attendance sheets since they are being paid overtime for work over 40 hours per week. The Administrator and City Clerk are exempt from*

*attendance sheets because they are salaried employees and available for 24 hours a day and are not compensated for time over 40 hours a week. The Court Clerks' attendance sheets will be implemented immediately.*

- B. The city does have adequate documentation of vacation and sick leave earned, used and accumulated, but extension of the balances was not carried out to the final column as balance on hand for any given month. However, effective immediately, the city intends to update all employees' vacation and sick leave earned, used and accumulated on a quarterly basis instead of a monthly basis.*
- C.1. We intend to review this issue with the city's auditors to determine whether we can establish additional procedures as an alternative to opening a separate bank account, which would require manual record keeping for very little activity.*
- C.2. Any prior and current year funds which are being held for Peace Officer Standards and Training Commission (POSTC) will be disbursed immediately to the state in accord with state law.*
- C.3. Any prior and current year funds which have been collected for domestic violation fees will be disbursed immediately to St. Louis County for local domestic violence shelters.*
- D. We intend to establish a separate accounting for the Parks and Storm Waters sales tax monies in accordance with state law. This will be done in the next three months.*
- E. The city will consider the recommendation and proceed with caution to avoid any political and legal liability to the city or to those individuals who oversee the program.*

#### **AUDITOR'S COMMENT**

- A.** Timesheets should be prepared by all staff including salaried employees. Such records serve to document actual hours worked as well as vacation and sick leave for the board to monitor and to substantiate any allocation of payroll costs between various funding sources.
- C.1.** We do not recommend the city open another bank account for these monies. Our recommendation is that the city account for these monies separately in some way to ensure they are spent appropriately. This can be done by maintaining a separate fund for these monies or tracking applicable revenues and expenditures in an existing account.

|            |                                 |
|------------|---------------------------------|
| <b>10.</b> | <b>Municipal Court Division</b> |
|------------|---------------------------------|

- A.** We noted the following concerns relating to court receipts:
  - 1)** Although the Court clerk was able to provide us bank reconciliations for the period audited, she does not always perform and/or document a formal bank

reconciliation monthly. Monthly bank reconciliations are necessary to ensure that accounting records are in agreement with the bank and errors are detected on a timely basis. Without proper documentation, there is little assurance that these reconciliations have been performed.

- 2) In our prior report, the city indicated checks and money orders were being restrictively endorsed immediately upon receipt; however, during our audit period checks and money orders are not restrictively endorsed until the deposits are prepared. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- 3) The duties of receiving, recording, and transmitting monies collected by the municipal court are not adequately segregated, and although the City Administrator indicated he agrees court receipts to transmittals to the city about twice a month, these reconciliations are not documented. In addition, the City Administrator does not reconcile bond receipts to deposits to the bond account.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving monies from that of recording receipts and depositing court monies. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the reconciliations between receipts and transmittals.

This condition was also noted in our prior report.

B. We noted the following concerns relating to bonds:

- 1) Monthly listings of open items (liabilities) are not prepared and reconciled to the bond account bank reconciliation balance. A monthly listing of open items is necessary to ensure proper accountability over open cases and to ensure the monies held in trust are sufficient to meet liabilities. As of March 31, 2000, the city prepared an open items listing that materially agreed to the reconciled bank balance. However, this reconciliation should be performed on a monthly basis.
- 2) The municipal court division has not implemented adequate procedures to follow up on bonds held for more than one year. As of June 30, 1999, the balance of the city's bond account included bond receipts totaling \$8,747 which have been held at least two years.

An attempt should be made to determine the proper disposition of these bonds. A review should be made of any bonds posted by persons who failed

to make the required court appearance to determine if the bonds should be forfeited and monies paid over to the city treasury as provided by Section 479.210, RSMo 1994. For those bonds which are held on closed cases and remain unclaimed, Section 447.500 through 447.505, RSMo Cumulative Supp. 1999, which relate to unclaimed property, should be used to disburse these monies.

- 3) Bonds collected by the police department are not transmitted to the Court Clerk on a timely basis. Bonds are transmitted to the Court Clerk only once or twice a week. To adequately safeguard bond receipts and reduce the risk of loss or misuse of funds, transmittals should be made daily or when accumulated receipts exceed \$100.
- 4) A bond fee of \$2 is collected each time a defendant is placed under arrest and posts a bond. This fee is transmitted directly to the city. However, the bond fee is recorded various ways in the bond ledger. Sometimes it is recorded as part of the bond amount, sometimes it is recorded separately from the bond amount, and still other times it is not recorded in the bond ledger at all.

The bond fee should always be recorded in the bond ledger. The police department should consider recording the total amount received in one column, and then recording the bond amount and the bond fee amount, each in separate columns. The bond ledger should include all bond and bond fee receipts to ensure proper accountability over bonds.

Similar conditions were noted in our prior report and at that time the city indicated they would implement the recommendations.

- C. Prior to January 2000, the police department accounted for the numerical sequence of traffic tickets and summonses issued. However, due to a system change, the numerical sequence is no longer accounted for properly.

Without a proper accounting of the numerical sequence of traffic tickets and summonses issued, the police department and the court cannot be assured that all tickets and summonses were properly submitted to the court for processing. A log listing the ticket and summonses number, the date issued, and the violator's name would ensure all summonses were properly submitted to the court for processing, properly voided, or not prosecuted.

This condition was noted in our prior report.

- D. Procedures established to pursue the collection of delinquent accounts and failure to appear cases include issuing warrants; however, the court did not always monitor to ensure warrants were issued on a timely basis.

Proper and timely issuance of warrants for amounts due to the court helps to maximize court revenues along with providing equitable treatment for those citizens who are paying fines and court costs when due.

**WE RECOMMEND** the city of Pine Lawn Municipal Division:

- A.1. Ensure monthly bank reconciliations are performed and documented.
- 2. Restrictively endorse all checks and money orders immediately upon receipt.
- 3. Properly segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.
- B.1. Prepare monthly listings of open items and reconcile this listing to the balance in the bank account.
- 2. Implement adequate procedures to follow up on bonds being held and dispose of them in accordance with state law.
- 3. Transmit bond receipts daily or when accumulated receipts exceed \$100.
- 4. Ensure that the bond fee is always recorded in the bond ledger.
- C. Work with the police department to ensure records are maintained to account for the numerical sequence of all tickets and summonses issued.
- D. Monitor to ensure all warrants are prepared and activated in a timely manner.

**AUDITEE'S RESPONSE**

*The Mayor and the City Administrator responded:*

- A. *The city accepts the findings and plans to implement: monthly bank statement reconciliation, restrictive endorsement of checks and money orders, and reconciliation of bond receipts to deposits by an independent individual.*
- B. *The city also accepts the following recommendation: to reconcile open bonds to the bank statement on a monthly basis, to turn over to the state any funds from the disposition of bonds held more than a year, to deposit bond receipts more frequently, and to ensure that the bond fee is posted properly in the ledger.*
- C. *The city intends to work with the police department to ensure the accountability and numerical sequence of all tickets and summons.*
- D. *The city intends to work with the police department and court clerks to ensure the efficient preparation of all warrants.*

*The above recommendations will be implemented by June 30, 2001.*

This report is intended for the information of the management of the city of Pine Lawn, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

CALDWELL COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-107  
September 27, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

September 2000

[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

**IMPORTANT:** The Missouri State Auditor is required by Missouri law to conduct audits only once every four years in counties, like Caldwell, which do not have a county auditor. However, to assist such counties in meeting federal audit requirements, the State Auditor will also perform a financial and compliance audit of various county operating funds every two years. This voluntary service to Missouri counties can only be provided when state auditing resources are available and does not interfere with the State Auditor's constitutional responsibility of auditing state government.

Once every four years, the State Auditor's statutory audit will cover additional areas of county operations, as well as the elected county officials, as required by Missouri's Constitution.

-----  
This audit of Caldwell County included additional areas of county operations, as well as the elected county officials. The following concerns were noted as part of the audit:

- In the spring of 2000, county officials were notified that various political subdivisions in the county had not received some property tax distributions from the Kidder Township Collector. According to statements filed for the months of November 1999 through February 2000, approximately \$257,000 was collected and distributed, however \$5,869 was not paid to several political subdivisions. Tax collections were deposited and distributions were made from the Kidder Township collector bank account. Additionally, numerous personal disbursements were made from this account. As of April 5, 2000, only \$93 remained in the account and the amount of personal disbursements exceeded allowable commissions by more than \$5,200.

Additionally, one taxpayer included on the delinquent tax list produced a canceled check and paid receipt showing \$1,030 had been paid. There was no evidence that these collections were ever distributed to the various political subdivisions. The county needs to review the yearly settlement as well as the unpaid amounts on the delinquent tax list and take the appropriate action. The county also needs to ensure that statutorily required bonds are obtained for all township collectors.

- The county does not have procedures in place to ensure budget documents are properly prepared and accurately reflect financial activities of the county. By the County Clerk not maintaining an independent record of revenues and expenditures for reconciliation with the County Treasurer, inaccuracies went undetected.

(over)

YELLOW SHEET

- The county has not sufficiently reduced its property tax revenues by 50 percent of the sales tax revenues as provided in the ballot issue passed by the Caldwell county voters under the provisions of Missouri statute. The county had no supporting documentation to explain why the tax levy was not decreased in 1999 and had no documentation for prior years levy calculations. The county should consider the excess collections when computing future property tax rollbacks.
- The county does not have procedures in place to adequately track federal assistance for preparation of the schedule of expenditures of federal awards. The information presented for most programs did not agree with the county's expenditures records. Without an accurate schedule of expenditures of federal awards, federal financial activity may not be audited and reported in accordance with federal audit requirements which could result in future reductions of federal funds.

The audit recommended improvements in other budgeting procedures, county expenditure procedures, personnel policies and procedures, fixed assets and property tax book controls. Also included in the report are recommendations on accounting controls for the Circuit Clerk, Sheriff, Prosecuting Attorney and County Clerk.

**Copies of the audit are available upon request.**

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON THE FINANCIAL  
STATEMENTS AND SUPPLEMENTARY SCHEDULE OF  
EXPENDITURES OF FEDERAL AWARDS**

To the County Commission  
and  
Officeholders of Caldwell County, Missouri

We have audited the accompanying special-purpose financial statements of various funds of Caldwell County, Missouri, as of and for the years ended December 31, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the county's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of various funds of Caldwell County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county and are not intended to be a complete presentation of the financial position and results of operations of those funds or of Caldwell County.

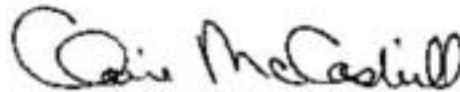

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of various funds of Caldwell County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county as of and for the years ended December 31,

1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated June 29, 2000, on our consideration of the county's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the special-purpose financial statements. Such information has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the special-purpose financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the management of Caldwell County, Missouri, and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

Claire McCaskill  
State Auditor

June 29, 2000 (fieldwork completion date)

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED  
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the County Commission  
and  
Officeholders of Caldwell County, Missouri

We have audited the special-purpose financial statements of various funds of Caldwell County, Missouri, as of and for the years ended December 31, 1999 and 1998, and have issued our report thereon dated June 29, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of various funds of Caldwell County, Missouri, are free of material misstatement, we performed tests of the county's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards*, and which is described in the accompanying Schedule of Findings and Questioned Costs as finding number 99-2. We also noted certain immaterial instances of noncompliance which are described in the accompanying Management Advisory Report.

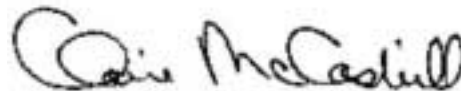

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of various funds of Caldwell County, Missouri, we considered the county's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted a certain matter involving the internal control over financial

reporting and its operation that we consider to be a reportable condition. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the county's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements. The reportable condition is described in the accompanying Schedule of Findings and Questioned Costs as finding number 99-1.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we consider finding number 99-1 to be a material weakness. We also noted other matters involving the internal control over financial reporting which are described in the accompanying Management Advisory Report.

This report is intended for the information of the management of Caldwell County, Missouri; federal awarding agencies and pass-through entities; and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

CALDWELL COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present the receipts, disbursements, and changes in cash of various funds of Caldwell County, Missouri, and comparisons of such information with the corresponding budgeted information for various funds of the county. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission, an elected county official, or the Health Center Board. The General Revenue Fund is the county's general operating fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

B. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed by warrant or in cash. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Budgets and Budgetary Practices

The County Commission and other applicable boards are responsible for the preparation and approval of budgets for various county funds in accordance with Sections 50.525 through 50.745, RSMo 1994 and RSMo Cumulative Supp. 1999, the county budget law. These budgets are adopted on the cash basis of accounting.

Although adoption of a formal budget is required by law, the county did not adopt formal budgets for the following funds:

| <u>Fund</u>                              | <u>Years Ended December 31,</u> |
|--|---------------------------------|
| Associate Circuit Division Interest Fund | 1999 and 1998                   |
| Prosecuting Attorney Delinquent Tax Fund | 1999 and 1998                   |
| Local Emergency Planning Commission Fund | 1999                            |

Warrants issued were in excess of budgeted amounts for the following funds:

| <u>Fund</u>                         | <u>Years Ended December 31,</u> |
|-------------------------------------|---------------------------------|
| General Revenue Fund                | 1999 and 1998                   |
| Special Road and Bridge Fund        | 1999 and 1998                   |
| Assessment Fund                     | 1999 and 1998                   |
| Prosecuting Attorney Bad Check Fund | 1999 and 1998                   |
| Law Library Fund                    | 1999 and 1998                   |
| Law Enforcement Sales Tax Fund      | 1999 and 1998                   |
| Prosecuting Attorney Training Fund  | 1999                            |
| Law Enforcement Training Fund       | 1998                            |
| Domestic Violence Fund              | 1998                            |
| Crime Victims Investigation Fund    | 1998                            |
| Record Storage Fund                 | 1999                            |
| Circuit Clerk Interest Fund         | 1999                            |
| Planning and Zoning Fund            | 1999                            |

Section 50.740, RSMo 1994, prohibits expenditures in excess of the approved budgets.

A deficit budget balance is presented for the General Revenue Fund for the year ended December 31, 1999; however, the budget of that fund also included other resources available to finance current or future year disbursements. Generally, other available net resources represented current year property taxes not received before December 31. Such resources were sufficient to offset the deficit budget balance presented.

Although Section 50.740 RSMo 1994 requires a balanced budget, a deficit balance was budgeted in the Sheriff Civil Fees Fund for the year ended December 31, 1998.

D. Published Financial Statements

Under Sections 50.800 and 50.810, RSMo 1994, the County Commission is responsible for preparing and publishing in a local newspaper a detailed annual financial statement for the county. The financial statement is required to show receipts or revenues, disbursements or expenditures, and beginning and ending balances for each fund.

However, the county's published financial statements did not include the following funds:

| <u>Fund</u>                              | <u>Years Ended December 31,</u> |
|--|---------------------------------|
| Law Enforcement Training Fund            | 1999 and 1998                   |
| Prosecuting Attorney Training Fund       | 1999 and 1998                   |
| Special Road and Bridge Sales Tax Fund   | 1999 and 1998                   |
| Prosecuting Attorney Bad Check Fund      | 1999 and 1998                   |
| Domestic Violence Fund                   | 1999 and 1998                   |
| Crime Victim Investigation Fund          | 1999 and 1998                   |
| Sheriff Civil Fees Fund                  | 1999 and 1998                   |
| Planning and Zoning Fund                 | 1999 and 1998                   |
| Record Preservation Fund                 | 1999 and 1998                   |
| Prosecuting Attorney Delinquent Tax Fund | 1999 and 1998                   |
| Health Center Fund                       | 1998                            |

## 2. Cash

Section 110.270, RSMo 1994, based on Article IV, Section 15, Missouri Constitution, authorizes counties to place their funds, either outright or by repurchase agreement, in U.S. Treasury and agency obligations. In addition, Section 30.950, RSMo Cumulative Supp. 1999, requires political subdivisions with authority to invest in instruments other than depositary accounts at financial institutions to adopt a written investment policy. Among other things, the policy is to commit a political subdivision to the principles of safety, liquidity, and yield (in that order) when managing public funds and to prohibit purchase of derivatives (either directly or through repurchase agreements), use of leveraging (through either reverse repurchase agreements or other methods), and use of public funds for speculation. The county has not adopted such a policy.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of cash deposits. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, savings institutions, and credit unions.

The county's and the health center's deposits at December 31, 1999 and 1998, were entirely covered by federal depositary insurance or by collateral securities held by the county's or health center's holding bank in the county's or health center's name.

However, because of significantly higher bank balances at certain times during the year, uninsured and uncollateralized balances existed for the Health Center Board at those times although not at year-end.

To protect the safety of county deposits, Section 110.020, RSMo 1994, requires depositaries to pledge collateral securities to secure county deposits not insured by the Federal Deposit Insurance Corporation.

3. Property Taxes

Through December 31, 1999, Caldwell County collected \$22,906 in excess property taxes. Section 67.505, RSMo 1994, requires the county to reduce property taxes for a percentage of sales taxes collected. Caldwell County voters enacted a one-half cent sales tax with a provision to reduce property taxes by fifty percent of sales taxes collected. Tax levies were not reduced sufficiently for actual sales tax collections.

N/A - Not applicable

The accompanying Notes to the Schedule of Expenditures of Federal Awards are an integral part of this schedule.

## Notes to the Supplementary Schedule

CALDWELL COUNTY, MISSOURI  
NOTES TO THE SUPPLEMENTARY SCHEDULE

1. Summary of Significant Accounting Policies

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of OMB Circular A-133. This circular requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA information is not available.

The schedule includes all federal awards administered by Caldwell County, Missouri.

B. Basis of Presentation

OMB Circular A-133 includes these definitions, which govern the contents of the schedule:

*Federal financial assistance* means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals . . . .

*Federal award* means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Accordingly, the schedule includes expenditures of both cash and noncash awards.

C. Basis of Accounting

Except as noted below, the schedule is presented on the cash basis of accounting, which recognizes amounts only when disbursed in cash.

Amounts for the Surplus Property (CFDA number 12.unknown) represent the estimated fair market value of property at the time of receipt.

Of the amounts for Immunization Grants (CFDA number 93.268), \$7,498 and \$7,689 represent the original acquisition cost of other vaccines purchased by the Centers for Disease Control but distributed to the Health Center through the state Department of Health during the years ended December 31, 1999 and 1998. The amounts for the Preventive Health and Health Services Block Grant (CFDA number 93.991), \$89 and \$200, represent the original acquisition cost of vaccines received by the Health Center through the state Department of Health during the years ended December 31, 1999 and 1998. Of the amounts for the Maternal and Child Health Services Block Grant to the States (CFDA number 93.994), \$446 and \$699 also represent the original acquisition cost of vaccines received by the Health Center through the state Department of Health during the years ended December 31, 1999 and 1998. The remaining pass-through amounts for Immunization Grants and the Maternal and Child Health Services Block Grant to the States represent cash disbursements.

2. Subrecipients

Of the federal expenditures presented in the schedule, the county provided \$160,459 and \$187,818 to subrecipients under the Public Assistance Grants (CFDA number 83.544) during the year ended December 31, 1999 and 1998.

FEDERAL AWARDS -  
SINGLE AUDIT SECTION

## State Auditor's Report

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH  
REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL  
CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

To the County Commission  
and  
Officeholders of Caldwell County, Missouri

Compliance

We have audited the compliance of Caldwell County, Missouri, with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to its major federal program for the years ended December 31, 1999 and 1998. The county's major federal program is identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to its major federal program is the responsibility of the county's management. Our responsibility is to express an opinion on the county's compliance based on our audit.

We conducted our audit of compliance in accordance with generally accepted auditing standards; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the county's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the county's compliance with those requirements.

In our opinion, Caldwell County, Missouri, complied, in all material respects, with the requirements referred to above that are applicable to its major federal program for the years ended December 31, 1999 and 1998. However, the results of our auditing procedures disclosed an instance of noncompliance with those requirements, which is required to be reported in accordance with

OMB Circular A-133 and which is described in the accompanying Schedule of Findings and Questioned Costs as finding number 99-3.

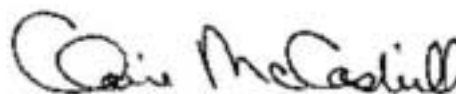

#### Internal Control Over Compliance

The management of Caldwell County, Missouri, is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the county's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on the internal control over compliance in accordance with OMB Circular A-133.

We noted a certain matter involving the internal control over compliance and its operation that we consider to be a reportable condition. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over compliance that, in our judgment, could adversely affect the county's ability to administer a major federal program in accordance with the applicable requirements of laws, regulations, contracts, and grants. The reportable condition is described in the accompanying Schedule of Findings and Questioned Costs as finding number 99-3.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with the applicable requirements of laws, regulations, contracts, and grants that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we do not believe the reportable condition described above is a material weakness.

This report is intended for the information of the management of Caldwell County, Missouri; federal awarding agencies and pass-through entities; and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

Claire McCaskill  
State Auditor

June 29, 2000 (fieldwork completion date)

Schedule

CALDWELL COUNTY, MISSOURI  
SCHEDULE OF FINDINGS AND QUESTIONED COSTS  
(INCLUDING MANAGEMENT'S PLAN FOR CORRECTIVE ACTION)

Dollar threshold used to distinguish between Type A  
and Type B programs: \$300,000

Auditee qualified as a low-risk auditee?        yes   x   no

## Section II - Financial Statement Findings

This section includes the audit findings that *Government Auditing Standards* requires to be reported for an audit of financial statements.

|              |                            |
|--------------|----------------------------|
| <b>99-1.</b> | <b>Financial Reporting</b> |
|--------------|----------------------------|

The county does not have procedures in place to ensure the county's budget documents are properly prepared and that they accurately present financial activities of the county. Numerous inaccuracies were noted in the actual information presented in the county's budget documents for 1999 and 1998. These errors included the omission of \$158,372 in revenue by the Special Road and Bridge Fund 1999, the erroneous inclusion of \$20,000 of revenue in the form of a bank loan in 1999 and the inclusion of a beginning cash balance from a previous year.

The County Clerk does not maintain a ledger of revenue and expenditures which can be reconciled to the County Treasurer's records; instead, she records revenue and expenditures using a computer spreadsheet and manual receipt slips. She uses the manual receipt slips to compile the budget document information. In addition, a thorough review of financial activity presented in the budget is not performed. By not maintaining an independent record of revenue and expenditures which could be reconciled to the County Treasurer's records, errors and omissions made by either official as well as corrections and adjustments made by the County Treasurer were not detected, resulting in the inaccuracies noted above.

In addition to being required by state law, complete and accurate budgets are essential for the County Commission and County Clerk to evaluate county operations and to project anticipated needs of the county for the upcoming year.

Adjustments have been made to the audited financial statements so that information presented reconciles to the County Treasurer's revenue, expense and cash balance totals.

**WE RECOMMEND** the County Clerk maintain an independent record of revenue and expenditures that can be reconciled to the County Treasurer's records. Also, the County Commission ensure that budget documents contain complete and accurate information about the county's finances and agree to the County Treasurer's records. In addition, the County Commission and County Clerk should thoroughly review the budget document before it is finalized and filed with the State Auditor's Office.

## **AUDITEE'S RESPONSE**

*The County Commission and County Clerk thought this was being done.*

*We will implement a plan to maintain an independent record of revenue and expenses that can be reconciled to the County Treasurer's record by November 1, 2000. The County Commission and County Clerk said they will ensure the budget documents are complete and accurate effective with the 2001 budget.*

**99-2**

### **County Sales Tax**

The county has not sufficiently reduced its property tax revenues by 50 percent of the sales tax revenues as provided in the ballot issue passed by the Caldwell County voters under the provisions of Section 67.505, RSMo 1994.

Following are the calculations used in determining excess property tax revenues collected for the year ended December 31, 1999:

|  | <u>Year Ended December 31,</u> |               |
|--|--------------------------------|---------------|
|  | <u>1999</u>                    | <u>1998</u>   |
| Actual sales tax revenues  | \$ 187,530                     | 170,773       |
| Required percentage of revenue reduction                                     | X <u>50%</u>                   | <u>50%</u>    |
| Required property tax revenue reduction                                      | <u>93,765</u>                  | <u>85,387</u> |
| Assessed Valuation   | 72,748,236                     | 64,228,697    |
| General Revenue Fund tax levy reduction<br>(per \$100 of assessed valuation) | X <u>0.10</u>                  | <u>0.13</u>   |
| Actual property tax revenue reduction  | <u>72,748</u>                  | <u>83,497</u> |
| Excess property tax revenues collected                                       | 21,017                         | 1,889         |
